MOSCOW (MARCH 11) - The Soviet Union and Chile Sunday renewed diplomatic ties after a 17-year break, Tass news agency reported.

The announcement came as Patricio Aylwin was sworn in as the South American country's new president, replacing General Augusto Pinochet.

Moscow broke off diplomatic relations with Chile in 1973 after General Pinochet seized power after ousting Marxist President Salvador Allende in a coup.

ISLAMABAD (MARCH 11) - Afghan President Najibullah said Sunday that he had declined an offer of immediate help from the Soviet Union to crush Tuesday's coup attempt against his government by sacked defence minister General Shah Nawaz Tanai.

In a speech broadcast by radio Kabul, monitored here, Mr. Najibullah said he did not want to hide the facts from the Afghan nation.

"My colleagues from the Soviet Union asked me by telephone in what way they could help me," he said.

"I thanked them and told them to be ready in case Pakistan or any other enemy attacked. Then I will need your help," he said.

"I also told them that if they sent forces now to help me, others would say the Soviet Union had saved me."

Mr. Najibullah promoted five lieutenant generals to the rank of general for crushing the putsch, radio Kabul said in a separate report monitored here.

The five promoted men were identified as: Mohammad Aslam Watanjar, who replaced Gen. Tanai as defence minister, Vice President Mohammad Rafie, national security minister Ghulam Farooq Yaqubi, army chief Mohammed Asif Delawar and Mohammad Nabi Azami, deputy defence minister and chief of the Kabul army division.

Also Sunday, a government spokesman said Afghan authorities had reopened the country's largest airbase after repairing bomb damage sustained during the coup attempt.

Bagram airbase, 40 miles (65 kilometers) north of here, was blasted by loyalist aircraft to stop rebel-piloted air force planes from using it to bomb the presidential palace.

The base has been largely repaired and is useable again, spokesman Homayun Mokammel said.

The government has yet to announce military casualties in the coup attempt, but has said 95 civilians died and almost 200 were injured.

WARSAW (MARCH 11) - A polish remand prisoner was apparently beaten to death, the interior ministry said Sunday.

The man, who was in custody in Slupsk, died Saturday after an operation, Polish television reported.

The prosecutor has started an investigation into accusations that the prisoner died after being beaten by a police officer.

The local police chief set up a special commission to investigate the incident, the report said.

In Chelmno, 11 remand prisoners escaped from prison Saturday, after overpowering a social worker and the chief prison warden, the polish news agency Pap reported Sunday.

One of the men, who escaped by climbing over the prison walls, has already been rearrested, the report said.

PORT-AU-PRINCE (MARCH 11) - Sporadic shooting could be heard in Port-au-Prince Sunday as stone-throwing demonstrators blocked roads and officials reported at least 18 deaths and more than 100 people injured in the 24 hours since Lieutenant General Prosper Avril resigned as Haiti's president.

Negotiations on naming an interim head of state to oversee elections reached deadlock, political sources said.

Soldiers appeared to be staying in their barracks, leaving the police to maintain order.

Arsonists set fire to a warehouse containing oil and rice and looters emptied food depots, including one stocked by a Christian relief agency.

An auxiliary policeman turned his machinegun on six people trying to ransack his house, killing them all, then fled. Neighbors burned his house down, and two more bodies were discovered in the smoking ruins, it was reported.

Radio stations cited witnesses as saying "men in olive green" shot dead five people on a downtown street overnight and then drove off with the bodies in a van.

Demonstrators ransacked the houses of about a dozen political figures and offices of small political parties.

The Haiti State University Hospital reported receiving more than 100 wounded people and 10 corpses, including those of the six looters killed Saturday night.

Lt. Gen. Avril's resignation Saturday followed five days of widespread unrest which by then had caused at least five deaths, including an 11-year-old girl shot accidentally by soldiers trying to quell a demonstration.

The lieutenant general, who was propelled to power in a sergeants' coup 18 months ago, turned his offices over to Major General Herard Abraham, the army's deputy commander.

BONN (MARCH 11) - France would withdraw its 50,000 troops from West German soil if asked to do so by a unified Germany, French Defence Minister Jean-Pierre Chevenement said in Monday's issue of Der Spiegel magazine.

"The presence of our troops is justified only as the French contribution to German security...it is for the Germans to decide", Mr. Chevenement told the West German weekly.

The troops are based in southwestern West Germany, along with 30,000 civilians and members of the soldiers' families.

Mr. Chevenement also said that a united Germany should also decide whether it wanted the umbrella of France's nuclear arsenal, which is extended to protect West Germany, to cover the rest of Europe.

He stressed that similar guarantees backed by nuclear weapons could also be provided by the United States and Britain.

"Nuclear guarantees should be the subject of an agreement", he said, adding that "the way things stand, one could easily imagine such a system of security also being negotiated with the Soviets".

HAVANA (MARCH 11) EFE - Cuban police have arrested an unknown number of human rights activists, including the secretary general of the Party for Cuban Human Rights (PPDHC), a leading Cuban dissident said.

PPDHC leader Tania Diaz Castro was detained early Saturday in a wave of arrests in which several other members of illegal rights groups have been hauled in, said dissident Gustavo Arcos in a telephone call to EFE.

Arcos, who is secretary general of the Cuban Committee for Human Rights, said the arrests came at the end of a week of constant heckling by supporters of the communist government outside the homes of activists.

Dissidents have said hostility towards them has increased in the wake of the condemnation of Cuba last Monday by the United Nations Human Rights Commission.

Official Communist Party daily Granma said Saturday the groups were "bordering the limits of the law and the tolerance of the people and of the revolution".

#90070u0095 03/11/1990 ~United Press International

SANTIAGO, Chile (MARCH 11) UPI - Vice President Dan Quayle, on a six-nation tour of the hemisphere, praised the return to democracy in Latin America Saturday on the eve of Chile's return to civilian government after 16 years of military rule.

''We have made tremendous gains in democratic values in this last decade '' Quayle said in a statement upon arriving. ''In 1980, 20 percent of the people of Latin America lived under democratic rule. Today, 95 percent of the people of Latin America live under democratic rule.

''Democracy being implemented in Chile has been a good example for the entire world and has been an inspiration for the people of Nicaragua as they too have voted for democracy,'' the vice president said.

Sen. Edward Kennedy, D-Mass., a member of the U.S. delegation, touched on the Pinochet government's record of human rights abuses and paid ''homage to all those who have done so much to restore democracy in Chile.'' He said he would not have missed Sunday's inauguration ''for anything in the world.''

''It is an honor to participate in this delegation, to live in this extraordinary moment and breathe the free air of Chile,'' Kennedy said. ''I want to pay homage to the hundreds and thousands of people who have been tortured, brutalized, but who never lost faith.''

''Perhaps in past administrations there were differences of opinion in the United States with regard to human rights and about the best way to restore democracy in Chile, but today we are united in the United States looking toward the future,'' the senator said.

Chile was Quayle's third stop on a six-nation tour of the hemisphere. The vice president is leading a U.S. delegation that will attend the inauguration Sunday of President-elect Patricio Aylwin. Before the ceremonies, Quayle was to meet with military President Augusto Pinochet.

Pinochet, 74, came to power in a 1973 coup d'etat that ousted elected President Salvador Allende. He will remain as commander of the 60,000-member Chilean army.

Chilean voters, in a 1988 referendum, rejected Pinochet's bid for another eight-year term in power. The military president agreed to hold elections and Aylwin, a 71-year-old veteran politician, won the December balloting.

Pinochet, with a cry of ''Long live Chile!'', bade farewell to the nation in a taped address Saturday night, urging support for the new civilian government and saying he will always be ready to confront the nation's enemies. He then left the presidential palace for the last time as president.

In addition to attending Aylwin's inauguration, Quayle will meet with Britain's Deputy Prime Minister Sir Geoffrey Howe and Latin American leaders, including Costa Rican President Oscar Arias, Uruguayan President Alberto Lacalle and Ecuadoran President Jaime Borja.

Before flying to Santiago, Quayle met for 40 minutes in Bridgetown, Barbados, with Prime Minister Erskine Sandiford and other Caribbean leaders.

The Caribbean leaders - from St. Lucia, St. Vincent and the Grenadines, St. Kitts-Nevis, Dominica and Grenada - sought reassurance that they will not lose out with the United States already committed to giving aid to budding democracies in Latin America and Eastern Europe.

''Let me disabuse anyone that feels the United States is neglecting the Caribbean,'' Quayle told reporters.

St. Vincent Prime Minister James Mitchell said preliminary discussions were held with Quayle and Kennedy on matters such as expanding a training scheme for artisans and the development of infrastructure.

The regional leaders also discussed the Caribbean Basin Initiative, known as CBI2, that is now before the U.S. Senate, Mitchell said.

Kennedy is traveling with Quayle as part of a small delegation that includes Bernard Aronson, the undersecretary of state for inter-American affairs.

During Quayle's stay in Barbados, a small number of demonstrators gathered near the U.S. Embassy in Bridgetown to protest the Dec. 20 U.S. invasion of Panama, but there were no reports of any incidents.

In Venezuela and Barbados Friday, Quayle sought to reassure leaders that the United States would respect the sovereignty of countries in the region. He described the U.S. invasion of Panama as a unique situation that was prompted by special circumstances.

In Venezuela Friday on the first leg of his tour, Quayle he met with President Carlos Andres Perez and Spanish Prime Minister Felipe Gonzalez. He reaffirmed U.S. economic commitment to the Western Hemisphere.

#90070u0165 03/11/1990 ~United Press International

(FEB. 11) UPI - Colorado, with a losing record and a lame-duck coach, stands one victory from the NCAA Tournament.

Meanwhile, the NCAA field expanded by five Saturday with the additions of No. 18 Louisville, Texas-El Paso, Dayton, Boston University and Idaho.

The Buffaloes, who finished last in the Big Eight for the fourth consecutive season, moved into the title game of the conference tournament with an 82-72 victory over Oklahoma State.

''If (former heavyweight champion Mike) Tyson can get beat, anything can

happen,'' Colorado forward Brent Vaughan said.

Colorado's victory, less than 24 hours after Friday's stunning 92-88 upset of No. 5 Missouri, allowed Coach Tom Miller to hang on to his job another day.

''Maybe it took us a while to get things together,'' said Miller, who has been told he would not be retained after the completion of the season. ''Half the battle is knowing what to do, the other half is doing it. The players don't care who does what. They're just going out and doing what has to be done.

''I think we've played some pretty good basketball at times this season but now we're seeing 40 minutes of concentrated, team, focused basketball.''

Shaun Vandiver scored 26 points and Stevie Wise added 22 to lead Colorado, which will have to beat No. 1 Oklahoma to earn the Big Eight's automatic berth in the NCAA Tournament.

Colorado got a basket from Vandiver and a three-pointer from Wise early in the second half to grab a 44-42 lead. Oklahoma State, 16-13, briefly retook the lead with a three-pointer by John Potter but Wise hit from beyond the arc again and the Buffaloes never trailed thereafter.

The Cowboys did tie the score three more times but after Corey Williams scored from the lane, Oklahoma State went scored just two free throws over the next 6:06.

Wise broke the final tie with a fast-break layup and Vaughan knocked down a three-point shot. Vandiver grabbed a loose ball and put it back in for a 60-53 lead with 9:58 to go before Potter had a pair of Oklahoma State free throws.

''We have a lot of respect for Colorado,'' Oklahoma State Coach Leonard Hamilton said. ''We beat them on a last-second shot at Boulder and we had to play hard to win at Stillwater.

''They've had a lot of what I call close victories this season. They've played a lot of teams close and then have a bad four- or five-minute stretch that takes them out of the ballgame and gives them a loss.''

--- AROUND THE COLLEGE SCENE ---

In the other Big Eight semifinal at Kansas City, Mo., Skeeter Henry scored 24 points and Jackie Jones added 23, including six in a decisive second-half run, boosting the Sooners to a 95-77 victory over No. 2 Kansas.

Oklahoma, leading 62-59, scored the game's next 11 points behind a fast break by Smokey McCovery, consecutive baskets by Jones, a 3-point play by Henry and another short shot by Jones that made the score 73-59.

Metro

At Biloxi, Miss., Louisville's Keith Williams held off Southern Mississippi's comeback bid by scoring 10 points in the final 2:24 to lead the 18th-ranked Cardinals to their fourth Metro Conference Tournament title in five years with an 83-80 triumph.

Western Athletic

At El Paso, Texas, Marlon Maxey scored 17 points and Greg Foster 16, lifting Texas-El Paso to a 75-58 victory over Hawaii and sending the Miners to the NCAA Tournament for the seventh straight year. UTEP won the WAC tournament for the fourth time in the past seven years.

Midwestern Collegiate

At Dayton, Ohio, Negele Knight tallied 32 points and 15 assists as Dayton won the conference title with a 98-89 victory over Xavier (Ohio). Knight scored 22 points in the second half to help Dayton make its first NCAA Tournament appearance since 1985.

North Atlantic

At Hartford, Conn., Bill Brigham scored 26 points and Boston University ended Vermont's postseason surprises with a 75-57 victory. The Terriers, in their sixth consecutive conference final, throttled Vermont by holding the Catamounts to just 32 percent shooting in the first half.

Big Sky

At Boise, Idaho, Ricardo Boyd hit a three-point shot with one second to play to give Idaho a 65-62 victory over Eastern Washington. Riley Smith led the Vandals with 22 points and 10 rebounds, while Boyd finished with 18 points.

Big East

At New York, Chris Smith scored 18 points and No. 7 Connecticut, buoyed by a second-half Georgetown scoring drought, earned its first trip to the tournament final with a 65-60 victory over the sixth-ranked Hoyas.

Derrick Coleman pulled down 23 rebounds and became Syracuse's all-time scoring leader with 25 points, lifting the fourth-ranked Orangemen to a 73-61 decision over Villanova.

Atlantic Coast

At Charlotte, N.C., John Crotty scored 16 points and Virginia held on despite missing the front of six one-and-one free throws in the final 1:15 to knock off No. 15 Clemson 69-66.

Brian Oliver scored 31 points and personally outscored Duke 15-12 over the final 7:30, leading No. 13 Georgia Tech past the 11th-ranked Blue Devils 83-72.

The Virginia-Georgia Tech meeting marks the first time in the 37-year history of the tournament that a team from North Carolina isn't in the championship game.

Southeastern

At Orlando, Fla., James Sanders scored 21 points and Melvin Cheatum added 20 to lead defending champion Alabama to a 65-62 triumph over Auburn. The Crimson Tide are seeking their third SEC title in the last four years.

Gerald Glass, apparently headed for the worst game of his college career after twice limping off the court because of injury, scored 8 straight points in the closing 51 seconds to give Mississippi a 65-62 victory over Vanderbilt.

Southwest

At Dallas, Todd Day 22 points and No. 10 Arkansas scored 19 of the game's first 20 points in blasting Baylor 115-75 in the semifinals. The Razorbacks' 115 points were the most ever scored in a SWC tournament game, eclipsing the record of 111 set Houston in 1977.

Carl Herrera and Byron Smith hit free throws in the final minute to lead Houston to an 89-86 victory over Texas Longhorns Coach Tom Penders was ejected with three minutes to play after picking up his third technical foul.

Pacific 10

At Tempe, Ariz., freshman Ed Stokes collected 15 points and 9 rebounds and paired with Matt Othick to fuel a second-half surge that brought No. 16 Arizona an 85-61 rout of Stanford.

Trevor Wilson sank a baseline jumper with 29 seconds remaining as UCLA survived a furious Arizona State comeback to post a 79-78 victory. The Sun Devils, the tournament hosts, had charged back from a 20-point deficit with 12:15 left to take the lead.

Big West

At Long Beach, Calif., freshman Lucious Harris scored 30 points to lead Long Beach State to a stunning 90-85 semifinal upset over New Mexico State. The victory extended the 49ers' winning streak to nine games.

Larry Johnson scored 20 points and Anderson Hunt added 19 to lead No. 3 Nevada-Las Vegas to a 99-72 rout of Pacific in the other semifinal. Stacey Augmon contributed 16 points and 9 rebounds for UNLV. Chris Cox scored a career-high 18 points for Pacific.

Mid-American

At Detroit, Carter Briggs scored 24 and Jeff Majerle added 19 to lift Central Michigan into the title game with a 78-76 victory over Miami (Ohio). Melvin Kelly blocked a layup with 14 seconds left to preserve the Chippewas' victory.

Curtis Kidd spearheaded a Ball State attack that outscored Eastern Michigan 16-2 in the game's final six minutes, leading the Cardinals to a 69-58 semifinal victory.

Southwestern Athletic

At Houston, Joe Faulkner scored 29 points and Robert Youngblood added 28 as Southern blasted Alcorn State 120-94. Southern used second-half runs of 10-4 and 16-3 grab a 106-75 advantage late in the game.

Charles Price scored 24 points and Ray Younger added 21 to power Texas Southern to a 105-75 victory over Mississippi Valley State. Fred West added 18 points and Darrion Applewhite 13 for Texas Southern.

Non-Tournament Games

At Ann Arbor, Mich., Terry Mills scored 24 points, Loy Vaught 23 and Rumeal Robinson 22 to lead No. 14 Michigan to a 127-96 Big Ten rout over Iowa. Vaught had 16 of his points and Robinson 15 of his in the second half as Michigan scored its most points ever in Crisler Arena.

At Columbus, Ohio, Perry Carter scored 24 points and Ohio State held off a second-half rally by co-No. 19 Minnesota for a 93-83 Big Ten victory over the Golden Gophers.

At Rosemont, Ill., David Booth scored 26 points and Chuckie Murphy and Terry Davis aided a second-half resurgence that lifted DePaul to a 64-59 victory over Notre Dame in a match of major independents still vying for NCAA bids.

#90070u0180 03/11/1990 ~United Press International

TRUCKEE, CA (MARCH 11) UPI - Two tour buses and two cars collided on a mountain freeway during a snowstorm Saturday and at least 80 people were injured including a bus driver who had to be pried from his mangled vehicle, officials said.

No fatalities were reported in the chain collision on Interstate 80 at about 4:30 p.m. PST that forced a two-hour shutdown of the major east-west thoroughfare through the Sierra Nevada that links northern California with Reno and northern Nevada.

Most of the injuries were described as minor but an emergency device known as the Jaws of Life had to be used to extricate one driver from the seat of his mangled bus, a fire department medic said.

''Our bus started to hydroplane and started sliding out of control,'' said passenger Brian Larsen, who was treated at a hospital. ''We went to the right and skidded and then back into the traffic lane and the bus following us ran right into us.''

Several passengers suffered fractures including a broken collar bone, a broken wrist and similar injuries, he said. ''There were quite a few injuries,'' he said.

One tour bus was operated by Reno Express and had left Hayward earlier in the day while the other was operated by Ernie's Tours and had left South San Francisco, the California Highway Patrol said.

''There were at least 80 injuries but most of them were minor,'' said Larry Ochoa, a medic and firefighter of the Truckee Fire Protection District, one of the first on the scene about five miles east of Truckee.

''The only bad one was the driver of one of the buses, who had to be removed with the Jaws of Life. The front end of that bus was mangled. Only a couple of others could be classified as borderline critical.''

All the vehicles were eastbound toward the Nevada state line when the collision occurred during a driving snowstorm that had triggered several minor accidents earlier in the day on the four-lane divided freeway 15 miles east of the California-Nevada line and 30 miles west of Reno, officials said.

''It appeared to be a skidding, chain collision,'' Ochoa said.

''The buses and the two cars all remained upright,'' he said. ''They

collided with one another and entered the center divider area, which is wide enough to accomodate one bus sideways,'' he said. ''The two buses ended-up face to face.''

Most of the injured passengers were taken to the Tahoe Forest Hospital in Truckee while others were taken to two hospitals in Reno, Nev., 30 miles east, he said.

#90070u0203 03/11/1990 ~United Press International

WASHINGTON (MARCH 11) UPI - House Ways and Means Committee Chairman Dan Rostenkowski Sunday unveiled a five-year plan he said would eliminate the federal budget deficit through a number of measures, including freezing spending, increasing consumption taxes and taking advantage of the peace dividend.

The program would supercede the Gramm-Rudman budget reduction plan, eliminate the federal deficit by 1994 and produce a $34 million surplus in 1995, the Illinois Democrat wrote in an article published in the commentary section of Sunday's Washington Post.

''For all the Republican rhetoric, federal spending wasn't cut at all in the last 10 years, it was merely rearranged,'' Rostenkowski said. ''Paying interest on our national debt is now the third largest category of spending. ... Let's get this problem off the national agenda so we can get on with building our future.''

The major points of Rostenkowski's plan:

-Earmark the peace dividend for deficit reductions. Rostenkowski proposes ''fundamentally'' restructuring defense spending to reflect the warming of relations with the Soviet Union and other Eastern Bloc countries. A reduction in defense spending of 3 percent each year would save $150 million by 1995, he said.

-Freeze domestic spending. The freeze would include all cost of living adjustments in all domestic programs except for ''means-tested'' programs for the nation's poorest citizens. Estimated savings would be $105 million over five years, Rostenkowski said.

-Increase consumption taxes on oil, pollutants, alcohol and tobacco.

People with ''moderate'' incomes would be allowed to offset the higher taxes through expansion of the earned income credit. The tax hikes would generate $101 million, Rostenkowski said.

-No income tax cuts. Rostenkowski said proposals by the Bush administration to reduce the capital gains tax will not provide new savings incentives as hoped. He said a similar plan did not work for former President Reagan in 1981 and will not work now. Keeping the current tax structure would save $62 million, he said.

-Eliminate the ''income tax bubble.'' Rostenkowski said that while a surtax boosts the income tax rate from 28 percent to 33 percent for the wealthy, the rate drops back down to 28 percent for the very wealthy. Keeping a strict 33 percent rate for all top wage earners would raise $44 billion, he said.

-Freeze tax indexing. A moratorium on inflation adjustments in the tax code would generate $50 billion, he said. The only exception would be the earned income credit for lower-income families.

Rostenkowski challenged the Bush administration to adopt his plan, ''or come up with a better one.''

''But any competitor will have to measure up to what my plan offers: No smoke and mirrors; no 'feel good' promises or slide-by budgeting; no picking out one or two small-potato items that wouldn't make a perceivable dent in the deficit, leaving the hard part to be worked out later by 'budget summit.' Just solid proposals - including some that I, as a Democrat, traditionally opposed - that produce substantial, incontestable savings calling for modest sacrifices for nearly every American.''

#90070u0204 03/11/1990 ~United Press International

BEIRUT, Lebanon (MARCH 11) UPI - Rival Christian forces fought street battles with machine guns and grenades in east Beirut Sunday that left at least four people dead and seven others wounded, security sources said.

The sources said troops loyal to Gen. Michel Aoun and militiamen of Samir Geagea's Lenbanese Forces exchanged rocket-propelled grenades and machinegun fire along the newly established frontlines in the Christian enclave. Most of the casualties were civilians.

It was the second violation of a cease-fire signed by the rivals March 2. In a similiar violation last Friday two militiamen and one soldier were killed.

Large-scale battles for the control of east Beirut that erupted Jan. 31,

between loyalists to Aoun and Geagea have left at least 800 people killed and 2,740 others wounded.

Despite recent conciliatory statements by Aoun and Geagea, a Christian mediation team, backed by the Vatican and France have failed so far to reach an agreement between the rivals.

Aoun told United Press International this week the war was over in the Christian enclave and he was ready to talk to all his rivals, including Syria and the Syrian-backed government of President Elias Hrawi.

Geagea also asserted his willingness to reach a comprehensive agreement that would consolidate the cease-fire in east Beirut. He said the Arab-brokered peace accord endorsed last summer in Taif, Saudi Arabia, was not a ''bible''.

At the origin of the dispute between Aoun and Geagea was Aoun's rejection to the Taif accord and Geaega's recognition of Hrawi who was elected president as a result of this agreement.

#90070u0214 03/11/1990 ~United Press International

MOSCOW (MARCH 11) UPI - Soviet President Mikhail Gorbachev, who has forced his Communist Party to give up its monopoly on power, opened a plenum of the Central Committee Sunday exactly five years after it elected him General Secretary.

''The past five years have changed our country beyond recognition and it will never be again what it was,'' the Communist Party newspaper Pravda said in its report on the plenum.

''Today's Soviet society differs much more from 1985's society than 1985's society differed from that of 30 to 40 years ago.''

Pravda said the 249-member Central Committee is again confronted with ''difficult and important duties'' on determing the party's role in a an emerging multiparty society and Gorbachev's new role in a strengthened presidency.

At its momentous Feb. 7 plenum, the Central Committee agree to give up its contitutionally guaranteed monopoly and called for an executive presidency forGorbachev, giving him the right to declare states of emergency in any part of the country, to veto legislation and dismiss parliament.

But as the plenum gathered in Moscow, Gorbachev was confronted with a secessionist move by the Baltic Republic of Lithuania, whose non-communist parliament was meeting in Vilnius to vote on regaining its pre-World War

II independence.

The plenum, expected to last one day, will determine the date of the 28th Party Congress tentatively set for June, how long elections for some 5,000 delegates to the Congress will take and how they will be elected. It also will discuss a draft of new party rules.

Because the Congress elects a new Central Committee, Gorbachev can be expected to campaign vigorously for a system that will select reform delegates to the Congress to break the resistance of the Central Committee viewed as a major obstacle to real economic and free market reforms.

At the February plenum, the Central Committee approved a plan for a smaller Central Committee of 200 members without alternate or candidate members and a new presidium in place of the ruling Politburo. That presidium would be made up of representatives from each of the current 15 Soviet republics.

The five perestroika years, Pravda said, have given the Soviet citizens glasnost, the right to speak out, a new national parliament, but little improvement in the output and choice of goods. Pravda said the past five years have also brought ethnic strife and unforeseen disasters such as the Chernobyl nuclear disaster and the Armenian earthquake.

''The past quinquennium (five year period) reflects all aspects of our life - both joyous and dramatic,'' it said. ''We have breathed the fresh air of glasnost and democracy, smelled the reek of Chernobyl and Ferghana (rioting and arson in the Central Asian republic of Uzbekistan).''

''We have felt ourselves the free citizens of a free country and have suffered the consequences of a scanty consumer market, inflation and budget deficit. We have felt the bitterness of inter-ethnic strife and social instability. We have traversed a long road,'' Pravda said.

#90070u0228 03/11/1990 ~United Press International

VILNIUS, Lithuania (MARCH 11) UPI - Vytautas Landsbergis, a musicologist who has led Lithuania's drive to independence, was elected president Sunday of the Baltic republic.

The Lithuanian Parliament, which selected Landsbergis, 58, over former Communist Party leader Algirdas Brazauskas, scheduled a vote later Sunday on declaring Lithuania independent from the Soviet Union.

Landsbergis, a musicology professor who founded the Sajudis independence movement in 1988, received 91 votes and Brazauskas received 38.

Although Brazauskas's splitting of the Lithuanian Communist Party away from Moscow in December gained him popularity for defying Moscow, the legislators recognized Landsbergis as the father of Lithuania's rebirth.

A total of 133 lawmakers voted. Landsbergis received 91 votes with 42 voting against him. Brazauskas got 38 votes and four votes apparently were simply no votes against Landsbergis.

With the vote, the goateed Landsbergis will become the first president of a free Lithuania in 50 years since its annexation by the Soviet Union.

The proclamation of independence will be the first splintering of the Soviet Union in 68 years since the nation's founding was proclaimed Dec. 30, 1922.

The Parliament, or Supreme Soviet, the first non-Communist legislature ever in the Soviet Union, peppered Landsbergis with questions on his stance on Soviet troops, the threat of an economic blockade and his competence to be chief executive in view of his professional experience as a professor of music.

By heading the independence drive while remaining a professor at his

institute, Landsbergis in effect made his musicology institute Lithuania's Gdansk shipyard, said an observer from Poland who saw the birth of Solidarity in 1980.

Gearing up for the historic vote to make itself independent and to then talk of secession later, the Lithuanian Parliament issued appeals to the peoples of the world and Soviet leader Mikhail Gorbachev.

It addressed the Soviet chief as President Gorbachev, indicating confidence he will be elected to the super presidency by the Supreme Soviet, or national parliament, in Moscow this week.

In its appeal to the nations of the world, the Parliament said: ''The Supreme Soviet of the Lithuanian Republic proclaims the continuation of the Lithuanian independent republic of 1918 and its return to the family of nations, and hopes for fraternal solidarity and assistance.

''Our decision is not directed against any government or any nationality within Lithuania. It is the path that will guarantee human rights and Lithuanian citizenship.

''May God and all people of good will help us.''

Addressing Gorbachev, it said that Lithuania will no longer ''welcome the stationing of the Soviet forces on Lithuanian territory'' and asked for talks on the issue.

''The amount of Soviet troops in Lithuania cannot be increased without the agreement of Lithuania,'' it declared.

It said Soviet border guards and the army should not carry out maneuvers on Lithuanian territory without Lithuania's consent.

It pledged that Lithuania will guarantee the security of Soviet military officers and their families who live in Lithuania.

''We ask you, esteemed President of the Soviet Union, to issue corresponding instructions to the Soviet government in this respect,'' it said.

The third appeal told the nations of the Soviet Union that ''perestroika in the Soviet Union, or the struggle against the bureaucratic system, meant for Lithuania a battle for independence.''

''The Supreme Soviet of Lithuania appeals to the peoples of the Soviet Union to support our aspiration, and to understand we are guided by good intentions,'' it said.

#90070u0234 03/11/1990 ~United Press International
JERUSALEM (MARCH 11) UPI - The Israeli Inner Cabinet ended a three-hour meeting Sunday without voting on a peace process proposal, edging the coalition government closer to collapse.

The center-left Labor Party has repeatedly threatened to leave the 14-month-old coalition if right-wing Likud ministers did not approve at Sunday's meeting a U.S. proposal for holding talks with a Palestinian delegation. Likud said it would not yield to ultimatums.

''This is the end of the agreement of the national unity government,'' Labor Party chairman Shimon Peres said after the Cabinet session. ''I see the non-decision as a decision.''

Neither Labor or Likud officially announced its withdrawal from the government following the Cabinet meeting. Likud ministers immediately met with party chairman Prime Minister Yitzhak Shamir. Labor Party Central Committee was scheduled to meet Monday to decide whether to remain in the coalition.

The failure of the Cabinet to come to a decision on the Palestinian delegation deepened the government crisis that has prevented any progress in the peace process and raised the specter of early elections and continued political turmoil.

The meeting ended after Shamir refused a request by Peres to bring the proposal by Secretary of State James Baker to a vote. The Labor ministers then decided to leave the meeting, Israel Radio reported.

Under discussion by the 12-member Inner Cabinet was the makeup of a Palestinian delegation to meet with Israeli representatives. Baker proposed including a Palestinian deportee and one or two West Bank Arabs with second addresses or offices in East Jerusalem, which is home to some 140,000 Palestinians.

The Baker proposal is aimed at overcoming fundamental differences between Labor, which supports a role for the East Jerusalem Arabs in the peace process, and Likud, which fears it would lead to negotiations on Israel's sovereignty over the area.

Likud ministers said they would continue with the peace process only if Labor agreed to walk out of the negotiations if it became clear the Palestine Liberation Organization was involved. They also demanded that East Jerusalem Arabs be excluded from all phases of the peace process. Labor rejected the demands, saying they were not part of the Baker proposal.

According to reports in the Israeli media, Defense Minister Yitzhak Rabin had offered a compromise to end the deadlock. Under his plan, Likud would agree in principle to the Baker proposal and the Parliament would debate any differences later.

''We did not have time to discuss the Rabin proposal,'' Likud Transportation Minister Moshe Katzav said. ''The prime minister said there is still a need for more discussion.''

If Labor leaves the government, it can try to form a narrow coalition with left-wing and religious parties. If neither major party can form a narrow coalition, elections will be held.

Leaders of the religious parties indicated they did not want to join a narrow coalition.

''The end of the Cabinet meeting points to bad things, the end of the national unity government,'' said Absorption Minister Yitzhak Peretz, of the ultra-Orthodox Shas party. ''My recommendation is to go to elections, not a narrow coalition.''

Cabinet approval of the Baker plan was needed before the foreign ministers of Egypt and Israel could meet in Washington with Baker. The three-way meeting was intended to discuss the framework of Palestinian-Israeli talks in Cairo on elections in the occupied West Bank and Gaza Strip.

In the elections, Palestinians would select representatives to negotiations on limited self-rule during a transition period before the final status of the territories was decided.

#90070u0356 03/11/1990 ~United Press International

WASHINGTON (MARCH 11) UPI - Transportation Secretary Samuel Skinner predicted Sunday that Americans would be prepared to bear the cost of repairing the nation's overburdened road, rail and aviation systems.

Defending an administration masterplan that would make state and local governments more responsible for transportation funding, Skinner declared that congestion on land and in the air ''will get better,'' but only at a price to be borne by users.

''Thirty-three states have raised their user fee and have put programs into place with federal support to rebuild the nation's infrastructure,'' he said. ''We just have to do more.''

Interviewed on the NBC News program ''Meet the Press,'' Skinner described how the administration would look to cities, states and even private business to build new roads and rail corridor to reduce congestion in urban areas.

In response to complaints from state officials, some of whom see the administration plan as a political vehicle to protect President Bush's pledge of no new taxes, Skinner said the increased financial obligation would be accompanied by greater flexibility to set transportation priorities.

In fact, some key Republicans have embraced calls for an increase in federal fuel taxes, with the revenues earmarked for road and bridge repair and construction. But Skinner offered no hint of give by Bush, even if the tax hike was targeted at those specific transportation objectives and not used simply to help cut the federal budget deficit.

The transportation plan, unveiled Thursday by Bush, urges states and localities to boost gasoline taxes, tolls and other fees to raise some of the billions of dollars needed to expand and modernize the nation's networks of roads, airports and rail systems.

No overall cost estimate was mentioned, though Skinner has said overhaul of the transportation infrastructure could run from $1 trillion to $3 trillion over the next two decades

The fact that 18 states boosted their gasoline taxes last year and a total of 33 have raised transportation user fees of one form or another shows that Americans are willing to pay for greater speed and safety, Skinner asserted.

While the federal government, which is expected to spend $18 billion on transportation projects this year, would retain primary responsibility for ''highways of national significance,'' Skinner said the interstate system might be redefined to turn urban bypasses over to the cities that use them.

Skinner said the administration would like to see cities and states match federal funds dollar for dollar for transportation projects in urban areas but suggested Washington would continue to take a lead role in improving the nation's aviation system with $7 billion worth of projects this year to build more airports and give state-of-the-art technology to air traffic controllers.

''What we've said, basically, is we need to invest in infrastructure, in transportation,'' Skinner said. ''We need to do it now, we can't wait until it's too late.''

#90070u0365 03/11/1990 ~United Press International

LINTHICUM, MD (MARCH 11) UPI - An apparently overheated air conditioner system caused smoke to fill the cabin of a USAir Boeing 737 jetliner, forcing the evacuation of 124 people at Baltimore-Washington International Airport, officials said Sunday.

The entire evacuation - off the plane and into the terminal - took about 28 minutes. No injuries were reported.

BWI spokeswoman Linda Greene said the pilots on USAir Flight 368, bound from Phoenix, Ariz., to Baltimore, notified the control tower Saturday night that a cockpit light indicated landing mechanisms were not properly locked in.

The pilots requested rescue crews be on hand in case of an emergency, and airport officials dispatched local units and called in mutual-aid units and paramedics.

The plane landed about 9:22 p.m., with no problems. Soon after touching down, however, smoke began filling the cabin.

Fearing a dangerous situation, airline employees activated the emergency chutes and 118 passengers and six crew members slid to safety on a taxiway adjacent to the runway.

The airport was not closed during the incident, emergency equipment was not needed, passengers were taken by mobile lounges to the airport terminal and the plane towed for inspection by mechanics, Greene said.

A Federal Aviation Administration spokeswoman said Sunday the agency will investigate, and airline officials said the National Transportation Safety Board was notified of the incident.

USAir spokesman Dave Shipley said the smoke apparently was caused by an overheated air-conditioner unit, and that airline mechanics were inspecting the plane. The airline hoped to have the 737 back in service by late Sunday afternoon, Shipley said.

The spokesman said even though a malfunction light was on before landing, there were, in fact, no problems with the landing gear.

#90070u0381 03/11/1990 ~United Press International

BOSTON (MARCH 11) UPI - A California doctor conducting a study of television and children's diets inadvertently discovered that youngsters are more likely to watch educational programs when their parents are not around.

Dr. Howard Taras says his findings have left him surprised, intrigued and lacking in explanations.

''It really did surprise us. We can only speculate about the reasons until we do another, larger study,'' he said.

Taras and colleagues at the University of California-San Diego found that when the children they studied ages 3 to 8 were left to their own devices, they preferred to tune in programs on public television.

However, when parents watched with the children, they were more likely to watch the commercial networks. The findings appear in the current issue of the American Journal of Diseases of Children.

''At this point, we really cannot say why. One reason may be that the parent would rather watch something other than PBS (Public Broadcasting Service),'' Taras said.

However, he said it is also possible that at the time of day when most of the youngsters were watching on their own, the only children's programming

available was on PBS.

''So it may not be that the child actually prefers PBS to 'Ninja Turtles ''' he said.

Taras said the original thrust of the study of 66 parents and the viewing habits of their children was to determine the effect of advertising and programming on the children's diets and exercise.

But when the researchers looked at the answers on questionnaires filled out by the parents, they found the unexpected PBS viewing pattern, along with responses that supported previous findings about television viewing among younger children.

Pre-school children in the study watched an average 25 hours of television per week - considerably more than the 17 hours seen by those of school age. The older children generally received little parental guidance in choosing programs.

Taras said his findings showed a clear connection between parental attitudes and the programming children watched. When parents used television primarily as an educational tool, rather than entertainment or a ''safe distraction,'' the children were more likely to watch PBS.

''It indicated how parents can subtly, but effectively, influence their children,'' said Taras.

All of the parents, who were predominantly Hispanic, lived in a working-class suburb of San Diego. Taras said he plans to conduct follow-up research, using a much larger group of parents and children with a greater ethnic and socio-economic mix.

In the next study, he said, ''we're going to look at specific times and programs - the things we didn't do this time.''

As far as the answers he originally sought about television and diet, the results were about as expected. ''The children tended to ask for food they saw on TV,'' he said, especially cereals and fast foods with high fat, sugar and salt content.

#90070u0388 03/11/1990 ~United Press International

LOS ANGELES (MARCH 11) UPI - The younger of two sons accused in the shotgun slayings of their millionaire parents in the family's Beverly Hills mansion surrendered to detectives early Sunday when he stepped off a flight from Israel.

Erik Menendez, 19, had been playing in a professional tennis tournament in Israel last week when he learned he was wanted for the Aug. 20 slaying of his parents. He was arrested about 1 a.m. at Los Angeles International Airport, Beverly Hills police Sgt. John Edmundson said.

Erik's brother, Lyle, 22, was arrested Thursday in Beverly Hills and faced arraignment Monday on two counts of murder.

Following Lyle's arrest, Erik had arranged to surrender to Beverly Hills detectives in Los Angeles. Four detectives met him at the airport. ''There was no resistance and he was taken into custody,'' Edmundson said.

Edmundson said Menendez was expected to be booked at county jail.

Jose Menendez, 45, a video and music industry executive, and his wife Kitty, 44, were killed in a barrage of gunfire as they watched television in the first-floor library of their home.

Detectives said the sons early on were the primary focus of the investigation, after theories that the murders were linked to organized crime quickly proved groundless.

With their parents' deaths, Lyle and Erik stood to share in an estate valued at $14 million.

The sons initially told police they found their parents' bodies when they returned home after seeing the movie ''Batman'' and then attending a wine and food festival.

The murders shocked the Hollywood community and cast a cloud over the entertainment industry in which Menendez, a Cuban emigre, was viewed as a hard-driven and successful executive.

Menendez was chief executive of Live Entertainment Inc., which had links to the adult video business before it was acquired by Carolco Pictures Inc., producer of the ''Rambo'' films.

Following their parents death, police said Lyle went on a spending spree and opened a restaurant in Princeton, N.J., where he had grown up.

Erik dropped plans to enroll in UCLA and instead embarked on a professional tennis career.

#90070u0390 03/11/1990 ~United Press International

ATLANTA (MARCH 11) UPI - Former President Jimmy Carter headed to the Middle East Sunday in an attempt to jump start the stalled peace process in

which he played a key role more than 10 years ago.

Carter, his wife Rosalynn and an aide, Kenneth Stein, were scheduled to visit Egypt, Syria, Jordan and Israel during a nine-day tour of the area beginning in Cairo and ending in Jerusalem.

The former president will meet with heads of state, Palestinian leaders and members of the business, religious and academic communities.

''This trip will provide us with a first-hand view of the economic and social issues that now dominate the political agendas of Middle Eastern states, and will enrich our understanding of the sensitive issues associated with Israeli-Palestinian negotiations,'' said Stein, director of the Carter Center's Middle Eastern Studies program.

In Israel, a ''unity government'' run by a coalition of loosely aligned political parties was in danger of disintegrating Sunday as factions argued over a proposal by U.S. Secretary of State James A. Baker III to hold talks between Israelis and Palestinians.

The Israeli Inner Cabinet ended a three-hour meeting without voting on a peace process proposal, edging the coalition government closer to collapse.

The center-left Labor Party vowed to leave the 14-month-old coalition if right-wing Likud ministers did not approve Israeli-Palestinian talks by Sunday.

Meanwhile, Syrian President Hafez Assad is calling for a continuing holy war against Israel. The Syrian threats have forced U.S. officials into a delicate balancing act because the United States, while an Israeli ally, is relying heavily on Syria to convince Iran to release 18 Western hostages held in Lebanon.

In another development, Egypt has joined with other Arab states in condemning the mass immigration of Soviet Jews to Israel, a manpower increase viewed by Israel's enemies as a military threat.

''Not only does this Jewish immigration reinvigorate Israel with manpower, but it also rejuvenates the entire concept of Zionism, or Jewish nationalism - the need and desire to bring Jews worldwide to the Holy Land '' Stein said.

Egypt is one of the few nations to have a good relationship with Israel as a result of President Carter's 1978 Camp David accords, which led to a peace treaty between the nations.

And Jordan, considered a moderate in the Arab-Israeli conflict, reportedly has taken steps toward joining Iraq militarily to form an ''Eastern

front'' against Israel.

Stein also noted the Israelis seem pleased with the fall of communist governments in Eastern Europe because many of those governments were supporters of the Palestine Liberation Organization.

In the past year, Carter has traveled to Panama and Nicaragua to observe elections, later denouncing the Panamanian proceedings as fraudulent and to Africa to meet with heads of state and check on progress of his Third World education and economic programs.

#90070u0394 03/11/1990 ~United Press International

CHARLESTON, W.VA (MARCH 11) UPI - West Virginia teachers, accusing Gov. Gaston Caperton of reneging on an offer, agreed Sunday to extend a strike that has idled thousands of educators and forced public schools to close statewide.

The West Virginia Education Association charged late Saturday that Caperton backed out of a promise to call a special legislative session to address demands for higher pay and improvements in insurance and retirement.

An hour after WVEA President Kayetta Meadows called upon the rank-and-file to stay off the job, Caperton denied ever making any such agreement.

''We made absolutely no commitment to a special session,'' Caperton said.

''I am so deeply disturbed and disappointed by this statement that doesn't tell the truth. It is difficult to communicate with people who don't tell the truth.''

Secretary of State Ken Hechler jumped into the fray Sunday, saying Meadows and Caperton were acting ''like playground name callers'' and should step aside to let other negotiators attempt to resolve the dispute.

''It's high time that two cooler heads step in and take over these negotiations or the whole state will go down the tubes,'' Hechler said.

Late Friday, Caperton urged teachers to return to work Monday morning. In exchange, he offered to recommend that local boards of education pay teachers for time missed as a result of the strike.

But late Saturday, Meadows said ''teachers in an overwhelming majority of counties'' had agreed to a settlement based on three conditions not mentioned by Caperton - the immediate resumption of negotiations, a special session, and a pledge that no punitive action be taken against

strikers.

The WVEA represents about 16,000 of the state's 21,653 teachers, most of whom have been idled since the walkout flared last Wednesday. Teachers became incensed when Caperton first offered late Monday - then rescinded the following day - a 5 percent pay raise.

Meadows said she was forced into asking counties to disregard their earlier votes after Caperton appeared on a television newscast and said no commitment had been made for a special session.

''It appears that we are now at impasse,'' Meadows said. ''The governor has given West Virginia school employees ... no choice but to continue the statewide strike.''

Legislators ended a 60-day regular session Saturday night, but the session was extended three days to finish work on the state budget.

Bob Brown, executive director of the state's federaton of teachers, which represents about 3,000 teachers, said his union's leadership supported Caperton's offer, and he urged educators to return to work Monday.

''The WVFT leadership accepted in principle the proposal of the governor as a fair and honorable way for all parties to resolve this strike situation and to return to the classroom, and recommends its acceptance to the general membership,'' Brown said.

Jackie Goodwin, a spokesman for the WVEA, said that Caperton is ''going to have make (the next move). We're at an impasse. He has to do something and something fast.''

(MARCH 11) UPI - Around the world, around the clock, the latest news from U-P-I...

Haiti's army chief General Herard Abraham met with opposition parties Saturday night to set up a provisional civilian government to take power in 72 hours. Dictator Prosper Avril stepped down today and handed power over to Abraham. Thousands of people in the Creole-speaking island nation rejoiced in the streets upon hearing of Avril's resignation.

Chilean President Augusto Pinochet gave his last speech as leader of the South American nation Saturday. 71-year-old veteran politician Patricio Aylwin will be sworn in as president Sunday. Vice President Quayle, along with a small U-S delegation, will attend the inauguration.

Two tour buses and two cars collided Saturday on a California mountain freeway during a snowstorm, injuring at least 80 people. The accident happened on Interstate 80, the major east-west thoroughfare linking northern California with Reno. The driver of one bus had to be pried from the wreckage with a device known as the Jaws of Life.

In New York, the Directors Guild of America honored Oliver Stone for the second time in four years for his direction of ''Born on the Fourth of July.'' Stone also won in 1987 for another somber Vietnam film- ''Platoon.'' The D-G-A honor places Stone as the best bet to win the Academy Award for best direction.

Authorities in Bartonville, Illinois, say two St. Louis-area men were killed Saturday when their twin-engine plane crashed during a thunderstorm. A National Weather Service official says there were peak winds of nearly 40 miles an hour when the plane went down.

In Washington, nationally known homeless advocate Mitch Snyder has launched another hunger strike. Snyder went on a hunger strike in 1984 to force the Reagan administration to provide funds for the homeless. Snyder and 21 others are protesting a city council plan to severely cut the budget that funds shelters and other services for homeless families.

#90070u0474 03/11/1990 ~United Press International

LONDON (MARCH 11) UPI - The editor of the Observer newspaper and about 50 other journalists made a personal appeal Sunday at the Iraqi Embassy that Iraq lift the death sentence imposed on reporter Farzad Bazoft.

Observer Editor Donald Trelford led his fellow journalists to the embassy in London to deliver letters seeking a reprieve for Bazoft, who was sentenced to death on espionage charges Saturday by an Iraqi military court.

Also, European Community ambassadors went Sunday morning to the Ministry of Foreign Affairs in Baghdad to appeal for clemency, a spokesman for the Foreign Office in London said. The spokesman said afterward they received no immediate response from Iraqi officials.

Trelford said he had a ''spirited discussion'' with a minister at the embassy in London, who in turn said the case had been represented unfairly in media reports.

''We had a rather spirited discussion. He felt that some of the coverage given to this matter has been unfair to Iraq,'' Trelford said in an interview with the British Broadcasting Corp.

''I told him there seems to be an important cultural difference between us because nothing that I've heard Farzad had done is inconsistent with journalism as practiced in this country,'' Trelford said.

''I asked anyway to speak to Farzad to establish what in fact he had done and I was not prepared to take their unsupported evidence of what Farzad had done,'' he said.

Trelford said the minister promised to send his letter immediately to Iraqi President Saddam Hussein.

''All we can do is hope and pray,'' he said.

Bazoft, 31, an Iranian exile working for the Observer newspaper, a London weekly, was arrested last September in Baghdad while investigating reports of an explosion at an Iraqi military plant.

Daphne Parish, 52, a British nurse who allegedly assisted him, was sentenced to 15 years in prison.

Bazoft and Parish went on trial Thursday and both were charged with committing ''hostile acts against Iraq.'' The Baghdad military court took five hours to hear the case Thursday and announced its verdict Saturday.

Trelford's action was the latest in a series of appeals, including one Saturday from British Prime Minister Margaret Thatcher, who expressed shock over the severity of the sentences and appealed to Hussein for clemency.

The Foreign Office has deplored the verdicts as ''harsh and excessive.''

British diplomatic sources have said the Iraqi military court did not produce any evidence to justify the death sentence. The Observer newspaper was not allowed to present evidence at the trial or allowed to send a British lawyer to assist in the defense and no Western news organizations were permitted to cover the trial, Trelford said.

Bazoft appeared on state-run Iraqi television last year and admitted to spying for Israel, but Trelford said the confession was made under duress.

#90070u0488 03/11/1990 ~United Press International

LONDON (MARCH 11) UPI - One out of four Conservative members of Parliament believe Prime Minister Margaret Thatcher should resign before the next general election, newspaper polls published Sunday showed.

The Independent said its poll showed 41 Conservative MPs out of 171

surveyed said the embattled prime minister should resign. The poll showed 113 MPs saying she should not step down before the next general election and 13 said they were undecided.

''Backbenchers are very contemptuous of her at the moment,'' one MP told the newspaper. ''That I have never seen before. Many Conservative MPs are taken aback by the wrongness of the poll tax and her handling of the economy.''

Polls published Sunday in two other British newspapers, The Sunday Times and The Mail, revealed similiar sentiments by Tory MPs about Thatcher, whose popularity among the electorate has reached an all-time low under the combined effects of a widespread revolt against the poll tax, political turmoil and the government's struggling economic policy.

The Sunday Times poll showed that 10 out of 100 MPs surveyed felt Thatcher should step down immediately, while 18 others believed she should go before the next general election, which must be held by June 1992.

Forty-five of 116 MPs said Thatcher should resign before the election, according to The Mail on Sunday survey.

Former Defense Secretary Michael Heseltine was pegged as the favorite to succeed Thatcher, the polls said.

Thatcher's mounting political crisis spread to financial markets last week undermining the performance of the pound sterling and hitting share prices Friday.

Markets were already jolted by a series of often violent revolts against her plans to impose the controversial poll tax - a flat fee that will replace property rates and is levied for local community costs regardless of residents' income - across Britain and Wales. The intensity of the poll tax rebellions fueled rumors that Thatcher would resign, further upsetting markets, analysts said.

Thatcher dismissed the rumors as ''pure poppycock'' during a tour of Scotland Saturday.

''Its all quite ridiculous. Quite, quite ridiculous. I'm fitter than I ever was,'' Thatcher said in a story published in The Independent on Sunday.

Conservative MPs told The Independent on Sunday they were deeply disturbed by another recent opinion poll showing the Tory party 19 points behind the Labor party. Many said they doubted Thatcher would retire on her own and feared a leadership battle could end the party's chances to stay in power.

''Hell will freeze over before she goes,'' one MP said. ''She is not the resigning type.''

Several MPs criticized Thatcher's leadership style, saying she could face a revolt among her party unless she started listening.

''At the moment, it's as if the party does not want to drink one sip of hemlock, but the whole bloody lot,'' one northern MP said. ''The government has got to start listening more.''

#90070u0542 03/11/1990 ~United Press International

NULATO, Alaska (MARCH 11) UPI - A pack of seven front-runners with three-time champion Susan Butcher in the lead neared the Yukon River town of Nulato Sunday, 401 miles from the finish line in the 1,161-mile Iditarod Trail Sled Dog Race.

Butcher, of Manley, Alaska, left the village of Galena 52 miles down the frozen Yukon river from Nulato at 8:45 p.m. Alaska time Saturday. She was followed by Lavon Barve of Wasilla, Alaska, and Dee Dee Jonrowe of Willow, Alaska.

Defending champion Joe Runyan of Nenana, Alaska, and Robin Jacobson of Squaw Lake, Minn., remained overnight in Galena, site of an Air Force base and a community of about 600 people.

Rounding out the field of front-runners are Tim Osmar, of Clam Gulch, Alaska; four-time winner Rick Swenson of Two Rivers, Alaska; and Jerry Austin, of S. Michael, Alaska.

Leaders in the wilderness race from Anchorage to Nome have navigated the foothills and mountain passes of the Alaskan wilderness and are now racing along flat stretches of the frozen Yukon, with clear, sunny skies during the day, and night temperatures down to 20 below zero.

Race Judge Jack Beckstrom said the leaders as well as the rest of the pack are following a strategy of resting their dogs at least six hours every 75 miles. The rest schedule combined with some tough trail conditions early in the race have made this 18th Iditarod about one half day slower than in recent years.

The Iditarod Trail Sled Dog Race began March 3 in Anchorage. The top 20 finishers share a $250,000 purse with the first musher to Nome winning $50,000.

Race officials anticipate the event could end as early as Wednesday.

#90070u0625 03/11/1990 ~United Press International

NEW YORK (MARCH 11) UPI - A boy clinging to life in a Manhattan hospital with burns over half his body got a boost to his spirits Sunday as well-wishers sent messages of encouragement from around the country.

David Aupont, who turned 12 one day after a 13-year-old boy tied him up and torched him in the basement of an abandoned building, was excited about a letter he received from the Guardian Angels offering to walk him to school when he gets out of the hospital.

The Vietnam Veterans of America also sent a message offering to donate skin from its skin bank, said Kathleen McGowan, a spokeswoman for New York University-Cornell Medical Center.

Aupont late last week received birthday greetings from President Bush, former President Ronald Reagan and New York City Mayor David Dinkins.

The boy was on his way to school last Wednesday when a neighborhood bully allegedly dragged him into a basement, tied him up, beat him and poured a flammable liquid over his body for no known motive, police said.

The boy escaped from the basement and ran through the streets with his skin and clothing on fire.

Doctors have given Aupont only a 50 percent chance of surviving his injuries.

The incident has brought an outpouring of support for Aupont and members of his family, who went back and forth from their hospital vigils with armloads of gifts.

McGowan said the boy asked for a television set Saturday so he could watch cartoons. He was taken off a respirator that day, just 24 hours after receiving skin grafts for burns on his arms.

Aupont saw himself on a television news program Saturday night. ''He was a little embarrassed but he was happy to see himself on TV,'' she said.

The boy's face was not burned and only his arms were bandaged, McGowan said.

''He's still critical but stable,'' she said. ''He's doing well for what he's been through. He had a good night's sleep.''

Aupont, who has told family members he wants to become a doctor when he grows up, has been described as a fighter by his doctors and family

members. ''That's very important for his recovery in this kind of case,'' McGowan said.

Because of the risk of infection the hospital has asked police to wait until Monday to question the boy about the attack.

The suspect, whose name was not released because of his age, has been held at the Spofford Juvenile Center in the Bronx and examined by psychologists said a counselor at the center who declined to give her name.

-30- 2695

#90070u0685 03/11/1990 ~United Press International

NEW YORK (MARCH 11) UPI - Cardinal John O'Connor said Sunday he has received an ''outpouring'' of letters from parents from all over the country thanking him for speaking out against devil worship lyrics in rock music.

The cardinal said a sermon he gave last week in which he warned about evil lyrics in rock music - particularly heavy metal songs - had sparked the greatest reaction he had ever received on any subject about which he has spoken.

''I have received more mail in a shorter period of time'' this past week, O'Connor said. ''The reaction has been faster than on anything that I've done or said since I've been here.''

''The outpouring,'' he added, ''has come from parents who expressed great support.''

O'Connor made the comments following his weekly 10:15 a.m. mass at St. Patrick's Cathedral in Manhattan.

In his sermon last week at the advent of the Roman Catholic Lenten season, O'Connor said rock music that includes satanic messages increases and ''instigates violence.''

Too many young people have become entrenched in devil practices, some of whom kill themselves as a result, he told congregants.

O'Connor said Sunday after his weekly sermon that he had tackled the controversy because so many people are concerned with the damage devil-worshiping musical themes can have on young people.

''So many people have talked to me about it, including police officers - about religious cults and satanic cults,'' said O'Connor, who heads the archdiocese of New York.

O'Connor said he ''was surprised at the skeptics'' who came forward this past week, denying the existence of hell and the devil.

On another controversial issue, the cardinal discussed a request by Los Angeles Archbishop Roger Mahony, who has asked for 10 elderly priests and nuns to volunteer to test an AIDS vaccine.

At 70, O'Connor said he himself would consider making the ''sacrifice,'' but only after careful study of the drug and advice from Catholics at all levels of the church.

The inoculation, developed by polio vaccine pioneer Dr. Jonas Salk, who would become its first volunteer, carries the potential for infection.

Mahony was in Rome and could not be reached for comment.

O'Connor, who will also be in Rome for meetings this week, also directed his comments to a negligence suit filed by Julia Skolnick, a white woman who gave birth to a black child and claims she was inseminated with sperm that was not from her now deceased husband. The case came to light Thursday.

''Sperm banks are unnatural,'' O'Connor said, but he added that the life created is no less God's gift. He said conception should come from sexual intercourse in marriage.

Last week, O'Connor mentioned the ''Suicide Solution,'' by heavy metal singer Ozzy Osbourne, as a prime example of possibly abusive lyrics. The cardinal said Sunday he would not accept Osbourne's invitation to discuss the matter.

In 1986, Osbourne was sued by the parents of John McCollum, 19, who killed himself while listening to the song. The case was dismissed, with Osbourne insisting the song only recounted a tale of the death of one person.

#90070u0689 03/11/1990 ~United Press International

(MARCH 11) UPI - Vice President Quayle is in Chile, where he is praising the trend in Latin America toward popular government. Today, Quayle will lead a small U-S delegation at the swearing in of President-elect Patricio Aylwin. Aylwin's inauguration will mark an end of the country's 16-year military rule. According to Quayle, 95 percent of the region is democratically ruled.

Aylwin will receive the reins of power from Chile's military President Augusto Pinochet. Pinochet has ruled the nation since wresting power from socialist President Salvador Allende in 1973. In his farewell speech to

Chileans yesterday, Pinochet urged them to support Aylwin. But he added that he will remain a vigilant watchdog for the nation's sovereignty. Pinochet will remain atop Chile's 60-thousand member armed force.

For the first time in one-decade, viewers will be able to make reservations to attend taping of The Bozo Show beginning March 17th. Officials at the Chicago-based show stopped distributing tickets in 1980 because a massive backlog of bookings extending years and years ahead. W-G-N T-V has broadcast the show for the past 28 years, beaming it to 34 percent of the United States and parts of Latin America.

The fourth annual American Comedy Awards belonged to the movie ''When Harry Met Sally.'' The film's stars, Meg Ryan and Billy Crystal, were honored for best film performances. Also faring well at the Los Angeles ceremnony was Julie Kavner, who was named funniest supporting actress for her role in Woody Allen's segment in ''New York Stories.'' She also got the nod as the funniest T-V series supporting actress for her part in ''The Tracy Ullman Show.''

#90070u0695 03/11/1990 ~United Press International

(MARCH 11) UPI - Security sources in Lebanon say rival Christian forces ignored a fragile truce today, and fought street battles in east Beirut that left at least four people dead and seven others wounded. The bloodshed follows recent comments attributed to militia leader General Michel Aoun that he was willing to lay down his arms and pursue a negotiated peace with Syrian-backed President Elias Hrawi.

At least 80 people were injured following a chain-collision of two tour buses and two cars yesterday near the Nevada-California border. Most of the injuries were minor, although an emergency official at the scene said several people were classified as borderline-critical. The accident occurred during a driving snowstorm and caused a two-hour closure of the roadway through the Sierra Nevada.

Colombia's 14-Million eligible voters will go to the polls today, under the watchful eye of some 230-thousand soldiers and police officers. The law enforcement agents will be on hand to prevent attempts by leftist guerrillas to disrupt elections for senators, congressmen and local seats. The vote features the first-time participation of the recently disbanded April 19th guerrilla organization.

A senior official of Lithuania's secessionist Sajudis nationalist movement tells U-P-I that the Baltic republic's Supreme Soviet will declare its independence from Moscow today. The declaration calls for the country to be known as the Republic of Lithuania. The official says parliament will fill the role of president until lawmakers piece together a suitable

constitution.

#90070u0752 03/11/1990 ~United Press International

ORLANDO, FL (MARCH 11) UPI - The NFL owners opened their annual meetings Sunday by unanimously approving a four-year TV deal worth $3.64 billion.

Each of the 28 clubs will average $32.5 million a year from television revenue, nearly double the $17 million each they were paid in 1989.

Cleveland Browns owner Art Modell, chairman of the television committee, said all 28 owners passed the package with little discussion. He said the meeting consisted of him and Commissioner Paul Tagliabue reporting on the package that included contracts with the three major networks and two cable networks.

He also praised Tagliabue for his work as a rookie commissioner.

''I've never seen anybody come in cold and pick up the nuances, intricacies and details of TV as quickly as Paul Tagliabue,'' Modell said.

The escalating contract pays the league $728 million in 1991, $837.2 million in 1992, $982.8 million in 1993 and $1.092 billion in 1983. That comes to $26 million per team next year, with increases to $29.9 million, $35.1 million and $39 million in 1993.

Still, Tagliabue and Modell claim the extra money will not guarantee clubs a profit. Modell said 16 of the 28 NFL teams lost money in 1989.

''The average operation cost last year per team was $35 million,'' Tagliabue said. ''Hopefully, everyone's going to make some money next year but we do need other revenues.''

Here's the breakdown by network:

CBS - kept NFC Sunday afternoon games, four playoff games and the 1992 Super Bowl. The NFC package is better than the AFC Sunday games because the older conference includes teams from more major markets. CBS' price: $1.06 billion.

NBC - retained its package of Sunday AFC games, four playoff games each season plus the 1993 Super Bowl for $752 million.

ABC - kept Monday night prime time games for $925 million. ABC's pact includes 17 games the first two years and 18 the third and fourth. The NFL added the next Super Bowl and two extra playoff games per year to ABC's package.

ESPN - splits Sunday night cable games with TBS. ESPN's $450 million package includes up to 13 games per season, all in the second half of the season, plus the Pro Bowl every year and some exhibitions.

TBS - lone newcomer paid $450 million for 35 regular-season games and 12 exhibtions over four years. TBS was the first to cut a deal with Tagliabue signing Feb. 22.

The league has yet to award the 1994 Super Bowl. Modell said it will go to one of the networks, but no decision will be made for at least two years.

''A cable network will never carry a Super Bowl for the balance of this century,'' he said.

Tagliabue also said the off-week before the Super Bowl will return in 1992 after getting scrapped next season. After the 1992 Super Bowl in Minneapolis, the league will decide either to keep or kill the off-week permanently.

The owners will vote on the controversial instant replay issue Monday afternoon. Instant replay has passed with little to spare the past four years and needs 21 of 28 votes to pass again. Tagliabue and New Orleans President Jim Finks, head of the Competition Committee, are strong replay supporters.

Missing from the owners' agenda from the meetings, which run through Friday, were the plight of the Raiders. Al Davis faces a Monday deadline to notify officials in Oakland if he wants to move the club back from Los Angeles. If he moves, he is expected to work within league rules - unlike in 1982 when he shifted the team over the owners' objections.

#90070u0828 03/11/1990 ~United Press International

(MARCH 11) UPI - Lithuania's Supreme Soviet is expected to declare the maverick Baltic land's independence from Moscow today. A spokesman for the republic's Sajudis nationalist movement disputed claims by Soviet President Gorbachev that Lithuania would have to pay BILLIONS of dollars in fees for its debt to the Kremlin. The official says the republic has payed tremendous amounts to Moscow in terms of human lives and material goods.

Today is the second day of Washington homeless advocate Mitch Snyder's hunger fast to change a city council decision that calls for a 19-Million-dollar reduction for services for homeless families. Snyder says he'll ''do whatever is necessary'' to reverse the Department of Human Services budget cut. The full council will decide whether to approve the

measure in 10 days.

The Directors Guild of America presented its top film-making honor to Oliver Stone last night for his movie ''Born on the Fourth of July.'' The award presented in Beverly Hills is the second Stone has received from the Guild, and leads many to believe he is the odds-on favorite to nab an Oscar for his work. 39 of the past 42 winners of the Guild honor have also gone on to win Academy Awards.

House Ways and Means Committee Chairman Dan Rostenkowski has unvieled a five-year plan that he says will wipe out the government's federal deficit. The Illinois Democrat's plan relies on a domestic spending freeze use of the so-called peace dividend to offset debt and an increase of consumption taxes. Rostenkowski says the Bush administration should either abide by his ideas or develop a better strategy.

#90070u0830 03/11/1990 ~United Press International

(MARCH 11) UPI - The State Department praised the Haitian military's vow to transfer political power to an interim government by Tuesday. But opponents of military dictator General Avril Prosper say his stepping down as president yesterday does NOT mean he has loosened his grip on the Western Hemisphere's poorest country. Opponents say they fear Prosper will continue to control the nation from behind the scenes.

A Seattle lawyer says he expects Boeing to respond this week to a threatened lawsuit involving disgruntled employees who want the airline manufacturer to pay their relocation costs if they are laid off. Boeing gave two-week notices to 600 workers before the weekend, and a spokesman says the company plans to cut five-thousand jobs by the end of the year.

The tide of political change affecting the Eastern Bloc has spread to Italy. The Italian Communist Party, the West's largest Marxist organization, has O-K'd proposals that will lead to its transformation into a new ''democratic socialist'' movement. The initial measures covering the party's ''principles, rules and guarantees'' were approved yesterday. The party will complete its reorganization at a party congress in around eight months.

The front runners in the 11-hundredmile Iditarod Sled Dog Race are expected to reach the Alaskan race's three-quarter point today. At the head of the seven-person front clump is three-time winner Susan Butcher. Tough trail conditions have slowed this year's pace by one half a day. But that doesN'T bother Butcher, who says she likes ''the slower pace and the longer rests.''

-30- 1773
#90070u1005 03/11/1990 ~United Press International
(MARCH 11) UPI - Soviet President Gorbachev is marking the fifth anniversary of his selection as Communist Party General Secretary by leading a plenum of the Central Committee. Today's meeting was scheduled in February and is expected to last one day. The purpose of the gathering is to set the date of the 28th Party Congress and the method of electing the five-thousand delegates that will attend it.

Israel's coalition government inched closer to collapse after the Israeli Inner Cabinet refused to vote today on a U-S peace proposal. The center-left Labor Party has vowed to withdraw its support from its coalition partner, the Likud Party, if it failed to act on the American plan to hold talks with a Palestinian delegation. A minority party leader says the stalemate could cause early elections.

Rival Christian militias shattered a fragile nine-day old truce today in east Beirut street battles that left at least four people dead and another seven wounded. Security sources in Lebanon say forces loyal to General Michel Aoun exchanged machinegun fire and rocket-propelled grenades with troops aligned with Samir Geagea's Lebanese Forces. Most of the casualties were civilians.

House Ways and Means Committee Chairman Dan Rostenkowski has come up with a way that he thinks will eliminate the federal deficit by 1994. In a commentary today the Illinois Democrat says the U-S debt can be turned into a 34-Million-dollar surplus in five years by freezing domestic spending and applying the so-called peace dividend against the debt. His plan also calls for increased consumption taxes.

-30- 1769
#90070u1013 03/11/1990 ~United Press International
(MARCH 11) UPI - Chile will receive its first elected president in nearly two decades when Patricio Aylwin is sworn in as the nation's chief executive today. Aylwin's inauguration will end more than 16 years of military rule by General Augusto Pinochet . Pinochet has called for public support of his successor. Two years ago, Chilean voters rejected Pinochet's call for a continuation of his military rule.

The head of a Jakarta human rights group says the Indonesian government has delayed the executions of six death row inmates linked to an aborted coup attempt 25 years ago. The UNannounced postponement comes amid international pressure to stop the government from carrying out its death penalty sentence of the prisoners. Some of the inmates have been in jail for more than 20 years.

A published report in Japan says the Soviet Union will ferry the first

Japanese citizen into space in December. Tokyo Broadasting System is paying the Soviets to include an employee in the December launch, which comes seven months before a Japanese astronaut is slated to ride on a U-S shuttle flight.

Cleveland officials are confident of their chances to lure the 1992 Democratic National Convention to the city. The party's site selection committee will visit Cleveland this week as they prepare to make their final choice. Cleveland last hosted a national convention when the Republicans visited in 1936.

-30- 1578
#90070u1125 03/11/1990 ~United Press International
(MARCH 11) UPI - A musicologist who has led Lithuania's drive to independence was elected president of the Baltic republic today. Vytautas Landsbergis was selected by the Lithuanian Parliament over the former Communist Party leader. The parliament is scheduled to vote later today on declaring Lithuania independent from the Soviet Union. The proclamation will be the first splintering of the Soviet Union in 68 years, since the nation's founding.

In Moscow, the Soviet Union today opened a key plenum of the Communist Party Central Committee. The important session comes exactly five years after the party leadership elected Mikhail Gorbachev General Secretary. Since then, Gorbachev has forced the party to give up its monopoly on power. The Communist Party newspaper Pravda says in a report on the plenum- quote- ''The past five years have changed our country beyond recognition and it will never be again what it was.''

Labor Party leaders in Israel say the Inner Cabinet's failure to vote on a peace process proposal today marks ''the end of the agreement of the national unity government.'' The Inner Cabinet ended a three-hour meeting without voting on the U-S proposal for talks with a Palestinian delegation. The Labor Party has threatened to leave the coalition government unless the proposal is approved. The party's central committee is to meet tomorrow to decide whether to stay in the coalition.

-30- 1586
#90070u1133 03/11/1990 ~United Press International
(MARCH 11) UPI - In Washington, the head of the powerful House Ways and Means Committee today unveiled a five-year proposal that he says would wipe out the federal budget deficit. Chairman Dan Rostenkowski says his plan would eliminate the red ink by 1994 through a number of measures, including freezing spending, increasing consumption taxes and taking advantage of the peace dividend. The Illinois Democrat's plan was published in a commentary in a Washington newspaper.

Authorities in Los Angeles say the younger of two sons accused in the shotgun killings of their Millionaire parents surrendered to detectives today. 19-year-old Erik Menendez was arrested when he stepped off a flight from Israel, where he had been playing in a tennis tournament. Erik's older brother, Lyle, was arrested Thursday in Beverly Hills. The two are suspected in the August 20th killings of their parents, Jose and Kitty Menendez. The two sons stood to inherit an estate valued at 14-Million dollars.

#90070u1390 03/11/1990 ~United Press International
(MARCH 12) UPI - No. 7 Connecticut and No. 8 Michigan State both broke long drought sunday in winning their conferences and emerging as top seeds in the NCAA Tournament.

The Huskies, who hadn't made an appearance in the NCAAs since 1979, punctuated their return with a 78-75 victory over No. 4 Syracuse to win the Big East title and earn the No. 1 seeding in the East Region.

Meanwhile, the Spartans won their first undisputed Big Ten title since 1978 with a thrilling 72-70 triumph over No. 9 Purdue. That gave Michigan State the top seed in the Southeast Region.

''It feels great. This was a real emotional high for me,'' Connecticut guard Tate George said after UConn won its first Big East tournament title in the conference's 11-year history. ''It's just so special after four years to finally get to this point. It's all paid off.''

Connecticut, 28-5, won behind a fierce defense that again rallied without injured center Rod Sellers. George led the Huskies with 22 points, Chris Smith added 20 and reserve John Gwynn 16.

Perhaps more important was the play of Toriano Walker, who scored 10 first-half points and provided sound defense against Syracuse star Derrick Coleman.

''I had two plans today to win this game,'' Connecticut Coach Jim Calhoun said. ''Plan A was to go to St. Patrick's (Cathedral) this morning, and Plan B was to make Derrick Coleman have to beat us with his jump shot.''

The Orangemen, 24-6, were led by Stephen Thompson's 21 points. Coleman finished with just 13 points and 10 rebounds.

''When they went to a man-to-man, we went to DC three or four times, but we just couldn't get it to him enough,'' Syracuse Coach Jim Boeheim said.

At East Lansing, Mich., freshman Dwayne Stephens picked up a loose ball and dunked with 20 seconds left, giving Michigan State its 10th straight victory.

Purdue, making its third attempt to get the ball inbounds after Kirk Manns' basket pulled Michigan State within 70-69, lost the ball twice on the inbounds pass.

Ryan Berning threw it in to Tony Jones and the ball was slapped away from him by Ken Redfield. The ball bounced near the top of the key to Purdue's Steve Scheffler, but three players converged on him and one slapped it loose, the ball bouncing off his leg toward the sideline.

Stephens picked up the loose ball near the left side of the top of the lane, made some tentative dribbles and then went up for the dunk - his only basket of the second half.

''He was looking to pass, but finally he looked up and there it was - so he dunked it through,'' Michigan State Coach Jud Heathcote said. ''I told him afterwards he's too young to be a hero.''

The Spartans, 26-5, were led by Steve Smith's 22 points. Tony Jones had 21 points to lead Purdue, 21-7. The Big Ten does not have a postseason tournament.

-- AROUND THE NCAA --

Seven other conferences completed their tournament finals:

ATLANTIC COAST

Georgia Tech 70, Virginia 61

At Charlotte, N.C., Dennis Scott, Brian Oliver and Kenny Anderson - Georgia Tech's ''Lethal Weapon III'' - hit consecutive 3-pointers to blow open a tight game. No. 13 Georgia Tech, 24-6, clinched its first league title since 1985. Bryant Stith's 17 points led Virginia, 19-11.

BIG EIGHT

Oklahoma 92, Colorado 80

At Kansas City, Mo., William Davis and Jackie Jones scored 26 points each as No. 1 Oklahoma, 26-4, deprived Colorado of a Cinderella berth. Shaun Vandiver scored 26 points to lead the Buffaloes, 12-18, which was playing under fired Coach Tom Miller.

BIG WEST

Nevada-Las Vegas 92, Long Beach State 74

At Long Beach, Calif., David Butler scored 19 points and Greg Anthony added 18 to give Nevada-Las Vegas, 29-5, the title and deprive Long Beach State an NCAA berth. Lucious Harris scored 22 points for the 49ers, 22-8, which lost its NCAA bid to fellow Big West member Cal-Santa Barbara.

MID-AMERICAN

Ball State 78, Central Michigan 56

At Detroit, Billy Butts and Curtis Kidd scored 19 points each to carry Ball State. The Cardinals, 24-6, earned an automatic NCAA Tournament bid for the second straight year. David Carter led Central Michigan, 13-17, with 18 points.

PACIFIC-10

Arizona 94, UCLA 78

At Tempe, Ariz., Jud Buechler scored 22 points and No. 16 Arizona, 24-6, turned in another suffocating defensive effort to win its third straight tournament championship and 14th straight Pac-10 game. Trevor Wilson led UCLA, 20-10, with 28 points and 17 rebounds.

SOUTHEASTERN

Alabama 70, Mississippi 51

At Orlando, Fla., Alabama, 24-8, limited Mississippi star Gerald Glass to six points and won the SEC Tournament for the third time in four years. The Crimson Tide's Melvin Cheatum and David Benoit had 15 points each. The Rebels, the surprise of the field, fell to 13-17.

SOUTHWEST

Arkansas 96, Houston 84

At Dallas, No. 10 Arkansas ended Houston's 13-game winning streak to claim its second straight conference tournament crown. Todd Day tossed in 22 points for the Razorbacks, 26-4. The Cougars, 25-7, were paced by Carl Herrera's 19 points.

#90070u1565 03/11/1990 ~United Press International

(MARCH 11) UPI - It's a new era in Chile. Veteran politician Patricio Aylwin took the oath of office today to become the country's first elected president in more than 16 years. The ceremony was in Valparaiso, birthplace of outgoing President Augusto Pinochet, where the Congress is to meet under a new law approved by Pinochet's military government. It ends Pinochet's military rule that began with a bloody coup in 1973.

Lithuania's new president calls it ''a heroic act.'' The new parliament today voted that only its laws are valid in the Baltic republic. It then

restored the republic's old name- simply ''Lithuania''- instead of the Soviet Socialist Republic of Lithuania. The lawmakers later are expected to vote on independence from Moscow. Earlier, the parliament elected Vytautas Landsbergis Lithuania's new president.

Haiti's leader has stepped down, but opposition leaders are NOT resting easy. They expressed fears today that a new military-dominated government is being formed. Military leader Prosper Avril resigned yesterday and turned power over to the army chief of staff, General Herard Abraham. He reportedly told an opposition coalition he does NOT consider himself president and will turn over the government to the Supreme Court on Tuesday. But that has NOT calmed opposition leaders' fears.

Authorities in California say a bus collision on a highway in the Sierra Nevada yesterday injured 86 people, including a bus driver who lost a leg. Police say one bus spun out of control on snow-covered U-S 80 and collided with another bus that was behind it. Two cars plowed into the wreckage but were NOT damaged seriously. Some passengers say the driver of the first bus removed snow chains about 15 miles west of the accident site near Truckee, which is about 15 miles west of the California-Nevada line.

Officials say an apparently overheated air conditioner system caused smoke to fill the cabin of a U-S-Air jetliner that had just landed at the Baltimore-Washington International Airport last night. 124 people were evacuated from the plane, and there were NO injuries. A Federal Aviation Administration spokeswoman says the agency will investigate.

-30- 2362

#90070u1699 03/11/1990 ~United Press International

(MARCH 11) UPI - The new parliament of the Soviet republic of Lithuania is moving rapidly toward possible secession. The parliament rebuffed the former Communist Party leader and selected Vytautas Landsbergis today as president. Landsbergis is the leader of a Lithuanian independence movement.

Chile's General Augusto Pinochet turned the presidential sash over to opposition leader Patricio Aylwin today in a ceremony at the congressional building in Valparaiso. Only hours before the ceremony took place, the Chilean Congress met for the first time since Pinochet seized power in 1973.

Israel's coalition government apparently is on the verge of collapse. The divisions between the Likud and Labor parties on how to approach a U-S-brokered peace proposal were NOT settled at today's meeting of the Inner Cabinet. Labor leader Shimon Peres says... ''The situation has reached an end.''

Transportation Secretary Skinner defended Bush-administration plans to

upgrade the nation's transit system today. The Bush plan would increasingly place the responsibility for transit funding in the hands of state and local governments.

Haitian opposition leaders fear that forces in the military are already maneuvering to take the place of General Prosper Avril, who resigned yesterday. The military chief of staff has promised to turn over political power to the Supreme Court by Tuesday.

-30- 1557

#90070u1812 03/11/1990 ~United Press International

(MARCH 11) UPI - Chile's military dictatorship ends with a peaceful transfer of power... Lithuania moves toward a declaration of independence from Moscow... and Israel's government moves to the brink of collapse. These and other stories, next, from U-P-I.

Democracy has returned to Chile for the first time in more than 16 years.

The Chilean Congress met today for the first time since General Augusto Pinochet seized power in 1973. And the first congressional session was the only congressional session of Pinochet's reign. He turned power over to opposition leader Patricio Aylwin today.

In a formal ceremony in the as-yet-UNcompleted congressional building in Valparaiso, Pinochet handed the presidential sash over to Aylwin, who was elected to the office last December.

Vice President Quayle- on a five-nation trip through Latin America- led the U-S delegation attending the inauguration.

At an early-morning meeting with Pinochet, Quayle was taunted by a crowd shouting, ''Go away.'' The cries reflect the cold relations between the Pinochet government and the United States, which has criticized it for human rights violations.

-30- 1311

#90070u1837 03/11/1990 ~United Press International

(MARCH 11) UPI - The Soviet Socialist republic of Lithuania is moving rapidly in the direction of secession- and for one thing, it does NOT want to be called a ''Soviet Socialist'' republic anymore.

The Lithuanian parliament officially dropped the words ''Soviet'' and ''socialist'' from the name of the republic today at a session that also saw the body select a new president.

The republic's new leader is Vytautas Landsbergis, a music professor who

is also the leader of the Lithuanian independence movement known as Sajudis.

The Lithuanian parliament also voted today that only its laws- and NOT the laws of the Soviet Union- are valid in the republic.

And it's NOT through yet. The parliament is said to be considering a vote for independence.

Lithuania was annexed by the Soviet Union as part of the pact with Nazi Germany in 1940.

The coalition that has governed Israel for 14 months is in danger of collapse... and that may be bad news for negotiations for peace with the Palestinians.

Israel's Inner Cabinet failed to reach a decision today on a U-S peace plan to hold talks with a Palestinian delegation.

Labor Party Chairman Shimon Peres reacted by saying that's the end of the Labor-Likud coalition. Peres says Labor ministers will advise the party Central Committee tomorrow to authorize withdrawing from the government.

But Prime Minister Yitzhak Shamir... head of the right-wing Likud Party... tried to leave the door open to maintain the coalition. Shamir says there are still proposals that can be discussed.

Labor needs a majority in Parliament to pass a NO-confidence vote. But it has only 39 out of 120 seats. The complicated process for withdrawal may yet leave time for compromise.

-30- 1910

#90070u1868 03/11/1990 ~United Press International

(MARCH 11) UPI - Democratic Congressman Dan Rostenkowski of Illinois today called for higher consumer taxes as part of a plan to wipe out the federal deficit in five years.

The plan calls for hiking taxes on oil, pollutants, alcohol and tobacco.

Rostenkowski also called for rejection of all tax cut proposals, a freeze on spending and using the so-called ''peace dividend'' to reduce the deficit.

Rostenkowski is chairman of the powerful House Ways and Means Committee. He outlined his plan in a published editorial.

In an interview, the veteran lawmaker said his program- quote- ''cuts all

the fat out and makes men stand up.''

Rostenkowski said while both Republicans and Democrats play politics with the budget deficit, they must realize a tax increase is necessary.

But he concedes it will be an uphill battle to get his plan through Congress.

The Haitian political opposition- which has seen military dictators come and go- fears the military is once again positioning itself to take power in the poorest nation in the Western Hemisphere.

General Prosper Avril stepped down amid public protests yesterday, and the reigning military chief of staff promises to turn over political power to the Haitian Supreme Court NO later than Tuesday.

But opposition leaders broadcast on radio today that they believe another military government is already being formed.

Avril has NOT yet followed his predecessors into exile, and the opposition fears that he might try to run the country from behind the scenes.

Opposition leaders are asking that the vice president of the Supreme Court be named interim president, pending elections.

-30- 1828

#90070u1884 03/11/1990 ~United Press International

(MARCH 11) UPI - Australia's Prime Minister Robert Hawke is out in front by 11 points in the latest public-opinion poll on the way to elections later this month.

But the lead is NOT a safe one. The poll says that almost a quarter of the voters are UNdecided, less than two weeks before the polls open.

In Australia- where it's the Liberal Party that's conservative- Hawke's Labor Party leads the Liberal-National Party alliance by 33 percent to 22 percent.

Hawke is seeking a fourth term in office after seven years in power, and observers rate his chances as better than even to remain in office. But they're also predicting a close finish in the election, which takes place March 24th.

Former President Jimmy Carter flew to the Middle East today to try to revive a peace process he helped start more than 10 years ago.

Carter, his wife Rosalynn and an aide are scheduled to visit Egypt, Syria,

Jordan and Israel in a nine-day tour. They'll begin in Cairo and end in Jerusalem.

The former president will meet with heads of state, Palestinian leaders and members of business, religious and academic communities.

Carter aide Kenneth Stein says the trip will give a first-hand view of the economic and social issues that shape Israeli-Palestinian negotiations.

The trip comes as the governing coalition in Israel is on the verge of breaking up over how to handle the U-S proposal for talks about Palestinian elections.

#90070u1909 03/11/1990 ~United Press International

(MARCH 11) UPI - The U-S State Department estimates of world-wide cocaine production nearly doubled last year.

A report says State Department analysts estimate maximum world cocaine production was 776 metric tons in 1989, 94 percent higher than the 1988 estimate.

The increase occurred despite the Colombian government's crackdown, the fall of General Manuel Noriega in Panama and the seizure of 200 tons of cocaine worldwide.

A State Department spokeswoman says the whopping increase is partly due to improved estimates, and does NOT mean production itself rose so dramatically.

But the figures help explain why even the largest seizures have failed to bring a hoped-for cocaine shortage.

#90070u2046 03/11/1990 ~United Press International

(MARCH 11) UPI - Lithuania declared its independence from Moscow today in a move that marks the first splintering of the Soviet Union since it was founded nearly 70 years ago. The vote by the Baltic republic's new parliament came shortly after the lawmakers eliminated the words ''Soviet Socialist'' from Lithuania's name.

The parliament also elected the founder of Lithuania's nationalist movement as the republic's new president. One of Vytautas Landsbergis's first official moves was to nominate the Communist Party chief as a parliament deputy chairman. But the party chief- defeated by Landsbergis for the president's post- rejected the goodwill gesture.

Colombians today cast ballots in nation-wide elections for congressmen, local officials and the candidate who will represent the Liberal Party in presidential elections in May. The election also marks the political debut of the former guerrilla group called the April 19th Movement. Analysts expect a 60 percent turnout of eligible voters.

Fighting is again threatening to engulf Beirut. Violence struck the various factions occupying the Lebanese capital today. A car bomb blew up in a market near a Syrian position, leaving 20 people wounded. And Christian factions are reported to be exchanging fire, leaving four people dead.

#90070u2059 03/11/1990 ~United Press International
(MARCH 11) UPI - Britain's poll tax is threatening NOT only the government of Prime Minister Thatcher but also her political career. Support for Thatcher is eroding in her own party. New polls say one out of four Conservatives in Parliament feels she should resign. Thatcher has rejected real-estate taxes in favor of a controversial tax on each British citizen.

British journalists are coming to the aid of a reporter sentenced to death in Iraq. Farzad Bazoft is an Iranian exile who was working in Iraq for London's Observer newspaper when he was charged with espionage. 50 journalists and the editor of the Observer delivered appeals to the Iraqi Embassy in London today.

The leader of the failed coup against Afghanistan's government says his goal was NOT to attain political power. The former defense minister says he launched the revolt in order to hold free elections. In a statement issued by a Pakistan-based guerrilla group, he says he would have transferred power to an elected government.

Three-time mushing champion Susan Butcher is within 400 miles of the finish line in the Iditarod Sled Dog Race. Butcher heads a pack of seven leading dog teams about two-thirds of the way through the Anchorage-to-Nome race. Four-time Iditarod winner Rick Swenson is also among the leaders.

-30- 1468
#90070u2426 03/11/1990 ~United Press International
(MARCH 11) UPI - British newspaper polls show one out of four Conservative members of Parliament believe Prime Minister Thatcher should resign before the next general election. One member of Parliament- or M-P as they are called- told one London newspaper... quote... ''Many

Conservative M-P's are taken aback by the wrongness of the poll tax and her handling of the economy.''

Australia's Labor Party is fighting to hold onto power with an election for prime minister just two weeks away. The Liberal-National alliance needs just 10 more seats out of 148 in the House of Representatives to win power. The main issues are 20-percent interest rates, foreign debt, inflation, the environment and social services. Prime Minister Robert Hawke is favored to stay in place, but almost a quarter of voters polled are undecided.

A boy clinging to life in a New York hospital with burns on more than half of his body is getting encouragement from around the country. 12-year-old David Aupont was tied up and set on fire by a 13-year-old boy Wednesday while on his way to school. Aupont is excited about a letter he received from the Guardian Angels, offering to walk him to school when he gets out of the hospital. The Vietnam Veterans of America has offered skin from its skin bank.

A California doctor conducting a study of television and children's diets discovered a surprising fact during his experiment. Dr. Howard Taras says youngsters are more likely to watch educational programs when their parents are NOT around. Says Taras- ''We can only speculate about the reasons until we do another, larger study.'' The doctor's findings appear in the current issue of American Journal of Diseases of Children.

#90070u2538 03/11/1990 ~United Press International

(MARCH 11) UPI - Lithuania's parliament today unanimously declared the state's independence from the Soviet Union. Hundreds of people outside the parliament building in Vilnius erupted in cheers. Lawmakers hoisted Lithuania's yellow, green and red national flag and chanted, ''Lithuania!'' Newly-elected leader Vytautas Landsbergis declared neighboring Latvia also will be free. The deputies shouted back that Estonia will be free as well.

Opposition political leaders in Haiti today threatened to lead a nationwide strike for democracy until former dictator Prosper Avril leaves the country. Avril resigned yesterday. Army General Herard Abraham has taken over the reigns of power and promises to hand over power to a civilian government by Tuesday. But opposition leaders are variously skeptical and hopeful.

Passengers say the drivers of two tour buses that collided in the Sierra Nevada in California yesterday removed their snow chains just 15 miles up the road from the accident. 86 people were injured in the crash. A spokesman for one of the bus owners says the vehicles had passed the

chain-control area.

#90070u2742 03/11/1990 ~United Press International
(MARCH 11) UPI - A declaration of independence from Lithuania...

A new president for Chile...

And voters go to the polls in Colombia...

These stories... and more... next, from United Press International:

Lithuania's parliament today declared the Baltic republic's independence from the Soviet Union. The proclamation of independence represents the first splintering of the Soviet Union in 68 years since its creation December 30th, 1922... five years after the Bolshevik revolution.

Hundreds of people inside and outside the parliament building in Vilnius cheered the news, waving flags and chanting Lithuania's name.

The parliament also restored the 1938 constitution and put private and public institutions under Lithuanian control.

The White House called for the Soviet government to respect the will of the citizens of Lithuania and negotiate with its leaders.

Soviet President Gorbachev has promised he would NOT use force against Lithuania. But he says the republic should pay Millions of dollars for investments the Soviets have made there.

Washington has never recognized the Soviet annexation of Lithuania, which occurred in 1940 as part of a deal cut by Josef Stalin and Adolf Hitler.

Lithuania's parliament further named a new leader... Vytautas Landsbergis, the founder of the Sajudis nationalist movement and Lithuania's first NON-communist president since coming under Soviet control 50 years ago. He joined lawmakers in calling for freedom for neighboring Latvia and Estonia.

In Tallinn, Estonia, some 500 nationalists formed their own Congress today and demanded Moscow withdraw its troops.

In the Latvian capital of Riga, about 200 citizens rallied against communist rule.

-30- 1899

#90070u2765 03/11/1990 ~United Press International

(MARCH 11) UPI - Hundreds of Chileans gathered today to witness the departure of General Augusto Pinochet as president, and the swearing-in of former opposition leader Patricio Alwyn .

Pinochet agreed to December's presidential elections after a voter referendum showed people wanted an end to his 16 years of military rule. But he will remain in charge of the armed forces.

Some protesters pelted the general with eggs and vegetables as he rode in an open car to the inauguration ceremony... which was held in the city of Valparaiso, Pinochet's birthplace. A bodyguard protected him with an umbrella. Chilean radio says Pincochet shouted back- ''UNgrateful!''

After Alwyn took the oath of office, he traveled to the capital city of Santiago... where he was met by thousands of cheering, flag-waving citizens.

Some celebrants attacked police with sticks, and the officers responded with tear gas and water cannons.

Police say five bombs exploded in Santiago early today. One damaged the home of a former top official of Pinochet's feared secret police, but NO one was hurt.

Voters in Colombia are going to the polls today in a national election that serves in part as a referendum on that nation's war on drugs. They're voting for congressmen, local officials and the Liberal Party presidential candidate.

President Virgilio Barco says the mere act of voting signifies a rejection of violence by both leftists and cocaine cartels.

Voting began in relative peace at some 46-thousand polling stations nationwide. More than 200-thousand troops and police officers guarded voting booths. Many leftist rebels in recent months have attacked small towns and confiscated voting I-D cards to prevent people from voting.

One guerrilla group... the April 19th Movement, or M-19... made its electoral debut. The leftist rebels turned over their weapons Thursday, ending 16 years of guerrilla war.

In another electoral first, Colombians voted for the Liberal Party candidate for the May presidential elections. Other parties stuck to traditional party conventions to pick their candidates.

#90070u2778 03/11/1990 ~United Press International

(MARCH 11) UPI - Transportation Secretary Skinner went out on the Sunday-morning news-show circuit to defend the Bush administration's controversial plan to improve the nation's transit system.

Skinner says U-S transportation ''will get better'' by shifting much of the responsibility for funding to state and local governments.

The plan has come under fire from New York Governor Mario Cuomo and other Democratic officials across the nation as a purely political ploy meant to protect the president in his pledge NOT to raise taxes.

Skinner acknowledged the program would probably mean higher local ''user fees''- if NOT new taxes- but added that 33 states have already raised their user fees. Says Skinner- ''We just have to do more... We need to invest in our infrastructure.''

12-year-old David Aupont... the New York boy burned by a neighborhood bully last week... was reportedly cheered today by an official offer from the Guardian Angels to walk him to school from now on when he gets out of the hospital.

But Aupont is still listed in critical but stable condition, suffering burns on more than half his body. Doctors have given him only a 50-50 chance of survival.

Aupont turned 12 last week... one day after the incident... and has since received birthday and get-well wishes from President Bush, Ronald Reagan and New York Mayor David Dinkins.

The Vietnam Veterans of America has also offered the boy access to its skin-graft bank.

Aupont was on his way to school last Wednesday when the bully allegedly dragged him into the basement of an abandoned building, tied him up, beat him and poured inflammable liquid on him before setting him on fire.

That boy is now held at a juvenile center in the Bronx and is undergoing psychological testing.

-30- 1961
#90070u2782 03/11/1990 ~United Press International
(MARCH 11) UPI - New York's Cardinal John O'Connor says he tapped a nerve by lashing out at alleged devil worship in heavy-metal music.

The cardinal took a stand against devil-worshipping music last Sunday. Since then, he says he has received- in his words- ''more mail in a shorter period of time'' than on any other subject he's ever discussed.

The conservative Catholic cardinal is known for his controversial stands on abortion and AIDS.

O'Connor specifically cited former Black Sabbath lead singer Ozzy Osbourne's song ''Suicide Solution'' in last week's sermon.

Osbourne was sued in 1986 by parents of a teen-age suicide who claimed the song led to their son's death. The case was dismissed, and Osbourne has since argued at every opportunity that the song is NOT meant to encourage suicide.

Osbourne invited Cardinal O'Connor to discuss the issue after last week's sermon, but the cardinal says he has declined.

#90070u2960 03/11/1990 ~United Press International

(MARCH 11) UPI - The chairman of the House Ways and Means Committee today produced a plan to get rid of the national deficit in five years. But Democratic Representative Dan Rostenkowski of Illinois admits it'll be an uphill battle to get congressional approval. The plan would freeze domestic spending, including cost-of-living adjustments for Social Security. It also would eliminate a major tax break for the very wealthy, and raise taxes on some consumer goods.

Greyhound announced today it will expand service to 120 locations that have been without bus transportation since some nine-thousand employees went on strike. Greyhound says it increased its scheduled mileage by 20 percent today, bringing its service to 39 percent of pre-strike levels.

Union leaders for striking employees meet tomorrow in Washington with federal mediators to discuss stalled contract talks.

Philadelphia expects to get its subway system back to full service tomorrow... five days after a derailment killed three people. Workers spent the weekend inspecting some 240 cars for possible mechanical problems. Those inspections were ordered by federal investigators after they discovered a number of loose train engines. Officials believe a motor under the train fell off and caused the derailment.

KANSAS CITY, MO (MARCH 12) BUSINESS WIRE - William J. Gunter has been named senior vice president and controller at United Telecommunications, and M. Jeannine Strandjord senior vice president and treasurer, as part of the merging of United Telecom and US Sprint financial operations into one integrated operating function.

''The combining of operations will help us more fully utilize the company's resources of financial talent,'' said Art Krause, executive vice president and chief financial and information officer. ''We anticipate improved communications and increased teamwork in supporting our local and long-distance divisions as we move into the future.''

Gunter's new duties will include financial reporting, consolidations, management accounting and operations, billing services, toll fraud and financial systems. Strandjord will be responsible for cash management, financing and banking relationships, pension trust administration, investor relations, internal auditing and risk management.

Gunter, who has held the position of vice president and treasurer of United Telecom since 1983, joined the company's audit staff in 1969. He was named internal audit manager at United Telephone of Ohio in 1971 and returned to United Telecom in 1973, where he has held a variety of key financial positions.

Strandjord joined AmeriSource Inc., a United Telecom company, in January 1985 as vice president-finance and distribution after serving in financial positions with Macy's Midwest, Kansas City Power & Light Company and Ernst & Whinney. She was named to her most recent post as vice president and controller at United Telecom in October 1986.

Gunter holds bachelor's and master's degrees from Rockhurst College in Kansas City, while Strandjord has a degree in accounting and business administration from the University of Kansas. Both executives are certified public accountants.

SUNNYVALE, CA (MARCH 12) BUSINESS WIRE - Insignia Solutions, developers of industry-standard SoftPC, which gives Macintosh and other platforms the capability to run MS-DOS programs, has announced an AT module for industry-leading SoftPC 1.3.

It will begin shipping next week.

The new product, called SoftPC AT Module, brings AT compatibility and color support to the Macintosh. Features include complete EGA support, 80287 math co-processor compatibility, and extended memory (LIM). It also brings significant speed improvements to SoftPC Version 1.3. Suggested retail price is $199.

''Until now, a vast range of software has remained inaccessible to the Macintosh user, from the top PC applications to specialty PC programs,'' stated Paul Rosenfeld, director of Macintosh Sales and Marketing, North America.

''With SoftPC and the new AT module users now have access to the best of both worlds.

''We designed the AT module so users can fully utilize up to 8 megs of Macintosh memory (which would give you up to 4 megs of PC memory) for running the most demanding PC applications,'' Rosenfeld added.

The best selling SoftPC, which has been available two years, will run on any Mac II or SE30 and requires a minimum of 2 MB of RAM. The EGA/AT Option Module requires a further 2 MB of memory.

Rosenfeld noted that, ''EGA will give SoftPC the higher resolution and color support Macintosh owners expect. This feature, combined with the math coprocessor, performance improvements and expanded memory means a lot more power to run PC/AT applications.''

SoftPC loads and runs MS-DOS programs straight from a ''virtual'' PC hard disk that it creates as a document on the Mac hard disk. The program opens a window that emulates an 80286-based AT running Microsoft MS-DOS 3.3, which is also included with SoftPC.

SoftPC is available to dealers for resale through Ingram Micro D and Softsel Computer Products, or from Insignia's 17 international distributors.

Insignia's product development is in High Wycombe, England. Marketing, sales and technical support are in Sunnyvale, Calif. and High Wycombe, England.

WOODLAND HILLS, CA (MARCH 12) BUSINESS WIRE - Transamerica Insurance Co. announced that an agreement has been signed for the acquisition of The Completion Bond Co. by Transamerica from its founder and sole owner, Bette Smith.

Terms of the agreement were not disclosed.

CBC is the premier provider of film and television production completion guarantees. A completion guarantee assures film venture financial backers that a film will actually be completed and available for distribution and commercial exploitation.

Transamerica Insurance, the primary property-casualty subsidiary of Transamerica Corp., has been the exclusive insurer of CBC's completion guarantees for nearly a year.

Smith will remain as president and chief executive officer of CBC. The transaction is scheduled to be completed by March 31.

Since its founding in 1981, CBC has guaranteed over 530 productions with aggregate budgets in excess of $1.6 billion.

CBC's first major film guaranteed in 1982 was Barbara Streisand's ''Yentl.''

Among other prestigious films CBC has guaranteed are David Lean's ''A Passage to India'' (CBC is presently working with Lean and Serge Silberman on Lean's next film ''Nostromo''), Spike Lee's ''Do The Right Thing,'' Akira Kurasawa's soon to be released ''Such Dreams I Have Dreamed,'' ''Field of Dreams,'' ''Driving Miss Daisy,'' ''Sex, Lies and Videotape'' and ''The Fabulous Baker Boys.''

In addition CBC provided a guarantee for the major French theatrical release ''The French Revolution,'' and has also guaranteed major

television series and mini-series, including Michael Mann's ''The Drug Wars: Camarena'' and Shelley Duvall's ''Nightmare Classics.'' CBC has offices in London, Paris, Rome and New York.

Isom and Smith have worked together extensively in the past. Prior to joining Transamerica Insurance, Isom developed the original insurance underwriting agreement that enabled Smith's company to commence operation in 1981.

     #90071b0026 03/12/1990 ~Business Wire
FREMONT, CA (MARCH 12) BUSINESS WIRE - A national conference on a new breakthrough technology -- computers that recognize handwriting and use an electronic pen interface instead of a keyboard -- will be held April 19 in Santa Clara, Calif.

Sponsored by GRiD Systems Corp., Fremont, Calif., the Pen Interface and Handwriting Recognition Conference will be the first national gathering ever held for software developers, Value-Added Resellers (VARs), corporate information managers and analysts who want to learn more about computers that use a pen interface instead of a keyboard. The day-long conference will be held at the Doubletree Hotel in Santa Clara.

Pen interface refers to electronic pen-to-screen technology. Pen interface computers incorporate an electronic pen to enable users to enter information by writing, typing or drawing rather than through the conventional keyboard or mouse.

The pen also can be used to select information from a menu, list or database, and to initiate a communications session to transfer or receive data.

''Based on the first six months of customer response to GRiDPAD, pen interface computers will clearly be one of the fast growing segments of the computer market. The pen interface is going to supplant the keyboard, mouse and wand in applications where notebook, laptop or even desktop computers are now used,'' said Alan Lefkof, president of GRiD Systems.

Conference panel discussions will be led by software developers who have pioneered pen interface and handwriting recognition applications. Sessions on the size of the market and the business potential for pen interface software will be conducted by industry consultants, including

Tim Bajarin, Creative Strategies International; William Lempesis, Dataquest Research: Peter Teige, InfoCorp; and E. Gray Glass III, Prudential-Bache.

Commenting on market growth, Glass said, ''We would expect pen interface computers to be used by a majority of Fortune 1000 companies by 1995.''

Conference sessions are also scheduled to examine pen interface software currently available, customer requirements for implementing pen interface within large organizations, and productivity gains made possible by pen interface applications.

The conference also will discuss how software developers, VARs and corporate information managers and analysts can develop MS-DOS pen interface applications for vertical markets to run on the GRiDPAD. The GRiDPAD is a handheld, notebook-size, MS-DOS computer that uses pen interface technology and recognizes printed handwriting. GRiDPAD computers will be available for use by conference attendees for hands-on demonstrations of current pen interface applications.

Commercial applications that will be discussed at the conference will include: route delivery, service dispatch, market research, electronic mail, facsimile capabilities, scheduling and calendar management. Government applications to be discussed will include public safety, intelligence, census taking and customs inspection.

The advanced registration fee for the conference is $65, a $30 savings over the on-site registration fee of $95. To register for the Pen Interface and Handwriting Recognition Conference call Leilani Ribardo at GRiD Systems 415/656-4700, ext. 575.

GRiD manufactures and markets a comprehensive range of battery-powered laptop computers, industry-standard desktop computers, operating systems, software tools, portable peripherals and electronic mail/networking systems.

GRiD, with installed systems in more than one third of Fortune 500 companies, has a worldwide direct sales and support organization. The company also demonstrates products at more than 50 GRiD Systems Centers and sells products through application-specific value added resellers. GRiD is located in Fremont. GRiD also has subsidiaries in the United Kingdom 44-0-372-60266 and in Germany 49-0-211-4998-2971.

GRiD is a wholly owned subsidiary of Tandy Corp., Fort Worth, Texas. Tandy is a leading manufacturer and distributor of consumer electronics and computers. A New York Stock Exchange company, Tandy has sales in

excess of $4 billion annually.

#90071b0028 03/12/1990 ~Business Wire

ANAHEIM, CA (MARCH 12) BUSINESS WIRE - Datam Inc. (NASDAQ: DATM) Monday announced their 1989 sales reached a record level - $36,990,000, a 16 percent increase from the $31,901,000 achieved in 1988.

Earnings for the 1989 year were $1,350,000, or 50 cents per share, as compared to the 1988 year with earnings of $1,079,000, or 40 cents per share, which included an extraordinary tax credit of 4 cents per share.

Louis B. Horwitz, the company's president, indicated: ''This was, indeed, a banner year for the company, with both Datum Timing and Austron Inc. being major contributors. A year of record performance was enjoyed by each of these two operations. This was Austron's first full year as part of Datum.''

He went on to say: ''It is particularly gratifying to report that the company's short and long-term debt, largely the result of the 1988 acquisition of Austron, was reduced by $3,539,000 during the year.''

Horwitz continued: ''The effects of the slowdown in the defense procurement process has already made itself felt. New business was 'soft' in the fourth quarter which will lead to lower results in the first quarter of 1990. However, we believe the slowness resulting from defense procurements to be temporary.''

Datum Inc. designs and manufactures precision frequency products and timing instrumentation for military, industrial, space and commercial applications. Timing manufacturing operations are located in Anaheim.

Frequency products are produced in Beverly, Mass. and Golsta, Calif. Austron maintains its headquarters and manufacturing facilities in Austin, Texas. Datum's corporate offices are located at 1363 South State College Blvd., Anaheim, Calif.

SUNNYVALE, CA (MARCH 12) BUSINESS WIRE - DAVID Systems Inc. and Pirelli FOCOM Ltd. Monday announced the signing of a multimillion dollar distribution agreement allowing the European-based Pirelli FOCOM to offer the DAVID Systems ExpressNet family of products, which provides the 10 Megabit Ethernet connectivity for local area networking over ordinary unshielded twisted-pair wiring.

Products included are the basic 12-port 10BASE-T hub, as well as the 5-slot and 12-slot concentrators, which provide connectivity for 48 ports and 132 ports respectively, and the newly announced VolksNet 10BASE-T LAN for smaller user group network configurations.

''This agreement with Pirelli FOCOM is a significant element of our off-shore distribution plan for ExpressNet,'' said Henry R. Nothhaft, president and chief executive officer of DAVID. ''Both we and Pirelli FOCOM believe the market in Europe for this product is substantial.''

DAVID's 1989 international sales were 17 percent of total LAN product revenues.

''We are pleased to enter into this relationship with DAVID,'' said Ian R. Elliot, managing director, Pirelli FOCOM. ''It is an important addition to our product portfolio.''

Formed to enhance the role of integrated digital communications, DAVID Systems supplied its first Ethernet LAN products in 1985. As a technical leader in its field, DAVID holds six communications patents and is an active participant in the IEEE 802.3 1OBASE-T twisted-pair Ethernet standard and Hub Management committees and is a founder of the 10BASE-T Consortium at the University of New Hampshire.

DAVID Systems products emphasize integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs. The company has headquarters in Sunnyvale.

Pirelli FOCOM Ltd. has headquarters in the Leeds, the United Kingdom.

LOS ANGELES (MARCH 12) BUSINESS WIRE - Texaco and Star Enterprise, a Texaco affiliate, will fuel ''good vibrations'' among music fans by giving

away 150,000 tickets to see The Beach Boys in concert through a nationwide promotion that will ''make waves'' in the history books.

No tickets will be sold for the 10-city Beach Boys tour featuring backup bands America and Three Dog Night. Instead, Texaco and Star Enterprise will give away all tickets for the tour through lucky game cards at participating Texaco stations.

The System 3 Concert Ticket Giveaway will begin at the San Diego Arena on May 1 and at the Arizona State Activity Center in Phoenix on May 2. Contests will begin in each city six weeks before the performance.

Other tour cities include Oklahoma City, at the Myriad on May 10; Dallas, at the Starplex Amphitheater on May 12; San Antonio, at Freeman Coliseum on May 13; Houston, at the Summit on May 14; New York, at Madison Square Garden this fall; Philadelphia, at the Spectrum this fall; Seattle, at the Coliseum on Sept. 5; and Portland, at the Coliseum on Sept. 6.

Interested concert-goers can obtain chances to win tickets at Texaco stations in each city. Participating Texaco retailers will offer game cards with scratch-off boxes that reveal winners. Winning cards will be redeemed for two tickets at area Ticketmaster/Ticketron outlets for seats of their choice from those available when the card is redeemed. The contest is void where prohibited, and no purchase is necessary to participate in the contest.

Since the concert is free to winners, Texaco invites attendees to donate a bag of non-perishable food for each free ticket to the tour's charity, Second Harvest National Food Bank Network.

For more than 25 years, The Beach Boys' California-style rock and roll has kept America perennially in tune with summer's laid-back lifestyle. Best known for the anthems to sunshine, surfing, fast cars and pretty girls, the group has recorded more than 40 albums and in 1988, was inducted into the Rock and Roll Hall of Fame for their contribution to American music.

Texaco announced the promotion at the Star Trek Adventure Studio Monday in the Texaco Star Theater at Universal Studios-Hollywood. In addition to Texaco executives, Beach Boys Mike Love and Bruce Johnston, and Cynthis Baniak of Second Harvest National Food Bank Network attended the event.

As the charity recipient, Second Harvest National Food Bank Network will receive all remaining tickets in each city three days before the concert date. The local food bank then will offer a free ticket per bag of non-perishable food donated. Texaco has guaranteed 200 tickets to food banks in each city.

Second Harvest is America's only charitable national network of food banks

and the nation's largest non-governmental food program. Through its nationwide network of some 200 food banks, food is channeled to nearly 39,000 soup kitchens, church pantries, senior and day care centers and other food programs that serve America's needy.

SAN DIEGO (MARCH 12) BUSINESS WIRE - Security Pacific Financial Services (SPFS), a San Diego-based financial services company, has developed a loan program designed specifically for Southern California's Hispanic residents.

The new program, called ''Money by Mail,'' invites customers to call a toll free number to reach bilingual SPFS staff and begin the application process for unsecured loans from $500 to $1,500 or more.

''About 23 percent of California's residents are Hispanic,'' said Rick Holguin, manager of SPFS' San Diego branch where Money by Mail applications are reviewed.

''The Hispanic market has been under-served by financial institutions. We see that as a tremendous opportunity to meet a real need by offering a program that's designed specifically for the Hispanic market,'' he said. ''Every facet of 'Money by Mail' is bilingual, from advertising to staff. We're making it easier and more comfortable for the customer to obtain a loan.''

''Money by Mail'' is currently being promoted through an intensive eight-week radio, television and print advertising campaign in the Hispanic media, such as Telemundo and Univision networks and La Opinion, the LA-based Spanish language newspaper.

Bilingual information on the program is also available at selected Security Pacific Bank branches throughout Southern California.

With more than $2 billion in assets, Security Pacific Financial Services is one of the largest financial services companies in the United States. SPFS has nearly 300 offices in 42 states, and is a wholly owned subsidiary of Security Pacific Corporation., the nation's fifth largest bank-holding company with $84 billion in assets.

SAN MARCOS, TX (MARCH 12) BUSINESS WIRE - Rohr Industries Inc. has named Phillip R. Fletcher president of its new High Temperature Aerostructures facility currently under construction here.

He will be responsible for manufacturing and overall operations at the 140,000-square-foot advanced metal fabricating and assembly plant. Products will include jet engine nozzle assemblies, in-flight thrust reversers, flaps, fairings, fan exit ducts, doors and panels made from conventional materials as well as superalloys.

Fletcher, 40, has held a variety of manufacturing management jobs at Rohr and most recently was director of quality assurance at its Chula Vista, Calif., headquarters. A seven-year Rohr employee, he also held technical and managerial positions at several aerospace and commercial firms including General Electric, General Dynamics, Mitsubishi and IBM.

''Phil brings strong technical and managerial talents and experience to this critical high-technology element of Rohr's manufacturing network,'' said Dr. Alek Mikolajczak, Rohr's vice president of technology and new business. ''We are relying on his demonstrated leadership and management abilities to build the teamwork and environment to provide HTA's high-quality products.''

A native of Dublin, Texas, Fletcher attended the University of Texas, Arlington, on a work-study scholarship and received his bachelor of science in industrial engineering degree in 1973. He also earned a master's degree in business from the University of Southern California in 1989.

Phil is active in management and technical professional organizations and is a trustee of the San Diego Space and Science Foundation.

HOUSTON (MARCH 12) BUSINESS WIRE - Stewart Information Services Corp.'s board of directors declared a quarterly cash dividend of 10 cents per share, payable April 30, 1990, to common stockholders of record March 30, 1990.

This represents the same amount declared in the fourth quarter of 1989.

Stewart's primary business is title insurance. The company issues

policies on homes and other real property in 50 states, the District of Columbia and Canada through over 2,600 issuing locations. In issuing a policy, the title is first searched, examined and then closed.

Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry. Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

DFW AIRPORT, TX (MARCH 12) BUSINESS WIRE - American Airlines will add 39 flights a day to its domestic route system in April as part of a plan to strengthen its competitive position leading up to the peak summer travel season, the airline announced Monday (March 12).

The increases are centered on American's hubs at Chicago, Dallas/Fort Worth, Raleigh/Durham and Miami, as well as several markets in California.

Key features are the introduction on April 17 of the first commercial air service ever at Stewart Airport at Newburgh, N.Y., the addition of two wide-body nonstop flights between Newark and Los Angeles, and the start of daily non-stop service between American's Miami hub and both Newark and New York's Kennedy Airport.

Those additions for Miami, combined with existing service in the Miami-New York LaGuardia market, mean that American will have service to and from its Miami hub from all three major New York area airports.

''These are steps that will allow us to enhance our schedules in many important domestic markets and give added strength to several of our hubs '' said Donald J. Carty, American's executive vice president. ''The result is a wider array of service and the chance to move into some new markets.''

At its Dallas/Fort Worth hub, American will increase its schedules by 14 flights a day, including the addition on April 9 of a second daily nonstop to and from Calgary in Alberta, Canada. Other Dallas/Fort Worth additions include new non-stop service twice daily in the DFW-Charleston (S.C.) and DFW-Columbia (S.C.) markets, effective April 1; an added non-stop flight, effective April 1, between DFW and each of eight destinations -- Raleigh/Durham, Burbank, Monterrey (Mex.), Greensboro, Richmond, Norfolk,

Bakersfield and Santa Barabara -- and an added non-stop, starting April 9, on the DFW-Los Angeles route. That will boost American's schedule in that market to 11 flights in one direction and 10 flights in the other.

In the Newark-Los Angeles market, American will add a wide-body 767 flight on April 16 and a DC-10 trip on May 24, giving the carrier a total of three non-stops a day on that route.

Carty said that as a result of all these changes, American will be adding a total of nine daily flights to its California services, boosting schedules in eight California markets -- Los Angeles-Newark, Oakland-Chicago, San Diego-Chicago, Los Angeles-Chicago, Santa Barbara-Dallas/Fort Worth, Dallas/Fort Worth-Bakersfield, Burbank-Dallas/Fort Worth and Los Angeles-Dallas/Fort Worth.

SAN FRANCISCO (MARCH 12) BUSINESS WIRE - General Cellular International announced Monday that it will manage, operate and jointly own a cellular telephone system in Baja California, Mexico as part of a joint venture company named Baja Cellular Mexicana, S.A. de C.V.

Partners in the joint venture company include local investors Aurelio Lopez Rocha and Eduardo Vazquez Arroyo, with the participation of Tecelmex a Mexican consulting firm.

The Baja regional license was the first to be announced in a formal ceremony at the office of the Secreteria de Communicaciones y Transportes in Mexico City. In all, eight licenses for cellular operations were issued covering the entire nation of Mexico.

The Baja California region, with an estimated population approaching four million, includes the cities of Mexicali, Tijuana, Ensenada, La Paz, Tecate and the tourist areas of Cabo San Lucas, San Felipe and Santa Rosalia.

San Francisco-based General Cellular International designs, constructs and operates cellular systems worldwide, with resident joint venture partners.

GCI specializes in building cellular systems in smaller cities and towns as well as in rural and remote regions where developing economies can benefit from the construction of advanced cellular telecommunications systems in an efficient and cost-effective manner.

LOS ANGELES (MARCH 12) BUSINESS WIRE - DEP Corp. (NASDAQ:DEPC) Monday reported sales gains for the second quarter and first half of fiscal 1990.

Net sales for the three months ended Jan. 31 were $25,502,000, up 10 percent from sales of $23,134,000 for the comparable period a year ago. First-half net sales were $53,248,000, up 19 percent from $44,557,000 in 1989.

Second-quarter net income was $452,000, or 8 cents per share, compared to $947,000 or 16 cents primary and 15 cents fully diluted per share. For the six months net income was $954,000 or 17 cents per share, compared to $1,953,000 or 33 cents primary and 31 cents fully diluted per share. There was no per-share dilution in the current periods.

Robert Berglass, president and chairman, said that net income was negatively affected by increased sales of products returning narrower profit margins and higher selling and delivery expenditures.

Hair care products were the primary contributors to Dep's sales growth during the first six months of fiscal 1990, according to Berglass. He said that the launching of Dep Everyday Shampoo and Oil-Free condidtioner significantly impacted first quarter results, and that sales of the firm's value-priced L.A. Looks hair care line continued strong throughout the period.

Sales of oral care products rose sharply in the second quarter, Berglass said, resulting in a net increase of nine percent in the first half of this year.

Berglass said that selling and delivery expenses were higher due to the need to effectively compete in a slow retail marketplace. ''We will continue to aggressively support our brands in order to accomplish our primary corporate objective of long-term, fundamental growth,'' said Berglass.

DEP Corp. manufactures, markets and distributes a wide varitey of personal care products which are sold through drug stores, supermarkets and mass merchandisers. Its trademarked hair, oral and skin care product brands include DEP, L.A. Looks, Topol, Lavoris, Cuticura, Nature's Family and Porcelana.

CARROLLTON, TX (MARCH 12) BUSINESS WIRE - Optek Technology Inc. (NASDAQ:OPTX) announced Monday that the net loss for the first quarter of fiscal 1990, ended Jan. 26 was $608,305 on revenues of $11,902,300, compared with net earnings of $293,000 on revenues of $14,012,979 for the first quarter of fiscal 1989.

''First-quarter results were below our expectations announced three months ago. We reported that the widespread slowdown in the electronics industry would likely affect Optek's performance through at least the first quarter of fiscal 1990.

''In addition, high employee absenteeism after the Christmas holidays in our Mexico plants resulted in low production rates for two weeks in January.

''Employment in Mexico has since increased to the required level. Optek's production problems have been corrected and improved performance should result,'' said Jim Crownover, chairman and president. Crownover said that new order bookings during the first quarter increased 30 percent to $13.4 million from $10.3 million for the fourth quarter of fiscal 1989. ''This upturn in bookings and the associated improvement in Optek's book-to-bill ratio are positive signs for the balance of the fiscal year '' he said. Crownover added that Optek's investments in its Mexico production facilities have resulted in dramatic gains in operating efficiency and ''virtually daily increases in throughput.''

He added, ''The company has taken appropriate steps to reduce operating costs and manage assets during the current slowdown while enhancing Optek's industry leadership position in anticipation of improving market conditions in the months ahead.'' Crownover noted that the company's Opcom subsidiary, which manufactures fiber optic local area network (LAN) equipment, has an improved market position since its formation in 1987. ''We are extremely encouraged by the steady increase in product introduction and increased customer inquiries now being received by Opcom '' he concluded.

Founded in 1979, Optek Technology designs, manufactures and markets its optoelectronic components and fiber optic local area network equipment both domestically and internationally. The company markets these products to the aerospace, office equipment, computer, electronics and communications industries.

AGOURA HILLS, CA (MARCH 12) BUSINESS WIRE - Dan E. Pasquini, president of Fortune Petroleum Corp. (NASDAQ:FPEX) Monday announced the selection of Comins, Schenkelberg & Weiner Inc. to be the company's independent certified public accountants for the fiscal year ended Dec. 31, 1989, replacing Arthur Anderson and Co.

Pasquini said that there were no disputes with Arthur Anderson and Co. and looks forward to a strong and growing relationship with Comins, Schenkelberg & Weiner.

Pasquini also said that ''the company is continuing its previously announced rights offering to shareholders of 825,000 units (2,475,000 shares) and the purchase of assets for 500,000 shares. Each unit is priced at $1.95 consisting of three shares of common stock and a redeemable common stock purchase warrant initially exercisable at 90 cents.

''The maximum offering of units would raise approximately $1,608,750 for the company.

''Each shareholder of record on Jan. 15, 1990, will have the right to subscribe to the offering. Any unsold units will be offered to the public '' said Pasquini.

Fortune Petroleum is an independent oil and gas exploration and development company with its principal producing properties located in California.

AMERICAN FORK, UT (MARCH 12) BUSINESS WIRE - TEL electronics inc. (NASDAQ:TELS) Monday reported financial results for the year ended Dec. 31 1989.

TELS reported net sales of $2,514,212 for the year, up almost 18 percent compared to $2,131,204 in 1988. Net income for the year was $120,336, or $.002 per share, compared to $177,519, or $.003 per share, in 1988.

''TELS had another record sales year in 1989, and the company continues to grow, with excellent results on many fronts,'' said TELS President Dr.

John L. Gunter.

''We continue to build our customer base and dealer sales. Growth continues in sales to motel and hotel chains, as well as to distributors. Major account sales are growing, and we hope for even greater growth in '90 -- new and potential major accounts look promising. We hope our new voice processing product, TEL-Voice, will 'really fly' in 1990. Negotiations continue with acquisition targets and OEM prospects, mostly long-range opportunities - but we hope a few will be successfully concluded soon. Efforts with the federal government and the military continue, with many excellent, long-range opportunities.

''TELS is working for today and for many tomorrows to come. Research and development expenses for '89 were up 22 percent and continue to pay off - new products (TEL-Voice, TEL-Executive) and many enhancements in 1989, a new product (INN-FORM Plus) already in '90, plus many activities in preparation for the future. TELS entered another exciting marketplace in 1989 with TEL-Voice, in keeping with our larger vision of the telecommunications management needs of the future, and we are now establishing our name in digital voice, as we have in call accounting.

TEL electronics inc. designs, produces and markets microprocessor-based telecommunications systems, to include telephone call accounting, line scanner, telephone management, voice processing, property management and other systems for use by the lodging industry, general business firms, professional organizations, and government and military agencies.

HOHOLULU (MARCH 12) BUSINESS WIRE - Hawaiian Airlines Monday announced the extension of its popular $199 one-way, value-added fare program for travel between Seattle and Hawaii including a free Hawaiian Airlines ticket to a neighbor island and significant car rental savings.

The extended program is available through June 15.

The value-added program includes a $199 one-way fare without restrictions, except for blackout periods. Ticket reservations must be confirmed and tickets issued prior to departure. Ticket purchasers, through the value-added program, also receive a free Hawaiian Airline ticket to a neighbor island of their choice including Maui, Kauai, the Big Island, Molokai or Lanai.

In addition, Dollar Rent-A-Car will provide a free car for each day they

rent a car at regular prices.

Two blackout periods are in effect during the program: April 13-15 and May 25-28.

Hawaiian Airlines, Hawaii's largest air carrier, became the first airline to sell Hawaii with special fares linking all of the islands in Hawaii when it began its value-added fare series in January to coincide with its purchase by an investor group headed by Peter Ueberroth and J. Thomas Talbot.

Hawaiian Airlines flies to the six islands of Hawaii, Anchorage, Seattle/Tacoma, San Francisco, Las Vegas, Los Angeles, Tahiti, the Cook Islands, American Samoa, Western Samoa, Tonga, Guam, Auckland, New Zealand and Sydney, Australia.

HONOLULU (MARCH 12) BUSINESS WIRE - Hawaiian Airlines Monday announced the extension of its popular value-added fare program starting at $298 roundtrip for travel between Los Angeles and Hawaii and including free Hawaiian Airlines roundtrip tickets to a Neighbor Island and significant car rental savings. The extension is effective from March 16 through June 15, 1990.

The value-added roundtrip air fare for mid-week departures on Tuesdays, Wednesdays, and Thursdays from Los Angeles International Airport will begin at just $298, including tax. Roundtrip flights on either Mondays or Fridays are $338. Fares for weekend travel are $368 roundtrip.

For each roundtrip ticket purchased, visitors will receive a free roundtrip flight to a Neighbor Island of their choice including Maui, Kauai, the Big Island, Molokai, or Lanai. In addition, Dollar Rent-A-Car will provide a free car for each day they rent a car at regular rates.

Roundtrip reservations must be confirmed not later than two days prior to departure. Roundtrip tickets must be issued no later than three days prior to departure, whichever is earlier. Once ticketed, no changes will be permitted, and the tickets cannot be combined with any other fares or car rental discounts. Two blackout periods are in effect during the program: April 13-15 and May 25-28.

Hawaiian Airlines, Hawaii's largest air carrier, became the first airline to sell Hawaii with special fares linking all of the islands in Hawaii

when it began its "value-added" fare series in January 1990 to coincide with its purchase by an investor group headed by Peter Ueberroth and J. Thomas Talbot.

ALISO VIEJO, CA (MARCH 12) BUSINESS WIRE - The board of directors of Armor All Products Corp. Monday announced the election of Kenneth C. Hicken, chairman, to the additional positions of president and chief executive officer.

Hicken succeeds Jeffrey M. Sherman who has resigned. Sherman also resigned as a director.

Hicken, 61, currently is executive vice president-operations of McKesson Corp. of San Francisco, which owns approximately 83 percent of Armor All's outstanding shares.

In addition, the board elected Rex R. Malson, president and chief operating officer of McKesson, to fill the vacancy on the board created by Sherman's resignation.

In reviewing Armor All's current operations, Hicken reported, ''We estimate that earnings per share in the fourth fiscal quarter ending March 31 will be below expectations and down substantially from the 48 cents reported in the prior year. As a result, earnings for the full year will be below previous expectations and the $1.30 reported in fiscal 1989.''

Hicken attributed the decline to continuing softness in sales of the company's products and higher marketing expenses.

Armor All Products is the world's leading supplier of auto- motive appearance chemical products. McKesson is the nation's leading distributor of nondurable consumer goods, principally pharmaceuticals, health and beauty aids and general merchandise and bottled drinking water.

#90071b0172 03/12/1990 ~Business Wire
LONG BEACH, CA (MARCH 12) BUSINESS WIRE - KIT Manufacturing Co. (ASE:KIT) released results of operations for its first quarter ending Jan. 31.

The company reported a net loss of $66,000, or four cents per share, on sales of $13,233,000. This compares to net income of $170,000, or 12 cents per share, on sales of $13,911,000 for the first quarter of the prior fiscal year.

Net sales, companywide, decreased five percent for the first quarter of fiscal year 1990 in comparison to the first quarter of the prior fiscal year. Recreational vehicle sales reflected a moderate decrease of four percent, while manufactured housing sales slipped six percent. Under normal seasonal conditions, and given the general downturn in retail buying, KIT's first quarter generally has the lowest sales volume with the

least favorable results.

According to Dan Pocapalia, KIT's chairman of the board and chief executive officer, ''The decline in sales and earnings was primarily due to the reduced demand of the company's products caused by consumers' concern about the economic outlook during the period. Also, the recreational vehicle division introduced a line of products that compete in a very price-sensitive market that generates lower margins.''

Since the end of the first quarter, sales momentum has been accelerating, especially for the company's recreational vehicle division products. Management is looking forward to a continued improvement in the company's operations for the second quarter and balance of the fiscal year.

DALLAS (MARCH 12) BUSINESS WIRE - Source One Systems, a Houston-based subsidiary of Spectrum Information Technologies, Dallas, has announced an exclusive arrangement to provide thousands of Toshiba's newest

notebook-sized personal computers as well as peripherals and enhancements to Sysco Corp. as part of its Field Sales Automation Project.

Sysco, an $8 billion company, is the world's largest distributor of food service products. According to Dick Johnston, manager, Microcomputer Information Services for Sysco, the company will distribute the Toshiba T1000XE and T1200XE systems to its marketing associates, area and district managers throughout the country over the next several months.

The Toshiba notebooks, introduced at a Toshiba product kickoff Feb. 12, in Sysco's hometown, Houston, will be used by its sales force to keep track of tens of thousands of products, maintain customer profiles, order and stock status and other functions aimed at increasing its customer service levels.

Spectrum Information Technologies, Source One's parent company is a publicly held, integrated technology company. Through its synergistic group of subsidiaries, Spectrum has the demonstrated capability to develop deliver and support a wide array of state of the art computing, telecommunications and portable data products.

Whether equipping field personnel with portable computers, providing host site computers and networks, or tying the two together with untethered, wireless communications technology, Spectrum is an industry leader.

SAN JOSE, CA (MARCH 12) BUSINESS WIRE - Meris Inc. and its two California medical laboratories have been awarded $61 million in one of the largest compensatory damage awards in Northern California.

A superior court jury found that Memorial Health Technologies, a subsidiary of a large Southern California-based hospital conglomerate, breached its contract with Meris and intentionally interfered with Meris' investors, customers and other prospective economic relationships in Southern California.

According to Meris' president, Chris C. Riedel, the judgment marks the end of a four and a half-year battle between Meris, at the time a small start-up, and the large multifaceted Memorial Health Technologies, whose parent organization, Memorial Health Services includes Saddleback Community Hospital, Memorial Medical Center of Long Beach and a number of other subsidiaries.

Headquartered in San Jose, privately owned Meris Inc. and its Bay Area laboratory serves more than 500 physicians.

MILPITAS, CA (MARCH 12) BUSINESS WIRE - Dr. Richard Schaffzin has been named chairman and chief executive officer of IC Sensors effective Monday, according to an announcement by Jim Knutti, company president.

Dr. Knutti said, ''Richard Schaffzin comes to us with a well rounded background and experience in our type of business. We look forward to his joining us to assist in managing our continued dynamic growth.''

His predecessor, Donald G. Lynam, who recently retired from active participation in the company, is an acknowledged pioneer in the sensor industry. A founder of IC Sensors, he has been instrumental in leading the company to its current dominant role in the industry.

Prior to joining ICS, Schaffzin, 45, most recently was operations vice president at EG&G Reticon. Previously, he held various positions at National Semiconductor including manager of strategic planning and hybrid operations manager. He joined National from Fairchild Semiconductor, where he was mainly engaged in engineering design activities.

IC Sensors, currently a privately held company, specializes in the design, manufacture and sale of solid state silicon sensors. Products include silicon pressure sensors, accelerometers, valves and actuators, and custom microstructures.

MONROVIA, CA (MARCH 12) BUSINESS WIRE - STAAR Surgical Co. Monday announced the closing of a $4 million licensing and technical support agreement with Chiron Ophthalmics Inc. of Irvine. (The letter of intent was announced in a news release dated Feb. 26.)

The transaction included a $2 million payment at closing and the balance of $2 million to be paid at different stages of the regulatory process for items included in the licensing and technical support agreement.

Both companies expressed optimism at the new long-term relationship. A spokesman for the company stated that corporate management would now turn its sights to the operations of the company and closing the pending transaction with Cooper Companies, also mentioned in the Feb. 26 news release.

STAAR, a publicly traded company founded in 1982, develops, manufactures and markets products for small-incision surgery, primarily for use in cataract procedures.

ST. LOUIS (MARCH 12) BUSINESS WIRE - In the first session of its scheduled five-day quarterly meeting, the TWA Pilots' Master Executive Council Monday voted to reappoint 747 First Officer Kent T. Scott as the group's master chairman.

Scott, who has been acting master chairman since August 1989, will now serve as the union's top elected official in a two-year term. The MEC, the union's policy-making body, comprises 12 pilots who collectively represent approximately 3600 TWA pilots.

During his term as acting master chairman, Scott spearheaded the pilots' attempts to resist recent efforts by Carl Icahn, TWA's owner, to gain further concessions from them and to systematically liquidate the international airline.

NEWBURY PARK, CA (MARCH 13) BUSINESS WIRE - Semtech Corp. (ASE:SHM) Monday announced unaudited results for the fourth quarter and fiscal year ended Jan. 28, 1990.

Revenues of $4.23 million and net income of $10,000 were reported for the fourth quarter compared with revenues of $4,489,000 and net income of $220,000 reported in fiscal 1989. For the entire fiscal year 1990 the company reported revenues of $18,812,000 and net income of $840,000 compared with revenues of $19.13 million and net income of $1,681,000 in fiscal 1989.

New order rates were below sales for the third consecutive quarter. Fourth-quarter new orders were 18 percent below the order rates of the fourth quarter in the previous year.

Gross profit margins continued to suffer in the fourth quarter. Semtech's fixed costs, including depreciation, have increased substantially since the previous fiscal year. In addition, Semtech curtailed production in the fourth quarter to help conserve cash and manage inventory levels. As a result, profits were negatively impacted by these ongoing fixed costs, including depreciation, during the quarter.

Reductions in prices due to competitive market pressures also negatively impacted gross margins in the current quarter.

Balance sheet ratios improved during the fourth quarter. Cash and temporary investments increased $667,000 form the third quarter while receivables and inventories were reduced by approximately $366,000 and $279,000, respectively. In addition, current liabilities were reduced by almost $270,000 in the fourth quarter. During fiscal-year 1990 long-term

debt was reduced by over $800,000 mainly due to the conversion of debentures to equity.

Semtech President and Chief Executive Officer John D. Poe, reported the company is evaluating options to restructure operations to respond to current business levels. Poe stated: ''Semtech has invested in new capacity over the past four years for front-end silicon-processing, assembly, test and hi-rel processing of rectifiers and microelectronics.

''We have, for the most part, funded these purchases through internal cash flow. However, changes in the military semiconductor marketplace brought about by events in Eastern Europe, as well as Federal budget deficit reduction pressures, may mean that these assets need to be redirected toward non-military product manufacturing, if possible, or perhaps disposed of through sale or divestiture.

''In addition to the normal cyclical nature of semiconductors, military semiconductor manufacturers are facing a period of significant change and uncertainty. We are managing the company to conserve cash while we decide what options are available under current market conditions and what costs may be associated with each option. Within the next quarter or two we plan to have our strategies solidified and actions in progress.''

Semtech was founded in 1960 and is a leading international manufacturer of high-quality silicon rectifiers, high-voltage monolithic capacitors, power hybrids and related devices. Semtech focuses its efforts on producing these precision components for military and commercial customers.

Semtech will hold its annual shareholders' meeting on June 7 at 2 p.m. at the Days Inn in Newbury Park, Calif.

#90071b0297 03/12/1990 ~Business Wire

SAN RAFAEL, CA (MARCH 13) BUSINESS WIRE - Island Graphics Corp. and Sun Microsystems announced Monday that Unisol Corp. of Tokyo will begin shipping Japanized versions of SunWrite, SunPaint and SunDraw software in Japan beginning April 1. Unisol translated the products into Japanese.

SunWrite, SunPaint and SunDraw utilize the easy-to-use OPEN LOOK graphical user interface. Unisol will license the products in Japan through its distribution channels. Unisol is owned jointly by Fuji Xerox and Sun Microsystems.

Island Graphics originally created the office publishing products with Sun

Microsystems, and since their introduction in February 1989, they have become the best-selling UNIX office software on Sun workstations.

''Japanese engineers and office professionals who have needed to do desktop publishing have been forced to choose between limited PC-based word processing and a few very expensive technical publishing programs,'' said Michael Takahisa, director of the marketing and sales department for Unisol. ''We're offering an affordable middle solution -- we've brought Kanji and Kana characters to SunWrite, SunPaint and SunDraw.''

''We believe that the Japanized versions of SunWrite, SunPaint and SunDraw will enjoy the same success that they had in their first year in the English language,'' said Dan Remer, Island's president.

SunWrite is a WYSIWYG word processing and page layout program that provides tools for creating memos, letters, newsletters and reports. SunPaint is a raster graphics editor that lets users edit scanned images and create original paintings. SunDraw is a vector graphics editor that provides tools for creating diagrams and illustrations. SunPaint and SunDraw share a common clipboard with SunWrite, letting users cut and paste Sun rasters and EPS files between programs.

Pricing for the Japanized SunWrite, SunPaint and SunDraw software products will be approximately the same as the English versions. They run on the same hardware as the English versions -- the Sun 3, Sun 4 and the SPARCstation -- and they require Sun's Japanese Language Environment (JLE)to support Japanese characters.

Island Graphics Corp., headquartered in San Rafael, is the leading developer of UNIX productivity and prepress software.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

SANTA ANA, CA (MARCH 12) BUSINESS WIRE - The First American Financial Corp., parent of First American Title Insurance Co., announced net income for 1989 of $13,462,000, or $1.35 per share, a 10 percent increase compared with the prior year.

According to D.P. Kennedy, president, the company benefited from a softening of long-term interest rates during the second half of the year and the resulting increase in business activity.

Revenues for the year ended Dec. 31, 1989, increased to $699,405,000, a 9 percent gain compared with 1988 and a new record level for the seventh consecutive year.

Fourth quarter earnings increased to $7,446,000, or 74 cents per common share, on revenues of $186,908,000, which compares with net income of $3,442,000, or 35 cents per common share, for the same quarter in 1988. Revenues for the fourth quarter 1989 were at a record level for any single quarter in the 100-year history of the company.

First American Title Insurance operates through a network of more than 4,500 branches, subsidiaries, affiliates or agents throughout the United States. The company also provides title services in Guam, Mexico, Puerto Rico, the Virgin Islands and the United Kingdom.

SECAUCUS, NJ (MARCH 12) BUSINESS WIRE - ILIO INC. (NASDAQ/NMS Symbols: ILIO, ILIOW, ILIOU) Monday announced third quarter and nine months net sales and net income for the period ended Jan. 31, 1990.

Net sales for the third quarter ended Jan. 31, 1990 increased 22 percent to $8,355,634 from $6,834,640 reported for the third quarter last year. Net income for the quarter increased 12 percent to $296,132, or 16 cents per share, as compared to $264,707, or 24 cents per share, for the quarter ended Jan. 31, 1989. Per share results for the quarter ended Jan. 31, 1990 were affected by an increase in the weighted average number of shares outstanding due to the company's initial public offering, consummated in November 1989.

For the nine months ended Jan. 31, 1990, net sales increased 57 percent to $23,197,872 from $14,777,495 reported for the same period last year. Net income for the nine months period was $583,704, or 43 cents per share, as compared to $243,155, or 22 cents per share, reported for the nine months ended Jan. 31, 1989. Per share results for the nine months ended Jan. 31, 1990 were affected by an increase in the weighted average number of shares outstanding due to the company's initial public offering, consummated in November 1989.

Commenting on the company's results, Jerry Ross, ILIO's chairman of the board and chief executive officer, said, ''ILIO's success is primarily attributable to the continued market penetration of our established product lines, as well as the significant consumer acceptance of our new product lines: petite sizes, large sizes, rayons and knitwear. We are confident that these divisions will continue to experience substantial growth and anticipate that our position in the moderately-priced apparel market will continue to be enhanced through the introduction of additional products.'' Ross added, ''Preliminary indications for the fourth quarter of fiscal 1990 are very strong and we anticipate significant increases in both revenues and profitability.''

ILIO, INC. designs, markets, sells and distributes women's cotton sportswear and apparel primarily under the ''Ilio'' trademark and through private label arrangements. The company markets its lines of sportswear, which retail for under $30, to moderately priced department stores, specialty stores, specialty chains and mass merchants. ILIO completed its initial public offering in November 1989.

EMERYVILLE, CA (MARCH 12) BUSINESS WIRE - ViewStar Corp., the leader in network-based software solutions for document image processing, announced Monday the opening of a nationwide sales network with eight offices in the United States and Australia.

''Expanding world markets for document image processing demanded that we expand our direct sales network,'' said Kamran Kheirolomoom, president and chief executive officer. ''Our new offices provide regional markets with local expertise, and enable us to maintain closer contact with both customers and prospects.''

With headquarters in Emeryville, Calif., ViewStar markets to the continental United States from its main office and satellite offices in Boston, Burbank, Calif., Dallas, Irvine, Calif., New York and Washington D.C. The company will continue to expand into international markets in 1990. Currently, ViewStar serves the Australian market via an Australian-based distributor.

Viewstar Corp. is the leading provider of network-based software solutions to the document image processing market. The hallmark of the ViewStar product is its ability to run off-the-shelf hardware, including 286 and 286-based PCs and PS/2s.

ViewStar was founded in 1986 and is backed by some of the most respected names in high technology venture funding. ViewStar shipped its first system in March 1987 and currently has over 30 installed systems worldwide.

PHOENIX, AZ (MARCH 12) BUSINESS WIRE - Del Webb Corp. (NYSE:WBB) announced Monday that it has been informed by James J. Cotter, currently a member of the Del Webb board, that he intends to run three candidates, including himself, for director in opposition to management's slate at the upcoming annual meeting of shareholders.

Of the three, only Cotter is a director of the company and his term expires at the May 16, 1990 annual meeting.

Philip J. Dion, chairman of the board and chief executive officer, commented on the development, ''It is unfortunate that Mr. Cotter has decided to launch a costly and disruptive proxy contest at this time. With our pending release from any involvement in the New Jersey gaming industry shareholders of the company are just now beginning to realize the full benefits of the completion of our restructuring program and the decision to focus all of Del Webb's resources on the development of active adult communities.''

Dion continued, ''The board will not be intimidiated by Mr. Cotter's threatened proxy fight. We have turned the corner. In 1989 Del Webb reported net income of $7,597,000, or 62 cents per share on revenues of $189.5 million, a major improvement from our loss of $14,949,000 in 1988.

Dion added, ''Our new development in Sun City Las Vegas was a major contributor to Del Webb's record backlog of 900 homes under contract valued at $120 million. In addition, we are extremely pleased with our recent assemblage of a major property in Palm Springs, California which we plan to develop into our next active adult community.''

Dion concluded, ''Mr. Cotter appears to be self-serving in his effort to elect himself, Ralph Perry and Ronald Simon to the Del Webb board. Both Mr. Perry and Mr. Simon serve as director's of Mr. Cotter's company, Craig Corp. of Los Angeles. We will not permit Mr. Cotter to exploit for his personal gain Del Webb's recently completed restructuring and return to profitability, which was accomplished under the company's management team. Accordingly, I will strongly recommend to the full board later this week that Mr. Cotter not be re-nominated and that we vigorously oppose his proxy contest.''

Del Webb Corp. is the leading developer of active adult communities in the United States.

#90071b0617 03/12/1990 ~Business Wire

SANTA CLARA, CA (MARCH 12) BUSINESS WIRE - National Semiconductor Corp. Monday announced that sales for the third quarter ended Feb. 25 were

$404.3 million compared with $379.3 million from continuing operations for the comparable quarter a year ago.

The company reported a net loss of $10.2 million, or 12 cents per share, versus a net loss of $44.6 million, or 46 cents per share, a year ago.

Sales for the nine months ended Feb. 25 were $1,218.7 million, with a net loss of $29.7 million, or 36 cents per share. Sales for the first nine months of the previous fiscal year were $1,228.8 million, with a net loss of $100.3 million, or $1.04 per share.

Charles E. Sporck, National Semiconductor's president and chief executive officer, said: ''As we indicated at the beginning of this quarter, the third quarter is historically a challenging one for us, incorporating a seasonal slowdown in sales, along with the annual holiday shutdown of our production facilities. In addition, our performance was affected by continued pricing pressure in certain product areas.

''During the quarter, we completed the closure of the Danbury, Conn., facility which was the final step in the cost reduction and restructuring program announced in the fourth quarter of fiscal 1989.

''We saw strong bookings in the latter part of the third quarter, up sequentially over those of the second quarter. We expect to continue the progress we have made in improving our performance and continue on course to meet our commmitment to achieving profitability in the fourth fiscal quarter.''

LYNNWOOD, WA (MARCH 12) BUSINESS WIRE - Carver Corp. (NASDAQ:CAVR), manufacturer of high quality audio components, Monday reported a sales increase of 15.6 percent to $23.7 million in 1989 from sales of $20.5 million in 1988, and a net loss of $1.8 million, or 50 cents per share, compared with a net loss of $643,000, or 18 cents per share, in 1988.

Net sales for the fourth quarter increased 34.1 percent to $7.5 million from $5.6 million in 1988. Fourth quarter net losses were $577,000, or 16 cents per share, compared to $224,000, or 6 cents per share, in 1988.

The balance sheet remains strong. Cash and cash equivalents have decreased as the company purchased inventory of OEM product and raw materials to support the increased sales level.

Carver Corp. designs, develops, manufactures and markets high fidelity audio components for home, mobile and professional use.

MIAMI (MARCH 12) BUSINESS WIRE - In response to a number of inquiries, a spokesperson for General Development Corp. amplified its announcement earlier Friday of severe liquidity problems by explaining that such problems related in large part to the pendency of the ongoing Grand Jury investigation.

The spokesperson noted that the company is meeting with its line banks in an attempt to work out a financing program to improve its financial condition. In addition, the spokesperson noted that the company has undertaken a number of restructuring steps to improve the company's operating cash flow.

These include a recently publicized layoff of approximately 10 percent of General Development's work force, the consolidation of various northern homesite sales offices to reduce costs and increase efficiencies, and the elimination of its northern housing sales operations.

Housing sales are now conducted exclusively in local community markets. General Development hopes to reach agreement with its banks to provide the necessary bridge financing, but there is no assurance that this can be achieved.

COSTA MESA, CA /SAN DIEGO (MARCH 12) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV) and Cipher Data Products Inc. (NASDAQ:CIFR) jointly announced Monday that they have entered into a definitive merger agreement.

Under the agreement, Archive's subsidiary CAC Corp. will promptly amend its pending cash tender offer for all Cipher shares to increase the price from $7.50 to $8.25. It is expected that revised tender offer materials will be mailed to Cipher's stockholders this week.

If the offer is completed, Archive will, subject to certain conditions, be obligated to acquire the remaining equity interest in Cipher through a cash merger at the same price.

Bear, Stearns and Co. Inc. is serving as financial advisor to Archive and as dealer manager for the tender offer. Georgeson and Co. Inc. is acting as information agent. The telephone number of the information agent is 1/800/223-2064.

The amended tender offer will be conditioned upon, among other things, the tender of a number of Cipher shares which, when added to the approximately 4.6 percent CAC currently owns, represents a majority of the fully diluted shares.

Archive has obtained a commitment letter from Barclays Bank p.l.c. and Barclays has indicated that it expects to execute a definitive credit agreement with Archive by the end of this week. The drawdown of the funds will be subject to a number of standard conditions.

Archive and Maynard Electronics, an Archive company, offer a complete selection of tape drives and subsystems for economical computer data backup for fixed-disk drives in workstations, multi-user systems and personal computers.

Cipher is a multi-national corporation that designs and manufactures magnetic tape peripherals and optical disk drives supporting the removable information storage needs of computer systems.

Cipher is the world's leading independent supplier of tape drives, including half-inch cartridge, half-inch reel-to-reel and quarter-inch cartridge 3-1/2 and 5-1/4 inch form factor streaming tape drives.

Its Optimum subsidiary in Mountain View, Calif. is a leading American supplier of write-once optical disk drives.

METHUEN, MA (MARCH 12) BUSINESS WIRE - Parlex Corp. announced Friday that it has named James R. Barnes to the position of executive vice president.

In this capacity, Barnes will report to Herbert W. Pollack, president of Parlex Corp.

Barnes has extensive experience in technical, operational, financial and marketing management in the electronics industry. He most recently was employed by Datapoint Corp. as vice president-technical operations.

Prior thereto, Barnes held operations and executive management positions with Data General Corp. and QYX Division of Exxon Office Systems. He has also served as research and development manager of the Boise division of Hewlett Packard.

Barnes holds a BSME from Stanford University, an MSME and an ENGR degree from the California Institute of Technology, an MBA from the University of Santa Clara and is a graduate of the Advanced Management Program at Harvard University.

Barnes and his wife reside in Sudbury, Mass.

Commenting on the appointment, Herbert W. Pollack, president, stated, ''Jim's background and experience will enable him to play a significant role in the development and execution of the corporate strategies needed for the 90s.''

Parlex Corp. is a leader in the design and manufacture of interconnection and packaging products for semiconductors and electronic components. Its custom product line of flexible printed circuits and flexible-rigid multilayers (Flexilayers) can include the assembly of surface mount components.

Parlex also manufactures custom laminated cable and complex rigid

multilayer circuits. Its facilities are located in Methuen; Salem, N.H.; and Carson City, Nev.

Parlex is unique in the industry for its ability to provide a complete range of service for its entire product line, including CAD design, manufacturing, assembly and computerized testing. These cost-effective, versatile, reliable and innovative products are sold to original equipment manufacturers in the military-aerospace, computer, communications, medical automotive and other industrial electronics industries.

SHREWSBURY, MA (MARCH 12) BUSINESS WIRE - A new company, Hybridon Inc., and the Worcester Foundation for Experimental Biology have announced the licensing of the Foundation's patented genetic targeted or antisense drug technology.

This exclusive proces produces synthetic genetic material that can enter the cells of viruses. In laboratory cultures it has prevented replication of AIDS and influenza viruses in human cells. In the announcement by the Foundation the technology licensed to Hybridon is based on research done by Dr. Paul Zamecnik, John Goodchild, and Sudhir Agrawal.

Hybridon Inc., a for profit business, was formed in February of 1990, by the signing of an exclusive, worldwide patent license agreement by the foundation and Hybridon's lead investors, Medical Science Partners LP, of Brookline, Mass.

In addition, the foundation has granted exclusive licenses to Hybridon for four other pending patents. $2.5 million has been committed to Hybridon by Medical Science Partners and other investors.

According to Dr. Pederson, president of the Worcester Foundation, ''The promise of gene-targeted drug technology is enormous. We are witnessing the birth of a promising new therapeutic field. Yet there are also challenges and hurdles - ones that basic research with modest NIH grants at a non-profit institution cannot meet. Thus, a corporate partnership is born, out of mutual interests and an exciting shared sense of purpose.''

Dr. Paul Zamecnik, who will head the research team said, ''this genetic inhibition approach has a broad potentiality for the treatment of human diseases. It is particularly promising as a basis for a new form of therapy for those viral and protozoan infections in which vaccines are ineffective, due to the cunning of the infectious agent in changingits

surface protein coats frequently.

''Antibodies directed against influenza virus for example, are only marginally effective because they are presented with a viral surface coat different from that of a previous epidemic. The genetic inhibition or 'antisense approach' strikes directly at the instructions of the virus itself for its own reproduction.''

The Worcester Foundation for Experimental Biology was established in 1944. It was in Worcester at the Foundation in 1952 that Drs. Chang and Pincus discovered the first oral contraceptive. Medical Science Partners, of Brookline, was formed in late 1988 as a capital fund to create new companies based on biomedical research, inventions and discovery. The managing partners are Joseph F. Lovett and Andre L. Lamotte, Ph.D.

MENLO PARK, CA (BMARCH 12) BUSINESS WIRE - Network General Monday announced the formation of Network General Europe, S.A.

The newly announced corporation will be located in Brussels, Belgium, and will initially be staffed to provide sales and service support for Network General's European distributors.

Network General also announced the appointment of Tom Orr as vice president of sales for Network General Europe. Orr, who will relocate to Brussels, was previously director of international sales for Network General.

''The European market for our products is extremely large and is growing rapidly. We believe we can best serve our European customers by having a local European presence,'' said Harry Saal, president of Network General. ''The formation of Network General Europe and the assignment of Tom Orr as vice president of sales represents the first step in establishing an independent European operation,'' added Saal.

Founded in 1986, Network General is an industry leader in designing, developing and marketing diagnostic systems for local area networks. The company's Sniffer product was named PC Magazine's ''Editor's Choice'' in 1987 among a selection of competing LAN protocol analyzers, and was awarded the 1987, 1988 and 1989 ''LAN Product of the Year'' in LAN Magazine's diagnostic equipment category.

Most recently, the Sniffer analyzer was given the ''Reader's Choice Award'' by LAN Times. Network General is headquartered at 4200 Bohannon Dr., Menlo Park, Calif., 94025-1097; telephone, 415/688-2700.

SALT LAKE CITY (MARCH 12) BUSINESS WIRE - Evans & Sutherland Computer Corp.,(NASDAQ:ESCC) a leader in high-performance computer graphics systems for over 20 years, Monday announced its entry into the general-purpose 3D graphics workstation market.

The new ESV series of RISC/UNIX based, 20 MIPS systems provide the highest graphics performance available on a completely standards-based platform. Other systems that have attempted standards compliance have seen a substantial loss of graphics speed. The ESV system requires no such compromise, achieving top graphics performance while fully implementing PHIGS and X Windows.

A wide range of graphics performance is available on the ESV series, placing it in the mid to high-end range of high-performance 3D graphics workstations. The ESV workstation series has a price range of $49-$85K and is available for delivery in April, 1990.

In the near future, the company plans to offer options for the ESV workstation that will more than double the graphics performance. Advanced photo-realistic rendering techniques from the CDRS industrial design system and new graphics technology will also be incorporated into the product family.

Evans & Sutherland designs, builds, sells and services interactive computing systems for vehicle training and for general engineering and scientific applications.

COLUMBUS, OH (MARCH 12) BUSINESS WIRE - Drug Emporium Inc., (NASDAQ:DEMP) a national deep-discount drugstore chain, today announced that it has

acquired 100 percent of its Minneapolis-St. Paul franchisee, M. & S. Drug Emporium Inc.

Gary Wilber, Drug Emporium chief executive officer, said the three-store franchisee was purchased in a pooling-of-interests for approximately 230,000 shares of Drug Emporium common stock. Drug Emporium previously owned just over two percent of the outstanding shares.

He pointed out that the acquisition meets the long-established guidelines for buying back franchises. ''First, we like the management and Brian F. Boyle, president of the franchisee, will continue to direct our Minneapolis regional operations. Secondly, we like the market and expect to begin expand ing the territory with new-store development during the current fiscal year.''

Drug Emporium presently owns and operates 80 stores and franchises an additional 112 stores specializing in brand-name health and beauty aids, cosmetics and prescription drugs.

FREMONT, CA (MARCH 12) BUSINESS WIRE - Mylex Corporation (NASDAQ:MYLX) Monday announced unaudited results for its fourth quarter and year ended December 31, 1989.

For the year ended December 31, 1989, net sales increased to $40,104,000, up approximately 43 percent from 1988 net sales of $27,913,000. Net income for 1989 was $1,682,000, or $.16 per share, a decrease of 53 percent compared to 1988 record net income of $3,562,000, or $.34 per share.

Pre-tax income for 1989 totaled $2,786,000, or 38 percent less than pre-tax income in 1988 of $4,517,000. In 1989, Mylex's effective tax rate increased to 40 percent versus only 21 percent in the prior year when the Company utilized net operating loss carryforwards.

Fourth quarter 1989 sales declined to $8,591,000 from $9,470,000 recorded for the fourth quarter of 1988. Net income for the current fourth quarter was $271,000, or $.03 per share, which compares to $836,000, or $.08 per share, reported in the same period of the prior year.

According to Dr. Akram Chowdry, President, ''Although the number of Mylex

386 motherboards and peripheral products sold in 1989 increased significantly, accounting for the sharp rise in revenues, we encountered strong competition in the marketplace. Gross profit margins were effected as it was necessary to lower prices to maintain market share.''

''Throughout 1989,'' Dr. Chowdry added, ''the Company engaged in extensive research and development of two new EISA 486 models and three related peripheral products. R & D expenses increased by nearly 406 percent over the prior year. We believe these investments are necessary to maintain our leadership position and reputation as a developer and manufacturer of high performance and quality products. We expect to begin to see the return on our investment in 1990.''

Additional costs were incurred as a result of the Company's higher level of sales and marketing activity in 1989. Dr. Chowdry noted, ''Our aggressive sales efforts were rewarded beginning in December 1989. Since that time, we have obtained three major new customers, Softsel Computer Products, Inc., one of the largest international computer products distributors; Samsung Electronics Co., Ltd., of Korea; and GreatWest Technology, Ltd., a major supplier of computer equipment to ComputerLand.''

Looking ahead, Dr. Chowdry said, ''These new contracts, which are expected to begin contributing to revenues in the first quarter of fiscal 1990, have also enhanced our reputation as an innovative designer and manufacturer of quality computer products. We intend to continue to pursue major contracts with large OEMs, VARs, and distributors while at the same time, developing and introducing attractive new products into the marketplace.''

Mylex Corporation is engaged in the design, development, production, and marketing of high-end technology electronic products, including a 386 and EISA 486 microprocessor board product line of system motherboards and peripheral controller devices as well as graphics boards. These products are used to enhance the performance of personal computers, microsystems, and workstations. Mylex products are recognized in the marketplace for both their high performance and high quality standards.

LYNWOOD, CA (MARCH 12) BUSINESS WIRE - The Earle M. Jorgensen Co. (NYSE: JOR) announced that an agreement in principle has been reached to settle the three actions filed by stockholders challenging the pending tender offer by and proposed merger with affiliates of Kelso & Co. pursuant to which the stockholders of the Earle M. Jorgensen Co. would receive $41.50 per share in cash.

The three actions were filed shortly after the execution of the merger agreement was announced, two in the Court of Chancery of the State of Delaware and the third in the United States District for the Central District of California. Each of the actions named as defendants The Earle M. Jorgensen Co., certain of its directors and Kelso & Co., among others.

Earle M. Jorgensen, the founder and the chairman of the board of the company, stated: "I am most pleased to have these actions concluded. With the resolution of the shareholder litigation, the transaction is moving steadily toward completion."

The agreement in principle provides that The Earle M. Jorgensen Co. will make certain additional information about the transaction available to stockholders and that the defendants named in the actions will not oppose an award to the various plaintiffs' counsel of attorneys' fees and expenses in an amount up to $400,000.

It is anticipated that the parties will jointly apply for the necessary judicial approval of the settlement.

VANCOUVER, BRITISH COLUMBIA (MARCH 12) BUSINESS WIRE - Energex Minerals Ltd. (NASDAQ: EGEX; TSE: EGX)is pleased to announce that it has concluded an agreement with Cheni Gold Mines Inc. to sell the company's interest in the AL Claims, located in the Liard and Omeineca Mining Divisions of British Columbia.

The agreement calls for Energex to receive a royalty of $9 per ton on the first 250,000 tons of ore mined and milled, with provision for an additional $1.25 per ton for each US$10 increase in the price of gold per ounce above US $400 per ounce and a 3.5 percent net smelter return on any additional tonnages mined and milled from the property.

Cheni has paid an advance royalty of $1,150,000 at closing.

Cheni is currently in production at a rate of 500 tonnes per day at the Lawyers property 35 kilometres to the southeast of the AL Claims.

In order to facilitate the completion of the agreement with Cheni and to resolve a dispute with the prospectors from whom the company acquired the AL Claims, Energex has agreed to pay the prospectors 14 percent of any proceeds received by Energex from the first 250,000 tons of ore mined and milled by Cheni and 1/2 percentage point of the company's net smelter royalty.

The prospectors also retain a 5 percent net profits royalty on production from the AL Claims.

In addition, Energex has agreed to pay the prospectors a 2 percent net smelter royalty on the Moose and JD mineral claims to replace all previous rights and entitlements. The Moose and JD claims, comprising approximately 17,000 acres, are contiguous to the AL Claims and are not included in the Company's agreement with Cheni. The company retains 100 percent of these properties subject to a 15 percent net profits interest to Falconbridge Limited.

Proceeds from sale of the AL Claims will be used to continue the company's oil and gas exploration program in Texas and Louisiana.

#90071b0666 03/12/1990 ~Business Wire
DALLAS (MARCH 12) BUSINESS WIRE - Babbage's Inc. (NASDAQ: BBGS), a specialty retailer of consumer software, Monday announced that net income increased 17 percent to $3,110,000, or 59 cents per share, for its fourth quarter ended Feb. 3, 1990.

Sales for the quarter increased 56 percent to $42,940,000, compared to

$27,459,000 for the like quarter in the prior year. There were 14 and 13 weeks in the quarters ended Feb. 3, 1990 and Jan. 28, 1989, respectively.

Net income increased 17 percent to $3,110,000, or 59 cents per share, compared to $2,650,000, or 50 cents per share, for the like quarter last year. Net income for the year-earlier quarter included an extraordinary benefit from tax-loss carryforwards of $96,000, or two cents per share.

For the fiscal year ended Feb. 3, 1990 sales increased 62 percent to $95,296,000 compared to $58,750,000 last year. There were 53 and 52 weeks in the fiscal years ended February 3, 1990 and January 28, 1989, respectively.

Net income declined 17 percent to $2,301,000, or 44 cents per share, from $2,772,000, or 59 cents per share, in fiscal 1989. Net income for the year-earlier period included an extraordinary benefit from tax-loss carryforwards of $138,000, or three cents per share.

Comparable store sales for the 13 week period ended Jan. 27, 1990 increased by 6.3 percent. The company opened 53 stores and closed one store during the fiscal year, bringing total stores in operation to 160, a 48 percent increase in total stores compared to the same time last year.

Gross margin percent for the quarter declined to 30.6 percent from 35.1 percent in the year ago period. The decline resulted from a change in the company's mix of sales toward lower margin categories represented primarily by software for the Nintendo Entertainment System.

The decline was offset, in part, by a reduction in the company's rate of inventory shrinkage compared to prior years. Store operating expenses as a percent of sales were virtually the same as the same quarter last year while general and administrative expenses declined to 3.5 percent of sales compared to 4.9 percent.

As of Feb. 3, 1990 Babbage's had cash and cash equivalents of $4,255,000, no long-term debt and no borrowings under its $5 million bank line of credit. Year-end merchandise inventories of $17,706,000 were 18 percent lower on a per store basis than at the same time last year.

NEW YORK (MARCH 12) BUSINESS WIRE - USA Network and the World League of American Football have signed a four year agreement to cablecast regular season and post season World League games beginning in the spring of 1991, it was announced by Kay Koplovitz, president and CEO of USA Network.

USA Network will feature exclusive primetime coverage of the 12 week, round-robin schedule and six afternoon specials from Europe. The cable network will also carry one playoff game in each of the first two seasons and the league championship in 1992.

''USA is proud to be a broadcasting partner in this new international sports venture,'' Koplovitz said. ''We have enjoyed a long history of cable first in the sports arena. The World League is an exciting new addition to our sports schedule. It will give our viewers a chance to see professional football during the spring from locations around the world.''

A single corporate entity, the World League will field players from three sources: NFL contracted, colleges and free agents. Teams are divided into European, Eastern and Western divisions with each team playing a 10 game round-robin schedule that does not include one team. The season runs 12 consecutive weeks with 10 weeks of regular season play, one weekend of playoffs (two games featuring three division winners and one wild card team) and a championship game in the 12th week.

USA Network is scheduled to televise 10 Saturday games and 10 Monday games in primetime. USA will also feature six Saturday afternoon specials from Europe.

Currently, USA Network features a 40 week boxing series, an 11 tournament golf schedule which includes The Masters and a six tournament tennis schedule including 80 hours of exclusive coverage of the U.S. Open. The network also features numerous sports specials throughout the year.

USA Network, America's Favorite Cable Network, is seen in over 51 million homes via 10,100 affiliates.

#90071b0687 03/12/1990 ~Business Wire

NORTH BERGEN, NJ (MARCH 12) BUSINESS WIRE - Emerson Radio Corp. (NYSE:EME) announced Monday that it anticipates a loss for the fourth fiscal quarter ending March 31, 1990.

The Company disclosed that its sales margins in both its consumer electronics and personal computer lines during the current fiscal quarter continue to be disappointing due to the existing retail environment and high industry inventories. The expected loss for the fourth quarter is due to these factors. However, the Company expects that the fiscal year ending March 31, 1990 will remain profitable.

The company also announced today that prior negotiations with Fuji Electrocell Corp. for the license of the ''Fuji'' brand and trademark for consumer electronics products have been terminated due to unresolved issues as a result of the Company's due diligence review.

The company has been informed that Fidenas International Bank Limited has increased its holdings in common stock of the Company from approximately 5 percent to approximately 6 percent of the outstanding balance.

The Company disclosed that a Federal court action has been commenced against Emerson, two of its subsidiaries, one of its officers and two other defendants by holders of equity interests in a real estate limited partnership. The complaint alleges violation of Section 10(b) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder, as well as other common law claims arising out of the Company's alleged participation as one of the joint venturers in Emerson Equities, the general partner of the limited partnership. The complaint seeks compensatory damages of approximately $3.5 million, as well as injunctive

relief and punitive damages.

The company believes that it has meritorious defenses to these claims. In addition, the company has contractual indemnification which has been reaffirmed subsequent to the institution of this proceeding for any loss or expense incurred by it in connection therewith from a joint venturer of Emerson and one of the defendants in the action.

Emerson Radio Corp. designs and markets a full line of popularly priced consumer electronics products. The range of the Company's products includes televisions, video cassette recorders, compact disc players, radios, stereo systems, tape players and recorders, microwave ovens, compact refrigerators, telephones and answering machines. Recently, through its subsidiaries, the company has introduced a line of personal computers and peripherals which has been well received in its market place. H. H. Scott, Inc., a wholly-owned subsidiary, designs and markets a line of high fidelity audio and video equipment.

ALEXANDER CITY, AL (MARCH 12) BUSINESS WIRE - John W. Rouse Jr., Ph.D., president and chief executive officer of Southern Research Institute, a prominent research organization in Birmingham, Ala., has been appointed to the board of directors of Russell Corp. (NYSE/PSE: RML). The announcement was made by Eugene C. Gwaltney, chairman.

Dr. Rouse fills a vacancy on the board created by the resignation of Frank K. Hall Jr., president of the Athletic Division of Russell. Hall tendered his resignation to make way for increased board representation by individuals who are not employed by or affiliated with the company.

As president and chief executive officer, Dr. Rouse is responsible for directing the daily operations of Southern Research Institute. As a result of its distinguished 45-year record of research accomplishments in the life sciences and engineering, Southern Research Institute has developed an international reputation as a research leader.

Dr. Rouse is currently serving on the board of directors of the Alabama Power Co., Protective Life Corp., AmSouth Bank of Birmingham and the Downtown Club of Birmingham. He also serves on the governing boards of the

Birmingham Chamber of Commerce, Birmingham Area Council of the Boy Scouts of America, Metropolitan Development Board, United Way of Birmingham and Leadership Alabama. He is a member of the President's Council of the University of Alabama at Birmingham.

Russell Corp. is an integrated manufacturer and marketer of leisure apparel, athletic uniforms, better knit shirts, and a comprehensive line of lightweight woven fabrics. The company's common stock is listed on the New York Stock Exchange and several regional exchanges under the symbol RML.

#90071b0692 03/12/1990 ~Business Wire

MEMPHIS, TN (MARCH 12) BUSINESS WIRE - Insituform of North America, Inc. (NASDAQ:INSUA) Monday reported results for the fourth quarter and year ended December 31, 1989.

For the year ended December 31, 1989, revenues were $21,098,108, an increase of 11 percent over last year's $18,982,791. The revenue growth was primarily attributable to an 18 percent increase in licensee net contracts which rose to $93.7 million in 1989 versus $79.7 million in 1988.

Revenues in the fourth quarter of 1989 were $4,640,298 compared to 1988's $5,174,479. Fourth quarter 1989 net income was $482,423 or $.06 per share and for the year was $3,593,446 or $.46 per share.

In 1989, ''other income'' included $887,224, net of related costs, arising from the successful prosecution of certain of its claims for refunds of import duties paid in prior years.

INA stated that the fourth quarter decline in royalty income and net product sales as compared to the prior year's results was a direct reflection of the decreased installation activity of certain of INA's licensees. Inclement weather conditions, increased competitive activity and delays in municipal project awards at the local level experienced in various licensee territories lowered the total revenues and operating income earned by INA during the period. Operating income was also decreased as a result of the comparatively higher level of research and development and manufacturing expenses for the quarter incurred in connection with the completion of INA's development of its new NUPIPER technology and the relocation of INA's main manufacturing facility in Batesville, Mississippi.

Insituform of North America, Inc. provides state of the art techniques for the reconstruction of deteriorated pipelines utilizing the InsituformR Process and soon to be introduced NuPipe Process.

In addition, INA furnishes its present network of thirteen United States licensees with the InsitutubeR, resins and other related products used by them in the rehabilitation of pipeline systems throughout the country, and is a center of research and development for trenchless pipeline rehabilitation processes.

INA serves the needs of America's infrastructure.

LAKE WORTH, FL (MARCH 12) BUSINESS WIRE - The Palm Beach County Chapter of the American Institute of Banking has recognized two senior executives of Suburban Bank for their 30 years of outstanding service to the financial community at a dinner held recently at the Holiday Inn in Boynton Beach.

Those commended were Richard M. Brannan and Elaine Behrmann, during the A.I.B. Annual Senior Management Night, presided over by Joseph Henderson, executive vice president of Suburban Bank.

According to Henderson, ''We are really proud that two of our people are being honored by their peers. Outstanding service is what banking is all about, and we strive to be the best.''

Brannan, president and chief executive officer of Suburban Bank is a native Floridian. He began his financial career with General Motors Acceptance Corp. and moved on to The Flagship Bank where he was senior vice president and senior loan officer.

Brannan is a past director of the Florida Bankers Association, BankPac, and chaired the Consumer Lending Committee in addition, he was a founding director for Group 7 Installment Bankers.

Elaine Behrmann is vice president in charge of human resources at Suburban and has been with them for five years. She was formerly employed by First Marine Bank and Southeast Bank in Lake Worth, Behrmann has served on various state committees for the Florida Bankers Association and is presently a member of Financial Women International.

Suburban Bank is independent, locally owned and operated, and is a full services bank with four offices in Palm Beach County. They take special pride in customer service and have recently been awarded a coveted Three Star Rating by Veribank, an international banking organization.

The American Institute of Banking is a national group whose purpose is to promote the highest standards of banking practice, training and activity within the financial realm.

NEW YORK (MARCH 12) BUSINESS WIRE - ASARCO Incorporated (NYSE:AR) Monday

announced that it has initiated a lawsuit against Freeport-McMoran Inc., Freeport-McMoran Gold Co. (FMG), and a subsidiary of FMG, as well as Minorco S. A. and subsidiaries of Minorco challenging the sale by Freeport to Minorco of its 50 percent interest in the Santa Cruz copper in-situ mining research project located near Casa Grande, Ariz.

Asarco stated in its complaint in Supreme Court of the State of New York that the transfer to Minorco would damage the joint venture and did not comply with the joint venture agreement.

Asarco's lawsuit requests the court to enjoin, until Asarco's interests have been fully protected, completion of the sale by Freeport of its shares of FMG to Minorco and also enjoin consummation of the pending Minorco tender offer for shares of FMG, which is now scheduled to expire on March 23, 1990.

The Santa Cruz Project is a joint venture formed in 1977 between Asarco and Freeport, each of which owns half of the joint venture.

The joint venture is engaged in a research project supported by the U.S. Bureau of Mines and 75 percent funded by the U.S. government to test the feasibility of novel in-situ mining technology for the extraction of copper from a deep underground copper deposit.

#90071b0696 03/12/1990 ~Business Wire

MAPLEWOOD, NJ (MARCH 12) BUSINESS WIRE - First World Cheese Inc. (NASDAQ:FWCH), Monday announced record sales for the year ended Dec. 31, 1989 and projected results for the first quarter of 1990.

Net sales for 1989 reached a record $122 million, a 69 percent increase over sales of $72 million in 1988. Branded product sales, which include the PreMonde Alpine Lace brand low cholesterol and low sodium chesses, accounted for $70 million of the sales, a 119 percent increase over 1988.

The increase in branded product sales is attributable to a national TV and magazine advertising campaign conducted in the fall of 1989. The cost of the campaign which totaled over $3 million was expensed primarily in 1989's fourth quarter.

The campaign helped to solidify PreMonde Alpine Lace as the premier nutritional cheese in supermarket deli cases. Net earnings for the year were $4,000 or $.00 per share compared with $1,466,000, or 31 cents per share for the year 1988.

Net sales for the fourth quarter also reached a record $41 million, a 94 percent increase over the $21 million in sales reported in the fourth quarter of 1988.

The company reported a net loss of $1,725,000, or 35 cents per share for the quarter compared with net earnings of $355,000 or 7 cents per share for the 1988 fourth quarter.

The comapny said the fourth quarter loss was attributable to expenses incurred in the company's advertising campaign and to high wholesale cheese costs resulting from drought conditions in the midwest in 1988 and early 1989. Fourth quarter sales, however, were well above any previous quarter.

Carl Wolf, president and chief executive officer of First World Cheese said, ''With the heavy advertising expenses behind us and a decline in raw materials prices in 1990, as well as lower operating overhead, we anticipate sales of approximately $37 million for the first quarter of 1990 with estimated net earnings of 15 cents to 19 cents per share.''

Wolf also said that a decline in wholesale cheese costs and an expanded product line should result in a continuation of increased sales and earnings for the remainder of 1990.

First World Chese Inc., is a developer and marketer of a growing line of low salt and low cholestrol cheeses sold under the PreMonde Alpine Lace label.

The company's primary product lines are designed to meet consumer taste expectations while providing the dietary benefits of lower sodium, fat and cholestrol. Through its Mountain Farms Inc. and Marolf Dakota Farms Cheese Inc. subsidiaries, the company also packages and converts bulk cheeses into consumer retail packages and manufactures a small portion of the cheeses sold under the company's brand names.

CLEVELAND (MARCH 12) BUSINESS WIRE - The promotion of John M. Klipfell to Senior Vice President - Subsidiary Operations was announced today by American Greetings.

In his new position, Klipfell, 40, has responsibility for Carlton Cards, Ltd. (Canadian greeting card division); Those Characters From Cleveland (licensing division); and The Summit Corporation (retail division).

Klipfell, a 15-year veteran with the world's largest publicly-owned greeting card company, was previously Vice President and Assistant to the President.

Company President and Chief Executive Officer Morry Weiss said Klipfell's promotion ''recognizes his outstanding performance in a variety of assignments in Finance and Operations, and is another step in positioning American Greetings to capitalize on opportunities in the 90's and beyond.''

Klipfell graduated from Bowling Green State University in 1971 with a Bachelor's Degree in Business Administration. He joined American Greetings in 1975, specializing in Audit and Operations Review. His advancement through the Financial Department culminated with his promotion to Controller in 1983. In l989, he was named Vice President and Assistant to the President.

Klipfell is a resident of Strongsville, Ohio.

MIAMI LAKES, FL (MARCH 12) BUSINESS WIRE - Preferred Homecare of America Inc. (NASDAQ:PFRD), has completed the acquisition of Professional Intravenous Therapy Associates (PITA), of Atlantis, Fla.

The purchase price at closing was $1.1 million consisting of cash, stock and notes. The letter of intent was signed in October, 1989.

Carlos M. Herrera, president and chief executive officer of Preferred Homecare of America, stated ''This acquisition will provide us with an additional pharmacy in South Florida which allows us to increase our service area up to Port St. Lucie, and is consistent with our strategy of expansion through the acquisition of physician owned home infusion therapy companies.''

Preferred Homecare of America is a hi-tech home infusion company and provider of pharmaceuticals to subacute care facilities. Preferred Homecare of America currently has offices servicing patients in Miami/Fort Lauderdale, Pasco County, Fort Myers, Fla., the New York/New Jersey metropolitan area and the Washington/Maryland/Virginia region.

SALT LAKE CITY, UT (MARCH 12) BUSINESS WIRE - Scott L. Smith, president, issued a letter to shareholders Monday which described recent developments in the lawsuit against American Barrick, Texaco and Getty.

The letter also described that status of the company's exploration programs in the United States and in Uruguay.

In describing litigation developments, Smith indicates that Gold Standard has two appeals pending before the Supreme Court of Utah that seek the release of two important documents. The first document is an agreement among the defendants addressing Gold Standard's claims to the Mercur Mine. Gold Standard believes the document is evidence of the defendants' intent to deny Gold Standard its rights. The attorneys for both Barrick and Texaco are fighting fiercely to have this document suppressed and to thereby prevent follow-up investigation of that agreement.

The other appeal involves Getty's own internal investigation as to whether a feasibility study was ever prepared for the Mercur project and presented to Gold Standard. This ruling is pending and is of potential significance in the feasibility study aspect of the litigation.

In the letter to shareholders, Smith also comments on the recent ruling handed down by the Utah Court. The Court, in a ruling handed down Feb. 16 1990, held that a conversion from a 25 percent working interest to a 15 percent carried interest in the Mercur Mine was done on contract grounds and could no longer be contested on contract grounds, but the Court left intact tort (injury) claims respecting Getty's conduct in converting Gold Standard and its subsequent treatment of Gold Standard. The Court left intact Gold Standard's claims that Getty breached the contract on matters unrelated to the net profits conversion by failing to provide Gold Standard with a feasibility study.

The letter describes important proceedings subsequent to that ruling. On March 1, 1990, the parties appeared before the Court at which time the Court rejected the broadly stated form of order which the Barrick defendants had prepared in order to formalize the Feb. 16 ruling. A much narrower form of order is now pending the Judge's signature. The order provides in essence that only the contract claims respecting conversion are affected. The ruling and order leave virtually intact Gold Standard's claims for breach of fiduciary duty and other wrongful and tortious conduct by Getty. Additionally, the claim against Barrick and Texaco for

independent wrongful conduct remain completely intact. Gold Standard still has claims for substantially the same damage it has been pursuing for the entire course of the litigation.

#90071b0722 03/12/1990 ~Business Wire

CAMBRIDGE, MA (MARCH 12) BUSINESS WIRE - Lotus Development Corp. Monday announced two new versions of its best-selling 1-2-3 spreadsheet for Digital Equipment Corp.'s VAX/VMS family of computers.

The announcement is the result of a joint development and marketing agreement signed by Lotus and Digital in November 1988.

Lotus 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1 offer 1-2-3 functionality to commercial and technical VAX users at every level of an organization. The products can be used on all VAX/VMS computers, from a single-user VAXstation1/8tm3/8 to a VAX 9000 mainframe. ALL-IN-1 is Digital's market-leading integrated office system with more than three million users.

''Our versions of 1-2-3 for the VAX environment represent a key milestone in Lotus' strategy to provide customers with software products that operate in a consistent fashion, and easily communicate across a range of systems and hardware platforms,'' said Frank King, senior vice president of Lotus' Software Products Group.

''Lotus and Digital are natural partners in meeting the applications needs of customers in the 90s,'' said Henry Ancona, Digital's vice president of Business and Office Information Systems.

''With these products on Digital systems and networks, the two companies are offering customers advanced 1-2-3 Release 3 capabilities, from workstation to mainframe, with access to distributed corporate data, and integration with the industry's leading office system.''

Advanced Spreadsheet Functionality

Lotus 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1 are based on 1-2-3 Release 3 and are optimized for the VAX/VMS environment. The products incorporate 1-2-3 Release 3 advanced spreadsheet capabilities, including three-dimensional worksheets, external data access, file sharing, file linking, enhanced graphics and on-sheet relational database capabilities. The products are also compatible with all personal computer versions of Lotus 1-2-3.

Lotus 1-2-3 for VAX/VMS provides VT terminal and VAXstation users with access to 1-2-3, and provides PC users with a complement to PC versions of Lotus 1-2-3 and access to VAX services. Lotus 1-2-3 for VAX/VMS also supports Enterprise Spreadsheet Computing use. Enterprise Spreadsheet Computing is a cross-platform system of 1-2-3 spreadsheets that takes advantage of each platform's strengths. It combines the familiarity and responsiveness of 1-2-3 running on PCs with the data resources and centralized services of minicomputers and mainframes to provide users with a single applications environment.

''1-2-3 for VAX/VMS provides a transparent link among all users on a Digital network, including PC users, and enables them to share spreadsheets around the network as easily as if they were in the same room '' said Frank Moss, vice president of the Lotus Networked Applications and Systems Division. ''We designed the products to meet a major customer requirement -- decentralization with collaboration. These products help users attain new levels of efficiency and productivity by leveraging the network resources throughout an organization.''

Integration with Digital VAX/VMS and ALL-IN-1

Lotus 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1 fully support Digital's Network Application Support (NAS) services. The products take advantage of the networked VAX/VMS environment to offer cross-platform file and data sharing, enhanced security, and access to corporate data on a VAX.

Through Lotus' DataLens technology, which enables users to access external data sources from directly within Lotus applications, users will be able to easily integrate data through VAX/SQL Services1/8tm3/8 from the native VAX Rdb/VMS relational database system and other relational databases into their spreadsheets. For displaying graphs, 1-2-3 for VAX/VMS uses ReGIS for VT terminals and Xwindows protocols for DECwindows on workstations.

Lotus 1-2-3 for ALL-IN-1 can be invoked from any ALL-IN-1 menu. 1-2-3 for ALL-IN-1 worksheets can be saved to and retrieved from the ALL-IN-1 file cabinet, and worksheet files can be mailed to other users via ALL-IN-1 mail. 1-2-3 for ALL-IN-1 users can also take advantage of standard ALL-IN-1 ''gold keys'' to expedite basic operations in a typical ALL-IN-1 fashion.

The products take advantage of Digital's NAS resource sharing services such as Personal Computing Systems Architecture (PCSA), a connectivity architecture that connects DOS and OS/2-based PCs to VAX/VMS, providing users with transparent access to VMS disk, file and print services located anywhere on the network. This enables all users of PC versions of 1-2-3 in an organization to benefit from VMS services and to share worksheets with 1-2-3 for VAX/VMS users.

Multiple Language Support for Global Analysis

Lotus 1-2-3 for VAX/VMS also offers built-in support for multiple languages including French, German and Italian. This feature, combined with 1-2-3 for VAX/VMS's analytical capabilities, provides users in organizations worldwide with a powerful mechanism for global consolidation and analysis. 1-2-3 for VAX/VMS users are offered a choice of languages and country-specific reporting conventions when they install the product.

Users can work in their respective languages and country formats, and still transfer spreadsheets to a central VAX for consolidation and further analysis in a single language.

Lotus to Provide DataLens Developer Toolkit for 1-2-3 for VAX/VMS

Lotus also announced that it will produce a DataLens Developer Toolkit for Lotus 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1. This product will allow third-party database vendors and corporate programmers to create drivers that enable applications users to access a wide variety of external data sources from directly within 1-2-3. Drivers are currently under development for Sybase, Ingres and Oracle. The DataLens Developer Toolkit is currently in beta testing and will be available in the second quarter of 1990.

WordPerfect to Provide Link to 1-2-3 for VAX/VMS

In addition, Lotus and WordPerfect today announced that they are exchanging technology that will provide for access to 1-2-3 for VAX/VMS worksheet data from within a WordPerfect document on the VAX. This technology will be implemented in a future release of WordPerfect for VAX/VMS.

''We think 1-2-3 for VAX/VMS will have a large impact on the market and we're eager to allow our users to have access to the data stored in 1-2-3 worksheets,'' said Kim Cooper, WordPerfect director of marketing for VAX products.

Marketing Channels and Training

Lotus 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1 will be distributed through Digital's worldwide direct and indirect sales channels, including Digital's sales force, direct marketing organization (including DECdirect and the Electronic Store), distributors and OEM partners.

As part of its Enterprise Integration Services, Digital will offer customer training worldwide for 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1. This will be supplemented by additional courses from Lotus, as well as

from two leading training facilities, ERI Training of New York City and LeBlanc and Associates of Chicago.

Price, Availability and Support

Prices for Lotus 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1 are based on processor size. 1-2-3 for VAX/VMS prices range from $795 for single-user VAXstation 3100 systems to $67,473 for VAX 9000 systems. 1-2-3 for ALL-IN-1 prices range from $1197 for single-user VAXstation 3100 systems to $94,462 for VAX 9000 systems. The products will be available in the second quarter of 1990. The French, German and Italian versions of the product will be available in the third quarter of 1990.

Digital will support 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1 as Digital products, with technical telephone support, Digital Software Information (DSIN) access, critical on-site support and software updates. This support will be available worldwide, 365 days a year. Lotus 1-2-3 for VAX/VMS and 1-2-3 for ALL-IN-1 are part of the Lotus Spreadsheet Family, and are central components of Lotus' long-term cross-platform strategy to provide users with common applications and services in heterogeneous computing environments.

Lotus Development Corp. is the leading developer of applications software for personal computers and information services delivered on CD-ROM.

Digital Equipment Corp., headquartered in Maynard, Massachusetts, is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

All prices and terms are for the U.S.A. only.

Lotus and 1-2-3 are registered trademarks, and DataLens is a trademark of Lotus Development Corp. ALL-IN-1, DECnet, VAX and VMS are registered trademarks, and DECwindows, ReGIS, VAX Rdb/VMS, VAX/SQL Services, VAXstation, and VT are trademarks of Digital Equipment Corp.

#90071b0724 03/12/1990 ~Business Wire

NATICK, MA (MARCH 12) BUSINESS WIRE - Reaffirming its commitment to comply with Digital Equipment Corp. standards, Access Technology Inc.

Monday announced that 20/20, the leading spreadsheet for VAX/VMS computers now supports DECwindows, Digital's common user interface, and is available for immediate shipment.

The company also announced Monday that 20/20 now supports Digital's Compound Document Architecture (CDA), a Network Application Support (NAS) information service. 20/20 CDA functionality does not require DECwindows, and is also available on terminals.

In addition to providing VAX/VMS users with an advanced spreadsheet combined with graphics, consolidation and data management facilities, 20/20 has been optimized to take full advantage of the DECwindows environment, and is compliant with DECwindows user interface standards. 20/20 under DECwindows offers the information management market a powerful desktop spreadsheet solution which takes advantage of Digital's enterprise-wide computing environment.

With 20/20 running under DECwindows, users can run their spreadsheet, including commands, within a graphical user interface. For example, windows can be dynamically resized and moved anywhere on the screen. With this capability, users can use larger portions of their spreadsheets than with conventional character terminals.

20/20 also utilizes true X-windows graphics, rather than ReGIS emulation, thereby providing users with crisper, more attractive graphics.

20/20 supports a wide range of DECwindows facilities. This functionality includes:

- Support for CDA, Digital Data Interchange (DDIF) and Digital Tabular Interchange (DTIF) formats, which allows for easy exchange of data between 20/20 and DECwindows applications such as DECdecision and DECwrite. 20/20 can read and write models through DTIF, and exchange data with other applications through DDIF. 20/20 graphs can also be written out to DDIF for import into other applications.

- Mouse support for range selection and choosing menu options.

- Access of commonly used commands such as read/write, backout and list via pulldown menus or graphical ''buttons.'' This feature allows users to access their most common tasks quicker.

- Full support of scroll bars, thus allowing users to graphically navigate the worksheet.

- Ability to change font sizes within the 20/20 window. As a result,

users can use a small font size to view a larger area of the worksheet, or choose a large font size for purposes of easy reading.

#90071b0733 03/12/1990 ~Business Wire

LONG BEACH, Calif. (MARCH 12) BUSINESS WIRE - American Airlines has exercised seven options, increasing its McDonnell Douglas MD-11 firm orders to 15 aircraft.

American now has the most firm orders for the new tri-jet of any MD-11 customer.

This option exercise marks American's first MD-11 reorder since announcing its initial selection of up to 50 of the advanced technology tri-jets on Feb. 7, 1989. The first of the seven new firm aircraft is scheduled for delivery in late 1991. The aircraft will be powered by General Electric CF6-80C2D1F engines.

American said the MD-11s will be used for expansion of its international route system.

The Texas-based airline is the world's largest DC-10 and MD-80 operator, with 59 and 151 units respectively in service today.

American also holds orders/options for an additional 169 MD-80s.

A launch customer for the DC-10, American's working relationship with Douglas dates from 1934, when the airline purchased the first of the 17 DC-2s it eventually operated. American also launched the world's most famous airliner - the Douglas DC-3.

The MD-11 is an advanced wide-cabin, tri-jet family for the 1990s, now in production at Douglas Aircraft Co. here. It is available in three models - passenger, all-freighter, and ''combi,'' with both passengers and cargo carried on the main deck. Launched on

Dec. 30, 1986, the MD-11 first flew on January 10, 1990.

Two MD-11s are currently in flight test, with certification and first deliveries scheduled in late 1990.

As of March 1, l990, McDonnell Douglas had received 340 MD-11 orders and other commitments from 30 customers.

FORT LAUDERDALE, FL (MARCH 12) BUSINESS WIRE - To meet the growing demand for its video duplicating services, MagneTech Corp., Fort Lauderdale, Fla. a publicly-owned company (NASDAQ:TAPEU) announced it has quadrupled its production facilities in moving to new plant and headquarters near the Fort Lauderdale airport, which it has just officially opened.

Started in 1988 as a division of S.O.I. Industries of Miami (NASDAQ:LAMP), MagneTech is already producing annualized revenues of approximately $3 million, serving over 500 customers nationwide.

Operating 24 hours per day, it is now one of the largest and fastest-growing independent video service firms in the Southeast. Its customers include numerous Fortune 1000 companies, such as Compaq Computer Tandy and Burger King.

Jack Brown, president, said that in making the move MagneTech invested over $1 million in new video equipment. He added that the firm now has over 450 VHS duplicators operating with a daily capacity of some 16,000 duplicated tapes.

The company's new production clean room is designed to operate a maximum of 1200 VHS duplicators with a daily capacity in excess of 40,000 tapes. To date most of the videos are used for employee training, sales promotion etc.; but Brown said the company will soon enter the motion picture theatrical field working with major studios and broadcasters.

Don Courtney, president of S.O.I. Industries, which owns 68 percent of MagneTech, said that the duplicated video-tape market today exceeds $4 billion, and predicts that MagneTech will capture an increasingly larger share and show burgeoning revenues throughout the 90's.

For the six months period ended Dec. 31, 1989, MagneTech's earnings rose 120 percent over the like period of 1988. A four-for-one stock split of MagneTech's common stock and warrants took effect on Feb. 15. Trading for split shares on NASDAQ will commence on March 13, said Courtney.

PROVIDENCE, RI (MARCH 12) BUSINESS WIRE - Nortek Inc. (NYSE:NTK) announced Monday that it has resolved certain concerns expressed by the Securities and Exchange Commission regarding issues arising from a four-day delay in the filing of a Schedule 13D over three years ago regarding its investment in Rexham Corp.

Under the terms of a consent to a proposed judgment filed today, without admitting or denying any of the allegations, Nortek agreed to comply with certain sections of the Securities and Exchange Act of 1934 as they relate to the late filing.

In addition, Nortek, has agreed to pay $503,000, plus interest, into a fund to be set up to reimburse the losses, if any, incurred by sellers of Rexham Corp. common stock as a result of that four-day delay.

Ralph R. Papitto, chairman of the board and chief executive officer of Nortek, noted that ''Nortek has fully and voluntarily cooperated with the commission in all aspects of its review which began early in 1988 and offered since inception to cooperate in establishing a fund to reimburse losses, if any, incurred by sellers of Rexham common stock as a result of that four-day delay. Nortek filed its consent to a proposed judgment in order to bring an end to the continuous drain on management time and to avoid incurring additional legal fees. We are pleased to put this bit of our history behind us.''

Nortek Inc. is a diversified Fortune 500 corporation, manufacturing and marketing residential and commercial building products and commercial ventilating and air conditioning systems.

CLEVELAND (MARCH 12) BUSINESS WIRE - Stouffer Hotel Co. Monday announced plans for an $88 million, 367 room luxury resort on Tampa Bay in St. Petersburg, Fla.

The project is a joint venture of Stouffer and VDC Hotel Partners, a Florida general partnership. Stouffer, a unit of Nestle Enterprises Inc., will operate and jointly own the resort. Construction will begin immediately, with completion scheduled for late 1991.

Centerpiece of the complex, to be named the Stouffer Vinoy Resort, is the

landmark Vinoy Park Hotel, built in 1925 and listed on the National Register of Historic Places. Plans call for restoration of the 262 room hotel, addition of an adjacent 105 room tower, renovation of an 18 hole golf course and clubhouse to be called the Vinoy Country Club, a new 14 court tennis complex consisting of grass, clay and deco-turf courts, and a 74 slip marina located directly in front of the resort.

The resort also will feature two swimming pools (one at the country club), two restaurants, entertainment lounge, lobby bar and 20,000 square feet of meeting space including ballrooms of 6,000 and 4,000 square feet. A two-level garage will provide parking for 360 cars.

The property will be the company's second in Florida, joining the Stouffer Orlando Resort, and its 14th resort.

''The Stouffer Vinoy Resort will be a world-class complex combining the elegance and style of an earlier era with luxurious facilities designed to accommodate the desires of today's affluent leisure traveler,'' said William N. Hulett, president of Stouffer Hotel Co. ''We are pleased to team with Frederick E. Guest II and his partners in bringing to reality his long-time dream to develop this very special project.''

Architect for the project is William Cox Architect, P.A. of Coral Gables, Fla. Interior designer is Lynn Wilson Associates/BDG of Coral Gables. General contractor is the Federal Construction Co. of St. Petersburg.

Other Stouffer resorts are located on the Hawaiian islands of Kauai and Maui; St. Thomas, U.S. Virgin Islands; Orlando, Fla.; Scottsdale, Ariz.; Lake Lanier Islands, Ga.; Indian Wells, Calif., near Palm Springs; and in Cancun, Cozumel, Ixtapa, Loreto and Los Cabos, Mexico.

Stouffer owns or operates 41 hotels and resorts located throughout the continental United States, Hawaii, Mexico and the Caribbean.

WHITE PLAINS, NY (MARCH 12) BUSINESS WIRE - IBM Corporation and The First Boston Corporation Monday announced the formation of a new company, Seer Technologies, Inc., which will provide integrated trading and investment management application systems for customers in the financial services industry. The new firm is located in New York City and will begin operations immediately.

Ownership of Seer Technologies is shared by IBM, First Boston, and the

company's management and other employees. The new firm's staff consists of former employees of First Boston.

Seer Technologies will develop, market and support integrated trading and investment management application systems for financial services customers such as investment and commercial banks.

Called NewArc 2000, the Seer Technologies system will provide multi-currency, multi-entity and global trade processing as well as improved risk management. It will offer these functions across a broad range of financial instruments such as equities, foreign exchange, money market, fixed income, options and futures.

NewArc 2000 will offer a complete solution for all steps of the trading process, from when the securities trader formulates a trade to clearing and settling the trade. It allows traders to access and analyze current market data, and enter and process trades through settlement. Using advanced technology, the system can be easily modified to accommodate new instruments and respond to changes in the regulatory environment.

"Seer Technologies looks forward to providing customers with a complete and integrated solution to meet their global trading and investment management systems needs," said Eugene F. Bedell, chief executive officer and president of Seer Technologies and formerly managing director at The First Boston Corporation.

"Our NewArc 2000 application system is the most comprehensive in the marketplace today, and delivers unmatched integration capabilities, as well as a wide range of functions. The use of this information technology will enable customers to better understand and respond to global trading conditions."

"The formation of Seer Technologies is an indication of IBM's commitment to customers in the financial services industry," said Marvin F. Mann, IBM vice president and president, Services Sector Division. "The new company will offer leading edge applications and technology that will help customers to better gather, analyze and share vital information and improve their risk management."

WASHINGTON (MARCH 12) BUSINESS WIRE - The Software Publishers Association announced Monday that North American software sales for fourth quarter

1989 increased to an estimated $916 million, measured at retail.

This is an increase of 15 percent over fourth quarter 1988.

International sales of U.S. software firms grew 28 percent over the same period. The overall total growth rate for both domestic and international sales was 19 percent. For the year, the SPA estimates that the North American PC applications software market was up 11.9 percent to $3.1 billion.

The SPA data is based on an analysis of monthly sales information submitted to the accounting firm of Arthur Andersen & Co. by 152 of the nation's leading PC software publishers. Among the more interesting findings for the fourth quarter 1989:

-- Word Processors were the largest ($197 million) and the fastest growing category for the period, up a phenomenal 78 percent.

-- MS-DOS sales increased 23.8 percent; Macintosh sales were up 19.0 percnet.

-- MS-DOS education software grew 37.5 percent.

COLUMBUS, Ohio (MARCH 12) BUSINESS WIRE - Cooker Restaurant Corp. has announced that the company's Employee Stock Ownership Plan has been authorized to purchase up to 500,000 shares of the company's stock in the market from time to time.

At current price levels, the company views the ESOP's purchase of its stock as an appropriate investment and is consistent with its policy of incentive compensation for all of its employees.

For the fourth quarter of 1989, the company's net earnings were $387,000, up 74 percent from earnings of $222,000 in the fourth quarter of 1988. Earnings per share were 4 cents compared with 3 cents in 1988's fourth quarter. Sales for the quarter rose 18 percent to $7,225,000 from $6,112,000 a year earlier.

For the fiscal year ended Dec. 31, 1989, net earnings totaled $1,469.000, up 171 percent from earnings of $542,000 for the year 1988. Earnings per share amounted to 16 cents compared with 7 cents. Sales increased 35 percent to $28,425,000 compared with $21,127,000 in 1988.

NEW YORK (MARCH 12) BUSINESS WIRE - David B. McCall, co-founder and former creative director of McCaffrey & McCall Advertising, and Lawrence R. Walsh managing director of the corporate group at Hill & Knowlton/New York, are joining Sawyer/Miller Group (SMG), the firm announced Monday.

David H. Sawyer, chairman of the New York-based communications consulting firm, said that McCall and Walsh both will be partners at SMG and will focus on developing communications strategies for its political, corporate and international clients.

McCall is renown in the advertising world as former copy chief to David Ogilvy at Ogilvy, Benson & Mather, where he also served on the board of directors.

Among his many creative accomplishments at O&M were the famous Maxwell house percolator campaign and the first corporate campaign for Sears.

In 1962, McCall and Jim McCaffrey left O&M to buy the C.J. LaRoche Co., which they later renamed McCaffrey & McCall. Their clients included Mercedes Benz, Tiffany, Puerto Rico Tourism and J.C. Penny.

The agency billed $10 million in 1963 and $300 million in 1989. McCall is a former director of the American Association of Advertising Agencies.

At Hill & Knowlton, Walsh directed public affairs activities for a broad range of corporate clients, including counsel in corporate positioning, crisis managements and executive communications.

He was previously in charge of H&K's London corporate and public affairs division, where he coordinated the activities of U.S. clients throughout Europe.

Previously, Walsh managed corporate and association accounts in H&K's Chicago office and served as director of state and local government relations, coordinating H&K's professionals in 17 U.S. offices.

Before joining H&K, Walsh was special assistant in the White House press office where he directed advance operations for President Carter's domestic and foreign travel, including the seven-nation economic summits in Europe, Asia and the United States.

BURLINGTON, MA (MARCH 12) BUSINESS WIRE - Xylogics Inc. (NASDAQ:XLGX), the original manufacturer and supplier of Sun Microsystems' SMD disk and 1/2 inch tape controllers, Monday announced it is making twelve products available to the Sun market.

With this announcement, Xylogics now offers the Sun user community the largest range of disk storage and communication controllers ever available from a single source. More important to Sun users, these products are not ''clones,'' but rather products designed by Xylogics for Sun Microsystems, and products based on those designs. Xylogics is the OEM supplier of every high performance SMD disk controller shipped with Sun-3 and Sun-4 workstations.

Until this introduction, users buying Sun controller ''clones'' from other sources risked data reliability and system compatibility with the new SunOS 4.0 release. Other third-party manufacturers emulate Sun/Xylogics controllers in firmware, which often requires rewriting boot code, drivers formatters and other utilities to remain Sun compatible.

''This first-source distinction provides several benefits for Sun workstation users,'' said Peter Savage, president and COO of Xylogics. ''These new products not only provide exceptional price performance, but also make possible true Sun-compatible, plug and play capability.

''The experience Xylogics gained designing and building products for Sun now provides the Sun aftermarket with a broader range of high performance storage and terminal connectivity products with exceptional features, performance and reliability, at significant cost savings,'' Savage said.

To further broaden its Sun aftermarket offerings, Xylogics introduced the SV7890, the industry's first dual-channel IPI-2 disk controller in a single 9U slot for Sun systems. A single-channel version of this 9U controller, the SV6890, is also offered at a reduced price.

#90071b0777 03/12/1990 ~Business Wire
SAN FRANCISCO (MARCH 12) BUSINESS WIRE - IBM Monday announced a comprehensive solution for financial institutions that converts their growing mountain of checks into high-quality electronic images.

Major reductions in the labor associated with handling checks, and much of

the paperwork, burdening today's document processing systems can be eliminated with the IBM ImagePlus(a) High-Performance Transaction System(a) (HPTS).

The images can be quickly captured and then transmitted electronically to be displayed on IBM Personal System/2(a) workstations, stored on magnetic or optical media, and printed on advanced function laser printers.

''More than 50 billion checks a year are written in the U.S. We believe that check processing costs can be reduced dramatically by using HPTS,'' said Marvin Mann, president of IBM's Service Sector Division. ''Banks can also realize improved customer service with monthly statements containing check images, as well as the ability to better respond to customer inquiries.''

Developed in joint partnership with six major United States and Canadian banks, HPTS incorporates both leading-edge image processing and amount recognition (RECO) technologies to automate critical financial applications that are highly labor intensive.

The system is designed to allow potential future applications in the areas of returned items and exception processing, archive, the electronic kill (transmitting images, instead of checks, between banks) and merchant draft and remittance processing. IBM also intends to provide additional enhancements for cost-effective remote site configurations.

The entire HPTS system is designed so that it can be implemented in stages co-existing with conventional check handling operations. IBM development partners, including the Mellon Bank, NCNB, Bank of New England, Security Pacific, the Bank of Montreal, and the Royal Bank of Canada are phasing in HPTS.

It is IBM's intent to make these products generally available following the early install program that is currently in progress.

An existing IBM 3890/XP user with CPCS and MVS/ESA in operation can install a pilot for approximately $600,000 to $1.2 million depending upon the image functions implemented.

GERMANTOWN, TN (MARCH 12) BUSINESS WIRE - Community Bancshares Inc. (NASDAQ:CBOG) Monday announced financial results for the year ended Dec.

31, 1989.

Net income for the year was $1,674,000, or 64 cents per share, compared with net income of $2,368,000, or $1.06 per share, in 1988. The 1988 earnings include a one-time pretax gain of $1,132,000 from the sale of a subsidiary, Tennessee Bank and Trust.

Excluding this gain from 1988 net income, earnings for 1989 rose 3 percent compared with the previous year. The 1989 results also include an increase of $1,000,000 in the provision for credit losses which the company recognized in the fourth quarter.

At Dec. 31, 1989, total assets were $240,305,000, up 13 percent from total assets at the end of 1988. Stockholders' equity was $19,192,000, or 8.0 percent of total assets, deposits were $215,586,000 and net loans totaled $157,647,000 at Dec. 31, 1989.

Commenting on the results, Donald E. Russell, president and chief executive officer, said: ''On an operating basis, Community Bancshares continued to show steady growth throughout 1989. Net interest income, one of the most important measures of the company's performance, increased 17 percent compared with the prior year. Continued growth in our market area resulted in strong loan demand and a 24 percent increase in our loan portfolio at year-end.''

Community Bancshares Inc. is a bank holding company headquartered in Germantown, a separately incorporated municipality adjacent to Memphis.

Community Bancshares' principal subsidiary is Community Bank of Germantown which serves Germantown and the Memphis area through seven branch locations.

BIRMINGHAM, AL (MARCH 12) BUSINESS WIRE - Jack H. Shannon, chairman of the board and chief executive officer, and William L. Watson III, president and chief operating officer of Secor Bank, Federal Savings Bank (NASDAQ: SECR), Monday announced the elimination of 50 employee positions in Secor's Northern Louisiana and Alabama operations effective Monday, March 12.

These job eliminations include both management and non-management positions and represent a continuation of a productivity and efficiency study which was implemented by Secor in the second half of 1989.

A.T. Hudson & Co. Inc., a financial consulting group with an impressive record of helping corporations in the United States, Canada and the United Kingdom, was chosen by Secor's executive management to assist in streamlining the company's operations.

This study, along with the reorganization of Secor's management structure, will result in an annual savings in excess of $3 million and will improve the profitability of Secor while enhancing quality of customer service.

"It is regretable that these actions must be taken; however, they are necessary for Secor to be profitable in today's competitive environment. Severance pay and job search assistance is being provided to those employees whose positions are eliminated," Shannon said.

Secor Bank is a regional financial services company serving markets in Alabama, Louisiana, Florida and Tennessee. As of Dec. 31, 1989, the company had assets of $2.3 billion with 62 branches and 13 loan production offices. Secor Bank is publicly owned with stock trading as SECR in the OTC market.

BRANFORD, CT (MARCH 12) BUSINESS WIRE - Echlin Inc. (NYSE: ECH) has completed the purchase of selected assets of VERA Imported Parts Corp. from Wickes Manufacturing Company, a subsidiary of Wickes Companies Inc. The acquisition was announced by Frederick J. Mancheski, chairman and chief executive officer of Echlin.

VERA, an importer of replacement parts for non-U.S. manufactured vehicles is headquartered in Piscataway, N.J., and has annual sales of about $25 million. VERA is similar to Echlin's Beck/Arnley Worldparts subsidiary, providing import vehicle repair parts to warehouse distributors and import parts specialists in the U.S.

''The U.S. import parts aftermarket is growing about 5 percent annually, in units, due to increased import car sales, the increasing age of imported vehicles, and fewer new car dealer repairs after the expiration of warranties,'' Mr. Mancheski said. ''The addition of VERA will increase our participation in this industry.''

Echlin, headquartered in Branford, is a worldwide manufacturer and distributor of motor vehicle parts, with annual sales of $1.5 billion.

#90071b0797 03/12/1990 ~Business Wire
NASHVILLE, TN (MARCH 12) BUSINESS WIRE - Russell L. Cooper Monday was named senior vice president of franchising and development at Shoney's Inc. (NYSE:SHN), announced Leonard H. Roberts, chairman and chief executive officer of the company.

Cooper was executive vice president for franchising and development at Arby's Inc.

Cooper, who has been with Arby's Inc. since 1985, takes over his new position on Monday, March 12, 1990.

Working together with Roberts, Cooper successfully turned around Arby's franchising efforts in the mid 1980s to achieve one of the highest

franchise growth rates in the restaurant industry. Roberts, former president and CEO of Arby's Inc., left Arby's in September 1989, and joined Shoney's Inc. in December of 1989.

Cooper assisted Arby's in setting a blistering pace in franchise development. Approximately 250 new Arby's franchise restaurants were opened in 1989 alone. During his five years with Arby's Inc., Cooper oversaw the successful development and opening of more than 900 new franchise restaurants, which greatly contributed to Arby's highly reputed turnaround.

In just five years, Arby's moved from a regional concept to one of the strongest national brands in the restaurant industry today.

Cooper said he expects to achieve rapid growth for Shoney's Inc.'s franchising program, which has been intensified since the company underwent recapitalization in 1988.

Russ Cooper, a native of Wisconsin, earned his law degree and Bachelor of Science degree from the University of Wisconsin. He then joined the Ralston Purina Co., where he worked closely with Len Roberts in several of Purina's consumer and foodservice growth businesses.

Shoney's Inc. presently operates more than 1,600 company-owned and/or franchised restaurants and Shoney's Inns motor hotels. Franchising efforts have traditionally centered on three concepts -- the 31-year-old flagship Shoney's restaurants, family-style concept with more than 680 locations, of which some 400 are franchised; Captain D's, a quick-service seafood concept founded in 1969, with 607 locations, of which 259 are franchised; and Lee's Famous Recipe, a fast-food chicken concept acquired in 1981, which operates 282 restaurants, 234 of them franchised.

The company's motor hotel division operates 56 franchisee-owned motels under the Shoney's Inn name, of which all but one are franchised.

Shoney's Inc. is a publicly held company traded on the New York Stock Exchange under the symbol SHN. In 1989, it reported record revenue and pretax income before interest expense. Revenues increased 10 percent from $782,086,000 to $860,094,000. Pretax income before interest expense increased 18 percent from $98,094,000 to $115,533,000.

WASHINGTON (MARCH 12) BUSINESS WIRE - U.S.-based software firms experienced enormous growth in Europe and Australia during 1989, the SPA announced Monday.

Twenty U.S.-based software firms, including Lotus, Microsoft, Ashton-tate, WordPerfect, Claris, Software Publishing, Borland, WordStar, Persoft, T/Maker and others participated in the SPA's International Data program.

These firms submitted confidential data to the accounting firm of Arthur Andersen, who prepared the report for the SPA. The data was collected in

18 software categories (including Word Processors, Graphics, Spreadsheets and others) and in six different software formats (including Macintosh and MS-DOS).

The 20 firms reported aggregate software sales of $662 million in Europe and Australia (measured at wholesale in U.S. dollars) for 1989. This represented a growth rate of 46 percent over 1988.

PARIS (MARCH 12) BUSINESS WIRE - With a view to significantly contributing to the ongoing development of the Indosuez markets activities, Dr. Richard L. Sandor has joined the U.S. operations of the Paris-based bank wholly owned by Compagnie Financiere De Suez.

Sandor, a highly distinguished professor of finance, has been a major driving force in the development of financial instruments over the last 15 years.

Banque Indosuez and Sandor have jointly developed a business plan with a view to creating Indosuez International Capital Markets Corp. to provide worldwide risk management services to the corporate and investor community with emphasis on U.S. dollar denominated capital markets and interest rate derivation products.

The bank expects to draw on Sandor's experience as the inventor of interest rate futures. More recently, he was executive vice president, member of the executive committee and board of directors of Drexel, Burnham, Lambert Inc. in charge of the international and domestic fixed income sales and trading operations.

Other talents coming from the bank and through the investment banking community will join the corporation information, whose chairman will be Jean-Francois Lepetit, president of Banque Indosuez, with Sandor being president and chief executive officer.

CHICAGO (MARCH 12) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) announced Monday the award of a $4.5 million instant lottery ticket contract by the Minnesota Lottery to the company's Scientific Games Inc.

division.

In addition to the instant, scratch-off tickets, Scientific Games Inc. will supply game-related services including marketing, public relations, retail outlet training, game security and accounting. The first instant game for Minnesota is expected to be introduced in the spring of 1990.

Scientific Games Inc., is the world's largest supplier of instant lottery tickets: Headquartered in Atlanta, the company supplies instant tickets and other lottery services to several domestic and foreign lotteries. The company recently announced plans to expand its production capabilities with a new printing facility in Georgia.

Roger N. Keesee, president and chief operating officer of Bally Manufacturing Corp., in commenting on the contract award, said, ''We are pleased to add the state of Minnesota to our growing instant lottery ticket customer base. We look forward to assisting in the establishment of the lottery in Minnesota.''

Bally Manufacturing Corp. is a world leader in the leisure industry with four casino hotels, a nationwide network of fitness centers, and a complete line of gaming equipment, fitness products and lottery products and services.

ALEXANDRIA, VA (MARCH 12) BUSINESS WIRE - The management of Kay Jewelers, Inc. (NYSE:KJI) issued the following statement in response to an article published in the Monday, March 12th edition of The Wall Street Journal:

''We take strong exception to some of the issues raised in the Wall Street Journal article published today, and feel compelled to set the record straight at this time. Most disturbing is the contention that 'Kay is running short of cash.' Such a statement is wholly inaccurate. Negative cash flow at this time of year is completely normal for most retailers, and certainly in the jewelry industry.

''Our bank lines are in place, and more than adequate to satisfy seasonal working capital needs. Indeed, Kay Jewelers' current ratio as of December 31, 1989 was 2.1 - to - 1, the strongest level in the Company's history.

''As for our relationships with our vendors, it is important to note that accounts payable as a percentage of inventory as of the end of 1989 declined significantly compared to prior periods. Specifically, accounts

payable as of December 31, 1988 were approximately $60 million, which declined to approximately $22 million at the end of 1989, on higher inventory levels.

''Clearly this suggests that Kay Jewelers is paying its vendors faster, as opposed to the article's contention of 'stretching out its payment schedule'. This is a trend we expect to continue this year. ''In addition there are no payment requirements on our $100 million senior subordinated note due until 1997. Payments on our $50 million senior subordinated notes and other senior debt include a $1.6 million payment due mid-year 1990, and a $5.6 million payment due in December, our strongest cash flow period of the year.

''Relative to inventory, the levels quoted in the article are considerably higher than reality. Moreover, the estimated inventory turnover at Kay Jewelers in 1989 of approximately 0.9 compares favorably with the latest available public figures provided by other major jewelers.

''We also believe that based on a year-end 1989 inventory per store figure of approximately $405,000, Kay Jewelers compares equally favorably to our largest competitors and to the industry as a whole.

The company concluded by noting that audited 1989 results will be released later this week.

ROSEMONT, IL (MARCH 12) BUSINESS WIRE - Travelmaster, the leading travel and entertainment (T&E) expense management system, recorded its best sales ever in 1989, Covia announced Monday.

Travelmaster sales last year totaled $1.3 million, more than doubling the previous annual high. The comprehensive, accounting-based software system was sold to 35 companies, including major firms in manufacturing, communications and consumer goods.

''These strong results are a result of the growing awareness in the corporate community that escalating T&E expenses are a controllable item, and that exercising controls can render significant botton-line results,'' said Lynne Rosenbaum, Covia vice president of marketing.

Rosenbaum noted that many corporations said an important factor in their purchase of Travelmaster was the capability to interface with Covia's Apollo travel reservations system. The interface allows records of each travel agency transaction to be passed automatically to a separate file in the corporate client's travel management system.

''As increasingly sophisticated corporations look at the T&E expense management systems available today, they find only Travelmaster offers the advanced capaabilities, applications and interfaces that really meet all their needs,'' Rosenbaum said.

Travelmaster, introduced 10 years ago, has the largest customer base of T&E expense management systems. Sold to nearly 200 corporations and other organizations, it operates on the widest range of hardware and operating system environments in the industry, and is available in mainframe, minicomputer and personal computer versions.

Travelmaster offers a full-service software solution, addressing all stages of the travel cycle and providing a fully automated interface to a company's general ledger, cost and accounts payable system.

''The response of the marketplace to Travelmaster underscores our belief that the corporate community is indeed ready for and demanding a sophisticated software system to help control T&E expenses,'' Rosenbaum said.

Covia is a worldwide leader in travel management automation designed to maximize convenience, policy control and information while reducing costs. It is a partnership owned by United Airlines, USAir, British Airways, KLM Royal Dutch Airlines, Swissair, Alitalia and Air Canada.

#90071b0827 03/12/1990 ~Business Wire

MEMPHIS, TN (MARCH 12) BUSINESS WIRE - Insituform of North America Inc. (''INA'') (NASDAQ:INSUA) announced that it had executed a letter of intent (the ''Letter of Intent'') with George Erikson and Robert Erikson to acquire their controlling interest in CERBCO Inc. (''CERBCO'') (NASDAQ:CERB), the parent holding company of Insituform East Inc. (''IEI'') (NASDAQ:INEI), INA's exclusive sublicensee of the InsituformR Process for the repair and reconstruction of underground sewers and pipelines in Virginia, Maryland, Delaware, Ohio, the District of Columbia, Pennsylvania, West Virginia and three Kentucky counties.

IEI also holds a 42.5 percent interest in Insituform Midsouth, a general partnership in which INA currently holds a 15 percent interest, which is the exclusive sublicensee of the Insituform Process in Tennessee, the remainder of Kentucky and northern Mississippi.

The Letter of Intent provides that INA would purchase 247,564 shares, or approximately 78 percent, of the outstanding Class B Common Stock, $.10 par value (the ''CERBCO Class B Common Stock''), of CERBCO from George and Robert Erikson for $6,000,000 payable at closing subject to certain holdback provisions.

Under the certificate of incorporation of CERBCO, the CERBCO Class B Common Stock is entitled to elect the remaining directors of CERBCO after the election of not less than 25 percent of the directors by the holders of shares of Common Stock, $.10 par value (the ''CERBCO Common Stock''), of CERBCO voting separately as a class.

The Eriksons will retain ownership of their shares of CERBCO Common Stock, which otherwise votes, generally, together with the CERBCO Class B Common Stock, each share of CERBCO Class B Common Stock having ten votes and each share of CERBCO Common Stock, having one vote.

Accordingly, subsequent to closing, as a result of its ownership of CERBCO Class B Common Stock INA will cast approximately 57 percent of the votes cast on matters other than elections to the board and those matters requiring separate votes by class.

CERBCO, in turn, owns 296,141 shares, or 97 percent, of the outstanding Class B Common Stock, $.04 par value (the ''IEI Class B Common Stock''), of IEI.

Under the certificate of incorporation of IEI, the IEI Class B Common Stock is entitled to elect the remaining directors of IEI after election of not less than 25 percent of the directors by the holders of shares of Common Stock, $.04 par value (the ''IEI Common Stock'') of IEI voting separately as a class.

CERBCO also owns 1,100,000 shares, or 25.5 percent, of the outstanding Common Stock, $.04 par value, of IEI, which otherwise votes, generally, together with the IEI Class B Common Stock, each share of IEI Class B Common Stock having ten votes and share of IEI Common Stock having one vote.

Accordingly, CERBCO casts approximately 55 percent of the votes cast on matters other than elections to the board and those matters requiring separate vote by class.

In addition to its interest in IEI, CERBCO holds controlling interests in businesses engaged in selling, servicing and supplying of products for facsimile and copy machines, and in the provision of engineering, analytical and technical support services to governmental agencies.

The Letter of Intent is subject to execution and delivery of definitive documentation by INA and the Eriksons.

In announcing the Letter of Intent, James D. Krugman, chairman of INA, stated, ''This acquisition, when completed, will be the next step in the continuation of our strategy to more directly bring the members of the Insituform family of companies together.

''We believe this strategy, which is consistent with a logical extension of our policy of continuing involvement with our licensees, will enhance the competitive position of our companies and strengthen our ability to compete in our increasingly competitive marketplace. We look forward as well to the continued active participation of the Eriksons, and of Arthur G. Lang III, the founder and President of Insituform East, in the accomplishment of our mutual goals.''

INA provides state of the art techniques for the reconstruction of deteriorated pipelines utilizing the Insituform Process and soon to be introduced NuPipe Process.

In addition, INA furnished its present network of 13 United States Licensees (including IEI) with the Insitutube, resins and other related product used by the in the rehabilitation of pipeline systems throughout the country, and is as center of research and development for trenchless pipeline rehabilitation processes.

INA serves the needs of America's infrastructure.

CRESTED BUTTE, COL (MARCH 12) BUSINESS WIRE - The Crested Butte State Bank, leveled by an explosion on Tuesday, Mar. 6, is the first financial institution in the country to take advantage of a disaster recovery plan which enabled the bank to reopen in less than a week.

The disaster recovery plan is offered to participating financial institutions by Financial Contingency Systems Inc. (FICON), a division of Pike Safety Co., Colorado's largest independent supplier of security equipment to financial institutions.

Under the plan, the Denver-based company guarantees delivery of a FICON Modular Bank within 72 hours after a disaster occurs. According to FICON President Bob Gregory, ''We first heard about the explosion Tuesday morning, and we had a modular bank in Crested Butte 47 hours later.''

Upon arrival in Crested Butte on Thursday afternoon, Mar. 8, the FICON Modular Bank was leveled and block set in the town's public parking lot. Over the weekend, signage and skirting was put into place, and telephone and electrical services established. The bank reopened for business in the FICON Modular Bank building on Monday, Mar. 12.

Without access to a modular bank, it would take most financial institutions a minimum of ten days to two weeks to adequately equip a facility to reopen for business.

The FICON Modular Bank is designed exclusively for financial use, and includes furnishings and teller lines, full surveillance and security systems, prewiring for electricity and telephones, night depository, cash storage safe, a walk-up window for extended hours, even a copy machine.

The FICON Modular Bank is expected to service the needs of Crested Butte State Bank customers for approximately nine months until the permanent bank can be rebuilt.

This is the first time since FICON began offering the disaster recovery plan in the spring of 1989, that the Modular Bank has been put into use after an emergency. Gregory stated,''We regret the loss of life suffered in the explosion, and we hope we can help the community of Crested Butte through these difficult times.''

At present, FICON's customers are limited to the state of Colorado, but the company's immediate expansion plans call for similar services to be offered to financial institutions in Wyoming, Nebraska and Kansas.

#90071b0833 03/12/1990 ~Business Wire

KANSAS CITY, MO (MARCH 12) (BUSINESS WIRE - The Independent Bankers Association of America (IBAA), representing more than 6,300 member banks across the country, has joined with US Sprint to offer its members up to

10 percent savings on their long-distance telephone calls.

IBAA members will receive a 10 percent discount on out-of-state US Sprint Dial 1 and FONCARD calls between 8 a.m. and 5 p.m.; four percent between 5-11 p.m.; and three percent after 11 p.m. and weekends. Out-of-state Dial 1 WATS rates will be reduced five percent during the day for Association members.

''We are proud that the Independent Bankers Association of America will be able to experience the superior sound quality of US Sprint's fiber-optic network,'' said Craig Sanders, intermediaries marketing group vice president and general manager for US Sprint.

''This is a win-win situation for US Sprint and IBAA. The group's endorsement of our service reflects well on US Sprint, while the IBAA can now offer its members the benefits of high-quality and low costs for all their long-distance calls.''

The IBAA's member banks serve the lending, savings and investment needs of small town and suburban neighborhoods. Members are found in 49 states and the District of Columbia, with the banks locally owned and operated. Headquartered in Washington D.C., the IBAA is the only national association to represent exclusively the interests of the nation's community banks.

The Independent Bankers Association is one of the most recent organizations to take advantage of US Sprint's Association Member Benefit Program. The program enables associations to offer a reduced rate long-distance service to members in return for marketing the US Sprint service within the organization.

US Sprint is a unit of United Telecommunications, Inc., a diversified international telecommunications company based in Kansas City.

WAYNE, NJ (MARCH 12) BUSINESS WIRE - Worldwide Computer Services Inc. (NASDAQ:WCSI) announced Monday that net sales for the year ended Dec. 31, 1989, were $17,744,619 compared to $17,419,894 a year ago.

Net income of $28,201 compared to $371,777 of last year. Earnings per share of 2 cents compares to 21 cents per share for the prior period.

Robert L. Grant, chairman, noted that ''As previously announced, the

termination and severance costs associated with the November 1989 management restructuring, treated under generally accepted accounting principles, negatively impacted the December 31, 1989 final quarter and caused a significant loss in the fourth quarter.''

Grant further stated and concluded with the observation that ''The temporary help industry, particularly the computer sector we serve, is among the country's most rapidly expanding industries. New management has implemented cost controls concentrating on cash generation from operations while matching Worldwide's resources with the market's opportunities to achieve profitable growth.

''The positive results of these actions are already in early evidence in the current quarter to end March 31, 1990, which is expected to post a major improvement over the immediately preceding six months results.

Worldwide Computer Services Inc,. specializes in supplying clients, primarily Fortune 500 companies, with temporary and on-site, computer, software and communications professionals.

SYDNEY, AUSTRALIA (MARCH 12) BUSINESS WIRE - Stuart Fowler, managing director of Westpac Banking Corp. (NYSE: WBK), Monday announced that the bank had reached agreement in principle with IBM on the the marketing of CS90 technology.

Speaking at the IBM Financial Service Executive Institute in Palm Springs, Calif., Tom Hudson, vice president Financial Services Industries for IBM

said, ''We have reached agreement in principle to incorporate Westpac's Core Systems for the 90's (CS90) technologies into the IBM Financial Application Architecture.''

Hudson described the CS90 components as a strategic new technology breakthrough.

Speaking at the same conference, Westpac's General Manager Retail Banking, Alan Hohne, said, ''IBM's adoption of CS90 as a cornerstone of their development platform is a welcome endorsement of the soundness of the investment in this technology made by Westpac.''

The agreement in principle between Westpac and IBM was reached at IBM's Corporate headquarters in Armonk, N.Y., between Westpac's Bill McInnis, chief general Manager Management Services, and Marvin Mann, IBM vice president and president of Services Sector Division.

In a joint statement they said the agreement would represent a substantial financial investment by IBM in the development of application solutions for the whole finance industry.

Once contractual details have been agreed, and the approval of the regulatory authorities (including the United States) obtained, a further announcement will be made.

Westpac Banking Corp. is an international financial services group headquartered in Australia, ranking among the top 100 banks worldwide in terms of assets and the top 50 banks in profitability. In its home markets of Australia, New Zealand, Papua New Guinea and the South West Pacific, Westpac offers a full range of banking and financial services. Specialized services are provided through Westpac Group's offices in Asia, the United States, and Europe. Westpac's operations now extend offshore to 29 countries.

~HL:ETHIOPIAN REBELS OFFER CAPTURED PORT OF MASAWA FOR FAMINE RELIEF EFFORT
NAIROBI (MARCH 12) REUTER - Rebels in northern Ethiopia have offered the captured Red Sea port Masawa as a gateway for a famine relief operation to both government and rebel-held areas.

''The port of Masawa with all its existing facilities and associated network of roads is open and free for emergency relief operations,'' the Eritrean People's Liberation Front (EPLF) said in a letter told U.N. Secretary General Javier Perez de Cuellar.

Ethiopia's Soviet-backed government estimates that 4.5 million people face famine in northern Ethiopia this year as a result of drought aggravated by civil war.

The EPLF urged the United Nations to ''play a leading role in making effective use of the existing facilities and in coordinating all emergency relief operations through Masawa.''

The EPLF telexed a copy of Sunday's letter from London to Reuters in

Nairobi on Monday.

Masawa, once the main gateway for supplies to government- held areas of northern Ethiopia, was captured by the EPLF in mid-February.

Food distribution in the government-held areas of Eritrea has since stopped and all supplies have to be flown into the provincial capital Asmara from the south.

Foreign aid workers who visited Masawa after its capture said the port had been heavily bombed by the Ethiopian air force.

The government has appealed to foreign donors to finance an airlift by 14 large cargo planes from Ethiopia's southern port of Asab to Asmara to relaunch famine relief operations in the reduced area of Eritrea which it controls.

#90071c0053 03/12/1990 ~Comtex
WASHINGTON (MARCH 12) COMTEX - The Securities and Exchange Commission appears to have gained a key ally in its quest for jurisdiction over stock index futures.

Secretary Treasury Nicholas Brady has sent a letter to the Senate securities subcommittee saying the government "needs to rationalize regulatory jurisdiction" of futures contracts on stock indexes.

The Commodity Futures Trading Commission and SEC have fought for years over stock futures regulation. Under an agreemeent reached in 1982, the SEC became the primary regulator of stocks and the CFTC became the primary regulator of stock index futures.

In his letter to the Senate panel, which oversees legislation concerning the SEC, Brady supported giving the SEC oversight of stock index futures. This essentially is what a task force headed by Brady to study the 1987 stock market crash concluded when it said stocks and futures are really

part of one market and should have a single regulator.

Market volatility has been blamed on program trading involving a wide range of computer-assisted portfolio trading strategies. The volatility occurs when investors engage in index arbitrage, the buying or selling of stock baskets while at the same time executing offsetting trades in stock index futures in an attempt to profit from fleeting price discrepancies between the stocks and index futures.

Brady mentioned four possible solutions to the problem in his letter. They include merging the CFTC and SEC, giving the SEC exclusive jursidiction over all futures except those related to tangible commodities, giving the SEC exclusive jurisdiction over stock index futures or requiring higher futures margins.

Brady said that low margins on stock index futures -- good faith money required to initiate trades -- lead to speculation. This in turn "creates the potential for extreme volatility."

Investors in the stock market are presently required to put up at least 50 percent of the cost of their purchases in cash while in the futures market the margin is approximately 5 percent.

SEC Chairman Richard Breeden recently told a Senate panel that having two regulatory bodies for stocks and index futures contributes to market instability.

ANNOUNCEMENT:

On Feb. 27, 1990, Messrs. Paul Laderach and Donald A. Emeigh Jr. were elected to the board of directors of Belvedere Corp.

On Feb. 28, 1990, Messrs. Lloyd C. Briggs, Per Terje Vold, Agnar Langeland and David Cumming were also elected to the board of directors of Belvedere.

These six individuals constitute a majority of the directors, which means Christiania controls Belvedere's board.

STAMFORD, CT (MARCH 13) COMTEX - Aero Systems Inc. has been sued by shareholders who believe that the Miami company violated securities laws when it failed to disclose alleged transactions with Iran in violation of federal export laws.

The complaint, for which the company was served a summons March 7, also alleges that certain Aero executives breached their fiduciary duty when they adopted a non-qualified stock option plan in August 1988, according

to a filing with the Securities and Exchange Commission.

Filed in U.S. District Court for the Southern District of Florida, the suit requests class-action status and names the company and several top Aero officers as defendants.

Although Aeros' legal counsel has not had sufficient time to review and answer the suit, Aero does not believe that it or any of its employees have violated any laws or breached any duties, according to the filing.

STAMFORD, CT (MARCH 13) COMTEX - NGP No. I L.P., headed by an Energy Service Co. subsidiary, on Feb. 23 purchased $49.3 million principal amount of debt and 4.9 percent of the equity of financially troubled Penrod Drilling Corp. from Bank of America National Trust & Savings Association for about $44.4 million.

Dallas-based Penrod, a private company, operates 84 offshore and onshore oil and gas drilling rigs both domestically and internationally.

The company is half-owned by the Hunt family; the other half is owned by the Hunts' creditors.

The limited partners of NGP are The Goldman Sachs Group L.P., Natural Gas Partners L.P., Rainwater Inc. and PMJ Investment Corp., according to a filing with the Securities and Exchange Commission.

The Energy Service subsidiary is general partner of NGP and owns 40 percent of the partnership.

A separate partnership with the same limited partners acquired a similar Penrod position last November.

As a result, the two partnerships now own about 27.1 percent of Penrod's debt and 13.6 percent of the company's equity.

The partnerships are continuing to review the possibility of buying a larger Penrod interest, which is exploring various restructuring and recapitalization alternatives.

STAMFORD, CT (MARCH 13) COMTEX - Hialeah, FL-based Viragen Inc. has signed an agreement with Molecular Genetic Resources Inc. to sell Viragen's DNA amplification enzyme, known as Thermophilic DNA Polymerase, which is used to treat a variety of diseases.

Viragen and MGR will jointly develop and own the rights to TDP.

All costs for its manufacture will be borne by Viragen, according to a filing with the Securities and Exchange Commission.

MGR has agreed to pay all costs to market TDP and to buy it only from Viragen.

Viragen has also entered a research agreement with the University of Miami, Department of Neurology, relating to a state-approved, patient-funded multiphase clinical trial of human leukocyte interferon, which Viragen produces, in the treatment of multiple sclerosis.

The initial phase of the program is expected to last one year and involves 72 multiple sclerosis patients, who will receive different doses of Viragen's Alpha Leukoferon product.

Under the program, patients will be paying the university $15 per million units of human leukocyte interferon.

BUCHAREST (MARCH 12) - Executed Romanian dictator Nicolae Ceausescu's three children and their spouses are to be tried by a military court here in late April or early May, a source close to the court told Agence France-Presse Monday.

The three are Nicu, Valentin and Zoia Ceausescu.

All six are charged with "undermining Romania's national economy". They face possible sentences of 15 to 20 years in prison at the least, but could receive life in prison.

Nicu Ceausescu, the only one involved in politics, is also accused of "complicity in genocide", the source said.

Former President Ceausescu and his wife Elena were executed on December 25 after a brief but bloody popular uprising.

JOHANNESBURG (MARCH 12) - South African politicians cannot afford to delay economic change so they can spend time sorting out the political future, the South African Chamber of Business (SACB) warned here Monday.

An SACB survey concluded that even if political change were to win the country back a place in the international community, freeing credit lines,

the problem of an acute skill shortage would remain.

"It is imperative that attention be given to the whole structure and provision of education in South Africa now," the report said. "The shortage of housing, and the infrastructure surrounding such houses is another area that requires urgent attention."

Zach de Beer, parliamentary leader of the white liberal opposition Democratic Party, told an audience here Monday that the insistence by some African National Congress leaders on "clinging" to the idea of nationalization to generate wealth had alarmed the business community. He said the non-racial democracy to be negotiated in South Africa must be capable of rapid economic growth.

STOCKHOLM (MARCH 12) - Nelson Mandela, the paramount symbol of the struggle against apartheid, held an emotional reunion with his one-time law partner and comrade-in-arms Oliver Tambo at a Stockholm hospital on Monday.

Mr. Mandela, who arrived earlier in the day to a welcome fit for a head of state, was accompanied by Swedish Foreign Minister Sten Anderson to the bedside of Mr. Tambo, the titular head of African National Congress who has been in hospital here since the beginning of the year after suffering a stroke.

At the airport to welcome Mr. Mandela at the start of his first European visit since he was released from a South African jail last month were Mr. Anderson, Archbishop Bertil Werkstroem of Uppsala, head of the Lutheran Church, and a delegation of members of parliament.

Several African ambassadors, Lisbet Palme, widow of assassinated prime minister Olaf Palme, and members of the Free Mandela Committee also turned out to greet him.

Mr. Mandela's announced reason for coming here is to see Mr. Tambo, who he has not seen in nearly 30 years. The two men had set up a law practice together in the early days of their long crusade against the injustices of white supremacy in South Africa.

The details of the conversation between the two old men, both aged 71, had yet to emerge Monday evening, but they were believed to have discussed the possible return to South Africa of Mr. Tambo, described as improving but still exhausted.

Mr. Mandela is also here to hold talks with Swedish Prime Minister Ingvar Carlsson, who invited him personally to Sweden.

Diplomats said Mr. Mandela would meet several Scandinavian foreign ministers at a Wednesday evening dinner to be hosted by Mr. Carlsson. Finnish Foreign Minister Pertii Paasio has already said he will attend the dinner.

#90071d0770 03/12/1990 ~French/German News Agency

JOHANNESBURG (MARCH 12) - Three students were shot and seriously wounded in Bohlokong black township in the Orange Free State on Monday on their way back from discussing funeral arrangements for a murdered friend.

Methodist minister the Reverend S. Mabunda told the South African Press Association unknown gunmen had shot the three as they returned from a meeting at the Thabo Thokoza school to arrange the funeral of a friend shot dead in the township, near Bethlehem, on Friday.

Police said details of the shooting would be released in Tuesday's "unrest" report from Pretoria.

The United Democratic Front (UDF) warned here Monday that if the government continued the "repressive" tactics which saw police detain 89 activists in the Orange Free State last week then it could "easily provoke riotous behaviour."

UDF publicity secretary Patrick "Terror" Lekota urged President Frederik de Klerk and Law and Order Minister Adriaan Vlok to "think again before the situation deteriorates."

The Detainees Support Committee issued a statement at its ninth anniversary meeting here Monday declaring it would be satisfied with nothing less than the release of the 3,000 prisoners it has identified as political.

Max Coleman, chairman of the Human Rights Commission, told the meeting the government should stop "creating" political prisoners by jailing those who resisted a system of government condemned by the whole world.

In strife-torn Natal province the Azanian People's Organization on Monday complained that the warring Zulu Inkatha movement and the United Democratic Front had excluded AZAPO from talks aimed at ending the violence which has claimed close to 3,000 lives in three years.

AZAPO put out a statement saying that its own members were being killed in the violence, objecting to the UDF's tendency of lumping AZAPO casualties together with its own.

The UDF supports the African National Congress and its socialist-orientated

1955 Freedom Charter, while AZAPO is strictly socialist and rejects the ANC's notion that whites can help in the "liberation struggle."

Accusing Inkatha of using the Natal townships as battlegrounds for political dominance, AZAPO also attacked the UDF for turning its youthful followers, who clung to the discredited philosophy of "liberation before education", into professional thugs.

Pointing to the failure of ANC leader Nelson Mandela's peace plea in Natal's port city Durban on February 25, AZAPO said the ANC had "perhaps ... lost control of its members in Natal."

In Nyanga black township near Cape Town on Monday a black special constable was critically wounded when attackers wrested his shotgun from him and blasted him twice in the face.

Police also arrested some 30 demonstrators who had gathered in Cape Town city center for an illegal meeting to protest price hikes, amid claims by organizers that they had been leaving peacefully at the time.

Parliament in Cape Town on Monday passed a law banning guns from political rallies.

Defending the Dangerous Weapons Amendment Bill against charges by the far right Conservative Party that it was aimed only at white organizations, Mr. Vlok, the Law and Order Minister, said the government would not let the presence of guns at meetings sour open debate.

"We don't want people getting hot under the collar, drawing their firearms and endangering lives," he said.

Supporting the bill, Lester Fuchs, a Johannesburg member for the liberal Democratic Party, denounced "the ugly spectacle" of supporters of the neo-fascist Afrikaner Resistance Movement (AWB) wearing sidearms at their meetings, and slammed ANC supporters for taking wooden replica guns to rallies.

#90071d0820 03/12/1990 ~French/German News Agency

NEW YORK, UNITED NATIONS (MARCH 12) - The U.N. Security Council has so far been unable to fix a date for a debate on the settlement of Soviet Jewish emigres in Israel's occupied territories, informed sources said Monday.

The sources said there was an effective end of week deadline for the debate because U.N. Secretary General Javier Perez de Cuellar will be leaving here Saturday to participate in next week's Namibian independence celebrations.

Palestine Liberation Organization (PLO) chairman Yasser Arafat has proposed the debate be held Wednesday.

The debate was requested several weeks ago by the Soviet Union following protests by several Arab states at Israel's plans to settle immigrants from the Soviet Union in the occupied territories.

Official figures show that 60,000 Jews left the Soviet Union last year. Some 12,500 went to Israel including 108 who were settled in the occupied territories.

When it does meet, the Security Council will debate a Soviet resolution that the council "deplores the intentions of the government of Israel to settle immigrants in the occupied territories."

The Soviet resolution maintains that the settlement of these immigrants in the occupied territories is "contrary to the provisions of the fourth Geneva Convention, particularly article 49, which prohibits the occupying power to deport or transfer parts of its own civilian population into the territory it occupies."

#90071d5970 03/12/1990 ~French/German News Agency

WELLINGTON (MARCH 12) - New Zealand on Monday banned the export of native woodchip, logs and sawn timber.

Under a forestry policy announced in a statement by Prime Minister Geoffrey Palmer, the only exceptions will be where timber is taken from an area managed under a certified, sustained-yield management plan.

The policy will be attractive to the growing "green" lobby in an election year. The sale of native beech, in particular, as woodchip to Japan has been controversial for several years.

Mr. Palmer said the government had moved decisively on an issue of major environmental concern.

"Originally, more than 80 per cent of the country's land was covered in native forests. Now only one-third of that remains," he said.

One million hectares (2.47 million acres), or one-sixth of the remaining indigenous forests, were held privately. Of this, about 2,000 hectares (4,940 acres) a year were felled, and in many cases were being converted to grass or exotic tree species, or were being abandoned.

"The destruction has got to stop. The government's policy will ensure that

we maintain or enhance our total area of indigenousd forests," Mr. Palmer said.

He said the objective was to maintain or enchance in perpetuity the current area of indigenous forest.

"At present, indigenous forests are logged for low end-value uses, such as building-grade timber and woodchips. That is a waste of a valuable resource," he said.

#90071d6480 03/12/1990 ~French/German News Agency

MANILA (MARCH 12) - Additional car manufacturers will be allowed to enter the Philippine market, now dominated by three Japanese giants, in the small-engine category, the Department of Trade and Industry (DTI) said Monday.

New car makers will be allowed to compete against Toyota, Nissan and Mitsubishi under the "people's car" program, intended to bring cars within the reach of the middle class, an official statement said.

The program would cover cars with engine displacements of less than 1,200 cc to be sold at a target of 175,000 pesos (7,709 dollars) each.

The cheapest brand-new car in Manila costs about 260,000 pesos (11,453 dollars), and it can take weeks or months for delivery because demand has outstripped supply since the economy recovered in 1986.

#90071d6650 03/12/1990 ~French/German News Agency

BEIJING (MARCH 12) - The Chinese government will continue this year to bail out a troubled auto industry that has failed to reach its production targets, the China Daily newspaper said Monday.

The government released frozen loans last year to support the sector, mostly made up of joint ventures with overseas vehicle manufacturers.

The State Council (cabinet) has authorized the Bank of China to grant one billion yuan (212 million dollars) in loans to the Ministry of Materials and Equipment for its "rescue purchasing plan" for auto firms faced with sluggish sales and mounting stockpiles, the English-language daily said.

Of this, some 380 million yuan (80.5 million dollars) will be allocated to carmakers stuck with as many as 10,000 unsold vehicles, the paper said, citing a Chinese National Automotive Trade Corp. (CNATC) official.

The CNATC will also use the loans to snap up 4,990 unsold vehicles.

These will include cars made at joint venture firms, such as the Charade of Japan's Daihatsu-Nissan, the Santana by the West German firm Volkswagen, the pickups built with France's Peugeot, Cherokee jeeps constructed by Sino-U.S. firm Beijing Jeep Corp. (BJC) and West German Audi cars.

"The government is buying the stockpiled products from those stockpile-ridden enterprises in a bid to stimulate the sluggish home market this year," the CNATC official said.

The government announced last year that it planned use central bank loans to buy 7,440 vehicles built in joint venture factories with overseas automakers. The China Daily said it had bought barely 3,000.

Overseas automakers with plants here have faced great difficulties under an economic austerity programme launched by the government in September 1988, and cars are currently considered luxury goods.

The slowing down of the sector has seen China cut its output target in 1990 by 50,000 to 510,000 units, mostly trucks and utility vehicles.

The three top foreign firms established in China, Volkswagen, BJC and Peugeot, cut back production last year due to growing stockpiles.

Most Western industry experts have reckoned that there is little mid-term future for the passenger car in China.

#90071d6860 03/12/1990 ~French/German News Agency

TOKYO, March 12 (AFP) - Japanese capital investment is expected to slow from an estimated growth rate of 17.4 percent in the current fiscal year to 8.6 per cent in the year beginning in April, Japan Development Bank said Monday.

The government-owned bank said a February survey of 1,960 major companies found that investment in plant and equipment was expected to reach 24.74 trillion yen (163 billion U.S. dollars) in fiscal 1990.

Manufacturers plan to boost investment by 10.1 per cent to 10.13 trillion yen (66.6 billion dollars) while non-manufacturers are planning a 7.6 per cent increase to 14.61 trillion yen (96.1 billion dollars), it said.

#90071d6870 03/12/1990 ~French/German News Agency

LEIPZIG, East Germany (MARCH 12) - West German auto maker Volkswagen and the makers of East Germany's Trabant are to link up in a five billion Deutsche mark (2.95 billion dollars) car production project in East Germany.

The project, with IFA-Combinat PKW of East Germany, which makes the Trabant, will be producing some 125,000 cars a year by 1994, Volkswagen president Carl Hahn told a press conference during an industrial fair at Leipzig in East Germany.

Before the end of this year the plant at Mosel near Zwickau in the south will be turning out 50 cars a day of a Polo-style model.

Initially the Mosel plant will assemble cars using parts from West Germany and Spain but by 1994 it will be producing all the parts.

Volkswagen and IFA also announced that they planned to set up a joint retail company in East Germany to sell Trabants and Volkswagen models, including the Audi and SEAT.

Opel, the West German subsidiary of U.S. auto giant General Motors, had announced in Leipzig at the weekend that it had set up a joint venture with East German auto maker Aubomobilwerke Eisenach, which makes the Wartburg model,
aiming to produce 150,000 cars a year in East Germany.

A third West German auto maker, Mercedes-Benz, said in West Berlin that it planned long-term cooperation in the truck sector with East German truck maker IFA-Kombinat Nutzkraftwagen.

#90071d6880 03/12/1990 ~French/German News Agency

TOKYO (MARCH 12) - Japan's Nikko Securities Co. Ltd. said Monday it had developed a new index to reflect the performance of the entire Japanese securities market and not just stocks or bonds.

"Until now, there has been no index which covers the whole securities market," the company said, noting that it would help investors, such as pension fund managers, to measure the performance of their diversified portfolios.

The new barometer, known as the Japan-Mix Index, takes into account prices for five types of securities favoured by Japanese investors.

Japanese stocks currently account for 52.3 percent of the index, while bonds account for 24.6 percent, followed by short-term financial instruments such as certificates of deposit and commercial paper with 11.1 percent.

Foreign bonds have a weighting of 8.9 percent, followed by convertible Japanese bonds with 2.2 percent and foreign stocks with 0.9 percent.

The index, which uses a base figure of 100 points for the end of 1979, stood at 339.56 points at the end of January.

Japan currently has two main indexes for measuring share prices: the Nikkei Stock Average of 225 selected stocks, and the broader Tokyo Stock Price Index of all stocks listed on the first section of the Tokyo Stock Exchange.

Several bond market indicators also exist.

#90071d7020 03/12/1990 ~French/German News Agency

LEIPZIG, East Germany (MARCH 12) - Lithuania is hoping to attract a large number of joint ventures since Sunday's moves to restore full independence had paved the way for a market economy, a senior Lithuanian official has said here.

The vote in the Lithuanian parliament to restore full independence means that "barriers to a market economy will be lifted," the East German news agency ADN quoted Aloizas Tarvidas, the director of Lithuania's trade fair centre, as saying.

Mr. Tarvidas, who is representing Lithuania at an industrial fair currently under way in Leipzig, said he hoped that the changes would lead to "a wave of joint ventures" being set up there.

Foreign investment alone will enable the region to make "significant economic progress," Mr. Tarvidas added.

He said that 30 joint venture agreements had already been signed by

Lithuanian and foreign firms, adding that the region was mainly seeking economic partners in Scandinavia, Austria and the Netherlands.

But it was also interested in restoring ties with German businesses which existed before the annexation of Lithuania by the Soviet Union in 1940.

#90071d7120 03/12/1990 ~French/German News Agency

LONDON (MARCH 12) - British retail sales rose 2.4 percent in February over the January level, after a revised 0.9 percent fall the previous month, it was officially announced here Monday.

The February rise was well above market expectations of an increase of only 0.2 percent.

Initial figures for January had shown a 1.3 percent fall over the December level.

Wholesale prices were up 0.4 percent in February over the January level, and 5.4 percent on a year on year basis, according to non-seasonally adjusted figures, the Central Statistics Office said.

The increase was steeper than market forecasts of a 0.3 per cent rise over the previous month.

The Office also revised the January wholesale price increase upwards to 0.9 percent over the December level from an initial estimate of an 0.8 percent rise, with the year on year increase up 5.3 percent against an earlier estimate of 5.2 percent.

HONG KONG (MARCH 12) - Cable and Wireless Plc said here Monday it would upgrade its stake in its giant local subsidiary, Hong Kong Telecom, by 3.4 per cent for 1.7 billion Hong Kong dollars (218 million U.S.)

The deal would be struck with the Hong Kong government, which has agreed to sell half of its current 6.8 percent holding in locally listed Telecom, the British telecommunications concern said in a statement.

The transaction agreement would be made within four weeks, amid the finalisation of another deal under which a Beijing investment vehicle would buy a 20 percent stake in Telecom from Cable and Wireless, the statement said.

The Chinese purchase was announced by the local branch of the state-owned

China International Trust and Investment Corp. (CITIC) for 10 billion dollars (1.28 billion U.S.). Nineteen international banks have agreed to take part in the financing package for the CITIC purchase.

At the end of the day, Cable and Wireless, currently owning 75.2 percent of Telecom, would hold 58.6 percent of its Hong Kong subsidiary, the statement said.

Telecom is the British colony's biggest firm in terms of capitalisation, accounting for some 17 percent of the local stocks' key barometer, the Hang Seng Index.

BONN (MARCH 12) - West German sports shoe maker Puma said Monday that it would start production in East Germany in April in a venture with East German company VEB Sportschuhfabrik Ilmia.

The East German partner will make two types of football boot designed by Puma specially for the East German market, but the two sides could later also agree on production of children's footwear, Puma said.

Ilmia employs 250 people and has a production capacity of some 320,000 pairs a year. Its sales last year totalled 43 million Ost marks (25.5 million dollars).

KUALA LUMPUR (MARCH 12) - The Malaysian economy registered an 8.5 per cent growth rate in 1989 against an official forecast of 7.5 percent, Trade and Industry Minister Rafidah Aziz said Monday.

The 1989 remarkable achievement was made without leading to inflation, Bernama news agency quoted Ms. Rafidah as saying.

Ms. Rafidah said a robust growth of private investments had indirectly contributed to the higher economic growth rate. Private investments contributed strongly to the manufacturing sector's 10.5 percent expansion last year.

The manufacturing sector accounted for 25.6 percent of the gross domestic product (GDP) last year.

Malaysia's GDP expanded at 8.9 percent in 1988 and was expected to slow down to 6.5 percent this year.

#90071d7380 03/12/1990 ~French/German News Agency

SYDNEY (MARCH 12) - Australia's diversified industrial conglomerate BTR Nylex Ltd. looks set to post an annual profit of more than 500 million Australian dollars (378 million U.S.), analysts said Monday.

But the market is curious about what cash-rich BTR Nylex, which recently raised 660 million dollars (499 million U.S.) in capital, is planning after it announces its results for 1989 on Tuesday following more than five years' of deramatic growth.

Ken Fleming of James Capel Australia is predicting a profit of 505 million dollars (382 million U.S.), 60 percent up on the previous year's 315.5 million dollars (239 million U.S.).

The acquisition in late 1988 of Feltrax Ltd., a carpet and building materials company with operations in the United States, was expected to help boost the result, he said.

But a flat performance by the group's operations in Taiwan, The China General Plastics Group, would retard profit growth, Mr. Fleming said.

The result would also include the first full year from glass-maker ACI International Ltd.

The diversity of the group - from glass and plastics to textiles and engineering - had helped the company cope with Australia's economic downturn, analysts said.

They noted speculation that Alan Jackson, BTR Nylex managing director, had been looking at acquiring U.S. fibreglass giant Owens Corning.

There have also been suggestions that Mr. Jackson may make a bid for paper and packaging group Amcor Ltd.

BTR Nylex currently has about 60 per cent of its operations in Australia and one Ord Minnet analyst said "Jackson would probably be happier with 5050."

It cut its debt to around 400 million dollars (303 million U.S.) in December with a 660 million dollar (499 million U.S.) issue of convertible preference shares and non-maturing notes.

BTR Nylex has shareholders' funds of 3.6 billion dollars (2.7 billion U.S.), and analysts believe it is getting ready for a series of buys in North America, Asia and Australia.

They have tipped a profit of between 494 million dollars (374 million U.S.) and 510 million dollars (386 million U.S.).

#90071d7640 03/12/1990 ~French/German News Agency

PARIS (MARCH 12) - French electrical equipment group Schneider said Monday it was to acquire a 53.3 percent stake in leading Canadian electrical and transformer retailer Federal Pioneer Corp.

Schneider said it also planned to launch a takeover offer for the remaining Federal Pioneer shares at 15 Canadian dollars a share, giving a total value to the purchase of 294 million dollars (247 million U.S.).

It is acquiring the 53.3 percent stake from Enfield Corp. of Canada.

Federal Pioneer has a one third share of the Canadian electrical and transformer retail market, with more than 400 sales outlets, and had a turnover of 287 million Canadian dollars last year.

The Schneider acquisition is subject to the approval of the Canadian authorities.

TOKYO (MARCH 12) - Japanese companies' acquisition of large tracts of land for plant and offices hit a 16-year high last year, the government said Monday.

The International Trade and Industry Ministry said that the number of sites in Japan of 1,000 square meters or more bought by Japanese firms was 4,143 in 1989, up 17 percent from 1988.

The total area of such land acquisitions jumped 22 percent to 4,700 hectares (11,600 acres), the ministry said, adding that both the number and total area were the highest since 1973.

Ministry officials attributed the brisk land purchases to increased capital spending by manufacturing firms.

#90071d8080 03/12/1990 ~French/German News Agency

LAGOS (MARCH 12) - Nigeria will keep up its campaign for debt service reduction among its foreign creditors and international financial institutions, the Finance and Economic Development Minister, Chief Olu Falae, said here Monday.

The aim of the government's campaign is to allow the nation's economy to have enough foreign exchange necessary for its growth and development, the minister told members of the finance correspondents association of Nigeria.

The collapse of the oil market, a product that accounts for over 95 percent of Nigeria's total foreign earning, and the decline in the per capital income of Nigerians in the last few years qualifies the nation to be classified among the poorest countries in the world, he noted.

Nigeria's foreign external debt is currently estimated at 29 billion dollars, he said, adding that due to the fact that the debt is owed in various currencies and the daily fluctuation of these currencies, it would be difficult to get the exact external debt figure.

#90071d8240 03/12/1990 ~French/German News Agency

LEIPZIG, East Germany (MARCH 12) - West Germany's third largest bank, Commerzbank, said Monday that it planned to open 10 branches in East Germany as soon as possible.

Commerzbank board member Axel von Ruedorffer told a press conference at the Leipzig trade fair that the bank planned to open branches in East Berlin, Leipzig, Dresden, Erfurt, Karl-Marx-Stadt, Halle, Gera, Magdeburg, Frankfurt-on-Oder and Rostock.

The bank opened an office in East Berlin in mid-January.

The branches would deal with private and business clients, Mr. von Ruedorffer said.

Some 1,300 Commerzbank staff had expressed an interest in working in East Germany, but most jobs there would be offered to East Germans, he added.

#90071d8450 03/12/1990 ~French/German News Agency
FRANKFURT, West Germany (MARCH 12) - West Germany had a balance of payments surplus of 1.01 billion Deutsche marks (601 million dollars) in January, according to provisional figures announced here Monday.

West Germany had a balance of payments deficit of 825 million Deutsche marks (491 million dollars) in December, and a cumulative deficit for 1989 of 19 billion Deutsche marks (11.3 billion dollars).

The turnaround in January was due to several factors, with the current account showing a surplus of four billion Deutsche marks, and the deficit in the capital balance halved from 13.1 billion Deutsche marks in December to 6.4 billion.

West German direct investment abroad was also halved, to 2.7 billion Deutsche marks in January from 6.3 billion in December.

But foreign investment in the stock market totalled some 2.8 billion Deutsche marks, around the December level, as foreign investors continued to buy into West German companies in the hope of reaping the benefits of economic reforms in Eastern Europe, particularly East Germany.

#90071d8680 03/12/1990 ~French/German News Agency
PARIS (MARCH 12) - A private French radio station is to broadcast in French to the Soviet Union for five hours a day under a new agreement with Radio Moscow.

Herve Bourges, president of Radio Nostalgie, announced the deal here Monday. The agreement will take effect in May and is to last 15 years, he said. It was signed by Alexander Plevako, vice-president of Gosteleradio of the Soviet Union, and Mr. Bourges.

Radio Nostalgie's programs will be broadcast in French, but the Soviet partners will be allowed to insert Russian advertisements and news bulletins.

The programs, re-transmitted by Radio Moscow, are expected to reach up to 20 million listeners in a 1,000-kilometre (600-mile) radius of Moscow.

Radio Nostalgie is investing some 2.2 million French francs (392,000 dollars) in the scheme, and expects to set up a joint venture with Radio Moscow next year.

#90071d9490 03/12/1990 ~French/German News Agency
BUCHAREST (MARCH 12) - Some foods are to be rationed in the Braila district in southeast Romania, notably sugar which has been snapped up for producing home-made liquor, the Romanian news agency Rompress said Monday.

Flour and vegetable oil will also be rationed to one kilo (2.2 pounds) per person per month, the agency said.

Food distribution had improved since the execution of Romanian dictator Nicolae Ceausescu at the end of December, but because of a shortage of alcohol people had been buying up sugar to make their own, leading to a shortage, Rompress said.

It did not say how long the rationing would last.

SANTIAGO (MARCH 12) - At least 79 policemen and 120 civilians were injured in violent disturbances which broke out overnight in the Chilean capital where hundreds of thousands of people celebrated the swearing in of President Patricio Aylwin.

Interior Minister Enrique Klaus told reporters Monday that 10 of the 79 policemen and 17 of the civilians injured in Sunday's incidents were in serious condition.

During a visit to officers hospitalized after the disturbances, Klaus also said dozens of people had been arrested in the violence, which broke out as Aylwin made an informal speech to hundreds of thousands of supporters hours after the swearing-in ceremony.

Witnesses said Sunday that members of the crowd celebrating close to the capital's Moneda Palace turned on the police, who responded with tear gas and water cannon, while demonstrators in an eastern district blocked roads and damaged vehicles.

The minister blamed the incidents on people being drunk or under the influence of drugs and warned that the new government would clamp down on any fresh outbreaks of violence.

Aylwin took over office Sunday from military ruler Gen. Augusto Pinochet, ending 16 years of dictatorship.

#90071f2078 03/12/1990 ~United Press International
NEW YORK (MARCH 12) UPI - A federal judge Monday stayed until March 19 a temporary restraining order barring the Reuters news agency from terminating a news photo agreement with United Press International.

UPI is seeking a preliminary injunction prohibiting Reuters from breaching an agreement through which UPI clients in the United States receive

Reuters' pictures from abroad and Reuters' clients outside the United States receive UPI domestic news photos.

U.S. District Judge Peter Leisure issued a temporary restraining order Feb. 27 that prohibited London-based Reuters from stopping the flow of news photos to UPI clients as it did for four hours and five minutes Feb. 16. He said he was prepared to rule Tuesday on the request for a preliminary injunction.

If Leisure denies the preliminary injunction, the stay would give UPI an opportunity to appeal the decision or seek an alternative to the Reuters photo feed without interrupting foreign photo service to UPI clients until March 19.

Mitchell Karlan, an attorney for UPI, said the Washington-based news agency would apply for an expedited appeal or a further stay with the 2nd U.S. Circuit Court of Appeals if Leisure denied the motion for a preliminary injunction.

Reuters, claiming a deterioration in the volume and quality of UPI's newspictures, announced Feb. 16 it was terminating the five-year-old contract. Reuters then filed suit seeking to recover what it claimed was the additional cost of supplementing UPI's domestic photo service. UPI, in a counterclaim to the Reuters suit, sought an injunction and damages of at least $1.6 million.

After hearing arguments from both sides, Leisure said he would deny the application for the preliminary injunction because UPI had not demonstrated it would suffer irreparable harm if Reuters terminated the news photo agreement.

At that point the UPI attorney called UPI Chairman Earl W. Brian, who testified that the termination of the photo exchange agreement between the two news agencies would "destroy" UPI's ability to market its picture service. After hearing Brian's testimony, Leisure issued the one-week stay of the temporary restraining order.

"Newspapers in the country are vitally interested in foreign news photos," Brian said. "Without them, they will consider UPI's picture service incomplete." He said the UPI news photo service, which now is "slightly profitable," would suffer "massive losses" if the photo exchange pact were terminated.

Brian said UPI had held talks with Agence France-Presse about the possibility of providing UPI with foreign news pictures, but the negotiations have been unsuccessful because AFP said it would only enter into a three-month-long agreement.

Karlan, the UPI attorney, argued that without a preliminary injunction, UPI "will lose a large portion of their photo customers immediately, substantially more in the first three months and all of them after three months."

Robert G. Sugerman, an attorney for Reuters, said "it makes no sense" to say "customers and clients will cancel today if I can't tell them I have a long-term supply of foreign pictures. "Newspapers are not interested in foreign pictures in six or 12 months. They're interested in foreign pictures tomorrow," Sugarman said.

UPI claimed in court papers filed last week that Reuters used the ten-year photo-exchange agreement that took effect in January 1985 as a "cover" to encroach on UPI's market and put UPI newspictures out of business.

Reuters, in responding court briefs, called UPI's claims a "conspiracy theory." Any U.S. expansion plans by Reuters were permitted under the contract and were based on a belief UPI probably would go out of business, Reuters said.

Last week UPI filed for arbitration of a claim that Reuters has deprived UPI of revenues by supplying former UPI customers with Reuters' photo service. In its request to the International Chamber of Commerce Court of Arbitration in Paris, UPI said Reuters is obligated to reimburse UPI for any revenues it loses as a result of UPI subscribers switching to Reuters' photo service. UPI is seeking damages of more than $600,000 in the claim.

KUWAIT (MARCH 12) XINHUA - PALESTINIAN PRESIDENT YASSER ARAFAT HAS CALLED FOR A HIGH-LEVEL ARAB PARTICIPATION IN THE U.N. SECURITY COUNCIL MEETING DUE TO CONVENE ON MARCH 14 TO DISCUSS THE SOVIET JEWISH EMIGRATION TO OCCUPIED PALESTINE.

IN AN INTERVIEW WITH THE KUWAITI DAILY "AL-ANBA" PUBLISHED TODAY, ARAFAT STRESSED THAT THE ARABS WOULD ASK FOR STRONG RESOLUTIONS ON THE EMIGRATION ISSUE AT THE SECURITY COUNCIL MEETING AND WOULD DEMAND A U.N. GENERAL ASSEMBLY RESOLUTION IN CASE OF A U.S. VETO.

HE CLAIMED THAT ISRAEL IS PLANNING TO BUILD "A GREATER ISRAEL" THAT STRETCHES FROM THE EUPHRATES TO THE NILE RIVER.

ARAFAT WARNED THAT THE SOVIET JEWISH EMIGRATION TO OCCUPIED PALESTINE IS DIRECTED AGAINST THE ARAB NATION AS A WHOLE, SAYING THE ARABS SHOULDER GREAT RESPONSIBILITY FOR HALTING THE INCREASING JEWISH IMMIGRATION TO OCCUPIED PALESTINE, PARTICULARLY IN LIGHT OF THE CLASHED THAT TOOK PLACE IN OCCUPIED JERUSALEM TWO DAYS AGO IN WHICH SEVERAL PALESTINIANS WERE KILLED AND SCORES INJURED BY ISRAELI TROOPS.

THE LATEST WAVE OF SOVIET JEWISH IMMIGRATION STARTED LAST YEAR WHEN 12,000 JEWISH IMMIGRANTS ARRIVED IN ISRAEL.

ISRAELI LEADERS HAVE SAID THEY EXPECT UP TO 750,000 SOVIET JEWS TO COME TO ISRAEL THIS DECADE AND 230,000 OF THEM WILL ARRIVE THIS YEAR.

MANILA (MARCH 12) KYODO - AT LEAST 35 PEOPLE WERE KILLED WHILE SCORES SERIOUSLY WOUNDED WHEN TWO OVERLOADED PASSENGER BUSES FIGURED IN SEPARATE ACCIDENTS IN THE NORTHERN AND SOUTHERN PHILIPPINES, AUTHORITIES SAID MONDAY.

SEVENTEEN PERSONS INCLUDING CHILDREN DIED WHILE 20 WERE SERIOUSLY WOUNDED WHEN A MINI-BUS LOADED WITH PASSENGERS UP TO ITS ROOF DECK FELL INTO A DEEP RAVINE SUNDAY AFTERNOON IN THE RURAL TOWN OF ROSELIER LIM, ZAMBOANGA DEL SUR, SOME 780 KILOMETERS SOUTHEAST OF MANILA, THE CONSTABULARY SAID.

MANILA RADIO STATION DZRH, MEANWHILE, REPORTED THAT 18 PERSONS WERE KILLED AND SEVERAL WOUNDED MONDAY WHEN A PASSENGER BUS CRASHED IN VILLA AURORA, AURORA PROVINCE, SOME 150 KILOMETERS NORTHEAST OF MANILA.

LT. COL. POCAWA DIA, THE ZAMBOANGA DEL SUR CONSTABULARY COMMANDER, SAID THE MINI-BUS WAS DESCENDING A HILL WHEN IT DEVELOPED MECHANICAL TROUBLE, SENDING IT DOWN A DEEP RAVINE.

THE WOUNDED WERE BROUGHT TO HOSPITALS WHERE AUTHORITIES SAID THE NUMBER OF FATALITIES MAY RISE BECAUSE FIVE OF THE INJURED WERE STILL FIGHTING FOR THEIR LIVES.

DIA SAID THE ACCIDENT COULD HAVE BEEN PREVENTED HAD THERE BEEN ENOUGH PUBLIC TRANSPORT IN THE AREA.

THE DZRH REPORT, MEANWHILE, SAID SURVIVORS OF THE ACCIDENT IN AURORA PROVINCE BLAME THE MISHAP ON THE BUS DRIVER WHOM THEY SAID CONTINUED DRIVING DESPITE A MECHANICAL PROBLEM THAT HAD EARLIER BROUGHT THE BUS TO A HALT ALONG ITS ROUTE.

THE SURVIVORS SAID MOST OF THEM WERE NOT ABLE TO JUMP OFF THE BUS BECAUSE IT WAS OVERLOADED.

#90071p0002 03/12/1990 ~PR Newswire

DENVER (MARCH 12) PR NEWSWIRE - Generation 5 Technology Inc. (NASDAQ: GFIV) today announced that Permatrack Systems and Generation 5 Technology (Canada) Inc. have successfully completed a demonstration Georaphic Information Systems Project for the Skytrain Design and Constructon Office of B.C. Transit. The base Geo/SQL software provided by Generation 5 Technology was enhanced by Permatrack Systems Inc. of Vancouver, B.C. with an application (SkyMAP) tailored to meet the needs of light and rapid transit systems.

According to Liew, GEO/SQL has demonstrated that end users, with limited computer expertise, can easily access and create a variety of system specific charts and graphs. As-Built information on trackwork, linear induction motor (LIM) rails, power rails and Automatic Train Control (ATC) cables were consolidated into a computerized database. This integrated system of mapping and textual data permits management more efficient access to as-built documentation and maintenance records. Maintenance staff, using a series of pull down menu's can locate items such as faulty welds and can then, with a single key stroke review the contract specifications, the detail drawing and even a digital photograph of the

problem.

Lance Maidlow, president of Generation 5 Technology Inc. Ltd. (Canada), commented that "The development of the SkyMAP application for Geo/SQL was a model for effectuve GIS implementation. The B.C. Transit staff were able to verbalize the type of information management problems they were encountering, and Permatrack, with their specialized knowledge of LRT design, were able to specify new features which would add to the overall funtionality of the Geo/SQL software. These were added to the overall software by Generation 5 Technology staff and will thus be available to all Geo/SQL users in subsequent releases of the software.

Generation 5 Technology and Generation 5 Technology (Canada) Ltd. are pacesetters in the emerging fields of Automated Mapping, Geographic Information Systems (GIS), and Facilities Management, and operate under a joint marketing agreement. Generation 5 has distinguished itself by being the first to develop sophisticated computer mapping and GIS software which takes advantage of the nearly-ubiquitous AutoCAD computer graphics system; the "AutoCAD-Integrated" Geo/SQL and MunMAP GIS software environments allow low-cost desktop 386 PCs, PS/2s, and 32-bit desktop workstations to be linked with complex database applications running on mainframes and minicomputers.

Generation 5 Technology is a publicly held company.

CONTACT: Dan Hinckely of Generation 5 Technology Inc., 303-427-0055; or Lance Maidlow of G5 Canada, 403-455-9197.

#90071p0004 03/12/1990 ~PR Newswire

COSTA MESA and SAN DIEGO, CA (MARCH 12) PR NEWSWIRE - Archive Corp. (NASDAQ: ACHV) and Cipher Data Products Inc. (NASDAQ: CIFR) jointly announced today that they have entered into a definitive merger agreement.

Under the agreement, Archive's subsidiary, CAC Corp., will promptly amend its pending cash tender offer for all Cipher shares to increase the price from $7.50 to $8.25. It is expected that revised tender offer materials will be mailed to Cipher's stockholders this week.

If the offer is completed, Archive will, subject to certain conditions, be obligated to acquire the remaining equity interest in Cipher through a cash merger at the same price.

The amended tender offer will be conditioned upon, among other things, the tender of a number of Cipher shares which, when added to the 4.6 percent CAC currently owns, represents a majority of the fully diluted shares. On March 8, 1990, CAC announced that, as of the most recent extension of its

original tender offer, the number of tendered shares, together with its own shares, aggregated approximately 85 percent of the outstanding Cipher shares.

The amended tender offer will also be subject to the availability of sufficient financing to complete the transaction and pay all related fees and expenses. Archive has obtained a commitment letter from Barclays Bank p.l.c. and Barclays has indicated that it expects to execute a definitive credit agreement with Archive by the end of this week. The drawdown of the funds will be subject to a number of standard conditions.

Founded in 1980, Archive today is a leading manufacturer and supplier of data backup products to original equipment manufacturers and resalers. Archive and its subsidiary, Maynard Electronics, offer a complete selection of 1/4-inch cartridge and 4MM DAT tape drives, cassette and 8MM helical scan tape drives sub systems, and software for both DOS and APPLE computers. Archive's products provide economical data backup for fixed disc drive and perform additional functions as program loading, deal distribution and archival storage.

Cipher is a multi-national corporation that designs and manufactures magnetic tape peripherals and optical disk drives supporting the removable information storage needs of computer systems. Cipher is a leading independent supplier of tape drives, including half-inch cartridge, half-inch reel-to-reel, and quarter-inch cartridge 3-1/2 and 5-1/4 inch form factor streaming tape drives. Its Optimem subsidiary in Mountain View, Calif., is a leading American supplier of write-once optical disk drives.

#90071p0009 03/12/1990 ~PR Newswire

MIAMI (MARCH 12) PR NEWSWIRE - Three Andean resorts -- Argentina's Las Lenas and Chile's Valle Nevado and Chillan -- have been packaged by 4th Dimension Tours in a summer ski program in effect from June through October.

Las Lenas, a relatively new resort, is used for training French, Swiss and American Olympic ski teams. The ski complex at Chillan is one of the most attractive in Chile and has the largest lift in South America. Valle Nevado is an up-and-coming resort that already compares favorably with the finest in Europe and the U.S. The nine- and 10-day 4th Dimension packages offer weekly departures and a choice of accommodations ranging from dormitory bunks to hotels to apartments. Rates include round-trip air from Miami, New York or Los Angeles.

The 11 lifts at Las Lenas can handle 9,200 skiers an hour but its hotel and apartment capacity is only 3,000, so skiers have plenty of elbow room. The resort, which averages 250 inches of snow a year, offers 40 miles of downhill trails, 10 miles of cross-country trails, uninterrupted runs of almost five miles, guided out-of-bounds skiing and a vertical drop of more than 4,000 feet.

The 10-day package, which provides a day at leisure in Buenos Aires en route to the resort, is priced from $1,562 per person double at the moderate-class Geminis Hotel, from $1,762 at the first-class Escorpio or Acuario, from $1,893 at the superior-class Aries and from $2,183 at the deluxe Piscis, all including American breakfast and dinner. Apartments and chalets are available with or without meals at rates from $1,282 for each of four to eight people and from $1,482 for each of two.

Chillan skiers are based at Termas de Chillan, a handsome complex combining a ski resort and hot springs. The hotel's facilities include a fitness center with massage, thermal baths, sauna and four mineral water swimming pools. Situated at an altitude of 5,900 feet, the resort offers runs from easy to very difficult with a maximum vertical drop of 2,300 feet.

Continental breakfast, lunch and dinner are included in rates starting at $1,223 per person for a bunk in dormitory-style accommodations. Double-occupancy rates begin at $1,370, suite rates at $1,640.

Valle Nevado's more than 33 square miles of slopes provide terrain for both beginners and experts. Twenty-five runs, which are constantly groomed, are now served by eight modern lifts; future plans call for hundreds of miles of runs and more than 50 lifts. The resort also offers heli-skiing.

CONTACT: Carol Zaiser, 212-724-2116, or Ewen Gillies, 212-724-7695, of Gillies and Zaiser, for 4th Dimension Tours.

#90071p0034 03/12/1990 ~PR Newswire

NEW YORK (MARCH 12) PR NEWSWIRE - Total volume of private placements reached $170.7 billion in 1989, a 3.8 percent increase over the 1988 figure of $164.4 billion. Private placements accounted for 35.5 percent of the financing volume for both public and private markets during 1989 (publicly underwritten securities totaled $309.8 billion) compared to 37.4 percent during 1988 (publicly underwritten securities totaled $274.9 billion). The growth rate in private placements for 1989 was relatively sluggish compared to the double digit rates during the decade (private placements in 1980 was $15.9 billion). However, it is likely to increase in the 1990's as the private placement market becomes more lucrative with

the passage of Rule 144A.

Goldman Sachs & Co. captured the number one position as agent/advisor for overall private placement in the year ended Dec. 31, 1989 with $22.8 billion credited for a 13.4 percent market share. First Boston Corporation retained its rank of second position with $19.5 billion or 11.5 percent market share, while Salomon Brothers, J.P. Morgan and Shearson Lehman Hutton improved their standings relative to 1988 by each capturing at least 8.0 percent of the market. Drexel Burnham Lambert, despite its demise, finished 1989 with a strong 6th position, credited with $12.8 billion or 7.5 market share compared to $16.5 billion or 10.1 percent market share in 1988. However, Drexel Burnham Lambert turned in an impressive performance in acquisition- related private placements for the number on post with $7.7 billion credited or 33.3 market share.

A boom in ESOP-related private placements during 1989 contributed significantly to the overall private placement volume totals. ESOP-related private placements amounted to $16.8 billion in 1989 compared to $1.7 billion in 1988. This rush to the market place was attributed to changes in the federal tax code relating to ESOP financing. Goldman Sachs captured first position with $4.3 billion credited or 25.5 percent market share. First Boston placed second with $3.7 billion or 22.2 percent market share while J.P. Morgan showed an impressive third with 17.1 percent of the market or $2.9 billion. All other segments such as lease-related, acquisition-related, securitized and plain vanilla private placements remained relatively flat compared to 1988 in terms of total placement volume.

#90071p0036 03/12/1990 ~PR Newswire

PHOENIX, AZ (MARCH 12) PR NEWSWIRE - StatesWest Airlines Inc. (NASDAQ: SWAL) reported February 1990 passenger enplanements were 9,076, up 46.3 percent compared to 6,204 for February 1989. The carrier's February 1990 traffic capacity was 4,387,311 available seat miles (ASM) producing a load factor of 42.9 percent. ASM's for February 1989 totaled 3,565,331 producing a load factor for that period of 35 percent. Traffic increased 50.8 percent to 1,882,522 revenue passenger miles compared to 1,248,216 for February 1989.

StatesWest is one of the largest regional air carriers in the country not owned or totally affiliated with a major carrier. The company owns approximately 7.34 percent of Mesa Airlines Inc. (NASDAQ: MESA), a regional airline carrier headquartered in New Mexico.

The company operates one of the newest fleets of regional prop-jet

aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County and San Diego, along with the Arizona cities of Phoenix, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca, and Laughlin, Nev./Bullhead City, Ariz., and Telluride Colo. StatesWest operates 63 daily departures between these locations.

STATESWEST AIRLINES SUMMARY OF OPERATING RESULTS

	February 1990	February 1989	Percent Change
Passengers Enplaned	9,076	6,204	+46.3
Available Seat Miles (ASM)	4,387,311	3,565,331	+23.1
Revenue Passenger Miles (RPM)	1,882,522	1,248,216	+50.8
Passenger Load Factor (percent)	42.9	35.0	(Pts) +7.9

#90071p0037 03/12/1990 ~PR Newswire

MOUNTAIN VIEW, CA (MARCH 12) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced that it has called its $50 million eight percent Convertible Subordinated Debentures due 2004 for redemption on April 11, 1990 at a redemption price of 108 percent of their principal amount plus accrued interest.

Until the redemption deadline, the bondholders may elect to convert the Debentures into shares of the company's common stock at the conversion price of $23.18 per share. The bonds must be converted at Banque Generale Du Luxembourg prior to close of business on April 11, 1990. Upon conversion a holder of $5,000 principal amount of Debentures would receive 215.7 common shares (with cash in lieu of fractional shares) which at the Friday, March 9 closing common stock price of $33.75 per share would have a aggregate value of $7,280. This compares to the $5,514 receivable upon redemption.

Conversion of the bonds into common stock will increase the number of shares used to calculate primary earnings per share by the number issued upon conversion (2,157,000 if fully converted). This will be largely offset by a corresponding reduction in interest expense. Conversion will have no effect on the company's reported fully diluted earnings per share since they are already being treated as though converted for the purposes of calculating fully diluted EPS.

Silicon Graphics Inc. is a leading manufacturer of visual processing

workstations that combine high-performance computing with real-time 3D graphics capabilities. Its workstations are used primarily by firms in the engineering, scientific, creative design, animation, and visual simulation markets. The company's stock trades on the New York Stock Exchange under the symbol SGI.

#90071p0038 03/12/1990 ~PR Newswire

EL MONTE, CA (MARCH 12) PR NEWSWIRE - The Vons Companies Inc. (NYSE: VON) announced today that the company reported net income of $3 million, or $.08 per share for the 12 week quarter ended Dec. 31, 1989, compared with a net loss of $16.2 million or $.42 per share in the comparable 1988 period. Sales in the fourth quarter were $1,244.1 million compared with $1,176.6 million a year ago, a 5.7 percent increase.

Same store sales increases in the 1989 fourth quarter in the acquired stores were 10.9 percent and, excluding the acquired stores, were 5.5 percent versus the same period a year ago.

For the year ended Dec. 31, 1989, the company had sales of $5.2 billion compared with sales of $3.9 billion, a 33 percent increase. The sales increase primarily reflects the benefit from the Safeway acquisition.

For the year, same store sales in the acquired stores increased 9.7 percent and, excluding the acquired stores, increased 4.3 percent in 1989. Sales per selling square foot in 1989 in the acquired stores were $564 and, excluding the acquired stores, were $711.

For the year, the company reported a $25.1 million net loss or $.65 per share compared with a net loss of $23.9 million or $.77 per share a year ago. Losses in both 1988 and 1989 primarily reflect the impact of the acquisition and integration expenses. Operating cash flow (defined as operating income plus depreciation and amortization of property, amortization of goodwill and other assets and LIFO charge) was $157.7 million or three percent of sales for the 1989 year versus $106.3 million or 2.7 percent of sales in 1988. For the fourth quarter, operating cash flow was $41.1 million or 3.3 percent of sales compared with $21.6 million or 1.8 percent of sales for the comparable prior year period.

The ratio of operating cash flow to cash interest expense in 1989 was 2.05 and in the fourth quarter was 2.52. At year end, the company had unused lines of credit of $161.4 million.

Results in 1988 and 1989 include one-time costs of approximately $11.9

million and $23.8 million, respectively. One-time costs include costs associated with the Safeway integration and write-downs associated with the disposition of certain long-term assets. In the fourth quarter 1989, one-time costs were $11.1 million.

In 1989, the company's cash capital expenditures were $63.6 million, which were used primarily to fund six new store openings and the company's remodel and upgrade programs. During 1990, the company anticipates a similar level of capital spending.

Vons, headquartered in El Monte, is the largest retail supermarket chain in Southern California. At year-end the company operated 328 stores under the names Vons, Pavilions, Pavilions Place and Tianguis. The company also operated the Jerseymaid dairies and ice cream plants. The Vons Companies Inc. is traded on the New York Stock Exchange under the symbol VON.

NEW YORK (MARCH 12) PR NEWSWIRE - Reliance Group Holdings, Inc. (NYSE: REL) today announced that it had reached a definitive agreement for the sale of its General Casualty Companies subsidiary to Winterthur Swiss Insurance Company for $630 million in cash.

Upon completion of the sale, expected in the second quarter of 1990, Reliance will realize a pretax gain of approximately $380 million. The transaction is subject to regulatory approvals and other customary closing conditions.

General Casualty, headquartered in Sun Prairie, Wis., writes personal and standard commercial lines of insurance in a ten-state region in the Midwest. Premiums written by General Casualty in 1989 were approximately $400 million.

Commenting on the sale, Saul P. Steinberg, Reliance Group's chairman and chief executive officer, said: "General Casualty has earned a reputation as one of the premier regional underwriters and has performed exceptionally well, underscoring the intrinsic value we have built in the company. However, the offer by Winterthur is very attractive, and thus we determined that the sale is in the best long-term interests of Reliance and its shareholders."

"The transaction will have a major positive impact on Reliance Group Holdings and our ongoing insurance operations," Steinberg said. "Our debt-to-equity ratio will be lowered considerably, thereby strengthening

our balance sheet and giving us more financial flexibility. At the same time, policyholders' surplus of our insurance group will increase by approximately $300 million, providing additional capacity for us to pursue future growth opportunities," he said.

Reliance's other property and casualty insurance operations include Reliance Insurance Company, which writes a wide range of coverage nationwide through about 3,000 independent agents; Reliance National, which writes specialty and large accounts business through insurance brokers; Reliance Reinsurance, and Reliance Surety. Total premiums written by these operations in 1989 were approximately $1.40 billion. Also included in the company's insurance group are United Pacific Life Insurance Company and Commonwealth Land Title Insurance Company.

Winterthur is an international insurance and financial services company based in Switzerland. It reported gross premiums of $6.92 billion in 1988 of which $745 million came from its U.S. operations -- Republic Insurance Group, Allied Financial Group, Southern Guaranty, and Winterthur Reinsurance Corporation of America.

BOSTON (MARCH 12) PR NEWSWIRE - The U.S. Small Business Administration (SBA) for Region I announces the selection of AIM Welding Supply as Subcontractor of the Year for New England.

Located in Auburn, Mass., AIM Welding Supply, a division of AIMTEK, Inc., is a national distributor of welding machines, welding and safety supplies brazing alloys and industrial gases.

"We are very pleased to recognize AIM Welding Supply as the Subcontractor of the Year in New England. The high standards of the company set an example of customer service, excellence, workmanship quality, commitment and determination," says Acting Regional Administrator Joseph D. Pellegrino. "AIM Welding Supply is an ideal American small business."

AIM Welding Supply was nominated by Textron Lycoming of Stratford, Conn. The award takes such factors under consideration as: management; financial stamina and controls; labor relations; customer interface; technical capability; resource utilization; and cost, delivery and quality performance.

Founded in 1978 by Amar and Ani Kapur, AIM Welding Supply is a 100 percent small, disadvantaged firm. The company started business with one local customer and now has over 600 customers in 19 states throughout the

country. This year they plan to export to Europe and Asia.

Region I, one of 10 SBA regions, is responsible for assisting, counseling and championing small business in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont. Certified by Congress in 1953, SBA's mission is to help people get into business, help them stay in business, help small firms win federal procurement contracts, help victims of natural disasters and act as a strong advocate for small business.

#90071p0045 03/12/1990 ~PR Newswire

JACKSON, MI (MARCH 12) PR NEWSWIRE - Consumers Power company announced today that it is voluntarily ending the annual collection of $79 million in special "financial stabilization" rate revenues approved by the Michigan Public Service Commission (MPSC) almost five years ago to avert bankruptcy from financial problems related to an abandoned nuclear plant.

The proposed rate reduction will result in an immediate 5-percent rate decrease for the company's over 3 million electricity consumers throughout the state. This will result in electric rates for Consumers Power customers well below national and regional averages and more than 25 percent below Michigan's other major electric utility.

William T. McCormick Jr., chairman and chief executive officer of Consumers Power Company, commended the MPSC for "acting responsibly and wisely to help management chart a path to recovery by providing and maintaining this special rate assistance during the company's most critical period of recovery."

He stated that the termination of "financial stabilization" revenues is

appropriate now that the utility has met the debt reduction target of $1.9 billion set by the MPSC in its 1985 rete order establishing the surcharge.

"While full financial recovery is still to be achieved, Consumers Power has reached the point where an extraordinary rate surcharge is no longer necessary," he continued.

McCormick said that the rate reduction will have no impact on the company's earnings since these revenues have been reserved and never contributed to income. They will also constitute return of capital on the abandoned portion of the Midland nuclear plant. The "financial stabilization" revenues collected since 1985, which amount to about $434 million before tax, will be offset against Consumers Power's ultimate rate recovery in pending MPSC rate proceedings involving abandoned Midland nuclear plant assets, which is expected to be completed near the end of 1990.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90071p0048 03/12/1990 ~PR Newswire

NEW YORK (MARCH 12) PR NEWSWIRE - John T. Lynch has been elected president of Towers Perrin, one of the world's largest management consulting and reinsurance organizations, the company announced today. He succeeds James E. Kielley in the post. Kielley, who had been president and chief executive officer, has been named to the position of chairman and CEO.

Lynch will succeed Kielley as CEO by the end of this year. Kielley will continue as chairman until he reaches his normal retirement date on Jan. 1, 1992.

Lynch, 41, has served since 1986 as manager of the New York consulting office of TPF&C, a Towers Perrin company; more recently, he was appointed manager of the TPF&C Metropolitan New York Region. An actuary, he has been with the firm for 13 years. Kielley, 58, has had a career that spans more than three decades with Towers Perrin.

Towers Perrin had overall 1989 revenues of more than $680 million. Revenues from consulting operations amounted to $650 million, placing it among the very largest management consulting organizations worldwide.

Lynch, a Towers Perrin director, joined the firm in Washington in 1977 and transferred to Pittsburgh in 1979. He was elected a principal in 1982 and, that year, was named manager of the Pittsburgh office. Lynch was elected a vice president in 1984, appointed New York office manager in 1986, elected a director in 1988 and named Metropolitan New York Region manager in 1989.

He is a fellow of the Society of Actuaries, a member of the American Academy of Actuaries, a member of the Conference of Actuaries in Public Practice, and an enrolled actuary under ERISA. Lynch received a B.A. degree (1970) from the State University of New York at Albany.

Kielley joined Towers Perrin in 1957 in the firm's Philadelphia consulting office. He was named manager of the Los Angeles office in 1966 and manager of the New York office in 1969. Kielley was elected a principal of the firm in 1965, a vice president in 1968, a member of the board of directors in 1970, executive vice president in 1974, president in 1981 and chief executive officer in 1988.

Towers Perrin is based in New York. It has more than 5,000 employees in offices in 60 cities worldwide. One of the oldest and largest organizations in its field, Towers Perrin traces its roots back through several predecessor firms to 1871. It was incorporated in its present form in 1934. A unified firm owned by active employees, Towers Perrin serves more than 8,000 clients globally, including more than 750 of the 1,000 largest U.S. industrial companies and service companies.

#90071p0055 03/12/1990 ~PR Newswire

TUSTIN, CA (MARCH 12) PR NEWSWIRE - Luther Medical Products Inc. (NASDAQ: LUTH) announced today that they have served a $13.2 million patent infringement lawsuit against K-Tube of San Diego. K-Tube is a part of the Cook Group Companies from Indiana. Luther's lawsuit names K-Tube as a contributory patent infringer of Luther's patents for splittable-needle products used for intraveneous catheters.

"This patent is particularly important to us since we have an exclusive contract with Critikon (a Johnson and Johnson Company) for us to supply them with the product covered by our patents. Those patents are the ones K-Tube is infringing," indicated Ron Luther. "I will not let K-Tube, Cook, or anyone else start making something I invented and patented without first obtaining a license. We have in fact negotiated and issued such a license to one of the nation's largest and most successful medical companies in addition to Critikon on this particular patent. That company sought and received the license after a possible infringement was called to their attention. Cook however continues to willfully infringe."

The products employ a unique splittable needle design for which Ron Luther the product's inventor, has received considerable notoriety, and upon which he founded Luther Medical Products in 1980.

One of Luther's splittable needles is used to manufacture Micro Catheters. Those catheters are used primarily in the treatment of premature infants enabling a physician to deliver lifesaving nutrients via an intravenous catheter. Prior to Luther's invention, surgical techniques were frequently required in order to feed the infants.

Luther Medical Products Inc. designs and manufactures unique catheters (its president holds more current patents involving catheter technology than any other individual in the world) including the Stickless Catheter created to minimize the risks of transmittable diseases to health caregivers and sold by the Johnson & Johnson company Critikon under the trademark PROTECTIV.

#90071p0056 03/12/1990 ~PR Newswire

SALT LAKE CITY (MARCH 12) PR NEWSWIRE - American Stores Company (NYSE: ASC) today announced net earnings for the 1989 53 week fiscal year of $118,129,000, or $3.45 per common share, a 20.2 percent increase compared to $98,251,000, or $2.54 per common share, in the 1988 52 week fiscal year. Fourth quarter net earnings increased to $53,127,000, or $1.61 per common share in 1989 compared to $20,232,000, or $.52 per common share in 1988. The results of Lucky Stores Inc. are included from June 2, 1988.

Sales increased 14.0 percent to $6,142,156,000 for the 1989 14-week fourth quarter when compared to the 1988 13-week fourth quarter. Comparable 52 week like store sales increased 5.69 percent in 1989. Like store sales for the fourth quarter increased 4.66 percent in 1989 on a comparable 13-week basis.

Operating profits increased to 35.8 percent to $603,527,000 for the year ended Feb. 3, 1990, compared to $444,339,000 reported in the prior year. The 1989 fourth quarter operating profits increased 45.4 percent to $196,711,000 compared to $135,271,000 in the 1988 fourth quarter. Operating profits for all of the company's major subsidiaries exceeded amounts reported in the 1988 fiscal year for both the year-to-date and the fourth quarter. Lucky Stores and American Food and Drug reported the strongest annual improvements in operating profits.

The fourth quarter operating profits include a pretax charge of $32,500,000, or $.61 per common share in 1989, compared to a pretax charge of $20,000,000, or $.40 per common share in 1988, for the company's Salmonella litigation. The litigation is related to the 1985 Salmonella incident at the company's Jewel Companies Inc. subsidiary. The pre-tax LIFO charge to earnings amounted to $57,588,000, or $1.09 per common share in 1989 as compared to $58,224,000, or $1.19 per common share in 1988.

Earnings per common share in the third quarter of 1988 were increased by $.99 per common share from a terminated defined benefit plan and were reduced by a charge to increase insurance reserves at an inactive captive insurance company in the amount of $.41 per common share.

American Stores Company's principal grocery and combination store operating subsidiaries include American Superstores Inc. and its subsidiaries Acme Markets Inc., Jewel Foods Stores and Star Market Company; American Food and Drug Inc., and its divisions, Skaggs Alpha Beta and Buttrey Food Stores; Jewel Osco; Lucky Stores Inc., and Alpha Beta Company. American Stores Company's drug subsidiary is American Drug Stores Inc., which operates under the Osco Drug and Sav-on names. The company operated 1,894 retail food, drug and combination food/drug stores (including 141 Jewel and Osco combination stores) in 40 states as of Feb. 3, 1990.

#90071p0058 03/12/1990 ~PR Newswire

MILWAUKEE (MARCH 12) PR NEWSWIRE - Universal Foods Corporation (NYSE: UFC) announced that it has executed a defintive agreement to sell its Cheese Division to INVUS Group, Ltd., the North American acquisition and development arm of Belgium-based R.T. Holding S.A. The announced sale to INVUS Group, Ltd. follows the expiration of a previously announced letter of intent from the division's current senior management to purchase the business. The sale should be completed by the middle of April.

Commenting on the announcement, Guy A. Osborn, president and chief executive officer, said "We believe that the sale to INVUS Group will be a positive move for all parties involved. The proceeds realized from this sale will be used to support the continued growth of Universal Foods's other businesses, both through expansion of current operations and through acquisition of other companies. We continue to see outstanding growth opportunities in several of the company's lines of business and plan to aggressively expand those business segments domestically and internationally. The current results in the company's operations, as well as those growth opportunities, allow us to be very confident of maintaining earnings growth above the average of the food industry during the next few years.

"INVUS Group has indicated that it does not intend to make any major changes in the operation of the business but, in fact, intends to use it as a base upon which to continue building long-term value in the industry. We are also pleased to know that the buyer intends to keep the division's headquarters operations in Wisconsin."

The family-owned R.T. Holding has an equity base of over $1 billion. R.T.'s sales in the United States exceed $1 billion, all in the food industry, with particular emphasis in the baking and cheese sectors. Through International Cheese Co., R.T. Holding owns other cheese companies in Wisconsin, Vermont, and Massachusetts, with combined annual sales of approximately $250 million. Universal's Cheese Division will add approximately $200 million more in annual sales.

Universal Foods is an international manufacturer and marketer of value-added food products. These include the food flavors, food colors, the world's most diversified lines of frozen potato and yeast products and dehydrated vegetables.

SEATTLE (MARCH 12) PR NEWSWIRE - IMRE Corp. (NASDAQ: IMRE) today announced that the company has initiated two new clinical trials with the PROSORBA(R) treatment column already FDA marketing approved for the autoimmune bleeding disease immune thrombocytopenic purpura.

A breast cancer trial, jointly sponsored by the National Cancer Institute (NCI) and IMRE, is being conducted at Memorial Sloan-Kettering Cancer Center in New York. This trial will be administered by the NCI Cancer Therapy Evaluation Program.

An autoimmune disease trial will test the PROSORBA column in the treatment of myasthenia gravis, a neuro-muscular disease which affects over 100,000 patients in the United States. This is a multicenter clinical trial being conducted at the Mount Sinai Medical Center in New York City and Englewood Hospital in Englewood, New Jersey.

"We are pleased to begin these trials as they support the company's effort to expand the market for the PROSORBA column in cancer and autoimmune diseases and the NCI's efforts to evaluate new treatments for cancer," said Dr. Frank R. Jones, IMRE's chairman and chief executive officer.

IMRE Corp. is a Seattle-based medical products company that is considered a pioneer and the leader in the field of immunoadsorption, a process of treating a diseased patient's blood outside the body. In December 1987, the company received U.S. Food and Drug Administration marketing approval for the commercial sale of the PROSORBA column which it markets directly in the United States.

#90071p0077 03/12/1990 ~PR Newswire

DETROIT (MARCH 12) PR NEWSWIRE - Ford Motor Company (NYSE: F) today set very competitive prices for the all-new 1991 Ford Escort, which will go on sale April 26. The manufacturer's suggested retail base price is $7,565 for the Escort Pony.

The Escort, providing best-in-class value with world-class quality, will be offered in three models: a two-door hatchback (Pony, LX and GT), a four-door hatchback, and a station wagon.

The retail price of an average-equipped base-Escort model, including destination and delivery charges and the preferred-equipment package most likely to be chosen by customers, reflects an average increase of 2.5 percent over the 1990 model. This ranges from an increase of six-tenths of a percent on the two-door LX model to 7.6 percent on the GT.

"The new Escort provides tremendous value for the buyer, with improvements in exterior styling, fit and finish, interior space and functional features that set a new standard in value for the money," said Tom Wagner, Ford vice president and general manager of Ford Division.

"For example, the suggested retail price of the 1991 model LX four- door hatchback -- comparably equipped -- will be $680 under the 1990 Honda Civic DX; $993 under the 1990 Toyota Corolla DX, and $1,995 below the 1990 Geo Prizm four-door hatchback.

"The LX station wagon represents another dimension of Escort's practicality, and will be an important element of Ford Division's dual goal to re-establish Escort as the No. 1-selling vehicle in America and to continue to be the industry's wagon leader," Wagner said.

"Price of the 1991 model station wagon -- comparably equipped -- will be $804 under the '90 Honda Civic wagon; $1,063 under the '90 Toyota Corolla DX wagon, and $784 below the '90 Nissan Sentra XE wagon."

As part of the pricing strategy, there will be substantial suggested retail discounts on the preferred-equipment packages offered on 1991

Escort models, ranging from $500 to $744. The various packages include such popular options as air conditioning, rear-window defroster, speed control and tilt steering column.

"And to help simplify the customer's purchase decision -- and to enhance the Escort's value -- several high-installation-rate options on the previous model have been made standard equipment on the 1991 Escort," Wagner pointed out, "including five-speed manual transmission and tinted glass."

For example, standard on the high-volume LX series are AM/FM stereo radio, electronic digital clock, split folding rear seat, and full wheel covers.

Following are the base manufacturer's suggested retail prices of the 1991 Escort:

Escort	1991 MSRP
Pony Two-Door Hatchback	$ 7,565
LX Two-Door Hatchback	8,247
GT Two-Door Hatchback	11,063
LX Four-Door Hatchback	8,674
LX Station Wagon	9,259

WILMINGTON, DE (MARCH 12) PR NEWSWIRE - The trustees of the BRNF Liquidating Trust today announced an agreement in principle for the sale to Federal Express Corp. of twenty 727-200 aircraft, 19 spare engines and certain equipment and spare parts previously under lease from the Trust to Braniff Inc.

The agreement is subject to final approval by the board of directors of Federal Express and by the trustees and is subject to the Hart-Scott-Rodino Act. The delivery of aircraft is scheduled to begin in March and to be completed prior to year-end.

The amount to be realized by the sale will be affected by a number of factors, including various expenses, satisfaction of substantial liens existing from obligations of Braniff, adjustments to the value of the assets due to the level of servicability, and to the attrition of rotable spare parts. The trustee's tentative and preliminary estimate is that the net sale proceeds would be in the range of $170 and $175 million.

CLEVELAND (MARCH 12) PR NEWSWIRE - Fabri-Centers of America, Inc. (NYSE: FCA) today reported all time record operating results for the full year and final quarter.

Sales of $333,347,000 in the year ended Jan. 27, 1990 were 15 percent above the $290,862,000 recorded in 1989. Net income increased 72 percent to $8,760,000, or $1.70 per share, versus $5,093,000, or $1.01 per share a year ago in spite of substantial investment spending for new and remodeled stores.

Fourth quarter sales totalling $105,959,000 were the strongest of any quarter in the company's history, up 17 percent from the $90,269,000 total in the same prior year period. Net income also achieved a new quarterly high, rising 66 percent to $6,702,000, or $1.30 per share, compared to $4,032,000, or $.80 per share in last year's final period.

Alan Rosskamm, president and chief executive officer, said the company's strong sales performance stemmed mainly from its program of relocating smaller stores in mall locations to larger stores in destination-oriented, strip shopping centers. In 1990, this on-going program resulted in the opening of 58 large stores, the closing of 70 small stores and the expansion/remodeling of 41 existing stores. Rosskamm added that the larger stores accommodate a substantially wider merchandise assortment that is being well received by customers. The larger stores also provide operating economies of scale, a strategic element in Fabri-Centers' cost control program.

Rosskamm said further progress was made in repositioning the company's Cargo Express houseware store operation, which showed a modest operating profit for the year. Four new stores were added while two stores were remodeled during the year. He said further, that a carefully targeted expansion of Cargo Express is planned for the year underway.

Fabri-Centers' operates 615 fabric stores in 35 states and 15 Cargo Express houseware stores in Ohio.

NEW ORLEANS, LA (MARCH 12) PR NEWSWIRE - Avondale Industries Inc. (NASDAQ: AVDL) announced today that its board of directors has authorized management to repurchase up to 1.0 million shares of its common stock or approximately 6.5 percent of its 15.6 million shares outstanding.

Stock purchases under this program may be made in the open market or in privately negotiated transactions. Timing of purchases, number of shares purchased and prices paid under the program will be at the company's discretion, based upon prevailing market conditions and legal limitations. Any shares repurchased will become treasury stock and will be used for general corporate purposes.

Albert L. Bossier Jr., chairman of the board and president of Avondale said: "We believe that our stock at current prices, is an outstanding value and one of the best investments that we can make at this time. We are currently paying quarterly cash dividends of $.23 per share, producing an attractive dividend yield at current prices. The board of directors also believes this stock repurchase program is consistent with its overall objective of enhancing stockholder value."

Avondale Industries Inc., headquartered in metro New Orleans, is one of the nation's leading marine fabricators. In addition to its shipbuilding operations, the company specializes in boat and LCAC construction and is a major repair contractor for commercial and Navy ships. It is also involved in the modular construction of plants and components for a variety of land-based industries.

ATLANTA (MARCH 12) PR NEWSWIRE - National Data Corp. (NASDAQ: NDTA) and Marine Midland Bank, N.A., have entered an agreement giving NDC responsibility for the bank's merchant credit card processing business.

Marine Midland will continue to accept merchant deposits and settle

accounts throughout its branch network. In turn, NDC will perform all merchant accounting, credit card authorization, data capture, customer service and support. NDC will operate from offices in Buffalo, Rochester and Syracuse, N.Y.

As the credit car processing business has become more technology dependent several banks have turned over their merchant portfolios to National Data a company specializing in electronic processing services, said Mark L. Braunstein, NDC president.

In the past two years, National Data has acquired the merchant portfolios of Chemical Bank in New York, First Pennsylvania, First Maryland, Texas Commerce Bancshares, Bank of New England and Birmingham, Ala.-based AmSouth.

Like the other banks before it, Marine Midland will remain close to the merchants involved.

"We continue to support the merchant business," said Alan Eugley, general manager, merchant processing, Marine Midland. "This partnership with National Data will allow us to offer state-of-the-art products and services to our merchant customers without incurring the operational expenses associated with merchant processing. Marine can concentrate on our customers and rely on NDC to provide top quality merchant processing services at competitive prices."

Marine Midland Bank currently provides payment processing and payment services to more than 11,000 merchants in New York state and through agent banks throughout the country.

National Data Corp. provides business solutions requiring timely access to critical information to the retail, financial, healthcare and communications markets worldwide.

HERNDON, VA (MARCH 12) PR NEWSWIRE - EDS announced today it has signed a $45 million, seven-year contract with the U.S. Small Business Administration (SBA) to operate a data processing center in the Washington area.

Under the contract, EDS (Electronic Data Systems) will provide processing services for SBA loans, minority business designation applications and congressional inquiries. More than 1,700 terminals at SBA offices around

the country will be served by the center in Fairfax, Va.

The data center will replace the existing center at SBA Headquarters in Washington. New, state-of-the-art equipment will allow the SBA to respond more efficiently and reliably to information processing needs and requests.

"EDS has a long history of providing this type of service to government and commercial customers," said Robert McCashin, group executive of EDS' Federal Government Group. "This improved processing capability allows the SBA to respond effectively to small businesses even in this time of budget constraints."

EDS, which is based in Dallas and has operations in 27 countries, is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

#90071p0089 03/12/1990 ~PR Newswire

HUNTINGDON VALLEY, PA (MARCH 12) PR NEWSWIRE - Healthcare Services Group, Inc. (NASDAQ-NMS: HCSG) today reported record revenues for the three months ended Dec. 31, 1989, of $14,512,000 compared to $12,614,000 for the same 1988 quarter, representing a 15 percent increase.

Net income for the three months ended Dec. 31, 1989, was $1,160,000 or $.23 per share compared to $761,000 or $.18 per share for the same quarter in 1988, representing 52 percent and 28 percent increases, respectively.

Annual revenues for the year ended Dec. 31, 1989, were $55,360,000 compared to $37,770,000 for the same period of 1988 representing a 47 percent increase. Net income for the year also reached a record level of $4,169,000 or $.85 per share compared to $2,117,000 or $.53 per share for 1988, representing 97 percent and 60 percent increases, respectively.

Thomas Cook, executive vice president, commented that this record growth is primarily a result of the company expanding its operations to geographical areas not previously serviced.

At the end of 1989, the company was servicing approximately 372 facilities in 34 states up from 330 facilities at the end of 1988, representing a 13 percent increase.

As a result of the record achievement in 1989, the company declared its second annual cash dividend. The current year's dividend is $.07 per

common share compared to $.05 per common share last year, representing a 40 percent increase. The dividend is payable on April 9, 1990, to shareholders of record at the close of business on April 2, 1990.

Healthcare Services performs housekeeping, laundry and linen services to proprietary nursing homes and retirement complexes.

SIMSBURY, CT (MARCH 12) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) today reported a pretax loss of $16.9 million, and a net loss of $18.9 million, or $1.78 per share, on sales of $227.8 million from continuing operations for the year ended Dec. 31, 1989. Of the $16.9 million loss, $16.5 million related to one-time costs associated with the terminated merger with Vernitron Corporation and the company's restructuring effort commenced in the fourth quarter of 1989. Comparable figures for 1988 were pretax income of $7.8 million, and net income of $5.9 million, or 57 cents per share, on sales of $247.6 million from continuing operations.

For the fourth quarter of 1989, the company had a pretax loss of $13.0 million, and a net loss of $14.7 million, or $1.36 per share, on sales of $58.2 million from continuing operations.

Included in the $13 million pretax loss were merger termination expenses of $3.2 million and restructuring charges of $9.5 million. In addition, the fourth quarter of 1989 includes a provision for $4 million related to unanticipated costs on a long-term military development program. In the fourth quarter of 1988, the company had pretax income of $4.2 million, net income of $3.7 million, or 35 cents per share, and sales of $64.6 million from continuing operations.

The company's previously announced restructuring plan has initially focused on, among other things, the sale of the company's electronic interconnections business segment. As a result, the company's financial statements have been reclassified to separately show the results of this segment as discontinued operations.

The total net loss for the year 1989 amounted to $31.8 million, or $2.99 per share, compared with total net income for the year 1988 of $14.1 million, or $1.34 per share. The total fourth-quarter 1989 net loss amounted to $16.2 million, or $1.51 per share, compared with total net income in the fourth quarter of 1988 of $4.4 million, or 42 cents per share.

Kollmorgen Corporation has continuing operations focused in two business segments: special purpose servo motors and controls, and electro-optical instruments.

WILMINGTON, DE (MARCH 12) PR NEWSWIRE - Du Pont (NYSE: DD) today announced that it will install a CRAY Y-MP 4/332 supercomputer that will be twice as fast and have four times the memory of the company's current CRAY X-MP/28 system.

The CRAY Y-MP 4/332 will be installed at Du Pont's Experimental Station outside Wilmington this fall. It will have three central processing units, with capacity for a fourth, and 32 million words of memory. The unit, which will be leased from Cray Research Inc., is valued at about $13.5 million.

"This system will enable us to continue serving the growing numerical simulation needs of our scientists and engineers in support of the businesses," said Henry P. Morneau, director of scientific computing in Du Pont's Central Research & Development Department.

"Computational science provides value across our diverse businesses and technologies," Morneau added, "contributing to basic research, product development, process design and optimization, marketing and product support, environmental impact assessment and waste management."

This will be Du Pont's third Cray Research computer. The first, a CRAY-1A machine, was installed in late 1985 and replaced two years later by the CRAY X-MP/28. Complementing the supercomputer in the Scientific Computing Division is a large VAX cluster made by Digital Equipment Corp. Du Pont's petroleum subsidiary, Conoco, also operates a CRAY X- MP/14 supercomputer at Ponca City, Okla.

The supercomputer is used by Du Pont for the design and analysis of its manufacturing facilities and for designing and improving a variety of manufacturing processes. It is also used to help design and analyze new products and in support of environmental studies to reduce waste and minimize environmental impact.

#90071p0094 03/12/1990 ~PR Newswire

NEW YORK (MARCH 12) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) and OMV, the Austrian oil, gas and petrochemical company, announced today they had reached agreement for Mobil to sell to OMV for $200 million 5 percent of the North Sea Beryl field and its satellite fields and a proportionate interest in the associated gas transportation and processing system. Mobil retains a 45 percent interest in the properties and is the operator.

The agreement will require approval by the U.K. Department of Energy. In addition, the sale would be subject to the pre-emptive rights of Mobil's existing Beryl co-licensees: Amerada Hess (20 percent), Enterprise Oil (20 percent) and North Sea Inc. (10 percent).

"Beryl is a core Mobil asset, and normally we would not wish to sell any part of it. However, the unsolicited OMV offer for this small interest was extremely attractive to us," Mobil Chairman and CEO Allen E. Murray said. "The sale provides value which we could not otherwise realize. With our remaining 45 percent ownership we still retain a major interest in Beryl and we will continue our aggressive exploration program in the U.K. North Sea.

Since its discovery by Mobil in 1972, the Beryl field has become a major source of North Sea oil and gas.

Beryl began production in 1976 from the world's first concrete drilling and production platform, Beryl A, with storage facilities for 900,000 barrels of oil. Expanded, modernized and upgraded, Beryl A has since been joined by a more conventional steel-jacketed platform, Beryl B.

Today, the Beryl field also handles production from two subsea satellite fields discovered and operated by Mobil: Ness and Linnhe. Current production from the field area totals about 120,000 barrels of oil daily. Gas produced with the oil is at present being injected into the reservoir to store it for future sale. Meanwhile, Mobil and its co- licensees are undertaking a $500-million project to bring Beryl gas from the field via a 30-inch, 210-mile pipeline to a specially constructed gas plant at St. Fergus in northeast Scotland.

First delivery of the gas is scheduled for 1992. When full production in reached, sales from the field are expected to average 265 million standard cubic feet a day, the bulk of which will be sold to British Gas. The remainder will be sold direct to industrial and commercial customers.

#90071p0106 03/12/1990 ~PR Newswire

DALLAS (MARCH 12) PR NEWSWIRE - Babbage's, Inc. (NASDAQ: BBGS), a specialty retailer of consumer software, today announced that net income increased 17 percent to $3,110,000, or $.59 per share, for its fourth quarter ended Feb. 3, 1990.

Sales for the quarter increased 56 percent to $42,940,000, compared to $27,459,000 for the same quarter in the prior year. There were 14 and 13 weeks in the quarters ended Feb. 3, 1990 and Jan. 28, 1989, respectively. Net income increased 17 percent to $3,110,000, or $.59 per share, compared to $2,650,000, or $.50 per share, for the same quarter last year. Net income for the year-earlier quarter included an extraordinary benefit from tax-loss carryforwards of $96,000, or $.02 per share.

For the fiscal year ended Feb. 3, 1990 sales increased 62 percent to $95,296,000 compared to $58,750,000 last year. There were 53 and 52 weeks in the fiscal years ended Feb. 3, 1990 and Jan. 28, 1989, respectively. Net income declined 17 percent to $2,301,000, or $.44 per share, from $2,772,000, or $.59 per share, in fiscal 1989. Net income for the year-earlier period included an extraordinary benefit from tax- loss carryforwards of $138,000, or $.03 per share.

Comparable store sales for the 13 week period ended Jan. 27, 1990 increased by 6.3 percent. The company opened 53 stores and closed one store during the fiscal year, bringing total stores in operation to 160, a 48 percent increase in total stores compared to the same time last year.

Gross margin percent for the quarter declined to 30.6 percent from 35.1 percent in the year ago period. The decline resulted from a change in the

company's mix of sales toward lower margin categories represented primarily by software for the Nintendo Entertainment System. The decline was offset, in part, by a reduction in the company's rate of inventory shrinkage compared to prior years. Store operating expenses as a percent of sales were virtually the same as the same quarter last year while general and administrative expenses declined to 3.5 percent of sales compared to 4.9 percent.

Babbage's attributed the reduction in its year-end inventories per store to improvements made to its control systems and procedures as well as to the responsiveness of its buyers to changing trends in the consumer software market. The company also reported that since the end of its fiscal year it has successfully implemented a new inventory management system, developed in-house, which provides it with significantly enhanced management information and control.

FORT LAUDERDALE, FL (MARCH 12) PR NEWSWIRE - Lexicon Corporation (NASDAQ: LEXI) today announced that its wholly owned subsidiary SCOPE Incorporated of Reston, Va., has been awarded a long-awaited $9.7 million Hostile Aircraft Identification Equipment II (HAIDE) contract from the United States Army Communications-Electronics Command (CECOM), Fort Monmouth, N.J.

The contract is for the design, development and fabrication of six engineering development systems for Non-Cooperative Target Recognition (NCTR). This full scale engineering development contract is the latest initiative in the HAIDE developmental activity, which dates back to the 70s. This system provides an upgrade to the Hawk Missile System, improving system performance and extending the useful life of the Hawk systems.

The contract term is 24 months, and both low rate initial production (LRIP) and follow-up production contracts are anticipated.

SCOPE is the leader in the development of NCTR systems for all three services, and this is the first award leading to production. Another similar award is anticipated later this year from the U.S. Navy.

Michael Levy, president of Lexicon, stated, "This contract is the largest single contract in Lexicon's 14-year history and the largest to be awarded to SCOPE since SCOPE was acquired by Lexicon in 1985."

Lexicon Corporation, through its majority-owned subsidiary Sports-Tech International, Inc., also develops and markets advanced computer software and high performance video systems to professional, collegiate and high school sports customers.

CONTACT: Michael Levy, president of Lexicon Corporation, 305-772-7221.

PHILADELPHIA (MARCH 12) PR NEWSWIRE - C. Lawrence Rutstein, chairman of Cedar Group Inc.(NASDAQ: CDRG), today stated the following:

Management of Cedar Group knows of no fundamental reason for the sharp decline of its stock on Friday, March 9. The growth of the company predicted several weeks ago for the current fiscal year is on track.

The company, however, was informed that rumors were circulated on Friday that a major business publication, Barrons, was publishing a story this past weekend which was negative to Cedar. In fact, a reporter for Barrons did interview Cedar on Friday. The Company welcomes professional business writers to evaluate our company.

In addition, the company has been aware of a rather large short interest in Cedar Group's stock which might initiate such rumors in order to blunt the appreciation of the stock price.

Management is continuing to work hard to achieve the growth of the company and maximize shareholder value over the near and long term. We thank our shareholders for their continuing confidence.

CONTACT: C. Lawrence Rutstein, Chairman of Cedar Group, 215-843-1000.

MURRAY HILL, NJ (MARCH 12) PR NEWSWIRE - As part of a national effort to regain America's leadership in semiconductor manufacturing, AT&T (NYSE: T) has signed separate agreements with Olin Corporation (NYSE: OLN) and SEMATECH to develop materials that will be key to the fabrication of new generations of integrated circuits.

The Olin/AT&T pact calls for Olin to manufacture and sell the AT&T-developed materials, and relates to an agreement between AT&T and SEMATECH -- a consortium of 14 U.S. semiconductor manufacturers. That agreement is one of SEMATECH's programs to revive this country's troubled semiconductor industry.

The Olin/AT&T agreement will concentrate on a critical chemical compound known as a resist, which is required for the manufacture of semiconductor devices. Currently, the annual market for resist is $225 million worldwide.

Applied to a silicon wafer, the resist functions much like photographic film by recording images of semiconductor circuits projected from masks -- similar to photographic negatives.

AT&T Bell Laboratories has invented a "deep UV resist" which is sensitive to the ultraviolet part of the spectrum. The resist can produce highly complex chips with lines as small as .3 micrometers, or roughly 1/400th the diameter of a human hair.

The deep UV resist will be manufactured by Olin Hunt Specialty Products, Inc., the Olin subsidiary that provides photoresists, process chemicals and other materials to the semiconductor and printed wiring board industries.

AT&T is one of the 14 semiconductor manufacturers who make up SEMATECH, and who are cooperating on an unprecedented basis to counter intense foreign competition in the chip-making industry.

More than half of SEMATECH's funding comes from its member firms, and the remainder from the federal government. To accomplish its objective, the Texas-based consortium partners with U.S. suppliers to develop new equipment, materials and processes that will support future generations of technology.

CONTACT: Robert Ford of AT&T Bell Laboratories, 201-564-4260, or Gene Kuhn of Olin, 203-356-3125, or Ann Marett of SEMATECH, 512-356-3327.

LOS ANGELES (MARCH 12) PR NEWSWIRE - Barry Collier, president, Prism Entertainment Corp. (AMEX: PRZ) and Richard Lorber, president, Fox/Lorber Associates Inc., announced today that Prism has sold 90 percent of its Fox/Lorber subsidiary to a company owned by David M. Fox and Richard Lorber, co-founders of Fox/Lorber, and GaGa Communications Inc., a Japanese film and video distribution company, which is Prism's joint venture partner in videocassette distribution in Japan.

The purchase price was $2,680,000 payable in a combination of cash, notes, and the surrender of 111,000 shares of Prism's common stock and the cancellation of options to purchase an additional 70,000 shares of Prism common stock.

"This restructuring of the ownership of Fox/Lorber will provide added incentives to all the partners," noted Collier. "The sale will enable Prism to concentrate on its core business of the sale and distribution of home videocassettes." Prism recently entered into a five-year exclusive distribution agreement with Paramount Home Video, a subsidiary of Paramount Pictures, a Paramount Communication Company. Lorber stated: "Fox/Lorber's nine years of international and U.S. distribution experience will strengthen GaGa's film acquisition and financing business, not just

for the Japanese market but worldwide. Similarly, GaGa will provide Fox/Lorber with many new resources and distribution opportunities in an expanding worldwide film and television marketplace. GaGa and Fox/Lorber expect this new relationship to significantly increase GaGa'a market share in Japan and position Fox/Lorber as a leading international film sales company."

Tetsu Fujimura, president of GaGa Communications Inc., in making this announcement in Japan also reported that Humax Pictures, one of the largest distribution companies in Japan and the owners of 13 movie theatres in Tokyo plus one theatre in Osaka, will also take an equity position in the new venture. Zuiho Hayashi, president of Humax, will also become a director of Fox/Lorber Associates Inc.

GaGa's investment in Fox/Lorber is a further step in a strategy to expand GaGa's business worldwide, including other possible mergers and acquisitions. GaGa will continue to maintain its Japanese distribution joint venture with Prism Entertainment.

Prism Entertainment Corp. is a home video company which sells and distributes videocassettes of theatrical and television films, children's programming, concert performances of music and comedy artists and other programming in the United States and Canada.

ANNAPOLIS, MD (MARCH 12) PR NEWSWIRE - UNC Incorporated (NYSE: UNC) announced today that it has reached a preliminary agreement with the Department of Energy (DOE) on a methodology to withdraw from the DOE's nuclear submarine program.

The withdrawal process will involve completing the current backlog of work at UNC's Naval Products Division, in Montville, Conn., by the end of 1993.

This development is the result of the government's initiative to substantially reduce defense expenditures. It marks the end of UNC's 30-year association with DOE's Naval Reactor Program.

A company spokesman stated that ongoing discussions with DOE will encompass such issues as the government's reimbursement of UNC's investment in this business, including a new manufacturing facility under construction since 1987; financial incentives for employees who remain

with the business during completion of the backlog; reimbursement of costs for employee severance; and reimbursement of costs to decommission the Montville site.

Dan A. Colussy, chairman, president and chief executive officer of UNC Incorporated, said, "This can be a positive development for UNC, overall, since it presents us with an excellent opportunity to reduce our debt and interest expense resulting in better returns for our shareholders. We shall then have an opportunity to redirect our resources from what has become a no-growth, low-return business into profitable businesses that support our strategic direction."

"The phase-out of this business, unfortunately, will result in the gradual termination of almost 1,000 highly skilled and dedicated employees who take great pride in their outstanding contribution to the U.S. Navy nuclear submarine program. Every effort will be undertaken to assist this outstanding group of individuals in relocating to new positions and to minimize the economic impact of the closing of this business."

UNC Incorporated, listed on the New York Stock Exchange, is engaged in providing high technology products and services in the aerospace/ aviation defense, and environmental industries.

NEW YORK (MARCH 12) PR NEWSWIRE - Sequoia Partners, L.P., announced today that it has commenced mailing proxy materials soliciting proxies to elect seven new directors to replace the current board of directors of Counsellors Tandem Securities Fund, Inc. (NYSE: CTF), at the combined annual and special meeting of stockholders scheduled for April 10, 1990.

Sequoia is seeking to elect directors fully committed to open-ending or liquidating the Fund. Sequoia believes either action would significantly increase the value of each shareholder's investment in the Fund by eliminating the discount from net asset value at which the Fund's shares have historically traded.

Sequoia owns 485,000 shares or 10 percent of the Fund's common shares outstanding and is a member of a group which owns 1,235,700 shares or 25.5 percent of the 4,851,791 Counsellors Tandem common shares outstanding.

Sequoia states in its proxy materials that if its slate of directors is elected they plan to submit for stockholder approval a binding proposal to either convert the Fund into an open-end investment company, the shares of

which would be redeemable anytime at the option of the stockholder at net asset value, or liquidate the Fund so that the net asset value -- less liquidation expenses -- could be distributed to stockholders.

Open-ending or liquidating the Fund would most likely include a redemption of the Fund's 880,000 preferred shares. The current redemption price is $51.50 per preferred share.

Sequoia's proxy materials point out that in the first half of 1989 the Fund's common shares traded at an average discount from net asset value of 20.8 percent. Sequoia believes that the narrowing of the discount since early 1989 is primarily the result of its activities including its purchases of the Fund's shares.

At the April 10 meeting, common and preferred stockholders together will vote to elect four of the seven directors; preferred stockholders voting alone will elect the other three.

Counsellors Tandem is a closed-end investment company which invests primarily in common stocks of public utilities.

UNIVERSAL CITY, CA (MARCH 12) PR NEWSWIRE - MCA, Inc. (NYSE: MCA) and Acclaim Entertainment, Inc. (NASDAQ: AKLM) today announced they have entered into an agreement whereby Acclaim will purchase all of the outstanding shares of LJN Toys, Ltd., a subsidiary of MCA. The undisclosed purchase price will be comprised of a combination of both cash and Acclaim common stock.

"We are extremely excited about the agreement with entertainment giant, MCA, and welcome their involvement as a significant shareholder in Acclaim " said Gregory E. Fischbach, chairman and CEO of Acclaim. "In addition to providing us the opportunity to market LJN's strong line of current and future Nintendo products, this agreement marks the beginning of a naturally beneficial relationship for the two entertainment companies," he added.

Established as a toy company nearly ten years ago, LJN is best known as a leading publisher of software for the Nintendo Entertainment System offering such titles as Roger Rabbit and Marvel Comics' X-Men; as well as the producers of Entertech, the industry's premier water gun line.

The agreement provides Acclaim with all of LJN's U.S. operations, with the exception of its American Publishing puzzles division , and includes the right to release an additional five titles per year for the Nintendo Entertainment System under the LJN label. The closing of the acquisition remains subject to the obtaining of various regulatory and legal approvals.

According to MCA Executive Vice President Charles S. Paul, "The valuable assets and merchandising properties of LJN can continue to realize their potential under the management of a young, yet proven leader in interactive entertainment. Acclaim's track record speaks for itself, and as a shareholder, we look forward to working with this rapidly growing company to explore opportunities in electronic interactive entertainment."

MCA, Inc. is worldwide leader in the entertainment marketplace with production and distribution of theatrical film and television products, theme parks recorded music, and book publishing.

Acclaim Entertainment, Inc. is a leading publisher, marketer and distributor of home entertainment products including Nintendo Entertainment System software, wireless remote controllers, Game Boy compact video system software, and hand-held electronic games.

PHOENIX, AZ (MARCH 12) PR NEWSWIRE - Honeywell (NYSE: HON) today introduced PC Data Manager, the newest addition to its portfolio of small,

integrated control systems. PC Data Manager is a powerful PC-based data acquisition and management system that performs supervisory control, displays, alarms, trends, history collection, reporting and logging functions for a variety of applications, including process control, batch management, and materials handling. The new product is designed to help customers achieve manufacturing competitiveness through a small, cost-effective platform.

"PC Data Manager is ideal for users who rely on programmable, intelligent devices to monitor or control a plant or process and who need a system that acts as a configurable operator's window into the plant," said Mitch Mirchandani, Honeywell product manager for the PC Data Manager. "Even customers with small applications need all the functionality of a large system. Today, 'small systems' refers to size, not functionality.

"The system incorporates Honeywell's years of investment in software and know-how in process control, providing distributed system capabilities in a 386-based IBM-compatible computer on a UNIX platform. The multi-tasking capabilities and flexibility of UNIX make the system especially easy to use and easy to implement."

Honeywell offers PC Data Manager with a variety of Honeywell logic controllers and integrated loop and logic controllers to allow the system to serve a broad range of application requirements. All configurations offer users effective operations and built-in levels of security at low cost.

Connected to a Honeywell 620 Logic Controller, PC Data Manager provides solutions for applications requiring fast program execution, extensive digital or interlock logic and relay ladder-type programming. The 620 Logic Controller family is upward compatible and accommodates an extensive range of I/O signal types.

When connected to a Honeywell Series 9000 Loop & Logic Controller, PC Data Manager provides sophisticated control in an easy-to-use, cost- effective platform, as well as multiple supervisory stations with multiple controllers. Users can configure and control up to 32 individual PID loops with the Series 9000, and can manage up to 960 digital I/O variables. Future releases of PC Data Manager will include this integration.

As a third option, PC Data Manager also can communicate with the Honeywell TDC 3000 to acquire Data Hiway-based data for incorporation in an information management system. Examples of this data might include information from basic controllers, multi-function controllers and process interface units. Data secured in this manner is totally integrated into the PC Data Manager database and can be used by any applications resident in the system, including third-party software such as spreadsheets.

Communication between PC Data Manager and the TDC 3000 Data Hiway is implemented with the Data Hiway Bridge, a standard Honeywell bidirectional communications product.

Users may choose between two main system configurations: a master operator station where only one PC is required and an auxiliary operator station where a second 286 PC is used. The auxiliary station can reside next to the main station, in another area of the building or even in another country via intelligent modems.

PC Data Manager prices start at $15,000 depending upon the configuration.

Honeywell is an international control company that provides products, systems and services for the home and building, industrial, space and aviation, and defense and marine markets. The company has 76,000 employees worldwide, with 1988 sales of $7.1 billion.

MINNEAPOLIS (MARCH 12) PR NEWSWIRE - Cray Research, Inc. (NYSE: CYR), is accepting entries for its 1990 Gigaflop Performance Awards, which will recognize computational researchers who are doing significant work on Cray Research supercomputers at speeds at or above 1.5 million operations per second.

Cray Research began the awards in 1989, recognizing 20 individuals and teams who had solved problems using Cray Research supercomputers running in excess of one gigaflop. A gigaflop is a unit for measuring computer performance -- one billion (Giga) Floating-point Operations Per Second.

John A. Rollwagen, chairman and chief executive officer of Cray Research, said, "Computer simulation has merged as a third brand of science, complementing theory and experimentation. Through the Gigaflop Performance Awards, we hope to encourage further advances in this field, as well as to acknowledge the achievements of the researchers who are helping to bring about this fundamental change in the way science is conducted. The response to these awards has been outstanding, and the performance levels reported by last year's winners exceeded our expectations. As a result, we have raised the 1990 performance target to 1.5 gigaflops from the 1.0 gigaflops threshold of the 1989 program."

Winners of the 1989 awards included researchers in the fields of nuclear energy physics, aircraft aerodynamics, financial analysis, seismic analysis, weather prediction, climate research, and medical imaging. The problems solved ranged from analysis of the Space Shuttle's solid rocket

booster to valuation of options on securities at thousands of interest rates and points in time.

Entries for the 1990 Gigaflop Performance Award Program are being accepted through Sept. 1, 1990. A panel of Cray Research scientists and engineers will review each entry to confirm that it meets the award criteria. Awards will be presented during the Supercomputing '90 conference to be held in New York City, Nov. 12-16, 1990. Entry forms are available from any Cray Research sales office or by writing to Vicky Frank, Gigaflop Performance Award Administrator; Cray Research, Inc.; 1333 Northland Drive Mendota Heights, MN 55120.

Cray Research, Inc., designs, manufactures, markets and supports large-scale, high-speed computer systems for scientific and engineering applications.

DETROIT (MARCH 12) PR NEWSWIRE - Cadillac Motor Car has appointed Roy S. Roberts as general manufacturing manager, effective April 1. Roberts returns to General Motors from Navistar International Corporation, where he served as vice president for the truck operations. He replaces Gary Cowger, recently named executive director of Advanced Manufacturing for the GM Advanced Engineering Staff at the GM Technical Center in Warren, Mich.

Roberts will be responsible for all Cadillac manufacturing operations, including component operations in Detroit, stamping plant operations in Grand Blanc, Mich., and assembly operations at the Detroit-Hamtramck Assembly Center and the Reatta Craft Centre in Lansing, Mich. Cadillac Motor Car is charged with manufacturing and assembly responsibility for the Cadillac Allante, Eldorado and Seville, and Buick Riviera and Reatta and the Oldsmobile Toronado.

"Roy is a very key addition to the Cadillac team, and assumes major program responsibilities as Cadillac continues to develop new products and processes aimed squarely at the quality, reliability and customer appeal attributes demanded by luxury car owners. Gary Cowger has done an exceptional job of moving Cadillac manufacturing forward, with major progress in the quality of our products and new processes such as design for manufacturability and actively developing voice of the assembler to take advantage of the outstanding skills our company possesses at all levels and in all locations. Roy's experience has prepared him well for the extensive challenges of this time at this company, and we are very

pleased to have him on board," commented Cadillac General Manager and General Motors Vice President John O. Grettenberger.

Roberts, 50, began his General Motors career in 1977 as a salaried employee in training at the former Diesel Equipment Division in Grand Rapids, Mich. He served there as an assistant superintendent of manufacturing, superintendent of manufacturing operations and director of quality assurance. When Diesel Equipment and Rochester Products Divisions were consolidated, he was promoted to plant manager of the Grand Rapids Plant No. 1 in October, 1981.

In February, 1983, he was transferred to Rochester, N.Y., as the division's eastern operations manager. He was named a manufacturing manager at Rochester Products in October, 1983, and became plant manager of the Chevrolet-Pontiac-Canada automobile assembly plant in North Tarrytown, N.Y., in December, 1985.

He was promoted to vice president in charge of the General Motors Personnel Administration and Development Staff on April 1, 1987. He resigned from General Motors in August, 1988, to assume his position at Navistar.

#90071p0130 03/12/1990 ~PR Newswire

ORLANDO, FL (MARCH 12) PR NEWSWIRE - RoTech Medical Corporation (NASDAQ-NMS: ROTC), a marketer and distributor of home care products and repackaged pharmaceuticals, announced earnings for its second quarter ended Jan. 31, 1990 of $.07 per share as compared to $.05 per share for the quarter ended Jan. 31, 1989. For the six months ended Jan. 31, 1990 earnings were $.13 per share versus $.09 per share for the six months ended Jan. 31, 1989.

Net income was $338,222 and $580,517 for the quarter and six months ended Jan. 31, 1990, respectively. This compares to $233,575 and $394,846 for the quarter and six months ended Jan. 31, 1989, respectively. Net revenues increased 30 percent to $3,912,675 from $3,009,107 in comparing the quarters ended Jan. 31, 1990 and 1989, respectively. Net revenues for the six months ended Jan. 31, 1990 increased 23 percent to $7,485,487 from $6,092,066 for the six months ended Jan. 31, 1989.

Management attributes increases in net revenues to its Southeastern expansion and the continued growth of its home infusion therapy division. Increases in net income were achieved as the company's cost of revenue, as a percentage of net revenues, declined due to an emphasis on the more profitable products. In particular, equipment rentals and home infusion

therapy have become the company's focus during 1989 and 1990.

DENVER (MARCH 12) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) announced today that the U.S. Bankruptcy Court in New York approved the $505 million settlement between Cyprus and The LTV Corp. of all claims filed by Cyprus against LTV and its subsidiary, LTV Steel Co. Inc.

While the settlement was approved by the Court, subject to possible appeal the actual amount of cash, notes, or securities that Cyprus and other creditors will receive on their claims is dependent on the terms of a plan of reorganization to be ultimately approved by the Bankruptcy Court. No reorganization plan has yet been presented by LTV to the Court for approval. Also unresolved is the issue of claims by the Pension Benefit Guaranty Corp., currently before the U.S. Supreme Court. Therefore, the timing and amount of Cyprus' ultimate recovery is uncertain and is expected to be substantially less than the allowed amount of its claims.

In November 1987 Cyprus had filed a $1.07 billion claim against LTV and LTV Steel for damages due to lost profits from rejected contracts and for

unpaid receivables. The claims against LTV Steel, once Cyprus' biggest coal customer, stem from LTV's July 17, 1986 filing for reorganization under Chapter 11 of the U.S. Bankruptcy Code and the subsequent rejection of long-term coal supply contracts with two Cyprus mines, the Emerald mine near Waynesburg, Penn., and the Knox Creek mine in Virginia. Both mines were supplying coal to LTV Steel coking batteries in Pennsylvania, Indiana and Ohio. When LTV Steel rejected its coal contracts with Cyprus, 250 employees at the Emerald mine were furloughed and Cyprus sold its Knox Creek mine property.

Cyprus Minerals, based in Englewood, Colo., is a major producer of coal, copper, molybdenum, lithium, and talc. The Company employs approximately 8,500 people worldwide.

MORRISTOWN, NJ (MARCH 12) PR NEWSWIRE - AT&T's UNIX Software Operation today announced that an updated version of its C++ Language System source code product will be generally available at the end of March.

The new product, C++ Language System Release 2.1, features fixes for minor bugs detected by USO developers and reported by customers since the release of R2.0 last June. It includes the C++ Standard Library set, as in the past.

"This product delivers on the promise we made to provide increased robustness for our C++ Language System product," said Mike DeFazio, director of system software at the AT&T UNIX Software Operation. "Release 2.1 also demonstrates USO's intent to provide the reference implementation of the language as defined by its author, Dr. Bjarne Stroustrup of AT&T Bell Laboratories."

DeFazio also said that Release 2.1 is accompanied by the version of the C++ reference manual that Stroustrup is presenting to the ANSI C++ committee today.

The C++ language adds an object-oriented programming paradigm to the popular C language. It supports the C language's more traditional procedural approach to programming, but lets C programmers add object-oriented features as their skills or needs dictate.

The C++ Language System Release 2.1 is available to software vendors in source code form for $25,000. Licensees who previously licensed Release 2.0 may upgrade all their processors for a one-time fee of $5,000.

Vendors who acquire Release 2.1 may distribute binary versions to certain customers as a no-royalty fee upgrade. The customers are those who have purchased their C++ product based on Release 2.0.

#90071p0136 03/12/1990 ~PR Newswire

ALLENTOWN, PA (MARCH 12) PR NEWSWIRE - Air Products and Chemicals Inc.'s (NYSE: ADP) environmental/energy systems businesses could generate annual net income of up to $50 million and operating cash flow of up to $100 million by the mid-1990s, according to Dexter F. Baker, the company's chairman and chief executive officer.

These businesses -- which extend the company's traditional skills in owning and operating large process plants into new areas -- include waste-to-energy facilities; advanced flue gas desulfurization systems for coal-fired power plants; and cogeneration plants that use solid, low-cost fuels to produce steam and electricity. In these three areas alone, the company and its partners have invested $1.2 billion in six projects that are in operation or under construction. "By the mid- 1990s," said Baker, "that investment figure -- of which Air Products expects to have a 50 percent interest -- could double."

Baker added that the markets for this portfolio of businesses could represent investment opportunities of $30 billion over the next 10 years. He cited the country's mounting solid waste disposal problems, proposed clean air legislation, and the increasing need for efficient, new electricity sources as the main driving forces behind the growth of these markets.

Baker pointed out that expanding the company's environmental and energy systems business is one of four elements to Air Products' corporate growth strategy. The other three elements -- which also will contribute substantial growth -- include investing in the company's core industrial gases and chemicals businesses; adding new products and markets to those core businesses; and expanding internationally. Baker concluded, "Because our company has been pursuing these strategies over the past few years, we

are well positioned to benefit from the two largest forces which will impact business in the 1990s: preservation of the environment and economic globalization."

The six projects within the company's environmental/energy systems division that have been completed or are under construction include a waste-to-energy facility Air Products' American Ref-Fuel joint venture with Browning-Ferris Industries, Inc. has completed at Hempstead, Long Island, N.Y.; and other similar facilities under construction in Preston, Conn., and Essex, N.J. The Hempstead plant, which cost over $350 million, burns up to 2,250 tons of municipal solid waste per day to generate over 60 megawatts of electricity. Since start-up this past fall, the plant has exceeded all operating expectations.

Air Products and Chemicals Inc. has annual sales of $2.6 billion, operations in 22 countries and 14,000 employees. Corporate headquarters are near Allentown, Pa.

CHICAGO (MARCH 12) PR NEWSWIRE - First Chicago Corp. (NYSE: FNB) announced that Owen J. Cheevers will join the bank as senior managing director of First Chicago Capital Markets, Inc., a subsidiary of First Chicago Corp., where he will be responsible for heading up the corporation's high yield securities division.

Cheevers, 39, will report to Geoffrey L. Stringer, corporate senior vice president of First Chicago Corp. Stringer is in charge of the corporate securities department, which has responsibility for underwriting and distributing commercial paper and other corporate debt securities, and also includes receivables funding and asset-backed securities capabilities.

"Cheevers will develop and implement a strategy for entering the high yield securities business. His experience in corporate finance will be crucial as First Chicago proceeds into this new business. We believe there are important opportunities in high yield securities, although it is a market that must be handled with care," Stringer said.

Most recently Cheevers was a partner with Rosecliff Inc. in New York. Prior to that he was managing director of high yield sales, trading and syndication at Merrill Lynch Pierce Fenner & Smith in New York.

Cheevers holds a B.S. degree in economics from the University of Denver and an M.B.A. degree from George Washington University in Washington.

MELBOURNE, FL (MARCH 12) PR NEWSWIRE - Harris Corporation's Semiconductor Sector announced today it plans to close its Taiwan assembly and test operation and to consolidate these functions at the company's manufacturing operations in Singapore and Kuala Lumpur, Malaysia by the end of this year.

The plant closing will affect approximately 800 manufacturing and administrative employees in Taiwan. Transfer of various packaging technologies and equipment in Taiwan has already begun and will be completed by the end of 1990.

According to Russ Morcom, vice president-general manager of Harris Semiconductor's Worldwide Manufacturing Operation, the Taiwan facility, which is the smallest of Harris' three Far East facilities, is being phased out as part of the company's plan to rationalize manufacturing resources by eliminating duplication, reducing overhead, and standardizing manufacturing processes.

"Our Malaysia and Singapore plants have compatible processes and ample test and assembly capacity to absorb the functions performed in Taiwan," Morcom stated.

Harris Corporation's Semiconductor Sector manufactures discrete semiconductors and integrated circuits for signal processing and control. It is the sixth largest U.S. merchant semiconductor manufacturer and number one supplying such products to the military and aerospace market.

Harris Corporation (NYSE: HRS), with worldwide sales of more than $3 billion, is focused on four major businesses: advanced electronic systems, communications, semiconductors, and the Lanier Worldwide office-equipment distribution network.

ANN ARBOR, MI (MARCH 12) PR NEWSWIRE - Soldiers at Fort Bliss, Texas, will get their chance to taste Domino's Pizza made on a United States military post Tuesday, March 13, at 10:45 a.m., when ribbon- cutting ceremonies take place to celebrate the grand opening of a new Domino's Pizza store.

The store, at Carter and Ricker roads, is the first freestanding Domino's Pizza unit on a military post, and will serve post personnel and residents of the surrounding area.

Domino's Pizza, Inc. President David P. Black and Western Area Vice President Nickep Romyananda will attend the ceremony, as will senior officers stationed at Fort Bliss.

"We're excited and very pleased to have the opportunity to open this store and look forward to a successful relationship with the personnel stationed at Fort Bliss," said Romyananda.

In addition to the ribbon cutting, the grand opening will feature complimentary pizza samples and a visit from the Noid. Children from the school on the post will join the ceremony at 11:30 a.m.

The Fort Bliss store is owned by franchisee DPMSD, Inc. Domino's Pizza has more than 5,200 stores in the United States and 20 international markets.

CONTACT: Moira McDermott, 313-668-7450, or David Pear, 214-392-3030, both of Domino's Pizza, Inc.

NEW YORK (MARCH 12) PR NEWSWIRE - Paramount Communications Inc. (NYSE: PCI) today announced the acquisition of Computer Curriculum Corporation (CCC), based in Sunnyvale, Calif. One of the earliest and largest developers and marketers of computer-based learning systems, CCC will become part of the Education Group of Simon & Schuster, the publishing arm of Paramount Communications. Terms of the transaction were not disclosed.

CCC's learning system integrates more than 3,000 hours of computer-assisted instruction with management software that individualizes the learning process for each student. CCC's system is unique in the degree to which it customizes the instruction each learner receives and the way in which it tracks, stores and reports the individual progress of each learner.

The CCC instructional system offers curricula for kindergarten through high school and adult basic education. The system is used widely by elementary, middle and high schools, as well as by community colleges and other institutions. The system recently has been adopted for use by corporations for workplace literacy.

Approximately 3,000 schools across the country are using the CCC system, delivering instruction in mathematics, science, reading, language arts,

English-as-a-second-language (ESL), and computer science to nearly 750,000 students. The system, which has proven successful with all students, has been particularly effective with at-risk students and adults who need to acquire basic skills in reading, language and math.

CCC was founded in 1967 by Patrick Suppes of Stanford University, a pioneer in the development of software-based curriculum. Suppes will be retained as a consultant and Ronald Fortune will continue as president of the company.

The Simon & Schuster Education Group publishes a full line of education materials for kindergarten through graduate and adult learning levels, including basic textbooks, workbooks, film and video, manipulatives and other supplementary materials.

In addition to educational publishing, Simon & Schuster is engaged in consumer and professional publishing worldwide. Paramount Communications Inc. is a global entertainment and publishing company.

#90071p0149 03/12/1990 ~PR Newswire

PARSIPPANY, NJ (MARCH 12) PR NEWSWIRE - AT&T announced that all of its newly manufactured consumer telephones and answering machines will come in 100 percent biodegradable packages. The conversion from plastic foam to corrugated cardboard packaging will be completed by June.

The redesigned packing also is smaller and can be crushed easily to a tiny fraction of its original size, thus generating a smaller volume of trash.

More than a year ago, cholofluorocarbons (CFCs) were removed from all of

AT&T's consumer products packaging. Today, all AT&T products are packaged in CFC-free materials.

CFCs are chemical compounds believed to cause depletion of the stratospheric ozone layer.

"We've worked hard to design packing materials that provide a high degree of product protection while using materials that won't pollute our land or air," said A. Lee Blitch, director of advertising and packaging for AT&T's consumer products business unit.

"While all of our products were packaged in CFC-free materials and most already were biodegradable, we decided that wasn't enough. We wanted all our packages to be biodegradable," Blitch said.

"In the process, we learned that protecting the environment is not only good for the planet, it's good for business. For example, with the old foam packing we shipped enough products in one year to fill about 1,800 tractor-trailers. With our new, smaller biodegradable packing, we will reduce the number of trailers needed by about 20 percent. That will result in saving hundreds of thousands of dollars."

Blitch also said the company has started using recycled paper in its packaging whenever possible. "We made our packaging biodegradable so it will decompose in landfills. We made it smaller so it will take up less space in these disposal sites. But we hope that consumers will recycle their packaging whenever possible."

AT&T recycles paper in its operations and, last year, assisted some 200 companies in their efforts to establish recycling programs. This recycling effort has generated $1 million for the company by reducing its waste hauling costs and through the sales of waste paper.

Also last year, the company announced a corporate goal to eliminate all emissions of CFCs from its manufacturing processes by 1994. This goal exceeds an international protocol, which calls for a 50 percent reduction of CFC use by the year 2000.

GARDENA, CA (MARCH 12) PR NEWSWIRE - Toyota Motor Corporation's U.S. research and development center, Toyota Technical Center U.S.A., Inc. (TTC), announced today that it has filed papers in Maricopa County, Ariz., for approval to build an extensive automotive proving ground there.

Included in the plans are a full range of test courses and other related test facilities.

The project is part of Toyota's recent move to strengthen U.S. R&D capabilities in line with its growing U.S. manufacturing presence. Since last year, Toyota has announced major expansion plans for both TTC and Calty Design Research Inc., in Newport Beach, Calif. These actions are aimed at improving vehicle appraisal, U.S. auto parts and materials evaluation, and materials evaluation, and advanced design development in the United States.

The new automotive proving proving ground will provide Toyota with the R&D capbility to better match its products to U.S. consumer needs and at the same time bolster the company's U.S. parts evaluation and procurement program.

TTC plans to go ahead with the purchase of the Maricopa County site as soon as it receives local government approval for the project.

SCARBOROUGH, ME (MARCH 12) PR NEWSWIRE - Sun Foods Supermarkets today announced it has expanded its program to encourage home and local community recycling efforts. Included in the program are reuseable canvas shopping bags which may be purchased by consumers, local recycling information boards in all stores, recycling brochures and in-store environmental information signs.

According to Ted Brown, a Sun Foods Supermarkets spokesman, the canvas bags were introduced in response to customer requests. Brown said, "We have had numerous customer comment cards requesting the canvas bags and we wanted to offer our customers environmentally sound alternatives. We are now offering three shopping bag choices: paper, recycled plastic and reuseable canvas."

"We can cut down on the amount of waste entering the waste stream by encouraging customers to bring plastic shopping bags back to our stores for recycling or to reuse their shopping bags," Brown added.

Recycling information boards located near the entrance to each store are also part of the newly expanded environmental program. The boards provide information on local recyclers and recycling programs.

"Many of the communities we serve say that residents need a source of local recycling program information. We hope to be of help in meeting this need," said Hugh G. Farrington, president and chief operating officer of Hannaford Bros. Co. (NYSE: HRD), parent firm of Sun Foods Supermarkets.

A recycling brochure called "How to Start the Recycling Cycle at Home" gives current information on how customers can begin recycling various items. In-store shelf signs are also part of the program. According to Brown, "The signs provide environmental information about products and packaging to assist consumers in making environmentally sound choices."

Brown said all of the environmental programs, including the plastic shopping bag recycling program begun last month, are intended to encourage home and community recycling and waste reduction efforts.

"The theme of our entire program is reduce, reuse, recycle," Brown added.

#90071p0159 03/12/1990 ~PR Newswire

NEW YORK (MARCH 12) PR NEWSWIRE - Marshall Lester has been appointed president of the newly formed American division of the Diesel Company, it was announced today by Kenneth Sitomer, president and chief executive officer of Russ Togs, Inc. (NYSE: RTS). Russ Togs recently acquired the U.S. and Mexican rights to Diesel, one of Europe's largest manufacturers of men's and women's jeans and accessories. "We are delighted to have a man with Marshall Lester's knowledge and hands-on experience to direct the new Diesel Company. His entire career has been focused on jeans and casual wear, both as an entrepreneur manufacturer and as a director of design," Sitomer stated. "He has not only developed and operated his own manufacturing company in England but has served as a consultant to one of America's most successful apparel retailers."

Lester has been president of Scott Lester Ltd., in England, which manufactured jeans under brand names which included Katharine Hamnett, Muscle Sport and Marshall Lester Jeans. He has been involved in a joint venture with Honorbilt PLC, an English clothing conglomerate, which owned a number of fashion companies in the United Kingdom, as well as Tomato, a Los Angeles-based young men's shirt and casualwear company.

During his career, Lester has designed, sourced and manufactured private label casual apparel merchandise for both his own companies and for Next, Topman and Miss Selfridge in England.

In the United States, Lester served as consultant to the Pasta Division of

the Paul Harris stores and has also been director of design and image for The Gap stores.

"Diesel has been consistently in the forefront of the European jeanswear industry and we strongly feel the timing is right to develop their concept as the new major force in the U.S. market," stated Lester.

Lester will operate out of the new Diesel Company's own showroom and headquarters at 1411 Broadway in New York. He will report directly to Steven Somers, executive vice president and chief operating officer of the women's group at Russ Togs.

CONTACT: Susan Ernst, vice president of Russ Togs, 212-642-8500, or Bob Perilla Associates, 212-581-5775, for Russ Togs

CHARLOTTE, NC (MARCH 12) PR NEWSWIRE - Piedmont Mining Company, Inc. (NASDAQ: PIED), engaged in exploration, mining and production of gold in the Southeast, reported a profit of $162,931, or $0.01 per share, in the fourth quarter ended December 31, 1989, compared with a loss of $17,113 in the fourth quarter of 1988. For the full year, the Company reported a loss of $236,652, or $0.02 per share, compared with a loss of $456,082, or $0.04 per share, in 1988. Despite lower gold prices, net sales increased 15 percent to $5,719,521 in 1989, compared with $4,986,379 in 1988. The Company received an average of $386 per ounce of gold sold in 1989, compared with $438 per ounce in 1988.

Gold production totalled 15,458 ounces in 1989, compared with 11,738 ounces in 1988. The Company processed and stacked a total of 369,272 tons of mineralized rock with an average grade of .052 ounces of gold per ton in 1989, compared with 402,456 tons with an average grade of .036 ounces per ton 1988.

"The significant increase in grade helped to offset lower gold prices and production delays due to bad weather during the year," said Robert Shields Chairman and Chief Executive Officer. "With the additional funds from our rights offering last year, we have greatly expanded our exploration and drilling program. Results for 1989 are after exploration expenses of $733,000. The cash mine operating costs before general & administrative expenses, exploration and non-cash charges were about $200 per ounce of gold produced in 1989. Total costs and expenses in 1989 were $389 per ounce. Our working capital increased to almost $3,000,000, or $0.21 per share, and shareholders' equity increased to $8,650,000, or $0.61 per share, at year-end 1989. Cash and cash equivalents were almost $2,000,000 at year-end. The Company had no long-term debt."

Drilling at the Haile property continues to show encouraging intersections (see table below). The proven mineral inventory at the Haile property at year-end 1989 increased 30 percent to 2.6 million tons averaging .045 ounces of gold per ton, compared with 2 million tons averaging .043 ounces per ton at year-end 1988

At the Russell-Coggins area in North Carolina, exploration drilling and geologic mapping continue. Several holes are shown below. The proven and probable mineral inventory at year-end 1989 has increased to 1,180,300 tons averaging .047 ounces per ton, compared with 426,000 tons at year-end 1988 averaging .056 ounces per ton.

NEW YORK (MARCH 12) PR NEWSWIRE - The acquisition of American Standard Inc.'s Railway Products Group North American operations has been completed by a partnership comprising Investment AB Cardo, a Swedish corporation; Vestar Capital Partners, Inc., a New York-based private investment firm; and certain members of management of WABCO Railway, the principal component of the Railway Products Group, it was announced today.

In addition to the joint venture in North America, where the parties share ownership, Cardo acquired 100 percent of the non-North American operations of American Standard's Railway Braking Products Group, which includes assets primarily in Europe.

The North American acquisition involved an innovative financial structure which combined elements of a management buyout with a strategic corporate acquisition.

WABCO rail brake system products are considered the industry's leaders in technology, quality and reliability.

WABCO's origin is the Westinghouse Air Brake Company, which revolutionized the U.S. railroad industry with the introduction of the railway air braking system over 120 years ago. Today, a majority of the North American rail and passenger transit vehicle fleet is equipped with WABCO-supplied braking systems and related parts.

William Kassling, a vice president of American Standard and group

executive of the Railway Braking Products Group, is an investor in the partnership acquiring the North American operations of WABCO and will become the chairman and chief executive officer of WABCO, which is headquartered in Wilmerding, Pa., near Pittsburgh.

WABCO has more than 1,800 employees and annual sales in North America of approximately $200 million.

MINNEAPOLIS (MARCH 12) PR NEWSWIRE - John F. Grundhofer, chairman, president and chief executive officer of First Bank System Inc. (NYSE: FBS), today announced that William F. Farley, who left the company in 1988 will rejoin FBS as a vice chairman. Farley, 46, will be responsible for some of the restructuring activities currently handled by Grundhofer and Darrell G. Knudson, vice chairman. Farley will be responsible for restructuring the company's operations and technology areas.

"Bill's familiarity with this market combined with his broad experience in financial services from his previous positions will be a great asset as we rebuild First Bank System," Grundhofer said.

Farley has most recently been a partner in the investment firm of Headrick & Farley Partners in Minneapolis.

Farley first joined FBS in 1984 as executive vice president and chief financial officer, a position he held until 1985 when he was appointed president of First Bank Minneapolis. Prior to that time he was senior vice president of finance and chief financial officer for Alexander & Alexander Services Inc., New York.

He began his business career in 1966 at Citibank where his early positions included strategic planner and manager of the World Trade Center Office. Farley was appointed deputy manager of Citibank's Lower Manhattan Region in 1972, regional manager for Nassau County in 1973 and manager of the bank's Manhattan Region in 1974. He was elected president of Citibank New York State in 1975, a position he held until 1978, when he became a partner of KKB Bank, a Citicorp-owned bank in Dusseldorf, Germany.

#90071p0174 03/12/1990 ~PR Newswire

LEXINGTON, KY (MARCH 12) PR NEWSWIRE - Kentucky Central Life Insurance Company (NASDAQ: KENCA) has reached $50 billion of life insurance in force achieving a goal the company set for itself in 1984.

The announcement was made by W.E. Burnett, Jr., chairman of the board and president.

"The goal was established because we wanted Kentucky Central Life to be in the top echelon of the life insurance industry," Mr. Burnett said. "We felt it would take $50 billion of life insurance in force by 1990 to accomplish this."

Kentucky Central Life has reached another important milestone, $2 billion in total assets, which is two and one-half times greater than the $750 million in assets at the end of 1984. Assets are on a consolidated basis of Kentucky Central Life and its subsidiary companies.

Only 50 life insurance companies had more than $50 billion of life insurance in force at the end of 1988, out of more than 2,300 doing business in the United States. With $39.5 billion, Kentucky Central Life was in 57th place. The 1989 rankings are not available, but Kentucky Central Life is expected to advance with a year end total of $48.6 billion.

Life insurance in force is a standard commonly used in measuring the relative size of life insurance companies.

Kentucky Central Life has experienced rapid growth while pursuing its goal. When the goal was announced in December 1984, the in-force total stood at $11.8 billion. For the five-year period from 1985 to 1989, the average growth has been $7.3 billion a year.

Mr. Burnett credits innovative products, a quality sales force, and efficient Home Office support for the company's record.

The company started developing new products and marketing techniques in the early 1980s and this continues to be an on-going priority. "Companies must have products and services to accommodate the changing needs and lifestyles of today's consumers if they are to remain competitive," he added.

Kentucky Central Life is one of the industry leaders in the sale of products incorporating the universal life concept.

Founded in 1902, Kentucky Central Life is the oldest life insurance company with headquarters in Kentucky. It is also the largest, based on life insurance in force. The company has sales and service offices

nationwide.

PITTSBURGH (MARCH 12) PR NEWSWIRE - H.J. Heinz Co. (NYSE: HNZ) announced today a 13.7 percent increase in net income and a 12.8 percent increase in earnings per share for the quarter ended Jan. 31, 1990, compared with the same period last year.

Net income for the third quarter was $117,196,000, up from last year's total of $103,034,000. Net income per share was 44 cents for the current quarter compared to 39 cents per share for the same period last year. The earnings per share numbers for the two periods reflect the two-for-one stock split in the form of a distribution of shares effective Sept. 27, 1989.

Third quarter sales were $1,408,433,000, an increase of $41,925,000 or 3.1 percent over prior year sales of $1,366,508,000. Higher sales came from acquisitions, price increases and volume. The sales increase for the quarter was partially reduced by unfavorable exchange rates for some foreign sales, particularly in the United Kingdom and Venezuela.

Net income for the nine-month period was $369,137,000, up 14.3 percent from last year's total of $323,029,000. Earnings per share were $1.39 for the current nine-month period, an increase of 13.0 percent from the $1.23 per share recorded in the same period last year.

Sales for the first nine months of the year increased 5.3 percent to $4,391,460,000 from last year's $4,170,642,000, primarily attributable to volume growth in the company's core products.

Dr. Anthony J.F. O'Reilly, Heinz chairman, president and chief executive officer, said, "We are encouraged by the year-to-date performance and are optimistic that we will achieve a level of full year growth which is consistent with our historical trend."

#90071p0178 03/12/1990 ~PR Newswire

ST. PETERSBURG, FL (MARCH 12) PR NEWSWIRE - Home Shopping Network, Inc. (AMEX: HSN) today announced record sales for the second quarter and first half of fiscal 1990, ending Feb. 28, 1990. Net sales for the second quarter increased $54.3 million, or 26 percent to $261.9 million from the $207.6 million reported in the same period last year. HSN's year-to-date sales rose $109.0 million to $517.2 million, up 27 percent from the $408.2 million achieved last year and also a record for the first half.

Net income for the second fiscal quarter more than doubled to $12.8 million, or $.14 per share compared with the $6.2 million and $.07 per share reached in 1989's second quarter. For the first half, net income was a record $33.1 million, or $.35 per share, a 94 percent jump from 1989's figure of $17.1 million, or $.19 per share. The second quarter's results for both years included a $1.0 million extraordinary after tax gain or $.01 per share from the repurchase of long-term obligations. For the first half of fiscal 1990, the extraordinary after tax gain from debt repurchases was $6.0 million compared with $5.7 million last year, in both cases, $.06 per share.

Net income before extraordinary item increased more than 100 percent for both the second quarter and six month period. Net income this quarter was $11.8 million, or $.13 per share, versus $5.2 million, or $.06 per share, last year before extraordinary item. Net income before extraordinary item for the first half reached $27.1 million, or $.29 per share, up from $11.4 million or $.13 per share last year.

Roy M. Speer, chairman and CEO said, "The record gains HSN has announced through the first half of our fiscal year are yet another indication of the strength of the electronic retailing industry and HSN's unique position to participate in that growth." Speer continued, "These record sales and earnings are attributable to our focus on HSN's core electronic retailing business and continued expense containment."

#90071p0179 03/12/1990 ~PR Newswire

PEORIA, IL (MARCH 12) PR NEWSWIRE - In its annual report released today, Caterpillar Financial Services Corp. announced new record business volume for 1989, reaching the $1 billion mark for the first time. The company also announced record profit.

New business financed totaled $1.02 billion, an increase of $143.6 million or 16 percent over 1988. This growth resulted from the company's success in financing a greater number of machines sold by Caterpillar dealers and increased prices on products financed.

Profit after tax increased by 64 percent to $21.2 million in 1989. Total assets also grew substantially, reaching $1.71 billion from $1.37 billion a year ago.

"The financial results for 1989 demonstrated our increased ability to meet the financing needs of Caterpillar customers in a superior manner," said James S. Beard, vice president of Caterpillar Inc. and president of Caterpillar Financial Services Corp. "This was accomplished through the development and implementation of competitive financing programs in support of Caterpillar sales strategies and by focusing on our continuing objective to be responsive to customer financing needs."

The company provides a wide range of financing alternatives for Caterpillar earthmoving and construction equipment, lift trucks, engines, turbines, and non-competitive related products sold through Caterpillar dealers in the United States, Canada, and Australia.

The annual report features Green Holdings, Inc. of Denver, the firm that leased the machine that pushed Cat Financial's new business over the $1-billion mark for the first time. The machine, an 834-wheel tractor, is working at Red Rock Gold Mine located in Goldfield, Nev. Coincidentally this customer was involved in the first earthmoving finance transaction when Cat Financial expanded its services to earthmoving machines and other Cat products in 1983.

Cat Financial also reported results for its subsidiary companies in Canada and Australia. Canadian new business financed reached $102.8 million dollars, a 9 percent increase over the 1988 volume. Caterpillar Financial Australia Limited, which completed its first full year of operations, recorded a financed volume level of $87.1 million.

Caterpillar Financial Services Corp. is headquartered in Peoria and is a wholly owned subsidiary of Caterpillar Inc. (NYSE: CAT).

NEW YORK (MARCH 12) PR NEWSWIRE - Robert G. Schwartz, chairman, president and chief executive officer of Metropolitan Life Insurance Company, today reported that "MetLife has an excellent year in 1989 despite unsettled conditions in the financial marketplace."

"We succeed as a company because of our insistence on integrity, financial strength, fair-dealing and quality," he continued.

Schwartz said that MetLife achieved sales records in all of its core businesses and that its surplus and investment reserves grew to more than $5.3 billion, a gain of more than $400 million. "This is a key indicator of our financial strength and stability," he explained.

MetLife highlights for 1989 include the following:

-- $116 billion of face amount of life insurance was issued -- a company record.

-- More than 4 million new policyholders were added to the company's roster of insureds, bringing the total to more than 45 million.

-- Payments to policyholders, beneficiaries and other recipients amounted to $28.9 billion.

-- Total income reached $32.6 billion.
-- Net investment income reached $7.9 billion.
-- Total assets under management by MetLife and its affiliates increased by $8 billion and stand at $128.4 billion, up nearly 7 percent from 1988.

-- MetLife's "Wonders of Life" pavilion opened at Walt Disney World's Epcot Center in Florida.

-- Some 2,500 new employees joined the MetLife family of companies as a result of new business ventures, bringing the number of employees worldwide to 65,000.

WILMINGTON, DE (MARCH 12) PR NEWSWIRE - The trustees of the BRNF Liquidating Trust (NASDAQ: BTRI) today announced an agreement in principle

for the sale to Federal Express Corp. of twenty 727-200 aircraft, 19 spare engines and certain equipment and spare parts previously under lease from the Trust to Braniff Inc.

The agreement is subject to final approval by the board of directors of Federal Express and by the trustees and is subject to the Hart-Scott-Rodino Act. The delivery of aircraft is scheduled to begin in March and to be completed prior to year-end.

The amount to be realized by the sale will be affected by a number of factors, including various expenses, satisfaction of substantial liens existing from obligations of Braniff, adjustments to the value of the assets due to the level of servicability, and to the attrition of rotable spare parts. The trustee's tentative and preliminary estimate is that the net sale proceeds would be in the range of $170 and $175 million.

DEARBORN, MI (MARCH 12) PR NEWSWIRE - CMS Energy Corporation (NYSE: CMS) announced today that it has received a $1.2 billion debt interest and a 49-percent equity interest in the Midland Cogeneration Venture (MCV) from its Consumers Power Company subsidiary in exchange for a CMS Energy debenture.

William T. McCormick Jr., chairman and chief executive officer of CMS Energy, called this transfer of MCV debt and equity ownership "timely considering the commercial operation of the MCV plant expected to occur later this week."

"This transaction is consistent with our ongoing policy of maintaining the financial health of Consumers Power, Michigan's largest utility," he said. "It also provides CMS Energy the means to expand its non-utility energy-related businesses and to take such other actions as are appropriate to optimize shareholder value," McCormick concluded. Consumers Power Company has reviewed this transaction with its various rating agencies and expects no impact upon the company's bond ratings to result from it.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth- largest combination utility.

STAMFORD, CT (MARCH 12) PR NEWSWIRE - Eric L. Steenburgh has been named president of Xerox Corporation's (NYSE: XRX) Information Products Division and Allan E. Dugan has been named to replace him as senior vice president and general manager of the company's manufacturing operations, it was announced today. Both appointments are effective March 19.

The two moves follow the resignation of Austin E. Vanchieri, a Xerox corporate vice president, who has headed Information Products since 1987. Vanchieri, with Xerox since 1965, is joining FROX, Inc., a start-up company in Menlo Park, Calif., as president and chief executive officer.

Steenburgh, also a corporate vice president, has held a number of manufacturing, marketing and business unit management positions since he started with Xerox in 1965. He has headed manufacturing operations, with headquarters in Webster, N.Y., since 1984.

Dugan, who will be responsible for all Xerox manufacturing operations worldwide, joins the company after 23 years in research, engineering and manufacturing with AT&T. He has been manufacturing vice president of AT&T Network Systems at its Merrimack Valley Works in Massachusetts since 1988.

The Xerox Information Products Division develops and makes entry- level and specialized products and markets them through agents, dealers, distributors, original equipment manufacturers, value-added resellers and telemarketing. Its products include copiers, typewriters, facsimile machines, printers, and desktop publishing and presentation software. The division's headquarters is in Hayward, Calif.

YOUNGSTOWN, OH (MARCH 12) PR NEWSWIRE - Wean Industries, a division of Wean Inc. (NYSE: WID), has received an equipment order from ARMCO Steel Co. L.P. to upgrade the No. 4 continuous strip pickling line at its Middletown, Ohio, plant.

Wean will supply new granite-lined tanks, entry and exit loopers, bridles, steering units, and a tension leveling scalebreaker, which Wean will build under a license from Clecim, SA of France. The contract also covers new electrical equipment which will be provided by General Electric Co.

Wean Industries is the world's foremost designer and builder of continuous strip pickling lines for removing the oxide scale from hot rolled steel strip, having supplied more than 125 lines. Wean designed and built both the No. 4 and No. 5 pickling lines at ARMCO, Middletown, as part of the major expansion program called "Project 600" -- and refurbished the No. 5 line earlier, under a contract issued in 1988.

Wean also markets a wide range of equipment for heat treating, coating, plating, inspecting, slitting and shearing flat rolled metals; pipe and tube mills; drawbenches; and rubber and plastics producing machinery.

INDIANAPOLIS (MARCH 12) PR NEWSWIRE - Forum Group, Inc. (NASDAQ: FOUR), the leading U.S. developer and operator of retirement centers for the upscale elderly, announced today that it has opened two additional full-service, luxury retirement communities, both in Arizona.

The company is nearing completion of a major development program begun in 1985 to build ten new retirement communities at a total cost exceeding $300 million. Eight are now completed and open, with occupancy rates well ahead of projections, and the two still under construction will be completed by May 1990. At that time, Forum Group will own and/or operate 28 retirement communities -- consisting of 4,575 independent living units, 672 assisted-living suites and 2,100 nursing beds -- across the country, making it the largest company serving this sector of the retirement living market.

One of the new communities is The Forum at Desert Harbor in Peoria, near Sun City, Arizona. Last week it officially opened the doors of its 266,725-square-foot, three-story retirement community featuring 155 one- and two-bedroom rental apartments, a fully licensed, professionally staffed, 57-bed healthcare center offering intermediate and skilled care, as well as 30 assisted-living apartments.

Earlier, The Forum at Tucson held a grand opening ceremony to inaugurate its 275,000-square-foot, four-story retirement community comprised of 150 one- and two-bedroom rental apartments, a licensed 67-bed healthcare center, and 30 assisted-living suites.

Apartments in Forum Group retirement communities are designed for today's active, independent seniors. Each is equipped with an emergency alert system, providing residents with immediate access to medical attention. Residents of Forum Group rental communities, for a single monthly fee, enjoy a number of gracious conveniences and amenities, including 30 meals per month in the communities' elegant dining rooms, continental breakfast, paid utilities, basic cable service, weekly housekeeping, bed linen and towel laundry service, social and cultural activities, recreational programs, a library, billiards room, convenience store, and numerous other features tailored to each community.

RICHMOND, VA (MARCH 12) PR NEWSWIRE - Following is a statement released today by John W. Snow, president and chief executive officer of CSX Corp. (NYSE: CSX), Richmond, regarding the "Statement of National Transportation Policy" released by the U.S. Department of Transportation on Thursday, March 8::

Secretary Skinner's Statement of National Transportation Policy provided a bold sense of direction and a broad-based strategy for the future of America's transportation system. It represents the personal commitment of Sam Skinner to focus the attention of leaders in government, Congress and the private sector on how we can best work together to build the transportation infrastructure required to make this country truly competitive in the global marketplace.

Secretary Skinner knows that the department he leads, and the nation, needs a strategic plan just as comprehensive and innovative as would be required of any business. The Secretary's policy statement provides such a framework for thinking about the future needs of our transportation system. It recognizes the critical interrelationships of the various modes and the undeniable fact that we must face up to and solve, together, the most serious problems of overload and congestion. Most importantly from my point of view, it is a strategy which underscores the responsibility of those of us in the private sector to work with government at all levels to rebuild and reshape our transportation network and appropriately modify federal and state law and regulatory policy so we can meet the transportation challenges of the 21st century. The policy points toward innovative programs for user fees, continues the government's commitment to deregulation, recognizes the steady decline of the U.S. Merchant Marine and commits to a comprehensive review of our maritime program.

All of us involved with transportation should be indebted to the Secretary for calling attention to our future transportation needs and for giving such visibility to the vital role of transportation in our national life. We welcome the Strategies for Action the Secretary has placed before us and look forward to working with him to make those strategies a reality.

SPRINGFIELD, VA (MARCH 12) PR NEWSWIRE - Versar, Inc. (AMEX: VSR) announced today that it has signed a master agreement with Battelle Environmental Management Operations (EMO) to provide technical support to the Department of Energy (DOE), the Department of Defense (DOD), and other government agencies in their environmental restoration programs nationwide.

Initial effort will concentrate on nuclear plant cleanup activities at DOE facilities. The contract has a maximum duration of five years, which

includes a base period, plus four one-year options.

The technical content of the work to be performed includes environmental impact analysis, underground storage tank program planning, environmental technology development, and environmental restoration. Versar will provide these and other technical services nationwide.

Dr. Michael Markels Jr., president and chief executive officer of Versar, said: "Versar has considerable experience in all components of the overall remedial investigation and feasibility study and site restoration process. This new nationwide contract will expand our regional business, delivered through a network of over 20 offices across the country."

Versar provides a wide range of scientific and technical services to solve environmental and health and safety problems caused by pollutants, hazardous materials and toxic substances.

HOUSTON (MARCH 12) PR NEWSWIRE - Noble Drilling Corp. (NASDAQ: NDCO) announced today that one of its international subsidiaries has received a letter of intent from Shell Petroleum Development Company of Nigeria Limited to enter into contract negotiations for the employment of two offshore drilling units. The operator's requirements call for refurbishment, renovations and mobilization to Nigeria of a shallow-water jackup rig and a posted barge.

The movement of the two rigs is subject to the conclusion of a definitive agreement, the completion of equipment modifications and the satisfaction of certain other conditions.

The company anticipates mobilization of the two units would commence in the third quarter of 1990. This would be the company's first entry into the west African country of Nigeria.

Noble Drilling Corp. is a major drilling contractor providing offshore and onshore contract drilling services worldwide, with operations in the United States, Canada, the United Kingdom, East Africa, and the Far East. The company's common stock is traded on the NASDAQ/national market system under the symbol "NDCO."

CALGARY, Alberta (MARCH 12) PR NEWSWIRE - Canada Southern Petroleum Ltd. (PSE: CSW) said it has filed a lawsuit in the Court of Queens Bench here seeking a return of the interests held by four Canadian oil and gas companies in the Kotaneelee gas field, located in the southeastern Yukon Territory.

Canada Southern, which has a 30 percent carried interest in the field, said the claim also seeks damages and/or other relief for the defendants' breach of fiduciary duty in failing to market gas from the field as well as a specific refusal to market gas in 1986. The defendants are Amoco Canada and its Dome Petroleum unit, Esso Canada, Mobil Canada, and Columbia Gas Development of Canada.

A Canada Southern spokesman said the lawsuit is an outgrowth of the defendants' failure to market Kotaneelee gas, coupled with the subsequent assertion that this failure is a consequence of the alleged marginal economics of the field.

"The theory has been advanced that the field is nearly worthless; hence there should be no accountability for the failure to produce the field," the spokesman said. "That being the case, it seems justifiable for Canada Southern to seek the return of the defendants' interests, which were contingent on the assurance of the earliest feasible marketing of the field."

The Kotaneelee field was disclosed by Canada Southern in 1964, and was connected to a major pipeline system in 1978. Only partially developed, it is capable of producing 120 million cubic feet per day from two wells on a sustained basis, the spokesman said, noting that gas from fields to the north and south of Kotaneelee currently is being marketed. He further noted that, if defendants' interests are returned to Canada Southern, its interest in the field would then be 90 percent.

EAST HARTFORD, CT (MARCH 12) PR NEWSWIRE - Ansett Worldwide Aviation Services (AWAS) of Australia has selected Pratt & Whitney PW2000 engines to power 10 Boeing 757 aircraft which AWAS has on order.

The Australian aircraft leasing concern will purchase 20 installed and three spare PW2037 engines for the Boeing aircraft. The value of the order is approximately $130 million. The engines will be delivered between late 1992 and 1995.

"We are extremely pleased because this is Ansett's first order for PW2000 engines," said William Raabe, vice president- marketing of Pratt & Whitney. "This demonstrates the growing acceptance of our engine among 757 operators around the world."

Airline data shows that the PW2000 has a seven percent fuel burn advantage over its competition, allowing operators to fly larger payloads longer distances. The engine incorporates advanced materials and design features, including a full authority digital engine control that reduces pilot workload while improving performance and easing maintenance.

Since entering service in 1984, the PW2000 has captured 59 percent of the market to power the Boeing 757. It has also been selected by the U.S. Air Force to power its new C-17 transport aircraft.

Pratt & Whitney is a unit of United Technologies Corporation (NYSE: UTX), based in Hartford, Conn.

LOS ANGELES (MARCH 12) PR NEWSWIRE - British Airways is offering a new advanced purchase excursion (APEX) fare on its twice daily non-stop Los Angeles to London services, announced David Williams, manager sales, Southwest USA.

"The $499 fare for travel commencing May 16 through June 15 is another example of British Airways' commitment to providing passengers with not only the highest quality service in air travel, but also the best value," according to Williams.

In addition to servicing Terminal 4 at world famous Heathrow Airport, British Airways hopes to showcase the new uncrowded London Gatwick North Terminal and its easy connections to Victoria Station through this offer.

Enhancing this special deal is the airlines' holiday package, "London Plus " with a full array of attractively priced land arrangements, as well as a guarantee against added fees which can raise the basic price on other carriers by as much as $30.

This offer is good for departures through June 15, 1990, and all travel must be completed by June 28, 1990. Passengers must book and pay for the non-refundable tickets by April 30. No changes may be made to the ticket after issuance. Other restrictions apply.

Further information regarding this or other British Airways programs may

be obtained through local travel agents or via British Airways' toll free number, 1-800-AIRWAYS.

DENVER (MARCH 12) PR NEWSWIRE - Amdura Corporation (NYSE:ADU) today announced that, as part of the company's business plan to consolidate and streamline operations, it will seek a buyer for the Lincoln, R.I., portion of its Amdura National Distribution Company (ANDCO). The Lincoln operation, formerly part of Globe Distribution which was acquired in 1988, distributes principally auto aftermarket goods to mass merchants in the northeastern United States.

In a related announcement, Amdura said that its plans to integrate and streamline operations includes closing distribution centers in South Holland, Ill., and Russellville, Ark. The South Holland operation, formerly part of Globe, will be integrated into the company's Milbank, S.D. and Gainesville, Ga., distribution centers. Operations in Russellville will be transferred to Milbank and Henderson, Nev., centers. ANDCO will serve its customers from distribution centers in Milbank, Gainesville, and Henderson, Nev.

Last month, the company announced plans to consolidate its Crawfordsville, Ind., distribution center into existing facilities at Brookings, S.D., which services many of the company's franchise Coast to Coast stores. The balance of the 1,200 Coast to Coast stores will continue to be serviced by distribution facilities in Springfield, Ore.

Regarding Lincoln operations, Wayne Waldera, Amdura president and chief executive officer, stated that the company had achieved "significant productivity improvements" in recent months.

"Even with these positive results, we concluded that Lincoln, with its distinctive customer mix, did not fit with our business strategy, which is to maximize the inherent strengths of our core hardlines distribution business and to structure for long-term stability.

Last week, Amdura announced the signing of a definitive agreement to sell its Crosby group to a division of TMB Industries, a New York investment firm. The company is still negotiating on the sale of its Harris manufacturing unit. Proceeds from the sales of both Crosby and Harris are expected to exceed $100 million.

Amdura is the nation's leading independent hardlines distributor, delivering thousands of hardware products to franchised Coast to Coast

hardware stores, Trustworthy dealer hardware stores, and national and regional mass merchandisers.

COLUMBUS, OH (MARCH 12) PR NEWSWIRE - Health & Leisure, Inc. announces that its newly formed subsidiary, AmTele, Inc., is entering the business of marketing a long distance telephone service of AT&T known as its Software Defined Network ("SDN"). SDN uses computer controlled switching systems to provide a variety of services to customers.

The SDN arrangement will enable AmTele to pass on discounted telephone rates to its customers. AmTele entered into an agreement with The Spielman Company, doing business as Hospitality Automation Consultants, Ltd. ("HACL") dated as of Feb. 23, 1990. Under the agreement, HACL assigned to AmTele the rights to market the SDN service along with HACL's existing customer accounts. The president of HACL also became an employee of AmTele.

ST. PAUL, MN (MARCH 12) PR NEWSWIRE - St. Jude Medical Inc. (NASDAQ: STJM) today announced that its board of directors has approved a two-for-one stock split, payable in the form of a stock dividend. Such dividend will be payable on April 30 to shareholders of record on April 16.

Lawrence A. Lehmkuhl, president and chief executive officer, said, "St. Jude Medical completed another successful year in 1989. Continued marketshare penetration, completion of the conversion to direct sales, shipping and billing in the United States, and a full year of operations in the lower cost environment of Puerto Rico propelled the company to record results. As a result, our share price has increased accordingly, and has prompted the board to declare a stock dividend."

St. Jude Medical Inc. manufactures and markets medical devices for cardiovascular and vascular applications.

SECAUCUS, NJ (MARCH 12) PR NEWSWIRE - Metromedia/ITT Long Distance today expressed its support of the Federal Communications Commission's decision calling for a thorough study of the long distance industry, but asked that the Commission avoid pre-judgment of possible rule changes until the study is completed.

Commenting on the Commission's March 8 proposal to loosen the restrictions now covering AT&T, Metromedia/ITT President Howard Finkelstein said, "I am encouraged that the FCC has opened the way for a complete review of the long distance industry. I am hopeful that informal comments by members of the FCC regarding the competitive state of the industry do not reflect a predetermination in advance of the study that AT&T should be deregulated."

Finkelstein added that he is in favor of deregulation when full competition exists in the long distance industry, but expressed concern that AT&T may be deregulated prematurely, before such competition has reached a state of development to sustain a competitive long distance market.

"Competition is desirable and healthy. Long distance users have greatly benefited from lower prices and innovative technology. But allowing the premature deregulation of AT&T can jeopardize the economic and technical benefits that competition has brought to the marketplace," Finkelstein said.

"Through price caps, customized tariffs and promotional offerings, AT&T has already achieved substantial deregulation. Further, it still retains many competitive advantages resulting from its pre-divestiture relationship with local telephone companies. This special position significantly contributes to its retention of a 70 percent market share. Before further deregulation is allowed, AT&T's competitors should at least realize true equal access.

"Over the next several months, Metromedia/ITT will be analyzing the issues in this proceeding and marshalling information to provide the FCC with a clear demonstration of AT&T's continued dominance of the long distance industry," Finkelstein concluded. "We will urge the Commission to hold off on deregulation until such time as sustained, real competition exists in the marketplace."

Metromedia/ITT Long Distance is one of the nation's largest long distance carriers, providing domestic and international telecommunications services to businesses, non-profit organizations and residential customers throughout the United States.

MINNEAPOLIS (MARCH 12) PR NEWSWIRE - Grand Metropolitan Food Sector, a subsidiary of Grand Metropolitan PLC, has announced the appointment of Chris J. Chamberlain as senior vice president, Business Development, effective immediately. He reports to Robert C. Lowes, the Food Sector's chief financial officer. Chamberlain replaces Gerard M. Murphy, who will be returning to London for personal reasons, and will focus on strategic planning for Grand Metropolitan.

In making the announcement, Lowes said, "Chris Chamberlain's strong background in international business development will be a major asset in our expansion and globalization of the food sector's key strategic brands."

Chamberlain has six years of experience with Grand Metropolitan. Most recently, he served as business development director, and as a managing director, within Grand Metropolitan Foods Europe. Prior to joining the company, he held senior management positions with Unigate Ltd., and British Petroleum. Chamberlain holds a degree in modern languages from University College in London.

Grand Metropolitan's Food Sector, with annual sales of approximately $8 billion, includes Pillsbury Inc., Alpo Petfoods, Burger King, Grand Metropolitan Foodservice USA and Haagen-Dazs, all headquartered in the United States, and Grand Metropolitan Foods Europe (Express Foods Group International and Pillsbury Europe) headquartered in the United Kingdom. Grand Metropolitan PLC, a leading international food, drinks and retailing company has annual sales of approximately $15 billion. In addition to the food sector companies, its U.S. subsidiaries include Carillon Importers, Heublein, Paddington and Pearle Inc.

HOUSTON (MARCH 12) PR NEWSWIRE - Stewart Information Services Corp.'s (NASDAQ: SISC) board of directors declared a quarterly cash dividend of 10 cents per share, payable April 30, 1990 to common stockholders of record March 30, 1990. This represents the same amount declared in the fourth quarter of 1989.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in 50 states, the District of Columbia and Canada through over 2,600 issuing locations. In issuing a

policy, the title is first searched, examined and then closed. Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry. Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

LA JOLLA, CA (MARCH 12) PR NEWSWIRE - Intermark Inc. (AMEX: IMI) and Triton Group Ltd. (NYSE: TGL) today announced that litigation had been commenced challenging the proposed business combination of Intermark and Triton.

The signing of a Definitive Agreement with respect to the transaction was announced March 2, 1990. At this time, five suits have been filed in Delaware and one action has been started in California. In each case, Intermark, Triton and one or more directors are defendants. The lawsuits seek to enjoin the transaction, among other relief, and allege breaches of various fiduciary duties on the part of the defendants.

Commenting on the litigation, Mitchell R. Woodbury, vice president and corporate counsel of Intermark, stated, "We continue to believe that the arm's length negotiations between Intermark and the Triton Special Committee of Directors as well as the procedural safeguards built into the Definitive Agreement will assure that the transaction is not completed against the will of the Triton stockholders other than Intermark. We intend to contest the lawsuits vigorously."

Intermark and Triton are operating/holding companies whose business is to control and add value to well-established, mid-sized American growth companies operating in broadly diverse industries.

Combined, the companies hold interests in 12 Partner Companies with total revenues of $2 billion and $1.5 billion in assets which employ 23,000 people.

DEARBORN, MI (MARCH 12) PR NEWSWIRE - William E. Scollard has been appointed vice president and senior adviser for Ford's North American Automotive Operations, reporting to Alexander J. Trotman, executive vice president in charge of NAAO.

Previously, Scollard was vice president - Manufacturing Operations for NAAO.

"In his new capacity, Mr. Scollard will advise NAAO's senior management team on a broad range of manufacturing-related matters," said Ford Chairman Harold A. Poling. "His primary assignment is to lead efforts to reduce automotive-related material costs and to improve investment efficiency as the company responds to the competitive challenges ahead."

In conjunction with Scollard's appointment, Donald A. Jesmore, general manager, Body and Assembly Operations, and Henry A. Nickol, general manager, Powertrain Operations, have been reassigned to report to Trotman. William H. Fike, executive director, Ford Mexico and Trim Operations, and Alan F. Spencer, executive director, NAAO Production Purchasing, will continue to report to Scollard.

Scollard joined Ford in 1950 as a college trainee and held a number of managerial assignments in manufacturing before becoming general manager of the Engine and Foundry Division in 1970. He was named general manager of the Casting Division in 1972 and of the Automotive Assembly Division in 1973. He was elected vice president - Body and Assembly Operations in 1980 and became vice president - Manufacturing and Component Engineering in 1983 and vice president - Manufacturing Operations in 1984.

Scollard was born Oct. 26, 1926, in Weymouth, Mass. He received bachelor and master of science degrees from Dartmouth College's Thayer School of Engineering and a master of business administration degree from the Harvard Business School.

#90071p0271 03/12/1990 ~PR Newswire

NEW YORK (MARCH 12) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) today filed its response to the Federal Communications Commission's Order, issued February 8, initiating enforcement action based on an audit of certain affiliate transactions.

In its filing, the company showed that ratepayers were not overcharged as a result of transactions between the NYNEX Telephone Companies and NYNEX Materiel Enterprises Company (MECO). In addition, the company also showed that it did not violate any law or regulation, and that the NYNEX

Telephone Companies benefited from their purchases from MECO.

For these reasons, NYNEX strongly disputes the Commission's proposal to impose penalties, including both refunds and fines, on New England Telephone Company and New York Telephone Company. NYNEX believes the Commission, upon careful consideration of the merits, will determine that the facts do not warrant the penalties it has proposed.

Regarding compliance with Commission rules, the filing demonstrates that when accounting rules governing affiliate transactions were put into effect on Jan. 1, 1988, New England Telephone and New York Telephone promptly complied. Prior to that, no such accounting rules had been adopted.

Quite apart from the absence of Commission rules prior to January 1, 1988, the NYNEX Telephone Companies acted prudently in purchasing goods and services. Both New England Telephone and New York Telephone had in place organizations to evaluate purchasing alternatives, and to assure that the services provided by Materiel Enterprises, when used, were efficient and cost-effective. The Telephone Companies, moreover, were never required to purchase from MECO--indeed, they spent less than half of their purchasing dollars with MECO.

Additionally, the audit's claim of overearnings ignores the fact that MECO's earnings have been consistent with--or lower than--those of similar companies. It also overlooks the fact that, even after adjusting for the alleged overcharges, the NYNEX Telephone Companies earned some $350 million less than their federally authorized return on interstate investment.

CONTACT: Robert O'Brien, 914-644-7211, John Bonomo, 914-644-7232, or Robert Jasinski, 202-416-0125, all of NYNEX.

DEARBORN, MI (MARCH 12) PR NEWSWIRE - The following statement may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company is asking owners of about 150,000 vehicles to return to dealerships to inspect, and if necessary, recalibrate the automatic overdrive transmission in order to prevent a longer term durability problem that could result in the loss of the overdrive gear.

The vehicles involved include: about 89,500 1989-model Ford Crown Victorias and Mercury Grand Marquis; about 47,700 1989 Lincoln Town Cars; about 13,300 1990 Crown Victorias and Grand Marquis; and about 2,500 1990

Lincoln Town Cars.

If customers did not have the recalibration performed, the vehicles involved could experience long third to fourth gear shifts or a loss of the overdrive gear. The vehicle could still be operated in the "D" (third gear) range, but prolonged use of the vehicle could render it inoperable.

The company will contact all owners by mail and will cover all costs of parts and labor. Of the vehicles affected, approximately 143,000 are located in the United States, 8,000 in Canada and 2,000 in export locations.

MINNEAPOLIS/ST. PAUL (MARCH 12) PR NEWSWIRE - Mesaba Aviation Inc. today reported that it flew 13.0 million revenue passenger miles during the month of February, a 51.4-percent increase over 8.6 million revenue passenger miles flown during the same month last year (one revenue passenger flown one mile equals one revenue passenger mile). The airline said it carried 60,241 passengers in February, an increase of 47.9 percent over 40,723 passengers carried last February. Mesaba's load factor during the month was 48.7 percent, compared to 52.3 percent last year.

The company said that its reduction in load factor during the month reflects the extra capacity added to its system over the past year, with its fleet of 48-passenger aircraft. In the prior year, the company's load factor was unusually high as it entered many of its new Detroit markets

short of capacity with its 19-passenger aircraft.

Mesaba operates as Northwest Airlink under an airline marketing agreement with Northwest Airlines at the Minneapolis/ St. Paul, Detroit and Milwaukee airports. The regional carrier currently provides scheduled airline service to 34 airports in the 10 states of Illinois, Iowa, Ohio, Michigan, Minnesota, Nebraska, North Dakota, Pennsylvania, South Dakota and Wisconsin. The airline plans to add service between Indianapolis, Indiana and Milwaukee on April 1, 1990.

Mesaba Aviation Inc. is the wholly owned subsidiary of AirTran Corp. AirTran's common stock is traded on the NASDAQ National Market System under the symbol ATCC.

PHILADELPHIA (MARCH 12) PR NEWSWIRE - SmithKline Beecham announced today that it will relocate its pharmaceutical business from Spring Garden Street in Philadelphia to the SmithKline Beecham Building at One Franklin Plaza, Philadelphia.

The relocation of approximately 1,000 employees will begin late this year and be completed in 1991. SmithKline Beecham will occupy 11 additional floors for a total of 19 in the 24-story building which will be renovated to accommodate the move.

"We are delighted to announce this decision consolidating our work force at One Franklin Plaza", said Henry Wendt, chairman of SmithKline Beecham. "SmithKline Beecham has very strong roots in Philadelphia, and we are pleased that our presence will continue."

Wendt noted that prior to the merger of SmithKline Beckman and Beecham Group last July, SmithKline Beckman announced it was ending pharmaceutical manufacturing at Spring Garden, that the business would be relocated and that the facility would be sold. Plans to relocate the pharmaceuticals

business to Upper Merion, Pa., where SmithKline Beecham's pharmaceutical research is headquartered, were halted following the merger.

The move to One Franklin Plaza involves approximately 800 employees from SmithKline Beecham's U.S. pharmaceuticals business and 200 from worldwide pharmaceuticals. They will join 285 members of corporate staff at the site.

ST. PETERSBURG, FL (MARCH 12) PR NEWSWIRE - Home Shopping Network, Inc. (AMEX: HSN) today announced record sales for the second quarter and first half of fiscal 1990, ending Feb. 28, 1990. Net sales for the second quarter increased $54.3 million, or 26 percent to $261.9 million from the $207.6 million reported in the same period last year. HSN's year-to-date sales rose $109.0 million to $517.2 million, up 27 percent from the $408.2 million achieved last year and also a record for the first half.

Net income for the second fiscal quarter more than doubled to $12.8 million, or $.14 per share compared with the $6.2 million and $.07 per share reached in 1989's second quarter. For the first half, net income was a record $33.1 million, or $.35 per share, a 94 percent jump from 1989's figure of $17.1 million, or $.19 per share. The second quarter's results for both years included a $1.0 million extraordinary after tax gain or $.01 per share from the repurchase of long-term obligations. For the first half of fiscal 1990, the extraordinary after tax gain from debt repurchases was $6.0 million compared with $5.7 million last year, in both cases, $.06 per share.

Net income before extraordinary item increased more than 100 percent for both the second quarter and six month period. Net income this quarter was $11.8 million, or $.13 per share, versus $5.2 million, or $.06 per share, last year before extraordinary item. Net income before extraordinary item for the first half reached $27.1 million, or $.29 per share, up from $11.4 million or $.13 per share last year.

Roy M. Speer, chairman and CEO said, "The record gains HSN has announced through the first half of our fiscal year are yet another indication of the strength of the electronic retailing industry and HSN's unique position to participate in that growth." Speer continued, "These record sales and earnings are attributable to our focus on HSN's core electronic retailing business and continued expense containment."

#90071p0283 03/12/1990 ~PR Newswire
RICHMOND, VA (MARCH 12) PR NEWSWIRE - Following is a statement released today by John W. Snow, president and chief executive officer of CSX Corp. (NYSE: CSX), Richmond, regarding the "Statement of National Transportation Policy" released by the U.S. Department of Transportation on Thursday, March 8:

Secretary Skinner's Statement of National Transportation Policy provided a bold sense of direction and a broad-based strategy for the future of America's transportation system. It represents the personal commitment of Sam Skinner to focus the attention of leaders in government, Congress and the private sector on how we can best work together to build the transportation infrastructure required to make this country truly competitive in the global marketplace.

Secretary Skinner knows that the department he leads, and the nation, needs a strategic plan just as comprehensive and innovative as would be required of any business. The Secretary's policy statement provides such a framework for thinking about the future needs of our transportation system. It recognizes the critical interrelationships of the various modes and the undeniable fact that we must face up to and solve, together, the most serious problems of overload and congestion. Most importantly from my point of view, it is a strategy which underscores the responsibility of those of us in the private sector to work with government at all levels to rebuild and reshape our transportation network and appropriately modify federal and state law and regulatory policy so we can meet the transportation challenges of the 21st century. The policy points toward innovative programs for user fees, continues the government's commitment to deregulation, recognizes the steady decline of the U.S. Merchant Marine and commits to a comprehensive review of our maritime program.

All of us involved with transportation should be indebted to the Secretary for calling attention to our future transportation needs and for giving such visibility to the vital role of transportation in our national life. We welcome the Strategies for Action the Secretary has placed before us and look forward to working with him to make those strategies a reality.

CONTACT: Joseph R. Beckman or Suzanne S. Walston, 804-782-1406, both of CSX.

LOS ANGELES (MARCH 12) PR NEWSWIRE - The Times Mirror Company (NYSE: TMC)

announced that Donald R. Beall has been elected a director of the company and nominated for election to a three-year term at the company's annual meeting on May 2, 1990.

Beall, 51, is chairman of the board and chief executive officer of Rockwell International Corporation, headquartered in El Segundo, Calif. He was elected to this position in 1988 after serving nine years as president and chief operating officer. Beall joined Rockwell in 1968 and has been a member of its board of directors since 1978. Prior to joining Rockwell, Beall held various managerial posts with Ford Motor Company.

Beall holds a bachelor of science degree from San Jose State University and a master of business administration degree from the University of Pittsburgh.

Beall is a past chairman of the board of governors of the Aerospace Industries Association, a charter trustee of the University of Pittsburgh, a member of the University of California-Irvine board of overseers and the board of trustees of the Center for Strategic and International Studies.

Among his other activities, Beall is also a member of The Business Council The Business Roundtable, the Chief Executives' Organization, the Young Presidents' Organization and the Business- Higher Education Forum. He is also a director, trustee or member of a number of professional and civic organizations.

Times Mirror is a Los Angeles-based media and information company. It publishes the Los Angeles Times, Newsday and New York Newsday, the Baltimore Sun newspapers, The Hartford Courant, The Morning Call, The (Stamford) Advocate and Greenwich Time. MESA, AZ (MARCH 12) PR NEWSWIRE - David L. Cooper has been named director of weapon system integration for the McDonnell Douglas/Bell Helicopter Textron LH SuperTeam, formerly the LHX SuperTeam.

A 32-year veteran of McDonnell Douglas' (NYSE: MD) space and missile components, Cooper will relocate to SuperTeam headquarters in Mesa to work on the U.S. Army's proposed LH armed reconnaissance helicopter. He reports to SuperTeam Vice President of Engineering Frank Harris.

Cooper formerly was program manager for the High Endoatmospheric Defense Interceptor (HEDI) Program at McDonnell Douglas Space Systems Co. He also served as chief engineer for the McDonnell Douglas Mast-Mounted Sight program for the OH-58D AHIP helicopter and for the Advanced Maneuvering Re-entry Vehicle.

He holds a bachelor's degree in electrical engineering from Virginia Polytechnic Institute and a master's degree in aeronautics and astronautics from the Massachusetts Institute of Technology.

The SuperTeam, led by McDonnell Douglas Helicopter Co., Bell Helicopter Textron and McDonnell Aircraft Co., is competing against one other industry team for a U.S. Army contract to develop and produce nearly 2,100 LH helicopters.

BOSTON (MARCH 12) PR NEWSWIRE - Warner-Lambert Company's (NYSE: WLA) plans to file new drug applications in the United States and Europe for Cognex (tacrine) by the middle of the year are on schedule, Fred Hershenson, Ph.D., vice president of drug development at the company's Parke-Davis Pharmaceutical Research Division, told investors attending the

10th Annual Cowen & Co. Health Care Conference.

Speaking at an Alzheimer's Disease Workshop, Hershenson said Warner-Lambert currently has nine compounds under development worldwide for treating various disorders of the central nervous system. Among them are two compounds for use in treating Alzheimer's Disease. The first is Cognex, which is currently being tested in a 16-center clinical program Warner-Lambert is sponsoring with the National Institute on Aging (NIA). The second is a postsynaptic cholinergic muscarinic agonist. The company has completed pre-clinical development of this compound and expects to file an Investigational New Drug (IND) application in the United States in July.

While discussing Cognex, Hershenson emphasized that a recent study in the British Medical Journal concerning tacrine was compromised in its design, the length of treatment and the number of patients included in the trial. The study indicated that little or no efficacy was achieved. "We are aware of other studies conducted in Canada that have come to similar conclusions," Hershenson told the group. "The contrast between the results of these studies and the results we have obtained in the study with the NIA stems from important differences in study design."

Among the design differences he cited are: number of patients included for evaluation, the duration of drug treatment and the selection of doses. What distinguishes the Warner-Lambert/NIA study is the use of an "enriched" population, according to Hershenson. "What this means is that to be included in our study, patients not only had to be able to tolerate the drug, they also had to show a positive and measurable response to a dose of either 40 mg or 80 mg of Cognex per day for a two-week treatment period," he explained.

In all but one of the tacrine studies that have appeared in the scientific literature, tolerance has been the only criterion used in selecting dose, according to Hershenson. The one exception was the study published by Dr. William Summers in the New England Journal of Medicine in November 1986, in which the study population was "enriched" to include patients who showed some ability to respond following a brief exposure to tacrine. Hershenson stressed that the Warner-Lambert/NIA study employed this enriched population design.

Warner-Lambert is a leading worldwide company devoted to developing, marketing and manufacturing quality health care and consumer products. The company employs some 33,000 people at its operations in 130 countries.

#90071p0329 03/12/1990 ~PR Newswire
NEW YORK (MARCH 12) PR NEWSWIRE - S&P's senior debt ratings of Whirlpool Corp. and Whirlpool Financial Corp. are lowered to single-'A'-plus from double-'A'-minus and Whirlpool Corp.'s commercial paper ratings are lowered to 'A-1' from 'A-1'-plus. The issues are removed from CreditWatch where they were placed on Nov. 20, 1989.

About $385 million of senior debt is affected. The downgrades reflect the impact of lower than historical levels of profitability, despite some margin gains and overseas growth in 1989. Return on capital was 17 percent in 1989, hurt by cyclical weakness in the U.S. appliance market, restructuring programs and the European joint venture.

Also, S&P believes that measures of profitability and debt servicing capability at Whirlpool will not be representative of the higher ratings over the next few years, due to the impact of its European joint venture with unrated NV Philips.

Debt, largely used to finance the joint venture, reached a peak of 41 percent of capitalization in 1989 and is likely to stay above prior levels. European industry fragmentation and price competition may delay the potential financial benefits of the NV Philips unit.

Continued weakness in the U.S. appliance market and/or continued difficulties realizing meaningful growth from Sears Roebuck & Co. distribution, which accounts for 40 pc of U.S. sales, could also impair earnings gains.

Capital spending requirements, a high dividend payout rate, and Whirlpool's anticipated buyout of the remaining portion of the joint venture for over $600 million in the early 1990s will make meaningful debt reductions more difficult. However, Whirlpool's strong business position as the industry leader in major appliances and management's operating strategies, albeit less conservative than in the past, continue to provide strong financial flexibility.

The current rating provides sufficient flexibility for the purchase of the remaining joint venture interest and anticipates gradual improvements in both profitability and balance sheet strength, S&P said.

CONTACT: Adele Archer, 212-208-1633 or Catherine Mattson, 212-208-1544, both of S&P.

PITTSBURGH (MARCH 12) PR NEWSWIRE - Alcoa Composites has acquired an

option to purchase Bonded Technology, Inc. (BTI), a bonded composites company based in Cromwell, Conn.

Under the terms of an agreement signed by the two companies, Alcoa Composites, a wholly owned subsidiary of Aluminum Company of America (NYSE: AA) that is based in San Antonio, Texas, has the option to purchase BTI on Feb. 28, 1991.

Announcing the agreement, Bruce James, president of Alcoa Composites, said:

"Alcoa Composites' strategic direction is toward broader involvement in bonded composite structures for the aircraft spares and subassemblies market. During the 12-month option period, Alcoa Composites and BTI will share technology and may make other arrangements to cooperate in areas of mutual strength to further plans in this and other markets."

Robert C. Miller, president of BTI, said: "Funds from the agreement will enable BTI to continue its recent high rates of growth and aggressively pursue expanding market opportunities for bonded composites in the aerospace industry."

#90071p0342 03/12/1990 ~PR Newswire

DENVER (MARCH 12) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) announced today that the U.S. Bankruptcy Court in New York approved the $505 million settlement between Cyprus and The LTV Corp. of all claims filed by Cyprus against LTV and its subsidiary, LTV Steel Co. Inc.

While the settlement was approved by the Court, subject to possible appeal the actual amount of cash, notes, or securities that Cyprus and other creditors will receive on their claims is dependent on the terms of a plan of reorganization to be ultimately approved by the Bankruptcy Court. No reorganization plan has yet been presented by LTV to the Court for approval. Also unresolved is the issue of claims by the Pension Benefit Guaranty Corp., currently before the U.S. Supreme Court. Therefore, the timing and amount of Cyprus' ultimate recovery is uncertain and is expected to be substantially less than the allowed amount of its claims.

In November 1987 Cyprus had filed a $1.07 billion claim against LTV and LTV Steel for damages due to lost profits from rejected contracts and for unpaid receivables. The claims against LTV Steel, once Cyprus' biggest coal customer, stem from LTV's July 17, 1986 filing for reorganization under Chapter 11 of the U.S. Bankruptcy Code and the subsequent rejection of long-term coal supply contracts with two Cyprus mines, the Emerald mine near Waynesburg, Penn., and the Knox Creek mine in Virginia. Both mines

were supplying coal to LTV Steel coking batteries in Pennsylvania, Indiana and Ohio. When LTV Steel rejected its coal contracts with Cyprus, 250 employees at the Emerald mine were furloughed and Cyprus sold its Knox Creek mine property.

Cyprus Minerals, based in Englewood, Colo., is a major producer of coal, copper, molybdenum, lithium, and talc. The Company employs approximately 8,500 people worldwide.

RANCHO CORDOVA, CA (MARCH 12) PR NEWSWIRE - Spinner Corp. (OTC), a California-based manufacturer, wholesaler and national retailer of gourmet chocolates, nuts and candies, announced today its acquisition of certain assets of J. Higby's Inc. (OTC) has been approved by J. Higby shareholders.

Concurrently, Spinner Corp. has changed its name to American Confectionery Corp. (ACC) and consolidated its corporate offices with those of J. Higby's in Rancho Cordova, Calif. The company has applied for inclusion on the National Association of Securities Dealers Automated Quotations (NASDAQ) System under the stock symbol CNDY and anticipates a listing "within several days."

ACC has formed a wholly owned subsidiary, J. Higby's Yogurt Corp., to operate the 70 J. Higby's Yogurt and Treat Shoppes in the United States and manage its international operations. J. Higby shareholders will receive 1.5 million shares of newly issued preferred stock in ACC, and warrants to purchase an additional 600,000 shares of ACC common stock at the price of $3 per share.

"We are pleased by this opportunity to expand our prestigious family of gourmet sweets," said Steve Kircher, ACC chairman and president. "J. Higby's yogurt is an excellent complement to the chocolates, nuts and candies already being marketed by ACC. The expanded company will be less affected by seasonal fluctuations, as J. Higby's will help bolster sales and profits in the spring and summer months when ACC's existing businesses are traditionally slower.

"In addition to benefiting from an excellent fit on a national basis, ACC is positioned to take advantage of important international relationships now being established by management in the Pacific Rim and Canada. Through its licensing agents, J. Higby's already has operations in Japan, South Korea, Malaysia and Singapore."

#90071p0349 03/12/1990 ~PR Newswire

CHICAGO (MARCH 12) PR NEWSWIRE - Foote, Cone & Belding (NYSE: FCB), the agency responsible for many of America's best-liked and best- recalled advertising campaigns -- including the California raisins, Levi's 501 jeans, Nabisco's Teddy Grahams, Mazda's Miata and Coors Light, The Official Beer of the '90s -- today was named "Agency of the Year" by Adweek magazine.

Citing the agency for its outstanding growth and new business record, Adweek said: "FCB distinguished itself in 1989 from other national agencies by the sheer dint of its success, both internationally and domestically."

Domestically, FCB led Adweek's charts for new business growth in the United States, with a new business scorecard termed "the envy of the industry."

Internationally, FCB completed an alliance with French-owned Publicis Communication and emerged as the No. 1 agency network across Europe.

A leading publication in the ad industry, Adweek conferred the coveted title on FCB in a competition scoring all major agencies in the United States. The award is the second in three years for FCB, which was named Agency of the Year by Advertising Age magazine in 1987.

In acknowledging the title, FCB Chairman Norman Brown said: "We thank Adweek for this high honor and are grateful to them for recognizing the fundamental philosophy and strength of FCB.

"We know this award reflects our success and unique balance of strength across the country. Our offices in all three regions of the U.S. -- East, Midwest and West -- topped Adweek's regional new business charts in 1989, just as FCB led the national scorecard.

"Our belief in strong, individualized offices that reflect local vitality and culture is a prime factor in our U.S. success...and now represents the path we've taken around the world."

Additionally, in 1989 more than half of FCB's new business wins came from existing clients including Nabisco, RJR Tobacco, SC Johnson Wax, Cadbury-Schweppes, Citicorp, Coors and Kraft General Foods. Largest among the major new clients of the agency was Taco Bell.

"Our company-wide ethic is rooted in a commitment to taking care of existing clients," Brown said. "We believe growing our clients' businesses is the best way to grow our own...and that principle is a major factor in our success in any year."

Brown thanked the agency's clients -- its "indispensable partners" -- in the United States and around the world.

"You can't be Agency of the Year without outstanding clients who nurture trust, appreciation and commitment to excellence. They are essential to any agency's success," he said.

"We share this distinction with all our clients -- in every office -- and with all of our FCB people around the globe who dedicate themselves to achieving excellence in everything we do."

Foote, Cone & Belding Communications, Inc. was founded in Chicago in 1873 and today is a global communications network of more than 125 offices in 40 countries. It is ranked as the fourth-largest U.S. agency and in 1989, combined with its European Publicis-FCB network, had worldwide billings of $4.6 billion.

STURBRIDGE, MA (MARCH 12) PR NEWSWIRE - Luxtec Corporation (NASDAQ: LUXT) announced today that sales for the first quarter ended Jan. 31, 1990, were $1,064,290, 9.1 percent lower than the $1,170,582 reported a year ago. The profit was $33,752, $0.0024 per share, compared to a loss of $108,550, $(0.0077) per share, for the three month period ended Jan. 31, 1989.

"The reduction in sales reflects the continuing softening in the medical instrument market," comments Bernard Clark, Luxtec president. "The

company has reduced operating expenses, lowering the breakeven point to existing sales levels."

"Selling expenses were 16.4 percent of sales for the quarter, compared to 25.2 percent in 1989. The decrease in expenditures resulted from the elimination of regional sales managers. General and administrative expenses were 14.0 percent for the quarter, compared to 24.5 percent in 1989. Decreases in legal, consulting, and research and development expenditures accounted for the reduction."

HOUSTON (MARCH 12) PR NEWSWIRE - Allwaste Inc. (NASDAQ: ALWS) today announced that earnings per share for the quarter ended Feb. 28, 1990, would, in all likelihood, be slightly below analysts' estimates of 7-8 cents. R.L. Nelson Jr., chairman of Allwaste, estimated that earnings would be 5-6 cents per share, on revenues of approximately $42 million-$43 million. This compares to revenues of $36 million and EPS of 7 cents in the like quarter of the prior year.

Nelson explained, "Historically, the second quarter of our fiscal year (winter months) is Allwaste's slowest period. For this most recent quarter, our manufacturing operations should report record results; however, several service operations have been impacted by the bitter cold weather experienced across the United States and Canada as well as the extraordinarily high rainfall in the Southeastern United States. Although weather and other seasonal factors have negatively impacted second quarter earnings, the backlog in our service operations is at an all-time high, due in part to these weather delays. This should favorably impact results for the spring and summer, which are historically our strongest periods of the year."

Allwaste Inc. is an environmental services company headquartered in Houston.

#90071p0359 03/12/1990 ~PR Newswire

ST. LOUIS (MARCH 12) PR NEWSWIRE - An F-15 that can automatically repair its own flight control system has successfully completed several test flights at the National Aeronautics & Space Administration's (NASA) Dryden Flight Test Center at Edwards Air Force Base, Calif.

McDonnell Douglas is developing the system under a $6.3 million, three-year Air Force-funded contract using an F-15 Eagle. The F-15 is equipped with unique software that detects faults and determines which flight components caused them. The system then alters flight controls to aid pilots in regaining full control of the jet.

The system is also able to diagnose electronic and hydraulic failures -- thus enabling ground crews to make repairs faster -- a factor that results in lower maintenance costs.

At NASA-Dryden, tests have shown that the system can reconfigure controls after failure of the right horizontal stabilator and that the system allows pilots to adequately control the aircraft at the specified flight condition.

The development of a self-repairing system with additional capabilities, including flight control reconfigurations using a thrust vectoring engine nozzle, is expected to be funded sometime after the current phase of development ends in September.

OTTAWA, ONTARIO (MARCH 12) PR NEWSWIRE - SHL Systemhouse Inc. (NASDAQ: SHKIF) of Ottawa has been advised by Kinburn Technology Corporation, its controlling shareholder, also of Ottawa, that Kinburn Corporation, its parent, is in severe financial difficulties. Kinburn Technology has guaranteed Kinburn's loans of which approximately $415 million are due to BCE Inc. of Montreal. Kinburn Technology has pledged as collateral for its guarantee its controlling interest in SHL Systemhouse Inc. Kinburn Technology said it expects to be called to pay under its guarantee and has advised SHL that Kinburn Technology does not have the financial ability to honor such a demand. Accordingly, control of SHL Systemhouse Inc. is expected to change in order to satisfy Kinburn Technology's obligations under its guarantee.

SHL Systemhouse is not dependent on its parent for financial support and is in a sound financial position with a strong balance sheet. Notwithstanding any change in control, the company will continue to be a strong, profitable company and a leader in the systems integration business.

EL PASO, TX (MARCH 12) PR NEWSWIRE - Property Trust of America (NYSE: PTR) announced financial results for the year ended Dec. 31, 1989. Earnings from operations for 1989 were $989,000, or 20 cents per share, as compared to $2,982,000 or 59 cents per share in 1988, a decrease of 67 percent. Net earnings for the year were also $989,000, or 20 cents per share, as compared to $3,015,000 or 60 cents per share in 1988, which included a small gain on the sale of an investment.

Cash provided by operations for distribution to shareholders for 1989 was $3,312,000, or 65 cents per share compared with $4,536,000, or 90 cents per share in 1988, a decrease of 28 percent on a per share basis. The financial results for 1989 were substantially affected by the inclusion of approximately $1,615,000 of costs incurred in connection with protecting shareholders against a hostile takeover attempt by Realty Acquisition Corp. of Kenner, La. This figure includes a non-cash charge of $672,000 relating to an option issued by the Trust to SWRT Inc. in connection with a termination and settlement agreement with Realty Acquisition. In addition there were other costs not expected to recur included in 1989, primarily the listing of Trust shares on the New York Stock Exchange.

Without these costs, earnings from operations for 1989 would have been $2,756,000, or 54 cents per share. Similarly cash provided by operations for distribution to shareholders would have been $4,407,000, or 87 cents per share, which would have exceeded distributions by $203,000, or 4 cents per share.

James H. Polk III, president and CEO of the Trust, stated: "1989 was a year of considerable excitement and challenge for Property Trust of

America. The Trust maintained its strong balance sheet, initiated several new real estate acquisitions and developments, and continued to be well positioned for new real estate investment opportunities. These positives were offset by the substantial expenses incurred in defending our shareholders against an unwelcome and inadequate tender offer by Realty Acquisition. However, the Trust was successful in defeating the hostile offer with the option transaction and related purchase of Realty Acquisition's stock by SWRT Inc. (William D. Sanders). The Trust is positioned now to move ahead with its southwestern business plan with renewed confidence and strength. We welcome the opportunity to work toward this objective with William D. Sanders, one of the country's leading real estate executives and investors."

NORWALK, CT (MARCH 12) PR NEWSWIRE - Pepperidge Farm Inc. announced today that it will vigorously contest Occupational Safety and Health Administration (OSHA) charges relating to recordkeeping practices and ergonomics at the company's Downers Grove, Ill., bakery.

Within the last year, Downers Grove plant management performed a complete update of the plant's recordkeeping logs spanning five years and over 14,000 medical entries. "We have fully complied with the letter and the spirit of OSHA's requirements," said company President Richard A. Shea. As yet, the company has not had the opportunity to review in detail the items cited by OSHA.

As for the ergonomic charges, Shea pointed out that, "despite the absence of OSHA standards or policies for employers to follow, we have consistently gone out of our way to provide a safe work environment for our employees. The assertions of OSHA are patently without merit."

#90071p0402 03/12/1990 ~PR Newswire

WHEELING, WV (MARCH 12) PR NEWSWIRE - Wheeling-Pittsburgh Steel Corp. (NYSE: QWHX), in response to an earlier press release today by the United Steelworkers of America (USW), strongly denied allegations raised by the USW that it was delaying current labor negotiations.

Contrary to Steelworker statements, company officials are not asking Steelworkers to accept a substandard contract, but rather have offered a generous wage and benefit package totalling $40 million a year. This provides for a greater than $5/hour increase in employment costs over three years, including a $2/hour increase in base wages, a $3,000 signing bonus, an average bankruptcy claims settlement of about $4,500 per employee as well as a 20 percent profit sharing program for USW employees that alone would have paid over $1.50/hour in 1989. Average earnings for USW production employees at Wheeling-Pittsburgh were about $28,000 in 1989.

The company noted that labor negotiations are, in fact, stalled. The last set of demands received from the USW on Jan. 18, 1990, would have increased Wheeling-Pittsburgh wage employment costs by over $11 an hour or over $50/ton by 1994. The corporation, as well as all of its major creditor and equity groups believe that it would be difficult, if not impossible, to confirm a viable plan of reorganization if the USW's latest demands were met.

Company officials speculated that the USW's goal is to restore industrywide coordinated bargaining and other USW international issues at the expense of individual employees' interests. The corporation believes that its wage and claims settlement offer is fair and equitable to its employees while providing for the long-term viability of the newly reorganized Wheeling-Pittsburgh Steel.

The company also denied that it has ignored the Bankruptcy Court's order dated Feb. 27, as alleged by the union and calls upon the USW to support its allegations in open court on March 15.

HOUSTON (MARCH 12) PR NEWSWIRE - Kelley Oil & Gas Partners Ltd. (AMEX: KLY) has filed with the Securities and Exchange Commission a registration statement for a proposed offering of $30 million principal amount of convertible subordinated debentures due 2000.

The debentures will be convertible into units of limited partner interests in Kelley Partners. Tucker Anthony Inc. and Wheat First Butcher & Singer Capital Markets will act as co-managers of the underwriting group.

Subject to market conditions and SEC effectiveness, Kelley Partners expects to complete the offering in mid- to late April. Net proceeds to Kelley Partners from the offering will be used to repay existing bank indebtedness, to finance development drilling activities and for general business purposes.

Kelley Partners is engaged in the management and development of oil and natural gas properties, located primarily in Louisiana, and the acquisition of additional producing properties in or near Kelley Partners' established production area.

COTTON VALLEY, LA (MARCH 12) UPI - An empty 80,000-gallon oil tank exploded Sunday, killing three men working on its roof.

The men were repairing the top of the tank at the Kerr-McGee oil refinery when sparks apparently ignited petroleum fumes, causing an explosion and small fire at about 2:10 p.m., said Webster Parish sheriff's deputy Charlie Horton.

T.C. Bloxom, the fire chief of nearby Minden, La, identified the victims as James Christopher Doyls, 22, of Longview, Texas; Steve Vega, 24, of Tyler, Texas; and Rickey Martin, 37, of Jacksonville, Texas.

The men were employed by Baker Tank Co. of Arp, Texas, which was contracted to renovate the tank, said Gerald Collins, the Louisiana operations manager for Kerr-McGee.

Bloxom said witnesses indicated ''the explosion was tremendous,'' ripping the top off the tank and probably killing the three men instantly.

A brief fire was confined to the remains of the tank and was extinguished shortly after the explosion, Horton said.

Vapors from petroleum products that had been stored in the tank apparently built up, possibly setting off the explosion, Bloxham said.

Plant officials had controlled the blaze by the time fire departments arrived at the scene.

The explosion and fire did not release petroleum products or any hazardous substances of any kind, Collins said.

Baker Tank Co. officials began an investigation of the incident late Sunday afternoon and were scheduled to continue their probe Monday morning Collins said.

Collins said the tank that exploded was about 30 feet high and had a diameter of about 114 feet.

#90071u0174 03/12/1990 ~United Press International
CAPE CANAVERAL, Fla. (MARCH 12) UPI - A Trident 2 missile carrying a load of dummy warheads was successfully launched Sunday night from a submerged nuclear submarine off the coast of Florida in the 30th test firing of the Navy's most powerful nuclear weapon system.

The three-stage, $26.5 million Trident 2 missile was fired from the USS Pennsylvania, an Ohio-class nuclear submarine, at 10:45 p.m. EST, according to Air Force spokeswoman Alecia Lewis, who said the test was a success. No other details were provided.

The launch was part of a routine ''demonstration and shakedown operation'' to certify a sub crew's ability to handle the missile system.

It was the first such launch from a submarine other than the USS Tennessee and the first since a rapid-fire double launch Feb. 12 in which two Trident 2 missiles were successfully fired.

The flight Sunday was the 11th test firing from a submerged submarine and the 30th in the Trident 2 test program, which included 19 launchings from a ground pad at the Cape Canaveral Air Force Station.

The missile's sea-launch record now stands at nine successes and two failures. Overall, the record is five failures and 25 successes.

The first and third such submarine firings in March and August last year ended in spectacular explosions that delayed operational deployment by three months.

A Navy investigation determined the nozzles of the Trident 2's first-stage motors were being subjected to more water pressure than expected as the 126,000-pound missiles were propelled to the surface by powerful charges of compressed gas.

Rear Adm. Kenneth Malley, the Trident's program manager, said engineers redesigned the nozzle system to make it better able to withstand the rigors of its brief ''flight'' through the water. Since the modifications were implemented, the missile has a perfect record.

The Trident 2 is thought to have a maximum range of up to 6,900 miles. Malley disclosed in January the missile can deliver a nuclear warhead to within less than 600 feet of a target, saying ''at 4,000 nautical miles, we have an accuracy that's better than the length of a submarine'' - 560 feet.

The Trident 2 is intended to be the equal of the land-based 10-warhead MX missile but under an agreement with the Soviets, the United States will maintain a maximum of only eight nuclear warheads on each of the 24 missiles put aboard the Tennessee.

#90071u0179 03/12/1990 ~United Press International

(MARCH 12) UPI - Chile has a new president. Sunday's inauguration of

civilian President Patricio Aylwin ended 16 years of military rule under General Augusto Pinochet. Aylwin won the presidency in December in elections Pinochet agreed to hold only after Chileans refused him another eight-year term of office in a 1988 referendum.

In Cotton Valley, Louisiana, three men were killed Sunday when an empty 80-thousand-gallon oil tank exploded. Webster Parish sheriff's Deputy Charlie Horton says the men were repairing the top of the tank at the Kerr-McGee oil refinery when apparently sparks ignited petroleum fumes, causing an explosion and small fire. The men were employed by the Texas-based Baker Tank Company, which was contracted to renovate the tank.

Tranportation Secretary Skinner predicted Sunday that Americans are willing to bear the cost of repairing the nation's overburdened road, rail and aviation systems. During an interview, Skinner defended a Bush administration plan to make local governments more responsible for transportation funding. He says congestion on land and in the air ''will get better''... but only at a cost to taxpayers.

Tammy Faye Bakker, wife of jailed T-V evangelist Jim Bakker, held church services Sunday at a new location south of Orlando, Florida, and said it was nice to be home again. Bakker serves as pastor for the church and says- quote- ''It's a whole new thing for me being a pastor, so I am just trying my wings.'' The new church is located in what used to be a Tupperware training center.

#90071u0185 03/12/1990 ~United Press International

LOS ANGELES (MARCH 12) UPI - Bill Cosby was a triple winner at Sunday night's 16th annual People's Choice Awards, and comedian Roseanne Barr and actress Meryl Streep walked off with two awards each.

The awards are a popularity contest and are not voted on by members of the entertainment industry. The winners are chosen by an opinion poll conducted by the Gallup Organization. There are no nominees, and those polled can vote for anyone they wish.

''The Cosby Show'' was named favorite television comedy series for the sixth time, and Cosby, a perennial winner, was named favorite male TV performer and all-around male entertainer.

Barr, Cosby's chief rival for the top of the weekly TV ratings, was named favorite female TV performer and favorite all-around female entertainer.

Backstage, Barr took the opportunity to deny reports that she wants out of the ABC series. ''That was a joke,'' she said.

Streep was the only other double winner, named favorite U.S. movie actress and favorite movie actress in 15 nations which are also surveyed for favorite movie, and movie actor and actress.

''Batman'' - which set summer box office records - was named favorite overall movie and co-favorite dramatic motion picture with ''Steel Magnolias,'' which New Yorker magazine called ''chalk scraping across the blackboard for two hours.''

Dustin Hoffman was named world favorite movie actor and Tom Cruise, an Academy Award nominee for his starring role in ''Born on the Fourth of July,'' was named favorite movie actor.

Asked to speculate on his Oscar chances next month, Cruise replied, ''Can't I just enjoy this?''

Arsenio Hall was named favorite late-night talk show host.

''They told me I didn't have the talent, that I was too black,'' said Hall who won over the other two top vote getters, Johnny Carson and David Letterman. ''If there's anything you want to do, don't let them take your dream away.''

Other winners included Neil Patrick Harris, male performer in a new television series; Jamie Lee Curtis, female performer in a new TV series; Fred Savage, young TV performer; Randy Travis and Kenny Rogers, country music performers; Bobby Brown, male musical performer; Paula Abdul, female musical performer.

''Rescue 911'' was named favorite new TV dramatic series; ''Doogie Howser M.D.'' the favorite new comedy series and ''Look Who's Talking'' won for favorite comedy motion picture.

''L.A. Law'' was named favorite dramatic series for the fourth time. ''Four more years!'' the ensemble cast chanted backstage.

Most of the winners showed up to accept their awards, including Jack Nicholson and Michael Keaton, the stars of ''Batman.'' The only major winners who did not appear were Hoffman and Cosby, who both accepted via videotape.

The program was recorded at Universal Studios and broadcast on CBS TV.

#90071u0242 03/12/1990 ~United Press International

PHILADELPHIA (MARCH 12) UPI - Transit officials began inspecting the city's entire subway fleet to follow up on a federal investigation of last

week's fatal accident that uncovered poor maintenance and a motorman's drug use.

In a letter to the Southeastern Pennsylvania Transportation Authority, the National Transportation Safety Board recommended that the 240 subway cars be inspected, SEPTA spokesman James Whitaker said Saturday.

''We inspected the entire fleet Wednesday and Thursday following the accident,'' Whitaker said. ''We are reinspecting the fleet as per the recommendations of the NTSB - in particular, the motor assemblies.''

The inspections were expected to be completed in time for SEPTA to resume full service on the line by Monday, officials said.

A portion of the line in downtown Philadelphia was shut down Wednesday after a morning rush-hour derailment killed three people and injured 163. The train's operator tested positive for cocaine use three hours after the crash.

The cause of the accident is still under investigation, but the probe is focusing on traction motor assemblies under the cars.

Preliminary NTSB findings revealed a traction motor, housed in the car's undercarriage, may have dislodged and hit a rail switch, causing the last three cars of the six-car subway train to derail.

The NTSB Friday inspected 19 cars used on the Market-Frankford elevated line, including three cars from the crash, and discovered 27 instances of poorly torqued nuts and cotter pins that hold traction motors in place.

SEPTA general manager Louis Gambaccini said the transit agency's maintenance procedures will be reviewed.

''I will convene a peer review panel with three experts from other transit systems to come in and look at us from up to bottom for our maintenance practices,'' he said.

The driver of the train, whose name has not been released, tested positive for cocaine use after the accident, Whitaker said. The 16-year SEPTA veteran's urine revealed he had both raw and metabolized cocaine in his system. The test was confirmed twice.

The motorman has not worked since Wednesday's accident and will be officially suspended Monday without pay, Whitaker said. He can appeal the suspension.

The other crew member on the train tested negative for drug or alcohol use Whitaker said. The tests are required of all crew members involved in an

accident.

NTSB investigator John Lauber said officials were probing whether previous disciplinary action had been taken against the suspended driver because of drug use.

But Lauber and Gambaccini were skeptical that human error caused the accident.

Investigators continued searching for the nut and cotter pin that held the dislodged motor. The on-site investigation in Philadelphia should conclude by Tuesday, an NTSB spokesman.

The wrecked cars were removed Friday from the subway tunnel.

#90071u0254 03/12/1990 ~United Press International

(MARCH 12) UPI - A backup proved he could outdo the best in the NBA in less than 10 seconds.

Joe Kleine, a reserve center for Boston who never averaged more than 9.8 points a game, hit an 11-foot jumper with 8.2 seconds remaining Sunday, putting the Celtics ahead 107-105. Charles Barkley, the league's leading field-goal shooter at 60 percent for Philadelphia, missed a 16-foot attempt with 3.2 seconds left, allowing the Celtics the two-point victory.

''It's been a long time since I've made a winning shot,'' said Kleine, who made only 3 of 12 shots, finishing with 10 points.

Kleine, a 7-foot, 271-pound player from Arkansas, was chosen by Sacramento as the sixth player in the 1985 draft. He was traded to Boston along with Ed Pinckney for Danny Ainge and Brad Lohaus Feb. 23, 1989.

Kleine acquired the starting role Sunday when Robert Parish left the game for good in the second quarter after suffering a hyper-extended right knee. Kleine responded by playing a season-high 38 minutes, collecting 10 rebounds and, of course, making the winning shot.

Barkley tied the game 105-105 by hitting a 3-pointer with 31.3 seconds left. On Boston's ensuing possession, Reggie Lewis missed a 12-foot jumper but Kleine grabbed the rebound and hit the decisive shot from the baseline.

''I got a good bounce,'' Kleine said. ''I saw Kevin going to the middle so I tried to get to the baseline.''

Larry Bird and Kevin McHale picked up the offensive slack left by the

departure of Parish, combining for 68 points. Bird, who scored 41, helped prevent the Celtics from losing their fourth-straight home game - something Bird has never experienced since becoming a Celtic in the 1979-80 season.

''Bird is back,'' said 76ers Coach Jim Lynam about the three-time All-Star who missed most of last season due to heel surgery. Bird hit 15 of 21 field-goal attempts Sunday.

Johnny Dawkins led the Sixers with 23 points. Barkley scored 22, but made only 7 of 17 field-goal attempts and 7 of 12 from the free-throw line.

McHale, who guarded Barkley on the last shot of the game, said, ''I've tried to play Charles the same way ever since he came in the league: stay between him and the basket and make him shoot over me.''

Philadelphia dropped 1 1/2 games behind the New York Knicks in the Atlantic Division. Boston stayed 3 1/2 games behind.

-- AROUND THE NBA --

Elsewhere in the NBA, the LA Lakers defeated Atlanta 123-115, Cleveland clipped Milwaukee 107-96, Golden State beat Sacramento 123-116, Detroit downed Charlotte 98-88, New York crushed Miami 106-90 and Utah edged Denver 110-109.

LA LAKERS 123, HAWKS 115

At Atlanta, Magic Johnson scored 32 points and James Worthy added 30 to send the Lakers to the victory over Atlanta. Johnson contributed a game-high 14 assists. Moses Malone paced the Hawks with 24 points and a game-high 14 rebounds. Lakers guard Byron Scott, who missed the last three games because of a strained left hamstring, played 31 minutes and scored 12 points.

CAVALIERS 107, BUCKS 96

At Milwaukee, Mark Price scored 31 points and John Williams added 21 to help Cleveland snap a six-game losing streak. Ricky Pierce scored 26 points forMilwaukee, which lost its sixth-straight game.

WARRIORS 123, KINGS 116

At Oakland, Calif., Chris Mullin scored 32 points and Mitch Richmond added 12 of his 28 points in the fourth quarter to lead Golden State. Mullin scored 13 of his points during a 24-2 first-quarter run. Antoine Carr scored a career-high 27 points and Wayman Tisdale added 23 for Sacramento, which has lost 26 of 31 road games this season.

PISTONS 98, HORNETS 88

At Charlotte, N.C., Joe Dumars and James Edwards scored 21 points each to send Detroit to its eighth straight victory. The Pistons have won 21 of 22 games. Dell Curry scored 21 points for Charlotte, which has lost five straight and 22 of 24 games.

KNICKS 106, HEAT 90

At Miami, Patrick Ewing scored 30 points and Gerald Wilkins added 25 to lead New York. Rony Seikaly led Miami with 28 points and 12 rebounds.

JAZZ 110, NUGGETS 109

At Denver, John Stockton hit a 3-pointer with 4.9 seconds left to lift Utah over Denver. The Jazz recorded their four consecutive victory and won for the 11th time in 12 games. Denver Coach Doug Moe was denied his 600th career victory. Karl Malone scored 35 points and Stockton finished with 17 for Utah.

#90071u0265 03/12/1990 ~United Press International

ANALYSIS BY JOAN HANAUER

NEW YORK (MARCH 12) UPI - Jane Pauley knows something about change, having made a major one herself at the end of last year when she ended her 13-year tenure as co-host of the ''Today'' show.

Pauley is back in the first of her new prime time specials, ''Changes,'' to air Tuesday, Mar. 13, 10-11 p.m. Eastern time, in which she examines change in other people's lives.

''In developing the special,'' she said ''my goal was to find people whose lives were changing in some dramatic but potentially universal way. They could be ordinary people, but with extraordinary stories. And I wanted to tell stories with 'hopeful' but not necessarily 'happy' endings.''

They include a jazz saxophone player who threw away his career on heroin and 30 years of his life in jail, a family who practiced what Tough Love taught, a comedian whose family life was anything but funny and a couple who discarded their suburban lifestyle to run a shelter for the homeless.

The sax player is Frank Morgan, a prodigy who learned from Charlie ''Bird'' Parker, who played for Duke Ellington and backed Billie Holiday and Josephine Baker while he was still in high school.

To play like ''Bird,'' he says, he felt he had to do what ''Bird'' did - including heroin.

Morgan spent 30 years in jail and finally was released from New York's Sing Sing prison in 1985. Now he is married, plays alto sax in New York jazz clubs to critical acclaim, and takes methadone instead of heroin.

Louie Anderson says food to him was what booze was to his alcoholic father - it killed emotional pain. He hid his emotionally abused childhood behind a series of jokes.

What broke the cycle for him was a book of letters to his late father, ''Dear Dad,'' after which he could finally say ''I forgive you, I love you I miss you.''

He tells Pauley he can no longer do the family humor that was the product of his previous pain. He is determined to lose weight and is writing a book about being fat in America.

''If that means I'm not famous any more, I can live with that,'' Anderson says.

The Argabright family is not famous or near-famous - their story could happen to anyone with teenage children. In 1982 Rebecca Argabright was a rebellious 15-year-old who let her grades slip, was verbally abusive to her family, experimented with drugs and repeatedly ran away from home.

Her parents turned to Tough Love, which led to a tough choice. When Rebecca ran away again and was picked up by the police, they did not bail her out. They told her she could live at home only if she followed their rules. Rebecca went to live with a foster family and was only allowed to come home only after she agreed to her parents demands.

Today Rebecca is a wife and mother herself. Does she repent her past and find new appreciation for the Tough Love approach? No, she does not. She and her parents are close today, but she feels Tough Love ''breaks families apart.''

The fourth story belongs to Bert and Nancy Schroeder, who once were a two-job family with a house in the suburbs. They sold their home, gave up their jobs and moved to a shelter where, for the past year, they have been looking after the needs of 250 homeless people. Their weekly salary: $10 each.

That takes care of the four case histories Pauley explores in ''Changes.'' As for Pauley's own change, the first of her prime time specials is a pleasant upbeat hour, not exactly electric but certainly good-natured and absorbing.

And Frank Morgan plays a sweet sax.

Roger Ebert finds ''Dead Poets Society'' the worst Oscar nomination of the year, taking up a place that should have gone to a better flick.

Dick Siskel gives a thumbs down to the nomination of Eddie Murphy's ''Harlem Nights'' for best costuming - when the main costume was the ubiquitous tuxedo.

The syndicated movie critics agree on the picture that should have been nominated - Spike Lee's ''Do The Right Thing.''

Ebert has some outrage left over for the fact that ''Roger and Me,'' about a filmmaker's failure to interview General Motors' head Roger Smith, was not nominated.

Siskel and Ebert will be airing their views on a special about this year's Academy Awards, ''If We Picked The Winners,'' to air between Mar. 12 and Mar. 26 (check local listings).

The show offers their views in four categories - best picture, actor, actress and song - and also worst nominee. Each had some ideas about why their favorites didn't make it.

This is second time that Siskel and Ebert have filmed before a live audience.

''The funny thing about doing the show live is that we were really nicer than when we are alone in the studio,'' Ebert said. ''It's almost like you are a little more outgoing and a little bit more conversational in front of an audience. When it's just the two of us, we really zero in on each other like a couple of homing missiles.''

#90071u0270 03/12/1990 ~United Press International

SANTIAGO, CHILE (MARCH 12) UPI - President Augusto Pinochet, the 74-year-old man who has held Chile under his thumb since a bloody 1973 coup, has become simply Gen. Augusto Pinochet.

But at the head of the 60,000-member army, Pinochet will watch over the re-emerging democracy under incoming President Patricio Aylwin. The constitution approved under the Pinochet government does not allow the civilian president to remove him for eight years.

Dressed in a sparkling white uniform, Pinochet took off the presidential sash Sunday in the port city of Valparaiso, shook hands with Aylwin and

then left.

In the hours before the act, he had received fervent applause and insults hurled at him as he rode to turn over the presidency lost when voters in 1988 rejected a new eight-year term for him.

Carlos Lobos, a 40-year-old Chilean father of seven, led cheers of ''He's going to return'' as Pinochet passed by in an open car in Santiago on his way to a final mass as president. Lobos said he just wanted to thank Pinochet for rebuilding the country from the chaotic period of President Salvador Allende, who died in the 1973 coup.

He said Chile ''was on the border of a civil war'' and Pinochet had ''modernized'' the country, calling him ''one of the most important figures in the history of Chile.''

But he said "no one here is going to accept a new coup. We are not fascists."

Pinochet still retains significant power as army commander, thanks to his reputation and a number of laws approved in the waning months of his rule by the ruling junta. He has stubbornly resisted Aylwin's calls for his retirement, pledging to remain as army commander to assure the stability of the country he presided over for so long.

So far, the army has shown no signs it is anything but willing to have Pinochet remain as commander.

Andres Zaldivar, president of the Christian Democrat Party, said Pinochet wants to ''govern from the shadows.''

Aylwin is restricted from removing Pinochet from office and the new government cannot cut the defense budget below a certain level. Aylwin also faces restrictions in naming certain other officials and the nine senators appointed by Pinochet tip the balance of legislative power to conservative forces.

The solemn ceremony in which he handed over the presidency contrasted with the Sept. 11, 1973, coup against the elected Marxist government of Allende. At least 1,500 people are believed to have died in the military takeover.

When Richard Nixon was president and Henry Kissinger was secretary of state, the U.S. launched an operation to prevent Allende from assuming office, and when that failed, to undermine his government with help and encouragement from U.S. companies doing business in Chile.

Evidence has never surfaced of direct U.S. involvement in the coup

planning, although it had encouraged and financed a campaign against Allende. The Nixon administration also rushed financial support to consolidate Pinochet's government.

Human rights groups charge that the military, aided by para-military death squads, summarily began a brutal campaign to eliminate Chile of Allende's leftist influence.

''Not a leaf moves in this country unless I move it,'' Pinochet said in 1981.

While he repressed political opposition, Pinochet leaves behind one of Latin America's most stable economies, the product of six years of growth after a 1982 crash. Inflation was 21.4 percent in 1989, low for a region racked by runaway prices.

In 1982, the economy stumbled into a deep recession and the next year the opposition united behind street protests. Pinochet was forced to allow political parties and opposition news media.

Pinochet's success with the economy was largely due to the ''Chicago Boys '' a group of University of Chicago-trained economists who were fervent believers in the free markets. But the opposition has charged the policies have left most Chileans with terribly low wages and government cuts damaged the health and education systems.

(MARCH 12) UPI - Two German lovers, kept apart by the Cold War for two years but finally married in front of the Berlin Wall Valentine's Day, have hit America's Freedom Trail. West German Oliver Mattala and his East German wife, Barbara, are taking a honeymoon tour of American symbols of liberty. The 21-year-old newlyweds were voted the ''most romantic'' couple in a contest sponsored by a West Berlin radio station and Southern California Bride Magazine.

New York Cardinal John O'Connor says he has received what he calls an ''outpouring'' of letters from parents from all over the nation, thanking him for speaking out against devil worship lyrics in rock music. The cardinal says the sermon he gave last Sunday sparked the greatest reaction he has ever received on any subject about which he has spoken.

A boy clinging to life in a Manhattan hospital... suffering burns on more than 50 percent of his body... received messages ofeighborhood bully last Wednesday, apparently for NO reason. David is said to be excited about a letter he received from the Guardian Angels, offering to walk him to school when he gets out of the hospital. Doctors say the youngster has a

50-50 chance of survival.

#90071u0286 03/12/1990 ~United Press International

SALCININKAI, USSR (MARCH 12) UPI - As Lithuania struggles for independence from Moscow, hundreds of thousands of ethnic Poles in the tiny Baltic republic are demanding autonomy of their own.

The small city of Salcininkai, in a region inhabited by 40,000 Poles near Vilnius, is typical of several pockets of Polish-speakers encircling the Lithuanian capital who complain their culture is being extinguished.

Their demands, triggered by the revival of Lithuanian nationalism, have nurtured fears Lithuania could face problems similar to the bloody clashes in the ethnic Armenian enclave of Nagorno-Karabakh in the Soviet republic of Azerbaijan.

With about 400,000 representatives each, ethnic Poles and Russians comprise almost one third of Lithuania's population of 3.8 million.

The conflict with ethnic Poles started last year when the Lithuanian Parliament, or Supreme Soviet, declared Lithuanian as the only official language in the multi-national republic and ordered residents to learn it in two years.

''Poles feel they are being discriminated against'' as a result of the ruling, said Stefan Dudojcz, a director of the mixed Polish-Russian school here.

The language act was followed by several other measures that have angered ethnic Poles, whose ancestors have lived in the area since the 15th century.

Polish-language masses can no longer be held in the cathedral of Vilnius, only high schools can operate in Polish, and authorities have refused a

request to open one higher educational institution for Poles.

''We are a big strength,'' the director said. ''If we don't get our rights the people will raise their heads.''

Political experts predict the conflict between Lithuanians and the two ethnic groups will aggravate as Lithuania becomes more independant.

Polish officials insist their demand is for cultural autonomy - not political independence. But Lithuanian officials seem unconvinced.

Kardecikjus Vitalius, an official in the Lithuanian Independent Party in the heavily Polish Naujoj Vilnius district of the Lithuanian capital, said Moscow has the ability to fan the fires of nationalism at any time.

''They will try to be an umpire between us,'' he said. ''The situation can become bad because the idea of autonomy (of the Polish regions) is horrible for us.''

Jan Oblaczynski, chairman of the association of Poles in the region, said Moscow already is playing the ''Polish card'' against the Lithuanians' drive for independence.

During the parliamentary elections Feb. 24 won by the Sajudis Lithuanian independence movement, winning seats were five Poles representing the Lithuanian Communist Party and backed by Moscow. Only three seats were won by Poles who called for cooperation with the Lithuanians.

''What happened during the elections is a great tragedy for Poles in Lithuania,'' Oblaczynski said. He predicted increased harassment of the Poles who favor cooperation with Moscow because the vast majority of Lithuanians seek secession from the Kremlin.

''The pro-Moscow Polish leaders want to form administrative units linked with the Soviet Union,'' he said. ''That idea is unrealistic.''

Oblaczynski said the Solidarity movement in Poland has expressed unofficial concern, but ''it has adopted a wait-and-see attitude.''

''We don't need a Nagorno-Karabakh in the area,'' he said. But he added the key to solving the problem is a change of attitude by Lithuanian authorities.

Oblaczynski said the tension would be eased if Poles were allowed to expand their Polish television program, if a higher school were opened, and if Polish priests were sent to Polish communities instead of Lithuanians.

Lithuanian officials say they are concerned with the Polish-Lithuanian

border, which was moved as part of the postwar settlement among the victorious Allied powers of World War II that pushed the state of Poland westward.

But Poles are just as concerned about the border. They point out maps are available in Lithuanian shops showing a border dipping deep into current Polish territory and covering the Polish cities of Suwalki and Sejny.

#90071u0291 03/12/1990 ~United Press International

NEW YORK (MARCH 12) UPI - All you need to know about current Broadway attractions, theaters, leading players and ticket situations (opening dates in brackets):

Credit card holders can order tickets by telephone as indicated. Orchestra seats for musicals run $45, $47.50 and $50 and for plays $37.50 to $40. Tele-Charge and Ticketron add a booking fee, and Ticketmaster adds a service charge. There are no additional fees for theater charge phones. Tele-Charge: 212-239-6200; Ticketron: regional offices or 212-399-4444; Ticketmaster: 212-307-7171.

''Black and Blue'' - Minskoff; an all star cast pays tribute to jazz and blues in a dazzling new musical by the creators of ''Tango Argentino''; available (1-26-89) (Teletron).

''Cats'' - Winter Garden; one of the most fantastically staged shows in Broadway history, a knockout musical based on a T.S. Eliot fable with Andrew Lloyd-Webber music; near capacity (10-7-82) (Tele-Charge).

''A Chorus Line'' - Shubert; longest-running show in Broadway history, an absorbing musical about Broadway chorus ''gypsies''; available (7-25-75) (Tele-Charge).

''The Circle'' - Ambassador; Rex Harrison, Glynis Johns and Stewart Granger make this fluffy 1921 Somerset Maugham drawing room comedy sparkle again; available (11-14-89) (Tele-Charge).

''City of Angels'' - Virginia; a new smash hit musical thriller by Larry Gelbart with music by Cy Coleman about a detective-novel writer in Hollywood; near capacity (12-7-89) (Ticketron).

''A Few Good Men'' - Music Box; Tom Hulce and Roxanne Hart score in a stunning new play about a military court martial that pits duty against conscience; available (11-15-89) (Ticketron).

''Grand Hotel'' - Martin Beck; Tommy Tune's eye-filling new musical is a generally effective adaptation of Vicky Baum's novel about 1920s Berlin;

available (11-12-89) (Ticketron).

''Gypsy'' - St. James; Tyne Daly is a searingly obsessive Mamma Rose in this effective 30th anniversary revival of the Styne-Sondheim musical; near capacity(11-16-89) (Ticketron).

''The Heidi Chronicles'' - Plymouth; Brooke Adams gives a fine performance as a woman comes of age in the feminist era in this new, Pulitzer and Tony award-winning Wendy Wasserstein comedy; near capacity (3-8-89) (Tele-Charge).

''Jerome Robbins' Broadway'' - Imperial; an electric Tony Award-winning musical smash with emphasis on dancing wrought from the hit shows choreographed by Robbins; near capacity (2-26-89) (Tele-Charge).

''Lend Me a Tenor'' - Royale; a hilarious new comedy set in the 1930s with a powerhouse cast headed by Philip Bosco, Victor Garber and Tovah Feldshuh; available (2-2-89) (Tele-Charge).

''Les Miserables'' - Broadway; the spectacularly staged Tony Award-winning pop opera from London based on Victor Hugo's novel, directed by Trevor Nunn; near capacity (3-12-87) (Tele-Charge).

''Meet Me in St. Louis'' - Gershwin; a lavishly staged musical version of the 1944 MGM film with 10 new songs and a powerhouse cast; available (11-2-88) (Ticketron).

''Phantom of the Opera'' - Majestic; Andrew Lloyd-Weber's enchanting, excitingly staged operatic treatment of the beauty and the beast story set at the Paris Opera; capacity (1-26-88) (Tele-Charge).

''Tru'' - Booth; Robert Morse recreates Truman Capote in a shallow but mesmerizing one-man play set in 1975; available (12-14-89) (Tele-Charge).

Opening: ''Cat on a Hot Tin Roof,'' O'Neill (3-21); ''The Grapes of Wrath '' Cort (3-22); ''Lettice and Lovage,'' Barrymore (3-25).

Closed: ''The Merchant of Venice'' (3-10) (81 performances).

#90071u0307 03/12/1990 ~United Press International

LONDON (MARCH 12) UPI - Queen Elizabeth II, in her annual Commonwealth Day address Monday, celebrated the kinship among Commonwealth nations even though they sometimes are at odds.

''The members of any family, and that is what the Commonwealth most nearly resembles, will vary widely in age, appearance, tastes, talents and

temperament,'' said the queen, who heads the Commonwealth. ''From time to time, they will hold some very different opinions. Yet members of a family have no difficulty in recognizing each other as relations, and in putting a value upon their kinship.''

The queen said the Commonwealth, an association of 49 countries that are or at some time have been ruled by Britain, had forged strong bonds because of its ability to appreciate each other's differences and grow.

Commonwealth Day is celebrated by members throughout the world on the second Monday in March each year to mark the anniversary of Queen Victoria's birthday, which is actually May 24. It was under the reign of Victoria, known as ''the grandmother of Europe,'' that the British empire reached its height.

About 2,000 people, including Prime Minister Margaret Thatcher, were expected to join the queen in attending a multi-faith observance of Commonwealth Day in Westminster Abbey Monday afternoon.

To illustrate her point, Queen Elizabeth II cited the recent return of Pakistan to the Commonwealth following a 17-year absence over Islamabad's disagreement with the recognition of Bangladesh by four member countries.

''If we are sometimes critical of each other, or disappointed, it is because we expect more of family members than we do of others,'' the queen said. ''Now and then a member may even feel constrained to go off on his own. Some years ago this happened to Pakistan for example. Yet today we have the joy of having Pakistan back in the family.''

The queen said the Commonwealth was bound by its wide appeal among people of all age groups, nations and races.

Calling Commonwealth members ''the biggest and most unusual family on Earth,'' the queen praised its ability to span all phases of cultural, political, economic and social development.

#90071u0324 03/12/1990 ~United Press International

(MARCH 12) UPI - Denis Savard scored his 1,000th career point in the second period and Chicago built a 4-2 lead until one second remained in the period. Suddenly, the momentum shifted.

Rod Brind'Amour scored for St. Louis at 19:59 of the middle period, bringing the Blues to within 4-3 at the end of two periods. St. Louis then controlled the final period, scoring three goals to record a 6-4 victory Sunday over the Blackhawks.

''Coming out in the third period, we knew what we had to do,'' St. Louis Coach Brian Sutter said.

Robert Dirk tied the score 4-4 at 4:39 for his first NHL goal. Ron Wilson then collected the game-winner, scoring at 8:23, 24 seconds after defenseman Dave Manson was called for cross-checking. The power-play goal was the Blues' first in 18 chances. Rich Sutter capped the scoring with an empty-net score with 18 seconds left.

With the victory, the Blues snapped a three-game winless streak and extended their lead in the Norris Division to four points over Chicago. The Blackhawks are now 0-6-1 in their last seven games.

''It was for first place,'' Wilson said. ''We go out of here tied with them or we go out four points ahead. We want first place and home-ice advantage (in the playoffs).

Chicago took a 3-1 lead in the second period on Al Secord's goal. Savard collected his 654th career assist on the score, giving him 1,000 points.

The sellout crowd gave the 10-year veteran a standing ovation as the announcement was made.

''I'm still proud of it,'' Savard said. ''It took me 10 years to do it, but it was one of my goals I set when I was a young kid. One was being in the NHL, the second was going to the Stanley Cup and the third one was to achieve 1,000 points. I'm glad I did it.''

-- AROUND THE NHL --

In other NHL games Sunday night, Calgary grounded Winnipeg 6-4, Vancouver dropped Pittsburgh 5-3 and Boston beat Hartford 4-3.

FLAMES 6, JETS 4

At Winnipeg, Manitoba, Joey Mullen broke a 4-4 deadlock at 3:16 of third period, helping Calgary snap a five-game losing streak against Winnipeg. The Jets' winning streak ended at four games. Calgary moved four points ahead of second-place Edmonton in the Smythe Division and eight points ahead of the Jets. Gary Roberts clinched the victory with his 31st goal, an empty net score.

CANUCKS 5, PENGUINS 3

At Vancouver, British Columbia, Vladimir Krutov scored his first goal in more than a month to lead Vancouver past Pittsburgh. Krutov took a feed from Doug Lidster and beat goaltender Wendell Young on a breakaway at 12:07 of the second period for his 11th goal of the season, giving the

Canucks a 4-2 lead.

BRUINS 4, WHALERS 3

At Hartford, Ct., defenseman Glen Wesley scored two power-play goals 2:53 apart during the third period to spark Boston. Hartford lost its third straight game. Wesley connected twice during a five-minute, high-sticking major penalty to Kevin Dineen. John Carter and Dave Christian also scored for Boston, which is 4-1-1 in its last six games.

#90071u0330 03/12/1990 ~United Press International

NEW YORK (MARCH 12) UPI - City Correction Department officials Monday investigated the shooting of two inmates wounded as they filed out of a morning church service at the maximum-security jail where they were held.

Authorities recovered a .25-caliber pistol almost immediately after the Sunday morning shooting at the city's maximum-security George Motchan Detention Center on Rikers Island.

The weapon apparently was smuggled into the jail, where correction officers do not carry guns.

The incident comes on the heels of another shooting at the Motchan Center Jan. 28 and was the second violent incident there in three days, authorities said.

Correction Department spokeswoman Ruby Ryles said 200 correction officers were dispatched to the maximum security jail to question inmates following the shooting.

Ryles said while there were more than 2,000 inmates at the center, investigators have narrowed down the possible suspects to those who attended Protestant service, which ended about 10:45 a.m.

''It would be limited to the 50 or 60 inmates who attended that service,'' she said.

Noel Grayson, 31, of Manhattan, was shot in the thigh and Rowan Berry, 25, of Queens, was shot in the chest, Ryles said. Both men were in stable condition at East Elmhurst Hospital in Queens.

''They were shot outside the chapel as they were leaving,'' Ryles said. ''A .25 caliber gun was immediately found at the scene.''

On Friday, Christopher Clemente, 19, an Ivy League honor student arrested for allegedly selling crack, was stabbed.

There were 2,066 inmates at the detention center, one of the nine jails on Rikers Island, which Sunday had a total of 20,380 inmates.

Grayson has been in the jail since Jan. 9 and was being held on charges of first-degree criminal sale of a controlled substance. Berry was being held on homicide charges and has been at Rikers Island since Feb. 28, 1989, Ryles said.

Both men were being held without bail.

#90071u0419 03/12/1990 ~United Press International

(MARCH 12) UPI - Around the world, around the clock, the latest news from U-P-I...

Soviet President Gorbachev is facing an historic challenge following Lithuania's declaration of independence from Moscow yesterday. Gorbachev has promised NOT to use force against the Baltic republic... but has indicated that the Kremlin will be making heavy economic demands as Lithuania's price of freedom.

Gorbachev says his beleaguered Communist party will NOT change its name, despite such moves in other Eastern European states. The Soviet president yesterday marked his fifth year as Communist Party general secretary by rejecting notions that the party had become obsolete.

The strike against Greyhound turned violent last night, when a sniper fired on a moving bus on an interstate south of Jacksonville, Florida. Officials say seven passengers were wounded, two seriously, by the bullets apparently fired from an overpass.

New York City Correction officials say a gun was apparently smuggled into a maximum-security jail on Rikers Island, where two inmates were shot and wounded yesterday. The prisoners were shot as they left morning church services. It was the second violent incident at the prison in three days.

Transit officials in Philadelphia are inspecting the city's entire subway fleet to follow up on a federal investigation of last week's fatal accident. Officials say the inspections are expected to completed in time for the city to resume full subway service by this morning.

-30- 1667

#90071u0435 03/12/1990 ~United Press International

(MARCH 12) UPI - The Air Force says a Trident-2 missile carrying a load of dummy warheads was successfully launched yesterday night from a nuclear

submarine off the coast of Florida. The 30th test firing of the Navy's most powerful nuclear weapon has the missile's sea-launch record now at nine successes and two failures.

Colombia was relatively calm all day yesterday, despite threats by leftists rebels to disrupt balloting in congressional elections and a presidential primary. Cesar Gaviria won the Liberal Party's presidential primary... with the party also making strong gains in the two-house legislature.

Hopes for a quick transition from a military to a civilian government faded in Haiti, with the opposition failing to find a candidate willing to serve as interim president. Opposition leaders say their top choice apparently is afraid of the military, which has never submitted to civilian rule.

Israel's coalition government is facing possible collapse. Leaders of the nation's Labor Party says they'll advise the party's Central Committee today to authorize pulling out from the government. The move follows the failure of the government's Inner Cabinet to reach a decision on a U-S peace proposal.

Police in Florida say Danny Bonaduce faces drug charges after allegedly buying crack cocaine near a Daytona Beach housing project. Bonaduce starred on ''The Partridge Family'' television show in the 1970's and is now a Philadelphia radio personality. Bonaduce was released on bail after Thursday's arrest.

#90071u0479 03/12/1990 ~United Press International
(MARCH 12) UPI - Thunderstorms across much of the nation Monday caused flooding that forced evacuations in the nation's midsection and closed roads in the Southwest, while the mercury soared to springlike temperatures along the Atlantic Coast.

The National Weather Service issued a flash flood watch for the northern half of Illinois Monday as a line of thunderstorms swept across the state. Litchfield, Ill., reported 52 mph winds but no damage or injuries, and the temperature warmed to 64 degrees in Chicago.

More than 200 people were evacuated from their homes along the Vermillion River in east-central Illinois Sunday amid high waters churned by heavy rains and the spring-like weather front.

Mobile homes floated off their moorings and some residents were threatened with arrest before agreeing to leave their homes along the north fork of the river, Vermillion County sheriff's deputies said.

A shelter was set up at a nearby grade school to care for those flooded out near the villages of Alvin and Bismarck, officials said.

The weather service, meanwhile, issued a dense fog advisory for northern and central parts of Wisconsin, where visibility was reduced to near zero. The flash flood watch in effect for northern Illinois also extended to southern Wisconsin.

A line of heavy thunderstorms that brought torrential rain to North Texas Sunday and led to at least one death continued Monday. Paul Cooley, 13, drowned Sunday night after falling into a rain-swollen creek in the Denton County suburb of Trophy Club.

A vigorous upper-level storm system moving eastward from New Mexico and clashing with a very moist unstable air mass produced storms Monday in Oklahoma. Scattered thunderstorms with very heavy rain covered the northwest third of Arkansas.

High pressure remained strong over the South Monday, extending the fair and warm weather that generated record weekend temperatures. Temperatures early Monday ranged from 62 in Charleston, S.C., to 63 in Atlanta and Knoxville, Tenn., 60 in Jacksonville, Fla., and 71 in Miami.

Much of New England got an early taste of spring, with temperatures soaring into the 60s near Boston over the weekend and into the 50s over most northern sections. Rain was expected to make its way across the region Monday.

Showers and patchy fog were reported in various areas throughout Pennsylvania, West Virginia, Maryland and southern New Jersey early Monday. Lows ranged from the 40s to the upper 50s throughout the Middle Atlantic states.

In the West, scattered showers fell over most of northern and central California as the weekend came to an end. Several thunderstorms boiled up over the Central Valley from Marysville to Stockton. Sierra ski resorts reported 18 inches of new snow from a storm that snarled traffic over the Sierra Nevada range for the third day in a row, closing Interstate 80 intermittently.

Skies were partly cloudy over much of Southern California. A few showers sprinkled the mountains, and some snow fell above 4,000 feet. Gusty winds up to 40 mph were reported in the mountains and deserts.

#90071u0486 03/12/1990 ~United Press International

HONG KONG (MARCH 12) UPI - Gov. Sir David Wilson said Monday on his return from four days in London that he was confident Britain would grant 225,000 Hong Kong residents British citizenship before 1997, when the British

colony reverts to communist China.

''The nationality package is something which the (British) government is determined to go ahead with,'' he said. ''There is concern about a number of people who have opposed the package, but the legislators I talked with said they still thought they would be able to get it through Parliament.''

The nationality package, announced to halt a confidence crisis in the colony that has seen many middle-class professionals emigrating ahead of the 1997 transition, has caused an uproar among conservative members of Britain's Parliament.

Despite pledges from British Prime Minister Margaret Thatcher that Parliament would pass the package, rebel Tory backbenchers have vowed to quash the plan.

Led by former Conservative party chairman Norman Tebbit, the rebel Tories say Hong Kong residents should look to China for their future, not Britain.

China has condemned the nationality scheme, branding it subversive and pledging that all Hong Kong's 5.7 million ethnic Chinese will be considered Chinese nationals after 1997, even if they hold foreign passports.

#90071u0503 03/12/1990 ~United Press International

BEIJING (MARCH 12) UPI - China is literally going to the dogs, but the growing penchant among Chinese to keep a pet pooch has raised new fears of rabies in the nation's crowded cities.

An article in the state-run China Daily Monday estimated the canine population nationwide has grown to some 100 million. It added, however, that as many 1 million people are bitten each year by rabid dogs, and 5,000 of those victims die.

The English-language newspaper described as ''astonishing'' the leap in the number of rabies attacks, up from just a few thousand a decade ago, and noted, ''Measures have been taken to control the number of pet dogs, but with no substantial results.''

''With the rocketing number of dog owners and shortage of immunization vaccine, more and more people have caught rabies,'' the newspaper said.

Dog-raising has spread with the liberalizations, and affluence Chinese have gained during the past 12 years of economic reforms. Keeping fish and birds remains more widespread and less risky.

A park in central Hefei is now the site of a bustling dog market, where wolfhounds sell for up to $210 each, half a year's wages for average workers. Most are bought by wealthy private entrepreneurs and retirees, the newspaper said.

Pet canines are banned in China's crowded cities without police permission. But the rules are tough to enforce, and several city governments in recent years have called for stricter control.

In the eastern city of Nanjing, dog owners evaded a control campaign last year by hiding their pets in attics or basements or sending them temporarily to the countryside, the China Daily said.

The newspaper quoted health officials as saying that only six facilities nationwide produce anti-rabies vaccine, and that most provinces cannot afford a mandatory vaccination program.

#90071u0511 03/12/1990 ~United Press International

NEW YORK (MARCH 12) UPI - Police Monday were investigating a grisly mystery uncovered by three youths who were horrified to learn that a cloth-covered ball they found on a South Bronx street and used for an impromptu soccer game was a severed human head.

And detectives were investigating whether the head and two arms and legs found along with it were linked to a male torso clad only in underwear discovered last weekend in Fort Tryon Park in Upper Manhattan.

The three youngsters - ages 9, 10 and 13 - were playing Saturday in South Bronx when they found a cardboard box, said Sgt. Mary Wrensen, a police spokeswoman.

''They found a box containing two plastic bags and a ball-like object wrapped in a cloth jacket,'' Wrensen said. ''They started to play soccer with the object and then they threw it into a trash can which had a fire in it.''

Wrensen said that Ralph Rodriguez, whose son was one of the youngsters, made the gruesome discovery that the trio was kicking around a severed head when he spotted something poking out of the plastic bag.

''He noticed a leg protruding from one of the bags,'' Wrensen said. ''He investigated and found other body parts.''

''That's when they realized the ball they had been playing with was a severed head,'' the sergeant said.

Wrensen said the medical examiner would try and determine whether the body parts discovered Saturday had been severed from a bloody torso found last Sunday by a city parks department worker near the Cloisters.

The torso, with legs, arms and head missing, was found March 4 in a cardboard box, wrapped in a plastic bag and two blankets on a footpath just off the Henry Hudson Parkway.

''They dumped the torso over a wall,'' said Sgt. Nick Vreeland, another police spokesman. ''There was quite a bit of blood at the scene.''

Vreeland said the wounds on the torso were ''clean-cut,'' possibly indicating the limbs and head had been sawed off.

''The legs were severed near the hip, the arms were severed near the shoulder and the head was severed close to the base of the neck,'' Vreeland said.

The torso was still warm when it was found, indicating the man was killed shortly before the body was discovered, Vreeland said.

Police found the man's clothing, including a shirt and pants, but the torso was clad only in underwear when it was found, the sergeant said.

#90071u0528 03/12/1990 ~United Press International

(MARCH 12) UPI - The U-S backs Lithuania's vote for independence... Mikhail Gorbachev is set to get new powers... violence in the Greyhound strike... and Queen Elizabeth observes Commonwealth Day. Those stories and more, next from U-P-I.

Lithuania's newly elected President Vytauatus Landsbergis says he hopes to begin formal negotiations with Moscow in the immediate future on the Baltic republic's formal secession from the Soviet Union.

Yesterday, the Lithuanian parliament voted unanimously to declare its independence, half a century after being annexed by Moscow's communist government.

The vote makes Lithuania the first of the Soviet Union's 15 republics to formally sever its political relationship with Moscow.

The historic move poses a challenge to Soviet President Gorbachev , who has said he will NOT use force to put down the nationalist aspirations of Lithuanians.

Gorbachev has, however, hinted that the Soviet government might impose a

steepeconomic price for Lithuanian independence.

Lithuanian authorities tried to play down possible tensions with Moscow. In the words of a parliament statement, Lithuania asked ''the peoples of the Soviet Union to support our aspiration and to understand we are guided by good intentions.

The White House issued a similar statement, asking the Soviet government to respect ''the will of the citizens of Lithuania.''

Mikhail Gorbachev is expected to get new powers under legislation being considered today by the Congress of People's Deputies.

The parliamentary body opened its third congress in Moscow, discussing a bill that would expand presidential powers, while limiting the number of terms the chief executive can serve to two five-year terms.

The proposed law would allow the president to declare states of emergency in any part of the country, veto laws and dissolve Parliament.

But it would also forbid the president to send troops abroad without Parliament's approval and provides for impeachment of a chief executive.

Direct election by the people is also part of the measure being considered. However, the first president- certain to be Gorbachev- would be chosen by the congress.

#90071u0543 03/12/1990 ~United Press International

(MARCH 12) UPI - An 11-day walkout against Greyhound has taken a violent turn, with a sniper opening fire on a moving bus near Jacksonville, Florida.

Police say seven passengers were injured, two critically, when a bullet hit the bus and ''apparently fragmented.''

Police say they have NO suspects in the attack that they believe came from an overpass last night along Interstate 95 south of Jacksonville.

Also yesterday, Greyhound announced that it is expanding intercity bus service to more than 100 locations that have been without service since the walkout began.

NO new contract talks are scheduled in the walkout by nine-thousand Greyhound workers. But federal mediators are asking union leaders to meet today in Washington to discuss the labor dispute.

Violent clashes have marked the walkout as Greyhound replaces striking drivers and others have crossed the picket lines to return to work.

The Navy successfully test-fired a Trident-2 missile last night from a submerged nuclear submarine off the coast of Florida.

So far, the Navy has test-fired the Trident its most powerful nuclear weapon system- 30 times. Of that number, five launches have been failures and 25 have succeeded.

An Air Force spokeswoman provided few details of the firing, other than to say that it was part of a routine ''demonstration and shakedown operation'' to certify a sub crew's ability to handle the missile system.

The U-S-S Pennsylvania launched the three-stage, 26-point-five-Million-dollar missile last night. All 11 firings from a submerged submarine took place aboard the U-S-S Tennessee.

The Navy has compiled a perfect at-sea launch record since engineers detected a problem with the missile's first-stage motors' nozzles.

The Trident-2 is thought to have a maximum range of up to 69-hundred miles. It is intended to be the equal of the land-based M-X missile.

#90071u0554 03/12/1990 ~United Press International

(MARCH 12) UPI - A French government official says attempts will begin again in Paris today to find a solution to the Cambodian conflict.

The meeting will involve the five permanent members of the United Nations Security Council- the United States, China, the Soviet Union, France and Britain.

The renewed diplomatic effort follows the failure of peace talks in Jakarta last month between the four warring Cambodian factions.

The meeting also comes one week after a Cambodian resistance leader asked Thailand to host talks between China and Vietnam, two nations influencing the fighting in Cambodia. A French Foreign Ministry spokesman agreed, saying ''as long as China and Vietnam have poor relations, it will be difficult to resolve the Cambodian conflict.''

But the spokesman adds that the Cambodian factions will NOT be represented at the talks in Paris. He says the talks will focus on coming up with a peace plan that can then be presented to the warring factions.

Queen Elizabeth the Second says the union of 49 Commonwealth nations makes

for perhaps the ''most unusual family on Earth.''

In prepared comments to commemorate today's Commonwealth Day, the queen says member nations experience animosities and grudges just as any family would. But she says the international association rebounds from such pitfalls because of the kinship the nations share, and the value placed on the relationship.

Members throughout the world celebrate Commonwealth Day on the second Monday in March each year to mark the anniversary of Queen Victoria's birthday. It was under the reign of Victoria that the British empire reached its zenith.

About two-thousand people will join Elizabeth at a multi-faith observance of the day in Westminster Abbey this afternoon.

#90071u0782 03/12/1990 ~United Press International

(MARCH 12) UPI - Soviet President Gorbachev says he will ask the Soviet government for its opinion on yesterday's defection by Lithuania, describing the Baltic republic's declaration of independence as ''alarming.'' Lithuania's new President Vytautas Landsbergis did NOT take his seat at the presidium of the Congress of People's Deputies meeting today in Moscow, boycotting the session instead.

In the Kremlin, the Congress of People's Deputies is moving today on legislation that would give Gorbachev sweeping new powers. The law would expand presidential powers by allowing the chief executive to declare states of emergency in any part of the country, veto laws and dissolve parliament. But it would also limit the president to two five-year terms.

Violence hit Greyhound as the bus company continues to operate despite an 11-day walkout by nine-thousand workers nationwide. Police say a sniper opened fire on a Greyhound bus last night near Jacksonville, Florida, injuring seven passengers- two critically. Police say they've made NO arrests and have NO suspects in the attack apparently related to the strike against Greyhound.

A boy described by police as a neighborhood bully is scheduled to appear today in Family Court in New York. The 13-year-old is charged with tying David Aupont to a radiator in the basement of an abandoned Brooklyn building, beating him with a bat and setting him on fire. Aupont... who turned 12 one day after Wednesday's attack... remains hospitalized in critical condition.

#90071u0790 03/12/1990 ~United Press International
(MARCH 12) UPI - Haiti's opposition is having a difficult time finding someone willing to serve as interim president. The 12-party opposition Unity Assembly met for nine hours yesterday, but adjourned without deciding on a qualified nominee. Some members say the trouble stems from fears that the military will NOT submit to civilian rule, despite dictator Prosper Avril's resignation.

Police in Los Angeles are holding two brothers without bail in the brutal slayings of their Millionaire parents. Erik Menendez surrendered to authorities yesterday after a flight from Israel. His brother, Lyle, faces arraignment today on two counts of murder. Video and music industry executive Jose Menendez and his wife were slain in August.

Prosecutors in New York say a key witness in the slaying of a black teenager in a racial attack must decide by today whether he'll testify in the case. The Brooklyn district attorney's office says John Vento will face second-degree murder charges in the August 1989 slaying if he fails

to live up to his agreement to testify in exchange for NOT being charged in the case.

A report published today casts doubts on a new controversial system to distribute an experimental AIDS drugs. The report cites figures from the drug's maker in saying AIDS patients taking D-D-I in the free distribution system have been dying at more than 10 times the rate of those taking the drug in standard tests. A Harvard Universitry doctor calls the high death rates in the program ''an absolute disgrace.''

#90071u0816 03/12/1990 ~United Press International
HOUSTON (MARCH 12) UPI - Domestic drilling as a whole and offshore drilling in the Gulf of Mexico both increased last week, industry sources said.

A total of 923 rotary rigs were working in the United States last week, compared with 894 the week before, and 743 the same week a year ago, Baker Hughes Inc. reported Sunday.

Offshore Data Services also reported two more rigs went back to work in the Gulf last week, boosting the utilization rate to 69.9 percent, with 151 mobile rigs working out of a fleet of 216.

Activity in European waters was unchanged, with 115 rigs working out of a fleet of 132, for a utilization rate of 87.1 percent. Worldwide, 537 mobile offshore rigs were working out of a total fleet of 671, boosting the utilization rate to 80 percent. There were 350 rotary rigs working in Texas last week, compared to 320 the week before and 234 the same week a year ago.

Rig counts in neighboring producing states included 149 in Louisiana, unchanged from the week before and compared to 131 the same week a year ago; New Mexico, 32, compared to 37 the week before and 27 the same week a year ago; Oklahoma, 107, compared to 101 the week before and 108 the same week last year.

There were 228 rigs working in Canada last week, compared to 229 the week before and 218 the same week a year ago.

#90071u0822 03/12/1990 ~United Press International
BEIJING (MARCH 12) UPI - The entire Politburo of the ruling Communist Party in the nation of Mongolia resigned Monday and the party leader, under pressure from a growing pro-democracy movement, proposed changing the party's constitutionally guaranteed pre-eminence, reports reaching Beijing said.

The developments were the latest in a series of stunning moves toward reform in Soviet satellite states, set off by policies instituted by Soviet President Mikhail Gorbachev.

Foreign diplomats in the Mongolian capital, Ulan Bator, reached by telephone from Beijing, said they had no formal confirmation of the moves

but said they apparently had been discussed at a special session of the Mongolian party Central Committee.

In reports reaching Beijing, the Soviet news agency Tass and the East German news agency ADN reported from Ulan Bator that Mongolian leader Jambyn Batmonh had announced the resignation of the entire Politburo of the Mongolian People's Revolutionary Party.

Batmonh, in a 40-minute address, said the secretariat of the policy-making Central Committee also resigned, the reports said. He said the party was ready to cooperate with opposition groups in further reforms.

Batmonh further announced that, on March 21, he will ask the Mongolian Parliament, the People's Great Hural, to amend article 82 of the nation's constitution, which guarantees the party as ''the leading power'' over the government and people.

Mongolia, sandwiched between Siberia and China, was the second nation to turn communist in 1921 after the Soviet revolution and has been a follower of Moscow since. Half of its 2 million people still earn their living as herdsmen on the nation's vast plains.

Mongolia's leadership has been shaken by the Soviet-inspired reforms and by a growing pro-democracy movement that has been holding public demonstrations in Ulan Bator since December, led by the fledgling Mongolian Democratic Union.

The Democratic Union has been demanding a faster pace of political reforms including a multi-party system and an end to official privileges, as well as a more market-oriented economy.

The party leaders' resignations came in response to a 48-hour hunger strike staged by Democratic Union followers last week in Ulan Bator's main square. The fast attracted tens of thousands of sympathizers and prodded the government into concessions last Friday.

The government and the pro-democracy forces have been unusually cooperative. The Communist Party and opposition groups issued a joint declaration Sunday of their willingness to work together.

In his speech, Batmonh called for a special party congress to be convened on April 10, apparently to elect new party leaders, but said there was ''no crisis'' in Mongolia, according to the reports from Ulan Bator.

He called on the nation to maintain ''national unity'' and appealed to Mongolians to resolve their differences through debate.

The democratic movement in Mongolia has steadily gathered strength since

its inception last December, but has clearly been aided by the government's willingness - reportedly at Moscow's behest - to continue reforms.

This month, the Soviet and Mongolian governments agreed that all Soviet troops would be withdrawn from Mongolia by 1992, with combat troops leaving in 1991 and logistics units leaving the following year.

#90071u0907 03/12/1990 ~United Press International

By JAN A. ZVERINA

DETROIT (MARCH 12) UPI - Toyota is taking bold steps and making bold claims for 1990 with its restyled Celica coupe.

The Japanese carmaker has departed the shelter of safe styling for the stormy seas of something different that can spell doom for any car if the fickle buyer winds suddenly change.

Apparently Toyota senses a breeze at its back, and that it's time to advance the rounded, aerodynamic look embraced by automakers during the mid-1980s.

It may also be an effort to shake off criticism that its styling may have become too stodgy or conservative.

The bold claims concern what most Celica buyers can order to be heard as well as seen - a 220-watt stereo with no fewer than 10 speakers and six amplifiers, as well as both a compact disc and tape cassette player.

Offered on all but the Celica ST for between $1,185 and $1,405 depending on model, Toyota says its System 10 is the simply finest factory-installed audio system on four wheels.

Back to the Celica's styling, shared by all models from the ST ($12,268) to the limited edition All-Trac Turbo model ($21,008). The GT begins at $13,938. The sportier GT-S starts at $16,268.

While its front end is similar to the previous version, the new Celica looks as if scribed from an array of ellipses both inside and out. There is not a sharp angle in sight on either the coupe or liftback model.

The All-Trac Turbo has an even bolder appearance because of its gaping hood scoop and flared fenders.

Although it is a look one either loves or hates, the Celica has a design

where form still follows function. Toyota engineers, for example, say its ovoid shapes enhance body strength.

Its interior has a rounded instrument panel housing large, well marked gauges. A driver's air bag is standard, mounted in an adjustable steering wheel.

The sportier Celicas have front seats adjusted by a multitude of controls to nestle occupants, but they offer little thigh support. The rear seats are virtually useless as in most small sports coupes, and rear visibility is hampered by its fastback roofline.

Evaluated was a Celica All-Trac Turbo, loaded to its louvered gills with extras like the System 10 stereo, air conditioning ($990) and anti-lock brakes ($1,340). It cost $25,428 as tested, counting a $265 destination fee. A GT-S was also driven for comparison.

The Celica ST is powered by a 1.6 liter 16-valve four-cylinder engine delivering 103 horsepower at 6,000 rpm. The GT and GT-S have a 2.2 liter 16-valve four rated at 130hp at 5,400 rpm. A 4-speed automatic transaxle is offered for up to $750 more in place of the 5-speed manual.

But crammed beneath the All-Trac Turbo's bulging hood is a turbocharged, intercooled 2.0 liter 16-valve four that pumps 200hp at 6,000 rpm. A 5-speed manual is the only gearbox offered.

The All-Trac, which uses a full-time center differential with a viscous coupling to transmit power via all four wheels, held its tenacious grip at all times during an early winter storm.

It even stayed the course during briskly executed 'figure 8s' in an empty, ice-slicked parking lot, although it expectedly reached its limits at much lower speeds on ice than in lightly packed snow.

Like the GT-S, the 3,272-pound All-Trac was found to have a supple but taut feel on dry pavement. But the aggressive 205/50 VR15 speed-rated tires telegraphed a high degree of road noise.

One week of driving a prototype All-Trac left this driver wishing mostly for a less limp gearshift, something Toyota insists has been fixed as the car goes on sale.

Beyond repair, however, is the All-Trac's high price.

It is substantially more expensive than equally capable coupes like the Eagle Talon TSi and Mitsubishi Eclipse GSX, built under the Chrysler/Mitsubishi joint venture.

As far as the super stereo is concerned, Toyota's claims are not without merit. But its volume capabilities is certainly a classic case of decibel overkill, given the Celica's small cabin.

Toyota plans to sell only 1,000 All-Trac Turbos for 1990, catering to those who wish a cornucopia of technology between one set of bumpers.

Total Celica sales are pegged at 90,000 units, the bulk split between the ST and GT models. The GT-S should account for 8,000 units.

(For each car written about in his weekly Roadtalk column, UPI Auto Writer Jan Zverina test drives the vehicle for one week, driving it between 250 and 500 miles on city and rural roads.)

#90071u0915 03/12/1990 ~United Press International

(MARCH 12) UPI - There you are. Sharpened pencils and erasers to the left W-2s, tax forms and all the rest to the right and before you, a shoebox packed with enough pieces of paper to make up a small forest.

It's that time of year again and you have failed in last year's promise to organize things so this year's tax filing chore would be easier.

But you can make good on that promise this year and reap the rewards for years to come if you add two programs to your IBM-compatible computer. They are Andrew Tobias' Managing Your Money and TaxCut, both from Meca Ventures.

Managing Your Money 6.0, released in December, has expanded well beyond the earlier offerings. It lets you keep close tabs on every cent made and spent for this year and as many years to come as you want.

Its ability to track money is limited only by the amount of hard disk memory you have, or how big a stack of floppy disks you are willing to deal with.

It can handle everything: a bachelor's budget, the accounts of families in which both partners work, investments great and small, even businesses and partnerships.

It will balance your budget and project your economic future five years downstream.

It will manage your portfolios, remind you of important dates and keep tabs on all your relatives, business associates and debtors through its own cardfile. It even has its own word processor.

There's a financial calculator that will do everything from evaluating your real estate or life insurance to showing how much it will cost to send the kids to college, or how little you may have left to retire on.

The program's ability to track every cent made and where it goes is endless.

There are ''help'' suggestions available at every step, and the process is most forgiving of mistakes. They are easily changed and all previous references in other segments of the program are quickly updated.

Money received or spent is divided into whatever categories you allocate and carried forward through the budget and various portfolio categories to assess your net worth.

You can even write individual checks or carry out home banking through the Spectrum or CheckFree systems.

All of this leads, ultimately, to the annual date with the tax person, and this is where the separate TaxCut offering comes in.

It is more than an update of previous versions. It is a merger between Tobias and tax lawyer Dan Caine, author of ''Ask Dan About Your Taxes.'' And it is one of the few times when one plus one really equals more than two.

The two programs are excellent in themselves, but together they are even more impressive. That's because TaxCut makes use of the archived information in Managing Your Money to begin filling in any of nearly 40 Internal Revenue Service forms and schedules.

It can handle 10 business, 20 partnerships, up to 120 depreciable assets and gives you up to 30 separate ''What If?'' scenarios to show what happens when just one figure in any of the above changes.

Piloting yourself around in Tax Cut is as easy as in Managing Your Money, thanks again to multiple help screens available behind every entry line. Or you can switch to the powerful ''Ask the Expert'' interactive questionnaire that discusses tax matters in plain English, a language seldom used by the IRS.

There's even a checklist that finds deductions you might have missed, along with ''auditor'' flags to alert you to items that might bring questions or require further help.

Initial purchase of either program brings the chance to buy future updates at discounted prices. This is a valuable plus because the minute it seems you have learned all of the tax rules by heart they change.

#90071u0926 03/12/1990 ~United Press International

LAGRANGE, GA (MARCH 12) UPI - State fire investigators worked Monday to determine the cause of a fire that gutted a rest home, killing four elderly people.

Police Lt. George Yates said three of the victims in Sunday's fire were relatives or friends of the woman who operated the private nursing home and one victim was a patient.

The dead were identified as Mary Alford, 80, a patient at the home; L.D. Boddie, 79; Mae Leatherwood Boddie, 76; and Silva Alberta Reid, 79.

Yates described the nursing home as a ''personal care center'' operated by Johnnie Mae Reid, who was slightly injured in the fire.

Reid's facility consisted of two houses - one in which ''she lived with a few of her patients and another house next door where about 10 to 15 patients lived.''

The fire occurred in the wood-frame house that served as Reid's residence.

Yates said the Reids were having a family reunion when the fire broke out shortly after 6 a.m. Most of the relatives were from Birmingham, Ala., and were staying overnight.

Reid and her husband managed to escape from the burning home with a small child.

''The fire just got so hot and intense that they couldn't get anyone else out,'' Yates said.

An autopsy shows all four victims died of smoke inhalation.

Alford was the only patient fatality. All other patients were in the other house.

Yates said the houses were equipped with smoke detectors and met all state safety standards.

''As far as we can tell, they met all the requirements,'' he said. ''We've called in the state fire marshal's office to investigate the cause, and we're waiting for their report.''

#90071u0931 03/12/1990 ~United Press International

CAIRO, EGYPT (MARCH 12) UPI - Former President Jimmy Carter arrived Monday to start a Middle East tour aimed at rekindling the stalled peace process in which he played a key role more than a decade ago.

The diplomats said Carter, his wife, Rosalynn, and an aide were on a two-day fact-finding visit of Egypt as guests of the Egyptian government. Carter is also scheduled to go to Syria, Jordan and Israel on his nine-day tour.

''President Carter's visit is not sponsored by the U.S. government. He is a guest of the Egyptian government,'' a U.S. diplomatic source said. ''Carter has always taken a keen interest in the Mideast peace process and obviously would like to see it progress.''

Carter, who mediated the 1978 Camp David accords that led to the subsequent Egypt-Israel peace treaty, is scheduled to meet later Monday with Egyptian Minister of State for Foreign Affairs Boutros Ghali, as well as members of business, religious and academic communities.

He is interested in hearing their views on current attempts to reform and decentralize Egypt's economy, which receives almost $1 billion in U.S. economic aid a year, Egyptian Foreign Ministry officials said.

On Tuesday, Carter is scheduled to meet President Hosni Mubarak and then fly to Damascus Wednesday, the ministry officials said.

Carter's tour coincides with continuing U.S. efforts to persuade a split Israeli Cabinet to agree to preliminary talks between Secretary of State James Baker and his Egyptian and Israeli counterparts.

Israel's Labor party indicated Sunday it might pull out the ''unity government'' unless the other leading coalition partner, Likud, agreed to Baker's plan for Israeli-Palestinian dialogue.

The United States and Egypt hope the talks will then lead to the first Palestinian-Israeli dialogue in Cairo. Egypt is representing the Palestine Liberation Organization in talks with Israel and the United States.

''As we understand it, Carter has no plans at present to directly mediate in the Mideast peace process, but any positive contribution he can make is welcome,'' a Foreign Ministry spokesman said.

Egypt's semi-official Middle East News Agency said Carter would also brief Egyptian leaders on his efforts to mediate between rebel groups and central governments in Ethiopia and Sudan, and also his ''humanitarian work in helping solve problems of refugees from these countries.''

In Damascus, Carter is scheduled to meet Syrian President Hafez Assad, who last week called for the continuation of a holy war against Israel.

Although Syria has continued its hard-line stance against Israel, there are recent signs it is slightly moderating its stance on the ongoing peace process, and last year joined another radical Arab state, Libya, in renewing diplomatic ties with Egypt.

The United States is relying on Syria to convince Assad's ally Iran to help release 18 Western hostages in Lebanon.

Carter aide Kenneth Stein, director of the Carter Center's Middle Eastern Studies Program, has said that Carter's visit also coincides with concern in the Arab world about mass migration of Soviet Jews to Israel, and the fall of pro-Arab Communist governments in Eastern Europe.

Egypt is the only Arab state to have signed a peace treaty with Israel. Although Syria remains Moscow's closest ally in the Middle East, Kremlin diplomats have indicated that massive Soviet aid to Damascus might be reduced.

In the past year, Carter has traveled to Panama and Nicaragua to observe elections and to Africa to meet with heads of state and check on progress of his Third World education and economic programs.

#90071u0935 03/12/1990 ~United Press International

(MARCH 12) UPI - Soviet President Gorbachev is expressing reservations about Lithuania's stated intention of severing its ties with Moscow. Gorbachev called the Baltic republic's declaration of self-determination ''alarming.'' The White House praised Lithuania's action.

Despite the breaking events in the Baltic region, Gorbachev is focusing on today's Congress of People's Deputies in the Kremlin. The parliamentary body will set the limits for the country's expanded presidency, a position analysts anticipate Gorbachev will assume.

Florida authorities say they have NO suspects in last night's sniper attack on a Greyhound bus near Jacksonville that left seven people hurt, two of them critically. Officials say the shots apparently were fired from an overpass as the bus cruised along U-S 1 last night.

NO new contract talks are scheduled between Greyhound and its nearly nine-thousand striking workers. But federal mediators have asked union leaders to meet today in Washington to discuss the 11-day-old labor dispute. There's NO word if bus management will be invited.

South African black nationalist Nelson Mandela has arrived in Stockholm, Sweden, for a five-day visit that will include talks with African Nationalist Congress President Oliver Tambo. A spokesman for the Nobel Committee says Mandela is a firm candidate for the 1990 Peace Prize.

Beverly Hills police say they have taken into custody the second son of Millionaire parents slain last August in what appeared to be a gangland murder. Erik Menendez returned to the United States from Israel after learning he was accused of his parent's deaths.

SEOUL, SOUTH KOREA (MARCH 12) UPI - Hyundai Corporation plans to accept Soviet invitations to join in a petrochemical plant project and explore for natural gas in Siberia, the founder and chairman of South Korea's leading conglomerate said Monday.

Chung Ju-yung, returning from a weeklong visit to the Soviet Union, said at an airport press conference that during the trip he had received official Soviet proposals concerning both projects and Hyundai plans active participation.

Chung, founder and honoary board chairman of the group, said the petrochemical plant, a joint venture between the Soviet Union and Combustion Engineering Inc. of Stamford, Conn., will be built in two phases at Tobolsk at a cost of $5 billion.

Plant construction will take three and a half years, starting in the second half of 1991, and Hyundai would undertake civil engineering and building work expected to amount to $1.2 billion, he said.

Chung said he plans to visit the United States early next month for detailed discussions with Combustion Engineering executives. He did not say if Hyundai would seek other contractors to join in the project.

He said Hyundai would make a larger investment for natural gas exploration in the Yakutsk area of Siberia. A feasibility study will start soon based on which the scale of the investment will be decided, he said.

Hyundai is Korea's top business group. Initially starting with construction, it has branched out into shipbuilding, automobiles, heavy machinery, rolling stock, electronics, trading, financing, and other fields.

#90071u1017 03/12/1990 ~United Press International

RICHMOND, VA (MARCH 12) UPI - A long step toward resolving the Dalkon Shield controversy is being taken this week with the mailing of 110,000 packets to women who claim injuries from the birth control device made by A.H. Robins.

The Dalkon Shield Claimants Trust, with $2.23 billion to dole out, will be handling claims in 101 countries and in 52 different languages. The two-inch thick packets to be mailed Thursday contain information on which injury category the women will fall into, and once the packets are returned, the process of sending out checks will commence.

Option 1 will provide $725 virtually automatically to women who suffered minor injuries or who can't get the medical records to prove they used the IUD linked to a maladies ranging from pelvic inflamatory disease to death.

Option 2 will provide higher payments - the exact amount is a closely guarded secret until the packets are mailed - to women who can prove injuries with medical records.

Option 3 provides a full review of all evidence of Dalkon Shield use and injury, with the claimant being able to appeal the offer to a mediator, then an arbitrator, and finally, a court trial. The fourth option is for women who claim later injuries, although they would fall in one of the first three categories once their claim is approved.

Some of the 180 workers employed by the trust, which is completely separate from A.H. Robins, expect the entire process to take five years to complete. As claims department chief Ann Peters told Monday's Richmond Times-Dispatch: "We are in the business of putting ourselves out of business."

Robins, which made a $500,000 profit off the IUD before withdrawing it from the market in 1974, went into Chapter 11 bankruptcy to find an orderly way to handle the claims, and had to merge with the American Home Products Corp. to get the money to finance the trust.

The trust, which has already doled out $57 million to 84,675 people in claims, has a number of different departments, including one specializing in in-vitro fertilization to give women made sterile by the device a chance to conceive children.

Five trustees oversee the work of the trust, with their decisions subject to review by U.S. District Judge Robert Merhige Jr. and U.S. Bankruptcy Judge Blackwell N. Shelly.

Merhige has ordered administrative costs to be 5-to-7 percent of the total money being spent, but trust director Michael Sheppard told the newspaper "as of December 15, we had actually earned $2.5 million more in interest than we had spent." Because of the size of the fund, it is earning $500,000 a day in interest off investments.

#90071u1070 03/12/1990 ~United Press International
ANALYSIS BY STEVE GERSTEL

WASHINGTON (MARCH 12) UPI - Probably since the beginning of the republic, certainly since the advent of television, the party that does not reside in the White House has found it difficult to get its message across.

This is true even when, as now, the out party, namely the Democrats, control Congress, which constitutionally is an equal partner in the nation's government.

Speaker Thomas Foley and Senate Democratic leader George Mitchell are the highest elected members of the out party but, equal or not, they cannot match President Bush when they seek to enunciate their party's position.

Like many predecessors trapped by the same problem, Foley and Mitchell will try almost anything, old or new - their latest venture being a joint news conference that flopped.

The news conference, partly spurred by television demands for more access, failed because Foley and Mitchell had nothing to announce and their answers were recycled news. No news does not get you on television.

House Democratic leader Richard Gephardt did makes news recently, proposing U.S. aid for the Soviet Union, a dramatic suggestion that was given a good deal of attention. But Gephardt was not speaking for his party members, many of whom thought the idea off base.

Moreover, White House spokesman Marlin Fitzwater quickly cut him down by asking, ''Can you believe he wants to raise taxes on the American people to give money to the Soviet Union?''

Several factors work against the out party ever finding a way to even come close to the White House in reaching the American public.

First and foremost, Bush is the president and no one else is. He can get almost automatic network coverage just by asking. No one else, at least in this country, can do that.

Second, the system works against the out party. Although Foley and Mitchell are the leaders of the Democratic Party, they do not speak for Congress, partially inhabitated by Republicans. They do not even speak for all Democrats whose views cover the waterfront on many issues.

Third, neither Foley nor Mitchell, although able and even articulate, are the type of charismatic men who can captivate an audience. Neither can Bush, but it doesn't matter - he's president.

Fourth, the Democrats do not have a titular leader, an elder sage, a former president, a national figure of great stature who is known and has standing with the American public.

That role is sometimes filled by the most recent presidential candidate - but not a humiliated Michael Dukakis. His running-mate, Texas Sen. Lloyd Bentsen, could fill the role, but has shown no great desire to do so except in the very narrow confines of his Senate duties.

After being removed by the voters and then shunned by his own party, Jimmy Carter is making a remarkable comeback, but he seems to be limiting himself to foreign affairs.

Since it's impossible for the out party to achieve parity of exposure with the president, Democrats can only hope they win the White House - sometime.

And for Republicans who might enjoy gloating over the problem plaguing the Democrats, they should not forget they have had and probably will again have the exact same problem.

#90071u1079 03/12/1990 ~United Press International

(MARCH 12) UPI - Haitian National Radio says that deposed dictator General Prosper Avril left Haiti aboard a U-S plane this morning. The report said the former military dictator left on a Boeing jet for an UNknown destination. There was NO comment from the U-S Embassy. Avril stepped down Friday after nationwide protests. Other radio reports today said that a Haitian Supreme Court justice has been named the country's new interim president under a plan calling for her to organize elections.

Lithuania's new president is following up on the republic's declaration of independence by boycotting a Soviet parliament session in Moscow. Vytautas Landsbergis is also asking President Bush to recognize Lithuania as independent. In Washington, the White House urged the Kremlin ''to respect the will of the citizens of Lithuania.''

The Soviet Parliament opened its third congress today, prepared to give Mikhail Gorbachev new powers that would also limit the nation's presidency. The proposed law would allow the Soviet chief executive to veto laws and dissolve parliament... and would limit the presidency to two five-year terms.

Western diplomatic sources say the United States, China, the Soviet Union, Britain and France are all taking part in Cambodian peace talks today in Paris. The meeting is the third attempt this year by the five permanent members of the U-N Security Council to mediate the conflict in Cambodia.

Police and a Greyhound spokesman say they have NO evidence linking a sniper attack on a moving bus to the 11-day strike against the carrier. However, a sheriff's spokesman says relating the two is- in his words-

''probably a correct assumption.'' Seven people were hurt in the attack near Jacksonville, Florida.

#90071u1090 03/12/1990 ~United Press International

(MARCH 12) UPI - Israel's chronic government coalition crisis came to a head this weekend with the inner Cabinet delaying a decision on a U-S peace proposal. The left-wing Labor Party is now threatening to withdraw from the government. In the words of Labor Party Chairman Shimon Peres- ''the situation has reached an end.''

Nelson Mandela arrived in Sweden today, beginning the fifth and final leg of his first foreign tour since his release from a South African jail three weeks ago. The black leader will spend five days talking with hospitalized African National Congress President Oliver Tambo and Swedish government officials.

Philadelphia's subway system is expected to be running at full service today following last week's derailment that UNcovered poor maintenance and a motorman's drug use. Transit officials inspected all of the city's 240 subway cars after the accident that killed three people and injured 163.

A Beijing newspaper says more and more people are getting rabies as the nation's dog population increases. The paper estimates China's canine population at about 100-Million. It says as many as one-Million people are bitten each year by rabid dogs- resulting in five-thousand deaths.

Police in New York are investigating a grisly msytery uncovered by three youths who found that what they thought was a cloth-covered ball was actually a severed human head. Detectives say the youngsters unknowingly used the head in an impromptu soccer game on a South Bronx street before realizing what it was.

#90071u1130 03/12/1990 ~United Press International

MINEOLA, NY (MARCH 12) UPI - New York state's top consumer watchdog says "important questions" remain about the recall of Perrier Sparkling Water for benzene contamination and its reintroduction.

Richard Kessel, the executive director of the state's Consumer Protection Board, ssaid Sunday the popular French beverage should not be returned to stores and restaurants until its quality was assured.

Small quantities of benzene were found in some bottles of Perrier last month, leading the Paris-based company which bottles the water to announce Feb. 14 it was withdrawing 160 million bottles from stores around the

world.

Perrier announced March 6 it had installed a new quality control system to ensure purity and would begin shipping bottles which were expected to arrive in the United States in the first week of April.

Kessel, in a letter to Ronald Davis, president and chief executive officer of the Perrier Group of America in Greenwich, Conn., asked that "answers be provided ... prior to the reintroduction of Perrier to New York State." Kessel posed the following questions to Davis:

- How did the benzene contamination occur?
- What was the extent of the contamination?
- What risks were posed to the public health?
- What steps has Perrier taken to guarantee consumers that such an accident will not happen again and that Perrier will be free of all contaminants?

Kessel said these were "important questions, which, to date, have not, in my opinion, been satisfactorily answered." "As a result of Perrier's inconsistent explanation for the benzene contamination, consumers remain concerned and confused about the safety of this product," he said.

Consumers need more information on the benzene contamination before the sparkling water is returned to stores throughout the state, Kessel said. "Increased, whimsical advertising is not a substitute for hard facts," he said.

He also announced that his office will conduct tests on a number of bottled waters to determine their degree of purity. "We want to see the difference between bottled water and tap water," Kessel said. "Generally speaking, the public thinks bottled water is a pure product. The Perrier incident shows that this is not always the case."

PALMER, Alaska (MARCH 12) UPI - A strong earthquake measuring 6.2 on the Richter scale shook islands far out in the Aleutian Island chain Monday but seismologists said there were no reports of damage in the area.

The quake struck at 6:41 a.m. PST, said a spokesman at the Alaska Tsunami Warning Center.

The temblor shook buildings and scared residents of Adak and Atka islands, the only two islands in the area with any significant population, the spokesman said. The epicenter was approximately 110 miles southeast of Adak.

The spokesman said there had been three or four aftershocks. The center issued no warnings of quake-generated ocean waves in the area.

NEW YORK (MARCH 12) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 69.00-70.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 133.20 c-lb.

Lead, common, U.S. primary producers 48.00-50.00 c-lb.; U.S. non-primary (secondary) producers 47.00-54.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $3.54-$3.66 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $130.00-133.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $506.00-$507.00; dealer-approx., $505.00-$507.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $98.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $101.80 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 298.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 70.50 c-lb.

#90071u1174 03/12/1990 ~United Press International

BRANDON, FL (MARCH 12) UPI - Families who raise monkeys trained to assist quadriplegics with daily chores are protesting Walt Disney Co.'s plan to evict a breeding center for the animals.

Two years ago, Disney joined Helping Hands, a program that trains Capuchin monkeys to flip light switches, pop videotapes into VCRs and put food in microwaves for the handicapped.

Disney built a $200,000 colony near its Orlando-area theme parks where the monkeys could be bred, but now has changed its mind and tentatively decided to evict the breeding center.

The families that raise the monkeys blame the change of heart on animal activists who claim the monkeys are being treated cruelly.

''It makes me so damn mad I want to spit,'' said Bob DeLong, who is raising two monkeys, Cocoa and Mindy Sue, at his Florida home. ''It makes me so mad that Disney has caved in to these right-to-life animal people.''

About 115 families in 33 states rear the monkeys. After four years of living with foster parents and learning to trust humans, the animals are taken to the Helping Hands center in Boston, where they are trained to aid quadiplegics.

Florida's 17 foster families are putting together a telephone and mail campaign to protest the Disney decision. Disney spokesman John Dreyer said the company's decision is not final, but said community pressure will not influence park officials.

An animal rights group, Friends of Animals, has objected to the pulling of the monkeys' teeth and the fact that they are forcibly removed from their mothers, FOA lobbyist Leslie Fain said. The American Society for the Prevention of Cruelty to Animals has cited as cruel the practice of shocking the monkeys in training.

M.J. Willard, a behavioral psychologist who founded Helping Hands a decade ago, said the animals' teeth must be pulled to prevent biting and that the shocks are very mild.

''It's like a case of the squeaky wheel getting the grease, and running right over the handicapped,'' Willard said.

More than 1,000 handicapped people are on a waiting list for trained monkeys, Willard said. She said she does not know what will become of the 65 breeder monkeys at Disney if the colony closes.

#90071u1187 03/12/1990 ~United Press International
TOKYO (MARCH 12) UPI - Mitsubishi Estate Co. Ltd., which last year purchased controlling interest in New York's Rockefeller Center, announced Monday the start of construction on Japan's tallest building.

The 70-story Landmark Tower, to be built in Yokohama, west of Tokyo, will replace the 60-story Sunshine Building in Tokyo as Japan's tallest building, the company said. The Landmark Tower will measure 971 feet in height, compared with the Sunshine Building's 787 feet. Japanese skyscrappers are limited in height by the frequent earthquakes that make construction of excessively tall buildings dangerous.

The Mitsubishi tower does not come close to being the tallest in the world, which is still the Sears Tower in Chicago with 110 stories and a height of 1,454 feet.

But Mitsubishi hailed the new building as a symbol of its position as one of the world's top developers. "In terms of scale and the epochal nature of its technology and amenities, the Landmark Tower project is an auspicious start for our second century as a pre-eminent developer of large-scale urban projects in Japan and around the world," said Jotaro Takagi, president of Mitsubishi Estate.

The Landmark Tower, designed by American architect Hugh Stubbins, will house 48-stories of offices in the lower floors and a 600-room hotel in the upper floors, the company said. Construction will begin March 20, the company said.

#90071u1207 03/12/1990 ~United Press International
PHOENIX (MARCH 12) UPI - An Alaska Airlines Boeing 727 rolling for takeoff at about 100 mph struck and killed a man on the runway at Sky Harbor International Airport Sunday night.

The pilot of the plane, bound for Tucson with 31 passengers on board, felt a ''bump'' and returned to the terminal, Rick Martinez, an airport spokesman, said.

Pilot Michael Townsend thought the unidentified man had committed suicide, Martinez said.

Passengers said the plane, Flight 608, swerved to the right. They then heard a thud and smelled what appeared to be hot brakes or tires.

The incident forced the closure of the southern runway for several hours,

but the airport's northern runway was able to handle the airport traffic.

#90071u1211 03/12/1990 ~United Press International

(MARCH 12) UPI - The U-S Embassy in Haiti says an American jet is carrying the island-nation's ex-dictator and his family to Florida this morning. An embassy spokeswoman says the United States acted on a request to help General Avril Prosper leave the country, but she would NOT identify who made the request. It's NOT clear if Florida will be Prosper's final destination. Radio reports also say a female supreme court justice has been named interim president.

Lithuania's newly elected President Vytautas Landsbergis refused to participate in the opening of the full Soviet parliament in Moscow today. It appears that many rank-and-file Lithuanian delegates have joined his boycott of the meeting that has been called to determine aspects of the country's newly expanded presidency. Soviet President Gorbachev is reserved in his comments about Lithuanian independence.

The Congress of People's Deputies is expected to give Gorbachev wide-ranging executive powers at today's gathering. But the legislative body is also likely to approve measures aimed keeping future presidents from using their positions in heavy handed fashions. Among the restrictions anticipated are a limit of two five-year terms and impeachment if a president violates the constitution.

News reports reaching Beijing indicate that the entire Politburo of the ruling Communist Party in Mongolia has stepped down. The report also says that the party's leader has propsed changing the legal mandate that ensures party political dominance. Mongolia is sandwiched between Siberia and China. The country's hierarchy has been shaken by recent Soviet reforms and a fledgling democratic movement.

WASHINGTON (MARCH 12) UPI - The government should raise the sugar import quota for the fourth time this marketing year, an industry trade group said Monday, arguing that a major shortfall in sugar supplies is possible.

The Sweetener Users Association suggested the quota should be raised by 150,000 tons to 250,000 tons, or up to 8.8 percent. The quota now is 2.85 million tons. In metric measurement, the quota is 2.56 million metric tons.

"The sugar trade has concluded that a sizable quota increase is going to be needed," association president Thomas Hammer wrote in a letter to Agriculture Undersecretary Richard Crowder.

Quotas have been used by the United States since 1982 to restrict the amount of foreign sugar allowed into the country. The quota is a part of the U.S. sugar program, which guarantees U.S. sugar cane and sugar beet producers a price of at least 18 cents a pound for raw sugar, well above the usual world price.

In his letter, Hammer said sugar supplies are tight and prices have been rising. He warned of estimates that "a significant quantity of quota sugar simply will not be shipped."

"The reasons are diverse but foremost among them are the strength in world market prices, the successive increases in the U.S. quota, which some smaller producers had not planned, and the production problems in Argentina and Brazil," he said. "The very length of the list of problem suppliers indicates that the chances of a major shortfall are great."

The Sweetener Users Association represents processors such as bakers and soft drink companies, who use sugar in making their products. Officials raised the quota on Jan. 16 in response to freeze damage to sugar cane in the South. The quota also was increased on Nov. 24 and Sept. 12. The Sept. 12 increase was part of a restructuring of the quota period.

BUCHAREST, ROMANIA (MARCH 12) UPI - Ax-wielding assailants hacked to death a provincial leader of the National Peasant Party in the second deadly attack on an opposition politician in a month, a party spokesman said Monday.

The report of the slaying comes amid escalating political violence in advance of the May 20 elections, the first democratic election in post-war Romania. Peasant Party spokesman Valentin Gabrielescu accused the dominant National Salvation Front of fostering an atmosphere of terror to discourage challenges to its authority.

The Front, the leading party in the provisional government, refused to comment on the allegations and police said they had no record of the murder.

Gabrielescu said the victim was the 60-year-old Peasant Party leader in Rosiori, a small town near the southern city of Calarasi. He declined to reveal the official's name and said his killers have threatened further attacks against the man's wife and two daughters.

The victim had just finished speaking to a small crowd on a Rosiori street corner March 4 when two unidentified assailants attacked him with axes and cut out his tongue with a knife, Gabrielescu said.

He said relatives carried the wounded man to his house where he died an hour later. Gabrielescu did not explain why the party had waited so long to report the incident.

The brutal slaying was a near-carbon copy of a reported attack in early February on another provincial party official. Romanian newspapers said Vasile Vulpescu, Peasant party chief in the northern town of Bacau, also was hacked to death and had his tongue cut out by unidentified assailants.

The vehemently anti-communist Peasant party has reported 27 attacks on its offices around the country and several assaults on its politicians since the December revolution that ousted communist dictator Nicolae Ceausescu.

Gabrielescu said party leaders believe most of the attacks were carried out by members of Ceausescu's outlawed secret police, the Securitate, with the blessing of the National Salvation Front.

''They (Front) are terrified of losing the election,'' Gabrielescu said. ''They can pay for these murders legally by simply increasing the salaries'' of the security forces.

''All we can do is protest through parliament, but we're menaced by letters and phone calls day and night,'' he said. ''It will only get worse as the elections approach.''

Sunday, about 2,000 people protested against the Front in the western city of Timisoara and 1,000 others demonstrated in the capital.

#90071u1421 03/12/1990 ~United Press International
WASHINGTON (MARCH 12) UPI - For all of President Bush's "read my lips" talk of no new taxes, the White House reacted with a curious lack of strenuous opposition Monday to a Democratic plan that would raise taxes to cut the federal deficit.

Whether hinting at a possible change in policy or simply hoping to paint the Democrats as big taxers, White House press secretary Marlin Fitzwater said the plan "probably facilitates" discussions on an election-year budget deal.

Despite some "well-known provisions that we couldn't support," most notably tax increases, Fitzwater said there was "room to talk" about the proposals advanced by House Ways and Means Committee Chairman Dan Rostenkowski, D-Ill.

"It's only the first day out of the box here and there are some aspects of this that are reasonable and worth talking about," Fitzwater said. "So we don't want to pour too much cold water on a plan that we might want to swing around in for a while."

In an op-ed piece published Sunday in The Washington Post, Rostenkowski sought to reframe the budget debate by calling for rejection of any new tax cuts, a freeze on spending and higher taxes to bring down the deficit.

Rostenkowski chastized Democrats as well as Republicans for playing politics with the budget and urged compromise all around to cut the deficit by more than $500 billion over five years and end "a national embarrassment." "This program cuts all the fat out and makes men stand up " Rostenkowski declared Sunday on the CBS News program "Face the Nation."

The Rostenkowski plan would supersede the Gramm-Rudman balanced budget law, which uses the threat of automatic across-the-board spending cuts to enforce its mandate of steady annual reductions in the deficit through fiscal 1994.

In place of that system, Rostenkowski would derive savings from a freeze on spending and benefit programs, a combination of tax increases and three percent annual cutbacks in defense spending.

While reiterating Bush's opposition to "messing around with Social Security" or tampering with higher taxes, Fitzwater welcomed the proposals as "the first comprehensive and thoughtful kind of plan we've seen."

"We want to begin discussions on the budget that are serious," he said. "So that's why I don't want to go into specifics, because clearly when you get into specifics, we're going to get pretty negative."

On Capitol Hill, Senate Republican leader Robert Dole of Kansas was equaly non-committal, portraying the Rostenkowski plan, at minimum, as a vehicle for discussion if not negotiation.

"I think Dan Rostenkowski made a very good statement. I hope there's some follow-up from Democrats in the Congress, Republicans and the administration," Dole said on ABC's "Good Morning America" program.

Rostenkowski's tax proposals tread on areas the administration declared off-limits in previous deficit reduction talks, including higher

consumption taxes on oil, pollutants, alcohol, and tobacco and eliminating a provision in current law that does not require the wealthiest taxpayers to pay the highest tax rate on income.

His plan would raise the top tax rate on the highest earners to 33 percent from 28 percent and flatly rejects Bush's proposed cut in the tax on capital gains, the profits from certain investments.

In large part because of its tax provisions, Fitzwater asserted the Rostenkowski plan would do "little to increase economic growth." He also faulted Rostenkowski for proposing to remove the "discipline" the Gramm-Rudman law imposes on the budget process.

Though at a loss to cite specific provisions of the plan that the White House could accept, Fitzwater said, "It's a thoughtful approach and we're willing to talk about it, but obviously there are a lot of problems with it."

(MARCH 12) UPI - Haiti's ousted military ruler and his family have arrived at Homestead Air Force Base in Florida. A U-S Embassy spokeswoman in Port-au--Prince says General Prosper Avril, his wife and two children boarded a U-S Air Force Hercules transport for the flight to the United States early this morning. As Avril left Haiti, radio reports said he would be succeeded by Supreme Court Justice Eerta Pascal-Trouillot, who will act as interim president of the impoverished Caribbean nation.

A military band played the national anthems of Hungary and the Soviet Union, as Soviet troops boarded a train in a town west of Budapest, heading for home. It's the first contingent of Soviet forces to leave Hungary under a deal signed during the weekend. Several protesters waved signs reading- ''Hurry home to the sunshine in Azerbaijan.'' The withdrawal accord calls for two-thirds of Soviet troops to leave Hungary by year's end.

Nicaraguan President-elect Violeta Chamarro wants Nicaraguans who fled the war-torn country to come home to re-build the Central American nation. That's the word Chamorro took to about 700 cheering native Nicaraguans after a Houston church service yesterday. Chamorro vows to free all political prisoners and bring stability to Nicaragua. She is in Houston for medical treatment on her right knee, broken in a fall at her home New Year's Eve.

In LaGrange, Georgia, state fire investigators are probing the rubble of a nursing home where four elderly people died yesterday. Fireswept the wood frame house killing three friends or relatives of the woman who operated

the private rest home. The fourth victim was a patient. Officials say all four victims died of smoke inhalation although the home was equipped with smoke detectors.

#90071u1479 03/12/1990 ~United Press International
VILNIUS, USSR (MARCH 12) UPI - Lithuania's new president, refusing to take his seat in the Soviet Parliament in Moscow, announced Monday that Australia had recognized the Baltic state's declaration of independence.

In Moscow, Politburo conservative Yegor Ligachev ruled out force to roll back Lithuania's independence declaration but also warned the republic to ''think long and hard'' before finally seceding.

Georgy Shakhanzarov, a close aide to President Mikhail Gorbachev, forecast long negotiations before Lithuania finally leaves the Soviet Union.

The Lithuanian parliament, which on Sunday declared the Baltic republic's independence from the Soviet Union, broke into applause when President Vytautas Landsbergis announced, ''Australia recognized the resolution of the Lithuanian parliament.''

He quoted a message received from the Australian Foreign Ministry by telephone, which also said Moscow should open negotiations with Lithuania.

In contrast, the legislators coolly received the text of a U.S. statement read by Landsbergis.

The statement issued in Washington by White House spokesman Marlin Fitzwater, called on the Kremlin ''to respect the will of the citizens of Lithuania,'' but did not speak directly of recognition.

Later Monday, Fitzwater said the United States is not ready to recognize independence and ''urges the Soviet government to negotiate the sovereign

rights'' of Lithuania.

Saying the United States has never recognized the ''forcible incorporation'' of Lithuania, Estonia and Latvia into the Soviet Union, Fitzwater said that he believed Washington is showing ''a measure of support...this is exactly the right measure of support for a process that will produce the desired effect.''

Lithuania's proclamation of independence was expected to lead to negotiations with Moscow over full secession. It posed the first splintering of the Soviet Union in 68 years since the Soviet Union was created Dec. 30, 1922, five years after the Bolshevik revolution.

The situation presents a historic challenge to Gorbachev, who has promised he would not use force against Lithuania but has indicated Moscow will make heavy economic demands as the price of secession from the Soviet Union.

Landsbergis, 57, remained in Vilnius and did not take his seat in Moscow at a meeting of the Soviet parliament, the Congress of Peoples' Deputies, where Gorbachev called the independence declaration ''alarming.''

''Decisions that are being taken there affect the vital interests and the future of the republic, its people and our entire state,'' Gorbachev told the Congress, which is expected to grant him sweeping new powers as president.

It appeared rank-and-file delegates from Lithuania also boycotted the proceedings.

''There is a lot of joy in Lithuania,'' Lansbergis told legislators of the Lithuanian parliament. ''Lets hope the joy will be turned into better performance for our country.''

Landsbergis, a musicology professor and founder of the Sajudis nationalist movement that has led Lithuania's independence drive, became the first non-communist president of a Soviet republic.

The new president expressed disappointment over the Kremlin's reaction to the declaration, saying the government newspaper Izvestia reported only that Lithuania changed its name and restored its former emblem without any reference to the issue of independence.

''The information is very laconic,'' Landsbergis said.

But Tass said in a dispatch from Vilnius said, ''The newly elected Lithuanian parliament voted to declare Lithuanian independence here on Sunday.''

Following two hours of discussions Monday, the Lithuanian Parliament adopted overwhelmingly an appeal for support from the other ''nations'' of the Soviet Union.

''Perestroika, which originated in the Soviet Union, meant for us the struggle against bureaucracy and first of all the struggle for our independence,'' the appeal said. ''We call on the nations of the Soviet Union to support our decision.''

The republican Parliament also adopted a call to the Soviet president urging him to start talks on the reduction of Soviet troops stationed in Lithuania.

#90071u1483 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - A White House spokesman acknowledged Monday that there have been delays in getting a Panamanian emergency aid package passed in Congress as President Guillermo Endara went into the twelfth day of his protest fast to show solidarity with the poor.

Endara has criticized the U.S. government for the slow pace of assistance for Panama following the Dec. 20 invasion. Some observers say the fast is intended to pressure the United States into speeding up the delivery.

Press secretary Marlin Fitzwater said that $400 million held by the United States while Panamanian leader Manuel Noriega was in power had been returned to the Endara government.

Fitzwater said there is a request for a $500 million appropriation for Panama on Capitol Hill, he said, adding,''There have been delays. We're trying to break out'' the package ''in Congress and get it passed.''

He said the assistance has to be debated ''and it does take time to consider these matters.''

Another $500 million package in loans and other aid is also in the works.

Fitzwater said he did not think it was a matter of pointing the finger of blame at anyone in Congress.

On March 5, the fifth day of the fast, Endara said, ''The fast is not related to the lack of action by the United States, but yes, I have expressed on earlier occasions the mistake that is the lack of the arrival of the U.S. aid, because it puts in danger the sacrifices of the United States (during the invasion) and, of course, the sacrifices of the Panamanians.''

Endara said none of the promised $1 billion in U.S. aid has arrived although several aid agreements have been signed.

Last week the U.S. Agency for International Development signed an agreement with the Panamanian government to provide a $25.1 million grant for emergency economic assistence. Other agreements worth $5 million and $2.5 million have also been signed between the two countries.

Endara, who weighed 265 pounds when he began his fast March 1, is drinking only water and running the government from the Metropolitan Cathedral, the site of his fast.

He said he will end the fast when his conscience tells him to and when he thinks the fast will affect his performance as president.

Endara, 54, says the fast is to show his solidarity with the poor and is a sacrifice in conjunction with lent.

In September of 1989, Endara embarked on a hunger strike for about 20 days to protest the naming of Francisco Rodriguez as provisional president of Panama by Noriega. Endara won the May 7, 1989 presidential election by a 3-1 margin, according to most observers, but Noriega annulled the election.

#90071u1487 03/12/1990 ~United Press International

MOSCOW (MARCH 12) UPI - A leader of an emerging political opposition group Monday challenged Mikhail Gorbachev to let the people vote directly for the new post of president and attacked state founder Vladimir Lenin as the source of all Soviet ills.

Historian Yuri Afanasiyev said Soviet leader Gorbachev should stand for election as president before the whole people and not have the Congress of People's Deputies, or Parliament, choose him.

''The inter-regional group opposes introducing the new post of president '' Afanasiyev said. ''Introducing the post of president and then electing one at the Congress would be a gross and grave mistake.''

The Congress was expected later Monday to approve the office of an executive presidency and then on Tuesday to select Gorbachev for the post in a vote by the 2,250 lawmakers.

The law expanding presidential powers would allow the chief executive to declare states of emergency in any part of the country and dissolve parliament.

But the measure also would limit the president to two five-year terms, forbid the president to send troops abroad without Parliament's approval and provides for impeachment of a chief executive who violates the constitution.

Direct election by the people also is part of the measure, but the first president - certainly to be Gorbachev - would be chosen by the congress.

Standing under a giant portrait of Lenin at the Congress of People's Deputies, Afanasiyev launched into an attack on the very founder of Soviet state, Lenin, a personal idol of Gorbachev and a virtual ''saint'' of the communist state.

Gorbachev has maintained that Josef Stalin distorted the democratic principles of Lenin who died in 1924, seven years after founding the Soviet state under the rule of the Bolshevik party later renamed communist.

Boos and jeers poured down on Afanasiyev for sandwiching his attack on the hallowed Lenin into the debate on instituting a presidential system of rule in the Soviet Union.

''If our leader and founder laid the foundations of anything, it was the institutionalization of a policy of mass violence and terror,'' Afanasiyev said.

''He also initiated the rule of lawlessness as state policy,'' he said. ''This was true throughout the (Josef) Stalin period. It brought many victims.''

He also said Stalin's economic policy of using vast amounts of raw materials instead of increasing productivity is a legacy still with the Soviet Union.

''We squander our natural resoures wholesale and retail,'' he said.

As he was finishing, Afanasiyev asked for an extension of time by one minute to complete his arguments, but was met with a stream of hoots.

Gorbachev agreed to the extra time, but Afanasiyev declined because of the catcalls from the largely conservative Congress members.

There have been previous criticisms of Lenin but never in such an open forum.

Last year, Vasily Grossman's novel, ''Forever Flowing,'' also charged Lenin was the source of Soviet flouting of legal norms.

When excerpts from the Grossman novel were published in the monthly

journal, Oktyabr, the journal's editor was threatened with dismissal.

The great Russian novelist Alexander Solzhenitsyn earned deportation from the Soviet Union in 1974 for blaming Lenin for starting the Soviet concentration camp, or Gulag, system of forced labor.

But Solzhenitsyn's books are now being published in the Soviet Union, and the novelist has said he will return when assured all he has written is available to Soviet readers. He now lives in Cavendish, Vermont.

The Congress of People's Deputies opened Monday in the Kremlin.

-30- 3889
#90071u1490 03/12/1990 ~United Press International
(MARCH 12) UPI - Reports reaching Beijing say the ruling Poliburo in Mongolia has resigned and the Communist Party leader wants to change the party's constitutionally guaranteed dominance. It's the latest in a series of moves toward reform inspired by policies of Soviet President Gorbachev. The Soviet news agency Tass and the East German news agency, reporting from Mongolia's capital, announced the resignation of the Politburo of the Mongolian People's Revolutionary Party.

In New York City, a 12-year-old Brooklyn boy who was clubbed and set afire on his way to school last week remains in critical condition. David Aupont told hospital officials yesterday he was encouraged by a letter he received from the Guardian Angels offering to escort him to school when he recovers. A 13-year-old boy, described by police as a neighborhood bully, was ordered to appear in family court today to face charges in the attack.

-30- 1076
#90071u1504 03/12/1990 ~United Press International
MOSCOW (MARCH 12) UPI - Politburo conservative Yegor Ligachev Monday ruled out force to roll back Lithuania's declaration of independence from the Soviet Union, but warned the Baltic republic to ''think long and hard'' before finally seceding.

Georgy Shakhanzarov, a close aide to Mikhail Gorbachev, forecast long negotiations before Lithuania finally leaves the Soviet Union despite Sunday's declaration. He depicted the Lithuanian step to bolt as rash.

Gorbachev, who has planned to introduce a mechanism to let any republic leave or remain in a reconstituted Soviet federation, told the Congress of People's Deputies that Lithuania's decision was ''alarming.''

''We will not use force,'' Ligachev told reporters during a recess at the Congress. ''(But) they should think long and hard before they decide to

leave.''

Sergei Stankevich, a rising legislative star and member of the Inter-regional Group of Deputies faction, said Lithuania's decision should alert lawmakers to a creeping dismantling of the Soviet Union.

''I think it is inevitable what is happening in Lithuania,'' Stankevich said. ''It is a great mistake for us to wait for this spontaneous disintegration of the Soviet Union.''

''We should start immediate negotiation with all republics on developing a new basis of federation.''

Shakhnazarov, part of Gorbchev's braintrust of advisers, said secession cannot be accomplished overnight.

''If a republic is going to leave the union, it is necesary to leave on the basis of law, agreements, political means, not on impulse and passion '' he said. ''You can't do such a thing in one month.''

''Such questions as secession must be regulated over two to maybe three years.''

Gorbachev, as usual keeping the center ground and not revealing what steps he would take, said Lithuania's declaration to regain the independence it lost in 1940 had to be studied.

''Decisions that are being taken there affect the vital interests and the future of the republic, its people and our entire state,'' Gorbachev said.

The break posed a historic challenge to Gorbachev, who has promised he would not use force against Lithuania but has indicated Moscow will make heavy economic demands as the price of secession from the Soviet Union.

Moscow has hinted at an economic approach involving the charging of world prices in hard currency for Soviet raw materials as well as demanding repayment of billions of rubles invested in Lithuania's infrastructure in the past 50 years.

WASHINGTON (MARCH 12) UPI - Two women soldiers who balked at driving troops into an area of heavy fighting in Panama will not be disciplined, the Army said Monday, reporting its inquiry found there was no ''order given and subsequently refused.''

''The U.S. Army has determined that disciplinary action is not warranted

in the case of two female drivers who expressed reservations about driving combat troops into Panama City, several hours into the first day of Operation Just Cause,'' the Army said in a statement issued from Panama.

A ''commander's inquiry'' was called after reports in January that the two women had refused to drive troops into a combat area during the Dec. 20 invasion of Panama. Some news reports said tears were shed.

The reports followed other accounts of women soldiers who had performed well under fire in Panama, reinvigorating the controversy over whether American women should be assigned combat duty.

Federal law and Army policy bars women from joining combat units.

The Army statement said the two women soldiers ''were among those identified to drive trucks to transport combat troops from Albrook Air Force Station, a U.S. base, to the vicinity of the Comandancia,'' headquarters of Gen. Manuel Antonio Noriega's Panama Defense Forces, on Dec. 20.

''The area of the Comandancia was the scene of heaving fighting throughout the day,'' the Army noted.

''The female drivers expressed reservations about going on the mission. The senior soldier present at the time (a specialist), acting on his own initiative, found two soldiers to replace them.

''No non-commissioned officer, officer, or member of the chain of command participated in the decision to replace soldiers, nor was any order given and subsequently refused,'' the Army said.

''The two female drivers were then transported back to their unit at Fort Clayton, and they continued to perform other driver duties, providing transportation to sites within the area of operations,'' the statement concluded.

The two soldiers were not identified.

Following reports of women soldiers performing well in Panama, Rep. Patricia Schroeder, D-Colo., announced she would introduce legislation requiring the Army to open jobs in some of its combat units to women on an experimental basis.

Defense Secretary Dick Cheney has said he does not believe women should be allowed to serve in combat jobs. ''My own personal view is that the current system is just about right,'' he said in January.

#90071u1543 03/12/1990 ~United Press International
BONN, WEST GERMANY (MARCH 12) UPI - British Foreign Secretary Douglas Hurd said Monday that Poland should have a role in the portion of German reunification negotiations that deals with its borders.

After meetings with West German Chancellor Helmut Kohl and Foreign Minister Hans-Dietrich Genscher, Hurd told reporters that ''the question of Poland's frontiers has also been tackled in a way which seems to us to show substantial progress.''

''It is now a matter of finding the right procedure,'' he said in reference to plans for the formal recognition by Germany of the Polish borders. A recognition of the borders entails confirming the loss by Germany of territory east of the Oder and Neisse rivers, ceded to Poland after Germany lost World War II.

Asked whether he supported Poland's demand for inclusion in German reunification talks, Hurd said, ''Certainly, Poles should take part in any discussion which affects their frontiers.''

But he did not specify whether he favored a participation of Poland in the so-called two-plus-four talks between the two German states and the four World War II Allies, Britain, France, the Soviet Union and the United States.

Delegations from the six nations will meet in Bonn Wednesday for the first session of the conference, set up in Ottawa last month.

No concrete decisions are expected before East Germany forms a new government after March 18 elections.

The major stumbling block in the negotiations is expected to be the military affiliation of a reunited Germany.

Hurd reiterated that he favored Germany's continued membership in NATO.

He denied suggestions that Britain had tried to slow the German reunification process.

''I'm not actually in favor of very long periods of uncertainty before the NATO aspect is settled,'' he said.

''I think probably our main concern is with the future of the North Atlantic Treaty and the crucial importance for that alliance and for the security of Europe of a continued German membership of NATO,'' he said.

Asked about the future of Soviet forces in East Germany, Hurd said he had

discussed the issue with Kohl and Genscher and that ''the views of our two governments are quite close on this.''

DAR ES SALAAM, TANZANIA (MARCH 12) UPI - President Ali Hassan Mwinyi asked his entire Cabinet to resign Monday, a brief statement issued by his office said.

The statement gave no explanation for the mass dismissal, saying only that all ministers were asked to resign pending formation of a new Cabinet.

Ministers' duties will meanwhile be handled by their principal secretaries the statement said.

Mwinyi has never presviously dismissed his whole Cabinet in advance of a reshuffle, and the new style wass seen by government sources as a prelude to tough action against corruption.

Last month former President Julius Nyerere, now chairman of Tanzania's ruling socialist Chama Cha Mapinduzi party and still a leading political figure in the country, called for immediate action against corruption and inefficiency in government.

He said Tanzania, which has been run on model socialist principles for almost 30 years, needed to observe the lessons of reform in Eastern Europe and, if necessary, adopt a multi-party political system.

Following Nyerere's call, a nine-man commission was set up to probe corruption in the senior ranks of the CCM.

Mwinyi, president since 1985, faces re-election in October this year if he seeks a second term. His selection will come up for approval by the party in August.

BY VERNON SCOTT

HOLLYWOOD (MARCH 12) UPI - The entertainment industry's guilds and critics have been scurrying around the last several weeks distributing their annual awards to steal some of the thunder from the only trophy that means anything, Oscar.

Only an Academy Award can translate into millions of additional box-office dollars.

Once the Oscars are announced, as they will be Mar. 26 from the Los Angeles Music Center with a TV audience estimated at 1 billion, other awards become immediately redundant.

Thus we are hearing the results of polls from the Producers Guild of America, the Directors Guild of America, the Writers Guild and such others as the New York and Los Angeles film critic groups.

The most interesting, for several reasons, to date is the vote of the membership of the directors guild.

First and foremost is the directors' neglect in nominating Bruce Beresford one of their members, for his direction of ''Driving Miss Daisy,'' which is the front-runner for the Academy Award for best picture of the year.

But then the film academy itself also failed to nominate Beresford.

The directors guild early this month gave its top award to Oliver Stone for ''Born on the Fourth of July.'' He won the same award in 1986 for ''Platoon.''

Both Stone's winners dealt with the Vietnam War, in which Stone served in combat.

In addition to overlooking Beresford, the directors also ignored Jim Sheridan, an Irishman and not a member of the guild, who made his directorial debut with ''My Left Foot'' and who was nominated by the academy.

Another Irishman, young Kenneth Branagh, was nominated for an Oscar for ''Henry V,'' but was passed over by the Directors Guild of America.

Beresford is an Australian, as is Peter Weir who was nominated by the guild for his direction of ''Dead Poets Society.'' Weir lost out to Stone.

One can only guess that Stone's closest competitor for the DGA award this year was Phil Alden Robinson, who was nominated for his marvelous ''Field of Dreams.''

Woody Allen, a winner in 1977 for ''Annie Hall,'' failed to gather enough votes this year for ''Crimes and Misdemeanors.''

The other loser was the talented Rob Reiner for ''When Harry Met Sally.''

Without question, Stone's victory among his own kind gives him an edge in the Oscar race.

He faces a different field on Oscar night. In addition to Allen and Weir, he is up against Branagh and Sheridan, neither of whom really stands much of a chance.

This time his toughest competition, Robinson, is not in the field. Nor is Reiner.

Give the Oscar to Stone.

Curiously, Stone's picture, ''Born on the Fouth of July,'' is more than likely to lose to ''Driving Miss Daisy,'' for which Beresford was not nominated for best director.

Should ''Driving Miss Daisy'' win best picture and Stone best director, it would be one of the rare times that an Oscar was won by a picture whose director was overlooked.

The last time that happend was in 1981 when ''Chariots of Fire'' won for best picture, but its director, Hugh Hudson, did not win. Warren Beatty collected the statuette for ''Reds'' that year.

But should Stone not win the Oscar, it would be only the fourth time a DGA winner did not also collect the Academy Award.

In 1986 Steven Spielberg won the DGA prize for ''The Color Purple.'' He was not even nominated for the Oscar, which was won by Sydney Pollack for ''Out of Africa.''

Anthony Harvey won the DGA trophy in 1968 for ''The Lion in Winter'' but blew the Oscar to Carol Reed for ''Oliver.''

In 1972 Francis Ford Coppola copped the DGA honors for ''The Godfather'' while Bob Fossie went home with the Oscar for ''Cabaret.''

At the DGA last Saturday night, Stone accepted his award, thanking his fellow directors and giving due credit to his assistants and producers.

He said, ''How sweet it is - and how fleeting.''

Stone is now the odds-on favorite to win the Oscar later this month.

#90071u1609 03/12/1990 ~United Press International

BALTIMORE (MARCH 12) UPI - Lawyers for the widow of Sen. John East attempted to persuade a federal judge Monday that the failure of Navy doctors to promptly diagnose East's thyroid disorder eventually led the North Carolina Republican to kill himself.

East's wife contends in a $3.5 million lawsuit that went to trial Monday in U.S. District Court that doctors' failure to recognize the classic symptoms of hypothyroidism - and to order a simple test that would have diagnosed it - allowed the senator to become depressed and eventually suicidal.

The suit, being heard by U.S. District Judge Walter Black Jr. without a jury, alleges that senator died because of negligence by doctors at the Bethesda Naval Hospital and by Rear Adm. Freeman Cary, who had been the attending physician on Capitol Hill since 1972.

East, then 55, killed himself June 29, 1986, by filling the garage of his Greenville, N.C., home with automobile exhaust fumes. He left a note citing the naval hospital doctors and Cary by name, concluding, ''They ruined my health.''

But government lawyers said they would paint the picture of a political neophyte who was recruited by conservatives such as Sen. Jesse Helms, R-N.C., and thrust from a contemplative life as a political science professor into the demanding whirlwind of Capitol Hill.

The government also argues that East's hypothyroid problem - a gland disorder that slows metabolism and causes fatigue and other problems - was detected and treated nearly a year before he killed himself.

Assistant U.S. Attorney Susan Ringler said the East suit was unusual because the alleged negligence is being blamed for a suicide rather than for an accidental or medical-related death.

The trial is expected to last as long as seven weeks, with East family members, aides and a battery of medical experts scheduled to testify.

In opening statements, James Hourihan, the lawyer representing widow Priscilla East, said East sought treatment in 1983 for problems related to the thyroid disorder, but that doctors were unable to detect the problem and eventually referred him to psychiatrists.

Hourihan pointed to warning signs of East's problems, citing the senator's April 1985 attempt to kill himself by shoving a chair leg down his throat. East eventually killed himself, Hourihan said, because the thyroid disorder cost him cognitive and intellectual capabilities and threw him into despair.

''He had an irresistible impulse to kill himself because of the ... hypothyroidism,'' Hourihan said. Of the doctors, he added, ''It was their poor treatment and handling that caused him to be cast adrift.''

Ringler countered that the government would show that the freshman senator was overwhelmed by his new duties in Congress and missed the intellectual life of an East Carolina University professor. He announced a decision not to seek re-election in September 1985, nine months before his death.

''John East quickly learned he was not going to make that difference,'' Ringler said. ''He became frustrated with the legislative demand.''

She also told Black that many of the symptoms East exhibited stemmed from his confinement to a wheelchair because of polio, and that ''most of them were old complaints.''

#90071u1620 03/12/1990 ~United Press International

STOCKHOLM, SWEDEN (MARCH 12) UPI - Nelson Mandela was reunited with Oliver Tambo here Monday in the first meeting between the two African National Congress leaders in more than 27 years.

The meeting came at the start of a five-day visit to Sweden during which Mandela, recently elected vice president of the ANC, was to discuss the future of the organization and its armed struggle against South Africa's system of white minority rule.

Tambo has been recovering in a Swedish clinic after a stroke last August, but his health seemed greatly improved as he made his first public appearance since he became ill, traveling from the hospital to the Haga Palace to meet Mandela.

''He was walking around, smiling, talking and joking,'' said Anders Holmstrom who was present at a photographers' session arranged by the ANC at Stockholm's Haga Palace.

''He seems to have problems climbing stairs but otherwise he looked very well,'' Holmstrom said.

Holmstrom's eyewitness report was the first independent one of Tambo's condition. Last month, South African communist leader Joe Slovo said Tambo was ''improving'' but would not elaborate.

Tambo, wearing a grey suit, was already at the Haga Palace when Mandela arrived. The two men went on to hold meetings with retired Anglican Archbishop Trevor Huddlestone, a close friend who served in South Africa for 12 years.

''Everyone looked very happy,'' Holmstrom said.

The meeting came as a spokesman for the Nobel Committee said Mandela was a

firm candidate for the 1990 Peace Prize and most likely would be on a short-list of candidates for the presitigous award.

Mandela's visit to Sweden was the fifth and final leg of the 71-year-old black nationalist leader's foreign tour and his first to Europe since being released from a South African jail three weeks ago.

Mandela was met at Stockholm's international Arlanda airport by a jubilant crowd of 300 ANC supporters and a bevy of Swedish dignitaries led by Foreign Minister Sten Andersson.

''It is an absolute honor to have Nelson Mandela in our country,'' said Andersson, whose country has been a leader of the world movement supporting sanctions against South Africa for its apartheid policies.

''We are particularly proud that ours is the first non-African country that Mr. Mandela has visited,'' Andersson added.

Mandela is to be treated as a head of state during his stay in the country living at government house. He has a full program of political talks.

Mandela was said to be fatigued after his hectic six-day African tour that took him to Zambia, Tanzania, Ethiopia and Zimbabwe. But an announcement that his Swedish tour would be curtailed was withdrawn.

Mandela was visibly tired at the end of his African appearances and reports Sunday said his doctors had told him to trim his busy schedule of speeches and appearances.

Mandela was treated for tuberculosis 18 months ago while still in a South African jail.

Other reports said Mandela wished to return to South Africa to try to calm developing unrest in South Africa's black homelands following a military coup in the coastal Ciskei homeland last week.

Mandela's message throughout his foreign tour has been one of keeping up the fight against apartheid in South Africa and of thanks to those countries and people who supported ANC members during their long years of exile.

#90071u1633 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - The Food and Drug Administration has asked a drug company for more information about possible adverse reactions from an experimental AIDS drug involved in a controversial study, officials said Monday.

''The FDA has been informed by the Bristol-Myers Squibb Company of New York ... that a number of adverse reactions, including deaths, have been experienced by patients given DDI,'' the agency said in a statement.

''The agency has asked the company to provide indepth information on these adverse reactions as soon as possible,'' it stated.

''The agency is working actively with the company to fully assess these cases to determine whether changes in the protocols may be needed. In the meantime, the agency and the company will keep physicians and their patients participating in the trial fully informed of this matter,'' the FDA said.

The company also has been asked to distribute a ''Dear Doctor'' letter to all researchers administering the drug to keep them informed and ''urging them to monitor their patients closely,'' it said.

The drug has been associated with acute pancreatitis in some patients, the FDA said. Pancreatitis is an inflammation of the pancreas, which in severe cases can lead to kidney failure, respiratory failure and death, it said.

A Bristol-Myers Squibb spokesman was not immediately available for comment Monday.

But The New York Times reported the company said 290 of the 8,000 patients taking the drug in its free ''expanded access'' distribution program have died while only two of the 700 AIDS patients taking DDI in Bristol's clinical trials had died.

Dr. Thomas Chalmers, associate director of the Harvard University School of Public Health's technology assessment group, called the high death rates in the new program ''an absolute disgrace,'' the Times said.

''I think it's a painful way to learn the lesson, but maybe it's the only way they'll learn that, to my mind, they did the wrong thing,'' Chalmers told the newspaper.

The Times reported that the expanded access program allows patients to take experimental drugs under the supervision of their own doctors while the drugs are being formally tested in clinical trials, which are carefully designed to allow an assessment of the drug's safety and effectiveness.

The FDA, responding to the demands of people with AIDS and their advocates agreed to permit the new program last August, the newspaper said.

Proponents of the new system have said dying patients should be allowed to decide whether to risk taking a drug when its safety is unknown and its

efficacy is unproven.

The drug, DDI or dideoxyinosine, is in enormous demand by AIDS patients who hoped it might save or prolong their lives when nothing else was helping, the Times said.

But critics have charged that the expanded access program represents a dismantling of the FDA, makes it very dificult to recruit patients for clinical trials and places patients at great risk of being harmed by experimental drugs, the report said,

With the new information on death rates, the critics say, their worst fears were being borne out, even though the causes of the deaths are not known, the Times reported.

''A difference of mortality of over tenfold is potentially quite alarming '' Dr. Paul Meier, a statistician at the University of Chicago, told the Times. Meier is also a member of the FDA committee that advises the agency on the approval for AIDS drugs.

Although the high death rate among the expanded access patients could be due to their being ''extraordinarily sick,'' Meier told the newspaper, ''nonetheless, that's a difference in rate of imposing magnitude and it calls for a very prompt explanation of what is going on.''

A spokeswoman for the drug maker said the higher death rates in the expanded access program should be viewed in context.

''We're dealing with a very, very sick population,'' spokeswoman Kathryn Bloom told the Times.

Although the more recent deaths were still being analyzed, Bloom told the newspaper that the company attributes them all to AIDS and its complications, except for five due to pancreatitis.

#90071u1643 03/12/1990 ~United Press International

LONDON (MARCH 12) UPI - More than 3,000 heliports will be built in Japan over the next 30 years under an ambitious plan to extensively use helicopters with the aim of overcoming ground and air congestion, Jane's Airport Review reported Monday.

But the magazine's March issue said plans to similarly use helicopters in the United States, particularly in California, had not progressed because of opposition by people living near potential heliport sites.

Jane's said a plan developed by the privately financed Japan Helicopter

Network (JHN) envisioned building 600 heliports that would cost $24 billion across the island nation over the next 15 years. None of the land-based heliports would be more than 22 miles apart or more than ten miles offshore, Jane's said.

The 600-heliport plan would lay the foundation for a network involving the building of some 2,700 other heliports by the year 2020 to ensure every village, town, and city in Japan has a landing area, Jane's said.

"It is believed that the superior functions of the helicopter will allow us to incorporate transportation networks into our society and our lives on an intimate basis," said Gen-ichiro Kazeshima, executive director of Heli-Network 3300, the title of the heliport masterplan.

JHN, formed last December with financing from 49 companies and government backing, will work to "coordinate all of the human, mechanical, enviornmental, economic, geographical, technological, and governmental aspects of helicopter use in one of the most crowded and affluent regions on Earth," Jane's reported.

However, the magazine said many Americans did not want helicopter services on such a scale, as indicated by opposition from local pressure groups concerned about noise and safety.

"Although political decision-makers recognize the need for rapid mobility within urban centers, they have been unwilling to bite the bullet to acknowledge the advantages of locating a heliport in a central business district," said Jack Kemmerly, an aeronautics official for the California government.

One expert said California should learn from Japan because it had a similar population density and geography and warned it would be disastrous if Los Angeles did not develop heliports.

"Mobility is the lifeblood of this region and we are beginning to suffer pains resulting from clogged arteries. Los Angeles is both a driver's paradise and nightmare," said James Gosnell, director of transportation for the Southern Californaia Assocation of Governments. Demand on highway infrastructure "is growing faster than supply, and the outcome is gridlock " Jane's quoted Gosnell as saying.

#90071u1646 03/12/1990 ~United Press International

NEW YORK (MARCH 12) UPI - The American Paper Institute opened its annual meeting Monday with an optimistic forecast for the U.S. paper industry, expected to continue along the strong growth trend of the past years.

The meeting, held for the 113th year, opened with analyst briefings on the future of the U.S. paper manufacturing industry which generated $112 billion in sales in 1989.

"The paper industry has done well in the past 20 years," said Lawrence Ross, first vice president with the investment firm of PaineWebber Inc. "The net profit growth in the U.S. paper industry stood at 14.2 percent in the 1970s and 7.7 percent in the 1980s, while the average growth for other industries were 11.5 percent and 3.9 percent for the same periods respectively," Ross said.

Ross credited a number of factors for the healthy growth of the paper industry. In the late 1980s, the industry benefited from lower oil prices which translated into lower production costs for the energy-intensive sector, while a weaker U.S. dollar boosted exports, he said.

The industry recorded a more than 25 percent growth in the 1980s, up 15.6 million tons from 60.9 million tons at the beginning of the decade. "Output of U.S. paper and paperboard continued at 76.5 million tons, foregoing gains as printing-writing paper customers trimmed inventories," said Red Cavaney, president of the institute.

The highest rate of growth was in the printing paper sector, responding to the increased demand for published material. "Reflecting the still growing importance of paper to support an ever increasing thirst for information in today's society, printing and publishing papers accounted for 40 percent of the decade's production growth," Cavaney stressed.

"U.S. papermakers have increased capital spending on most domestic plants and equipment at double-digit rates, far outstripping investment increases of other U.S. manufacturing industries," Cavaney said. "This commitment to modernizing the world's largest paper industry has yielded substantial productivity gains, totalling over 40 percent during the past decade, and has laid the foundation for a future with similar promise."

The institute projected that $17.9 billion will be injected in the U.S. paper industry this year, a higher rate of investments than in other major U.S. manufacturing sectors.

Ross echoed the feeling and credited major investments in the profitable sector as another factor accounting for its sustained growth. He also pointed out to the newly emerging merger trend in the traditionally stable sector.

"Georgia-Pacific Corp. did not hesitate to invest $90 million to increase its capacity by 175,000 tons a year when it recently acquired Great Northern Nekoosa Corp.," Ross said.

"Georgia-Pacific wanted to do such a transaction at $65 per share when the stock was originally valued at $38 per share because the company could be acquired at a fraction of the cost of building new facilities," he added.

Ross, however, warned that the paper industry would not become a favored scene for corporate raiders because acquisitions in the paper industry required major cash investments as well as expertise in the field. The availability of cash has dried out with the demise of the junk bond market and the banks' reluctancy to finance leveraged mergers, he pointed out.

Irwin Kellner, chief economist with Manufacturers Hanover Trust Co., described the situation of the paper industry against the backdrop of the U.S. economy.

"The growth of the paper industry is above the average, it will have a better growth in 1990 than in 1989, and a fairly respectable growth in 1991," Kellner projected.

The U.S. paper industry continued to improve its trade balance in 1989, with exports of paper and paperboard posting a 10.8 percent increase. Exports, mainly to Japan, also allowed sales of pulp paper products to grow substantially although domestic demand remained sluggish.

One major issue to be discussed during the meeting is recycling. The institute has set a goal for the industry to recover about 40 percent of waste paper in the United States by late 1995. In 1989, 27.7 million tons of waste paper, or about 26 percent, were collected for domestic use and export, a 5.4 percent increase compared with 1988. About 25 percent of the waste paper recovered in the United States is shipped abroad.

#90071u1653 03/12/1990 ~United Press International

MIAMI (MARCH 12) UPI - Haitian refugees in south Florida gathered Monday outside the gates of Homestead Air Force Base calling for the execution of ousted dictator Prosper Avril who had been spirited to the base from Haiti several hours earlier.

''We are here to tell the American people Avril is not welcome here,'' said Jean Pierre-Louis, 29. ''We would be angry if the United States keeps him here and does not send him back to be tried and executed.''

About 15 Haitians from Miami arrived at the gates of Homestead Air Force Base approximately two hours after an Air Force C-141 carrying Avril and his family arrived from Port-Au-Prince. The base is about 25 miles southwest of Miami.

Unrest against Avril's regime erupted a week ago, driving him from power

on Saturday.

The protesters broke into sporadic chants in French of ''Down with Avril'' and ''Justice for Haiti'' as they waited for Avril to leave the base.

''He is a guy who has killed a lot of people, beaten a lot of people and participated in drug activities,'' said Pierre-Louis, who fled Haiti six years ago. ''He should be tried, imprisoned or executed.''

Haitian refugees in Miami said they would ask U.S. prosecutors to try Avril on charges of killing his opponents, violating human rights and looting Haiti's treasury.

''I wish he could be under arrest for all the crimes he has been charged with,'' said Gerard Jean-Juste, former director of the Haitian Refugee Center in Miami.

''We consider Avril worse than Noriega,'' said protester Dumonte Pierre, in a reference to former Panamanian strongman Gen. Manuel Noriega who also was taken to Homestead after he surrendered to U.S. military officers following the Dec. 20 invasion of Panama.

Noriega is awaiting trial in Miami on drug-trafficking charges.

''I don't want the United States to become a place where these animals can go,'' said Pierre-Louis, who acted as spokesman for the protesters outside the base. ''They (Avril and his family) should go someplace where they can be with other animals like them.''

The U.S. Atlantic Command in Norfolk, Va., said Avril and his party were to be driven to Boca Raton, Fla., where Avril is believed to own property. In Port-au-Prince, U.S. Embassy spokeswoman Susan Clyde said the ousted dictator was accompanied by his wife, Marie-Ange, his daughter Carine, his son Philippe and a servant.

She said ''there was a request made'' for U.S. help in taking Avril out of the country, but would not say who made the request. Clyde said U.S. Ambassador to Haiti Alvin Adams met with Avril at the international airport in Port-au-Prince before the plane left about 6:20 a.m.

Opposition leaders announced Ertha Pascal-Trouillot, a Supreme Court justice, agreed Sunday night to be the country's interim president under a plan calling for her to organize elections in Haiti, one of the poorest nations of the Western Hemisphere.

#90071u1670 03/12/1990 ~United Press International

OREGON, IL (MARCH 12) UPI - A stroke suffered by the chief prosecution witness led to the declaration of a mistrial Monday in the case of three employees of political extremist Lyndon LaRouche.

An Ogle County judge approved a motion by prosecutor Dennis Schumacher and released the jury called to hear theft, robbery, burglary and intimidation charges against employees of LaRouche's Midwest Circulation Corp. of Chicago.

Ron Fredman, 33, Patricia Noble-Schenk, 36, and Richard Bloomquist, 26, all of Chicago, were joined on the courthouse steps by 10 LaRouche supporters to celebrate Cargerman's ruling.

Some celebrants clad in medieval attire, including a man dressed as a Spanish conquistador and a woman in a Joan of Ark costume, sang ''We Shall Overcome.''

Judge Alan Cargerman tentatively rescheduled the trial for June and set an April 17 hearing to determine the condition of prosecution witness Harriet Driver, 89, who reported the LaRouche workers bilked her of more than $100,000.

Driver collapsed while testifying Wednesday and was taken to a Rockford hospital, where she was reported in serious condition Monday. Schumacher said she suffered a stroke.

''She's doing fine. She's alert,'' the state's attorney said after Cargerman declared the mistrial. ''Her family says her mind is clear.''

Schumacher said it is possible Driver could testify by videotaped deposition in a retrial, but defense attorney Michael Null said he would seek dismissal of the charges if Driver is unable to appear in court.

Null said he would demand a ''total physical and mental examination'' of the victim before she is allowed to testify.

LaRouche had been scheduled to be transferred this week from the Federal Medical Center in Rochester, Minn., to the Winnebago County Public Safety Building in Rockford to testify on behalf of his supporters.

LaRouche is serving a 15-year conspiracy and mail fraud sentence.

#90071u1676 03/12/1990 ~United Press International

BOGOTA, COLOMBIA (MARCH 12) UPI - The victory by an anti-drug crusader as the Liberal Party's presidential candidate is a reflection of the Colombian peoples' desire to rid the nation of corruption and powerful

cocaine cartels, observers said Monday.

''The power of antique cronyism is being liquidated,'' said an editorial in Bogota's El Espectador newspaper. ''It (corruption) is rolling towards a cliff, pushed by clean people with pure minds.''

Cesar Gaviria, 43, won the Liberal Party's presidential primary Sunday in a public vote and will confront Social-Conservative Rodrigo Lloreda Caicedo and the leftist Patriotic Union's Bernardo Jaramillo Ossa in presidential elections on May 27. The current president, Virgilio Barco, is prohibited by Colombian law from seeking re-election.

Sunday was the first time the Liberal Party had let a presidential candidate be chosen by a public vote.

Gaviria netted 51.6 percent of the ballots cast against five other Liberal candidates with 45 percent of the votes counted. The National Electoral Registry said official results will be announced Tuesday.

A former minister of the interior, finance and economic development, Gaviria launched his campaign last August after front-runner Luis Carlos Galan was assassinated by drug cartel hit men during a political rally.

Galan's death triggered a war between the government and the cartels.

Galan's followers chose Gaviria to continue the campaign of the slain leader, who led a crusade in Colombian politics against traditional machine politics and the dirty dealings of the cartels.

''I think the result (of the primary) is something that is ... a sense of protest against the present Liberal establishment,'' said former President Alfonso Lopez Michelsen, who served from 1974 to 1978.

''I think that more than an election, it was a revolution, and more, not only for the Liberal Party, but for the national panaorama,'' Lopez told radio reporters.

Observers say Gaviria's youth and hard-line stance against the drug lords and corruption represent a new current in the country's politics.

Since Galan's death, Gaviria has vowed to support the ideals of the late politician, and backs the government crackdown on the drug cartels.

Gaviria also opposes a dialogue with the cocaine czars, who recently called a unilateral cease-fire to bring the government to the negotiating table.

''Citizens, this is the victory of Luis Carlos Galan ... It is the victory

of his conceptual clarity, his faith in Colombia, and the Liberal principles that inspired his life,'' Gaviria told cheering supporters Sunday night in his acceptance speech.

''Today's triumph is the beginning of ... the struggle against violence and poverty, against apathy and despair, the struggle for equality, justice, and tolerance,'' Gaviria said.

In another electoral novelty Sunday, a former rebel group, the April 19th Movement, or Ml-19, emerged as a political force.

Unofficial results published in Bogota newspapers gave two former guerrillas mayoral spots, including a rebel commmander who led the 1980 taking of the Dominican Embassy in Bogota.

The M-19 rebels, who five years ago staged a bloody Palace of Justice takeover in Bogota that left 100 dead, handed over their weapons to the Socialist International Thursday, ending 16 years of guerrilla war.

WASHINGTON (MARCH 12) UPI - The United States flew Gen. Prosper Avril and his family out of Haiti to Florida to guard his safety and to help restore order and democracy, the State Department said Monday.

Avril, his wife and two children arrived Monday at Homestead Air Force Base, spokesman Margaret Tutwiler said. She said the former Haitian leader was free to leave and travel wherever he chooses, but she declined to comment on his possible destination.

''General Avril requested United States assistance in departing Haiti because he was concerned for his safety,'' Tutwiler said. ''The United States responded to his request because it was the humanitarian thing to do, and because it seemed the course of action most likely to reduce further bloodshed, and thereby contribute to stability and calm in Haiti.''

She said the action came ''in the interest of assisting the democratic transfer of power'' to a transitional civilian government that will hold free and fair elections.

Alvin Adams, the U.S. ambassador to Haiti, encouraged Avril to leave the politically and violence-torn nation. Adams was with Avril at the airport in Port-au-Prince before he and his family boarded the the C-141 and left for the United States.

#90071u1687 03/12/1990 ~United Press International
(MARCH 12) UPI - Haiti's ousted leader and his family were on a U-S military jet that landed today at Homestead Air Force Base in Florida. U-S Embassy spokeswoman Susay Clyde in Port-au-Prince says there was a request made for U-S help to take ousted General Prosper Avril out of Haiti. She refused to say who made the request.

In Washington, the State Department confirms Avril was on a jet that landed today in Florida... but U-S officials will NOT say where Avril is going from there. Radio reports from Haiti say a woman Supreme Court justice was made Haiti's interim president under a plan calling for her to organize elections. Opposition leaders say the judge immediately went into hiding amid rumors of a planned coup attempt.

Greyhound chairman Fred Currey today announced a 25-thousand-dollar reward for information leading to the arrest and conviction of a sniper who fired on a moving bus near Jacksonville, Florida. Seven people were hurt, two seriously, in the shooting last night. Police believe the incident was likely connected to the bitter 11-day-old strike against the bus line.

Striking West Virginia teachers are asking for direct talks with the governor. Schools in at least eight counties are closed in a strike that has administrators scrambling to keep classes going elsewhere in the state. The job acton began last week after Governor Gaston Caperton rescinded an offer of a five percent pay raise.

Winter appeared to turn into summer today as the mercury soared into an upper summer-like register across the nation's eastern half. Temperatures moved toward the 80's along parts of the Atlantic Coast. In Washington D-C the morning temperature hit 73 degrees before most workers finished their first cup of coffee.

#90071u1694 03/12/1990 ~United Press International
LONDON (MARCH 12) UPI - Stocks closed lower in thin, nervous trading Monday on the London International stock exchange, depressed by a sagging pound, political uncertainties and a higher-than-expected increase in retail sales.

The blue-chip Financial Times 100-stock index, which fell 15.7 points Friday, closed down 11.5 points at 2,222.8. The narrower top 30 industrial average fell 12.0 points to 1,751.8.

Volume amounted to around to only 223 million shares, well below the 546 million shares changing hands on Friday.

Analysts said prices eased on news from a government report showing a

larger-than-expected rise in February's retail sales volume, despite high interest rates imposed by the government to battle inflation.

The Central Statistical Office said Britain's retail sales volume rose a provisional 2.4 percent in February from January and 2.6 percent from February 1989. Forecasters were expecting a rise of 0.4 percent for February compared with the 1.0 percent drop in January.

In a separate report, the government agency reported producer output prices, or prices of manufactured goods, rose 0.4 percent in February from January.

The Central Statistical Office also said producer input prices, or prices of raw materials and fuels purchased by the manufacuturing industry, fell an unadjusted 2.6 percent in February from January.

Market forecasters called for an 0.1 percent decline in prices, compared with an 0.5 percent drop in January, and they were expecting output prices to rise 0.3 percent, compared with an 0.8 percent rise in January.

On the London Foreign Exchange, the pound fell nearly one cent against the U.S. dollar, closing at $1.6095 compared with $1.6185 last Friday. Additionally the pound fell to its lowest level in nearly four months against a basket of other foreign currencies in nervous trading.

British Petroleum paced the actives, easing five cents to $5.33. Analysts noted aa block of 22 million shares changed hands early in the session.

Laura Ashley Holdings, the designer of women's clothing, eased five cents to 85 cents a share amid debt talks with a major bank. In the pharmaceutical sector, Wellcome PLC fell 18 cents to $10.45.

Terminated bid talks sent Marina Development tumbling 56 cents to $6.40 and Broadwell Land down 65 cents to $2.36.

Among some of the day's other highlights, Aquascutum class A gained 35 cents to $1.92 and George Wimpey, the contruction company, gained nine cents to $3.84 in anticipation of higher financial results on Tuesday.

#90071u1699 03/12/1990 ~United Press International

PARIS (MARCH 12) UPI - The Michelin guide gave its highest rating - three stars - Monday to the Louis XV restaurant in Monaco and its chef Alain Ducasse, but in a rare move the bible of French gastronomy also demoted Oustau de Baumaniere in southern France to two stars.

Michelin elevated eight restaurants to the two-star rating, including Clos de Longchamp in the Paris Meridien Hotel; Jacques Maximin in Nice; Oain, Adour et Faintaisie in the Landes region of southwest France; and Gill in the Normandy area near Paris. The guide also added 48 establishments to its one-star rating.

Six other restaurants, however, were lowered to the one-star category, including the well-known Pre Catelan in Paris. Fifty-eight restaurants had their single star rating removed, including Maxim's at Charles de Gaulle airport in Paris.

Michelin describes three-star restaurants as those offering ''superb food, fine wines, faultless service, elegant surroundings.''

The two-star rating is given to chefs whose specialites and wines are considered to be of excellent quality, while one-stars are earned by restaurants considered especially good in their class.

Although Michelin has removed the third star from an important number of restaurants over the years, including Maxim's and La Tour d'Argent in Paris, the decision to do so causes general consternation among France's gastronomic elite. Some, including La Tour d'Argent, bounce back to the highest rating, but many are never able to return to their former glory.

In the case of Oustau de Baumaniere, the restaurant's new owner, Jean-Andre Charial, said he thought the demotion was the result of recent changes in the restaurant's management, with Michelin in effect waiting for him to establish his own reputation.

The establishment, which has had a three-star rating for the past 35 years was founded by Charial's grandfather, Raymond Thuilier, who decided to step aside last year at the age of 93.

''We always regret it when we have to remove one star,'' a spokesman for Michelin said Monday.

Although he would not say exactly why Oustau de Baumaniere had lost a star the spokesman insisted that there was never a direct relationship between changes in management and the number of stars awarded or withdrawn.

The award to the Louis XV at the prestigious Hotel de Paris in Monaco marks the first time that Michelin has given its highest rating to a restaurant located in a grand hotel and one of the very few times that a chef who is not also the owner has received France's highest gastronomic accolade.

''The Michelin guide has taken a major step that will give great hope to many young chefs who do not have the financial means of setting up on their own,'' Jacques Maximin, who won his second star Monday, said in a telephone interview. ''The three stars to Ducasse will convince many chefs that they can be rewarded solely on the basis of their talent.''

Ducasse himself, who took over the kitchen at the Louis XV just 18-months ago, was reported to be in Tokyo and could not be reached for comment.

His fanciful creations combine the products of southern France with those of nearby Italy to create a pallette of flavors that has made him one of Europe's most talked about chefs.

His specialties include risotto with white truffles, octopus and shell fish with pasta and parsley, and rouget with potatoes, olive tapenade and garlic.

Ducasse began to experiment with the products of his native Landes region in southwest France while living on the family farm. He later worked under famous chefs including Roger Verge before striking out on his own and earning two Michelin stars when he was chef at Juana in Juan-les-Pins on the French Riviera. But it was not until he went to the Louis XV that the French gastronomic establishment began to take serious notice.

For Maximin, who opened the Nice restaurant that bears his name just last spring, the two Michelin stars confirm his comeback after a detour to Regine's in Paris. He had previously served as chef at the Chanteclair in the Hotel Negresco in Nice, winning two stars for seven of the 11 years he served there.

''It is a great victory for me,'' he said. ''Two stars just after opening

is good. I am closer to the third, my only goal.''

The mood was different at Le Pre Catelan, one of Paris's best known restaurants located in the Bois de Boulogne. The director, Marie-Joseph Dalibard, expressed shock when a reporter told her she had lost one of her two stars.

''It seems unthinkable to me,'' she said in a telephone interview. ''I do not see what the reason could be. I frankly don't think we merit this.''

#90071u1709 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - King Fahd of Saudi Arabia, who contributed $1 million to Nancy Reagan's war on drugs, also donated $1 million to Barbara Bush's campaign against illiteracy, officials said Monday.

Fahd made his gift to the Barbara Bush Foundation for Family Literacy on Sept. 29, 1989, through the Community Foundation of Greater Washington, which helps administer the fund, financial records show.

Foundation officials said the king asked nothing in return for his gift, which was made at about the same time that the first lady helped open a Saudi Arabian exhibit in her and her husband's adopted hometown of Houston.

''We are not at all sensitive about the contribution. We are grateful he came forward to help us,'' said Joan Abrahamson, chairwoman of the yeare-old foundation.

''He was not asked to make the contribution,'' Abrahamson said. ''We were contacted by his office. They said the king was very interested in education and literacy.''

Earlier this month, it was disclosed that at about the same time Fahd was secretly providing $2 million a month to help fund the Nicaraguan Contra rebels at the request of President Reagan, he was helping fund's Mrs. Reagan's ''Just Say No'' anti-drug campaign.

The Washington Post reported March 7 that Fahd made an unpublicized $1 million contribution in 1985 to the first lady's drug fund, and that this was followed by a second $1 million contribution by a Syrian-Saudi businessman, Mouaffak al Midani.

The two contributions amounted to more than half the funds raised for Mrs. Reagan's anti-drug efforts, which, like Mrs. Bush's foundation, had been administered by the Community Foundation of Greater Washington.

Fahd's $1 million contribution to the Barbara Bush Foundation for Family

Literacy represents almost half the $2.3 million the organization raised last year, although the figure, including pledges, now tops $5 million.

Mrs. Bush's press office declined comment on the king's contribution, saying that the first lady serves only as the organization's honorary chairperson, and that its activities are unrelated to the White House.

Abrahamson, who at one-time served as Bush's assistant chief of staff when he was vice president, said, ''The first lady has a complete arms-length relationship with us, both in terms of operation and fund-raising.''

Mrs. Bush announced the foundation in a ceremony at the White House on March 6. The foundation supports a number of literacy efforts, from training teachers to providing seed money for community activities.

Financial records show that the foundation has received more than 200 contributions, with King Fahd's being, by far, the biggest. Paramount Communications made a $250,000 gift, but promised to raise the figure to $1 million during the next four years.

#90071u1710 03/12/1990 ~United Press International

JACKSON, MS (MARCH 12) UPI - Investigators have developed new leads in the 1963 murder of civil rights activist Medgar Evers since the case was reopened at the insistence of local civic leaders.

''We've got some new leads,'' said Bobby DeLaughter, the assistant district attorney handling the probe. He would provide no details, saying, ''It is still an active investigation.''

The NAACP and the Jackson City Council had pressed for the re-opening of the investigation. The Clarion-Ledger newspaper of Jackson reported Sunday that authorities were still looking for evidence.

Byron De La Beckwith, now 69, stood trial twice in the slaying but was freed by hung juries. Currently a resident of Signal Mountain, Tenn., he said he is considering returning to Mississippi to campaign for public office, ''so that people will know men and women of white Christian lineage will not put up with this deviltry.''

The rifle found near the site of the slaying belonged to Beckwith and his fingerprint was found on it, but he said the weapon had been stolen from him.

Two former police officers who provided alibi evidence for Beckwith during his 1964 trials said they were standing by the story they gave then: at about the same time as the murder, they saw Beckwith at a gas station in

Greenwood, Miss., then about a two-hour drive from Evers' home in Jackson.

Evers, 37, field secretary for the NAACP, was shot in the back in the driveway of his home as he emerged from his automobile at about 12:30 a.m. on June 12, 1963.

#90071u1722 03/12/1990 ~United Press International

BEIRUT, LEBANON (MARCH 12) UPI - Rival Christian forces clashed Monday with machine guns and grenades in east Beirut amid increasing fears that a fragile 10-day-old truce would collapse, security sources said.

The sources said troops loyal to Gen. Michel Aoun and militiamen of Samir Geagea's Lebanese Forces exchanged heavy machine gun fire and rocket-propelled grenade fire along the newly established confrontation lines in the Christian enclave.

One person was killed and three others, including a child, were wounded, they said.

The three-hour fight ended after a Christian mediation team contacted the two side, the sources said.

Aoun and Geagea had agreed March 2 to halt all military operations and stop their propaganda war.

Large-scale battles for the control of east Beirut that erupted Jan. 31 between loyalists of Aoun and Geagea have left at least 800 people killed and 2,743 wounded.

Observers feared the recent violations of the cease-fire would lead to a large-scale military confrontation in the Christian areas.

They said Aoun and Geagea were taking advantage of the shaky truce to strengthen their positions and rush reinforcements to the front lines.

Despite recent conciliatory statements by Aoun and Geagea, the mediation committee backed by France and the Vatican has failed so far to narrow the differences.

Aoun told United Press International last week that war was over in the Christian enclave and that he was ready to talk to all his rivals, including Syria and the Syrian-backed government of President Elias Hrawi.

Geagea also asserted his willingness to reach a comprehensive agreement that would consolidate the cease-fire in east Beirut.

Meanwhile, the Palestine Liberation Organization's representative in Lebanon, Zeid Wehbe, said despite the latest battling a PLO initiative to end the intra-Christian fighting was successful.

Wehbe, who spent three weeks in east Beirut and met with Aoun and Geagea, said ''positive results will show up later on the ground.''

''The Palestinian initiative will continue until Lebanon's unity is achieved,'' he said. ''All officials we have met expressed readiness to enter into a constructive dialogue with their rivals in east and west Beirut.''

Wehbe said he would return soon to the Christian enclave and resume talks with all Christian figures.

#90071u1724 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - President Bush, who last month complained about ''overexposure,'' plans to hold more news conferences this year than during his first year in office, White House spokesman Marlin Fitzwater said Monday.

Fitzwater also indicated that Bush would hold a news conference this week, telling reporters ''don't go on vacation.''

Last month while en route to a drug summit in Cartagena, Colombia, Bush said he was miffed by reports that his administration had misled the press. The chief criticism was aimed at secret trips to Beijing by high-level State Department officials.

Bush, a former CIA director who has defended a president's need to keep secrets, told reporters he would make himself less available to the media to avoid having to shade the truth. ''I'm not going to be burned for holding out or doing something deceptive,'' Bush said.

''I think we've had too many press conferences,'' Bush said. ''It's overexposure to the thing. It's not good.''

But Fitzwater said Monday that the president has ''adopted a policy of more news conferences. He'll probably have another one soon.''

Bush held 32 news conferences in 1989, Fitzwater said, and has held eight so far in 1990. That's in addition to 64 interviews Bush has granted to reporters since he became president.

By contrast, President Ronald Reagan had 47 news conferences in eight years in office, ''and we're almost there,'' Fitzwater said.

Bush prefers an informal approach in dealing with the press, dropping by the White House press center for news conferences that, although planned, give the impression of being impromptu. Reporters usually are given notice of the news conferences 30 minutes to an hour beforehand. Most of them take place in the morning or early afternoon.

Bush has held only one formal televised East Room news conference, the format preferred by Reagan.

#90071u1740 03/12/1990 ~United Press International

(MARCH 12) UPI - Lithuania's new NON-communist president says Lithuanians welcome the move toward independence. But President Vytautas Landsbergis described the Kremlin's reaction to Lithuania's declaring itself independent as ''laconic.'' The Lithuanian parliament received coolly a White House call for Moscow ''to respect the will of the citizens of Lithuania.''

Landsbergis remained in Vilnius today and did NOT take his seat in Moscow at a meeting of the Soviet parliament, where Soviet President Gorbachev called the development in Lithuania ''alarming.'' Gorbachev told the congress- ''Decisions that are being taken there affect the vital interests ... of the republic, its people and our entire state.''

Officials at Phoenix's Sky Harbor International Airport say an Alaska Airlines jetliner struck and killed a man on the runway last night. Airport spokesman Rick Martinez says the Boeing 727 was rolling for takeoff at about 100 miles an hour when the pilot felt a ''bump'' and returned to the terminal.

Michigan's Chippewa regional prison facility is under lockdown today after a disturbance last night injured six guards and an undetermined number of inmates. Authorities say the ruckus broke out when a prisoner refused to return to his cell. Other inmates left their cells when the prisoner called for help and a brawl ensued.

-30- 1516

#90071u1756 03/12/1990 ~United Press International

HAJMASKER, Hungary (MARCH 12) UPI - The first Soviet soldiers to leave Hungary under a withdrawal agreement signed during the weekend boarded a train heading for home Monday as a military band played the two countries' national anthems in a small town west of Budapest.

Young protesters from the pro-democracy group, Federation of Young Democrats, held a small protest. The protesters waved signs saying,

''Hurry home to the sunshine in Azerbaijan'' and ''Go home as quickly as you came,'' referring to the 1956 Soviet invasion.

Under an agreement signed in Moscow, two-thirds of the Soviet troops and equipment in Hungary are to be pulled out by the end of 1990. The costs of the process dubbed ''Operation Going Home'' by the Hungarians will be covered by Moscow. There are 49,700 Soviet soldiers in Hungary as well as 27,146 combat vehicles, including more than 800 tanks and 1,500 armored personnel carriers.

About 300 troops and 40 armored vehicles boarded the train Monday at the tiny railway station in Hajmasker, a town of some 1,600 inhabitants.

The train is headed for the Hungarian border point of Zahony, a large village on the left bank of the Tisza River and a major frontier post for entry into the Soviet Union. There, the equipment will be transferred to cars that will fit the wider Soviet track gauge.

The first troops to leave the country was a batallion of the motorized rifle unit of the Southern Army Group stationed in Veszprem County, 75 miles west of Budapest.

A Soviet military band played the Soviet and Hungarian national anthems. That was followed by speeches by Soviet officers and Hungarian dignitaries including members of the Hungarian-Soviet Friendship Society.

Soviet trucks began arriving early in the morning, carrying young soldiers and their knapsacks. One soldier carried a guitar tied above his bedroll. Another had a large chess table under his arm. Most of them looked tense, and few seemed cheerful.

Village Council President Ferenc Horvath said the entire population was glad to see them off.

''Our village had been like a frontline settlement for decades,'' he said. ''We lived among warlike conditions. Whenever the tanks marched around, chandeliers and windows shook.''

The families of the departing soldiers were not much in evidence, but officials at the railway station said three carriages were set aside for them.

Billboards and electricity pylons throughout the country, and particularly along the route to the Zahony border station, were plastered with posters showing the back of a stiff-necked Russian officer with the Russian inscription: ''Comrades, that's the end.''

In the capital, a governmental commission has been set up to discuss the

financial details of the withdrawal. The Hungarians want to examine the state of the Soviet barracks, officers' apartments and equipment to be vacated so that they can make a final financial agreement.

According to one Hungarian official, the Soviets so far have failed to make the necessary repairs on these establishments.

The Defense Ministry spokesman, Col. Gyorgy Keleti, hastily denied a rumour that new Soviet troops are to arrive in the country by June of next year.

Keleti, however, acknowledged that some 10,000 new replacements are expected.

''These are only replacing those troops whose service time expires by May '' he said. ''These new arrivals will be sent only to units which are leaving later than mid-June of this year.''

#90071u1763 03/12/1990 ~United Press International

ATHENS, Greece (MARCH 12) UPI - The son of the late Iranian leader Ayatollah Ruhollah Khomeini said Monday the disclosure in Washington that President Bush recently took a call believing it was from the Iranian president was a public relations ploy.

The official Islamic Republic News Agency quoted Hojatoleslam Ahmed Khomeini as saying, however, that the United States ''will never see the day when the Islamic Republic of Iran will compromise with Washington.''

Khomeini, who holds no official position in Iran but staunchly upholds his father's anti-American line, also blasted people in Iran who wished to restore relations between Tehran and Washington.

Khomeini ''lashed out at the U.S. for making fresh attempts to approach Iran, stressing that Tehran will never compromise with Washington,'' an IRNA dispatch monitored in Athens said.

He said the disclosure of the hoax in which Bush spoke to someone on the telephone believing it was Iranian President Akbar Hashemi Rafsanjani was a ploy intended to create the impression that Bush would easily speak to Rafsanjani if he called.

IRNA quoted Khomeini as saying ''we will not cease our enmity against the U.S.''

Khomeini's remarks were the first confirmation from Tehran that some top Iranians wished to resume relations between the Islamic Republic and the United States, severed since the hostage crisis of 1979-81.

Last week the Istanbul newspaper Gunes quoted Turkish President Turgut Ozal as saying some U.S.-educated people who now held high positions in

the Iranian government wished to improve ties between Tehran and Washington.

In his meeting with Bush in January, Ozal offered to mediate. Bush reportedly said he too wanted to improve relations between the two countries and had offered the hand of friendship to Iran several times, but had seen no hopeful signs from the Iranian side.

Since Ayatollah Khomeini died in June last year his son, who acted as his secretary for years before the 1979 revolution, has backed hard-line Iranian clerics who oppose any reconciliation between Tehran and Washington.

#90071u1769 03/12/1990 ~United Press International
NEW YORK (MARCH 12) UPI - A judge has ruled that one-fourth of the earnings of Marilyn Monroe's multimillion-dollar estate belongs to a British psychiatric center for children, court papers revealed Monday.

The money, which was tied up in a court battle launched by the widow of Monroe's acting coach, will go to the Anna Freud Centre for the Psychoanalytic Study and Treatment of Children in England, according to the ruling by Judge Marie Lambert in Manhattan Surrogate's Court.

The estate of Marilyn Monroe, the blonde sex symbol who died in 1962 from an overdose of drugs and alcohol, grosses more than $1 million a year in royalties and other proceeds.

In her simple three-page will, Monroe gave 75 percent of the proceeds to her acting coach, Lee Strasberg. His widow, Anna Strasberg, was subsequently named administrator of Monroe's estate after her husband's death.

Monroe willed the remaining 25 percent to her psychiatrist, Dr. Marilyn Kris, to be used ''for the furtherance of the work of such psychiatric institution or group as she shall elect.''

Kris died in 1980 and in her own will left her share of Monroe estate proceeds to the Hampstead Child-Therapy Clinic, precursor of the Freud Centre.

But the money was tied up in a court battle after Strasberg's widow contended the bequests were limited to Kris's lifetime. She claimed that the instruction that Kris ''use'' the funds required that she personally supervise any use of them.

Lambert ruled, however, that the doctor could pass her interest in the

estate to a third party because ''there are no express provisions directing that Kris had to supervise or monitor the activities of any entity elected to receive estate funds.''

She also ruled that the Hampstead Child-Therapy and the Anna Freud Centre were the same entity.

An attorney for Strasberg, Irving Seidman, said that if his client had been awarded the 25 percent, she would have given it to a charity.

''Mrs. Strasberg's position all the time was that the money would go to a charity consistent with the desires of Miss Monroe's will,'' Seidman said.

He declined further comment.

#90071u1803 03/12/1990 ~United Press International

(MARCH 12) UPI - TODAY'S PEOPLE:

SAMURAI WIDOW BOOK: Judith Jacklin Belushi will be hitting the promotional trail soon with the release of her book, ''Samurai Widow,'' the story of how she got over the death of her husband, John Belushi. The book opens on Mar. 5, 1982, with Jacklin receiving the phone call from Dan Aykroyd telling her that Belushi was dead and much of it is taken directly from her dairies and letters. ''I began this process because I felt it would be helpful to me and I hoped that, ultimately, it would be helpful to others '' Jacklin says in the book's introduction. ''The result is a memoir of my journey through a troubled time ... It was a journey I didn't want to take down a road I didn't want to travel, with a destination I could not have imagined.''

BONADUCE BUST: Philadelphia disc jockey Danny Bonaduce, once the freckle-faced imp of ''The Partridge Family'' TV show, will be off the

radio airwaves indefinitely after his arrest on cocaine charges in Florida. Dave Knoll, the general manager WEGX, planned to speak with police in Fort Lauderdale before deciding Bonaduce's ultimate fate with the station. Bonaduce, 30, who was arrested last week after allegedly buying crack at a housing project, was arrested in California in 1985 and charged with possession of 50 grams of cocaine but had since gone through a rehabilitation program and been working at WEGX since 1988. ''He's had some problems there,'' said Bonaduce's grandfather, Jack Steck. ''I thought he had it licked. He certainly was fighting it. He's a tremendously witty guy - strictly offbeat. A very intelligent lad.''

THIEF STRIKES OUT: Someone tried to steal baseball star Jose Canseco's 42-foot boat but didn't get very far. The Oakland A's slugger anchored the boat near a beach club on the southern tip of Miami Beach Sunday afternoon and then swam in to play volleyball on the beach. A thief snuck aboard and set the boat adrift but was foiled when he couldn't get the engine started. Someone spotted the suspect skulking around the boat and called police, who arrested Gregory Dudley, 27, on attempted grand theft charges.

MONROE ESTATE: A judge in New York has ruled that a fourth of the proceeds and royalties from Marilyn Monroe's estate, which still generates $1 million a year, will to a psychiatric center in England and not the widow of her acting coach, Lee Strasberg. Monroe willed 75 percent of the proceeds to Strasberg and his wife, Anna Strasberg, was named administrator of the estate after he died. Monroe willed the rest to her psychiatrist, Dr. Marilyn Kris, who gave it to the center for the study of troubled children. Anna Strasberg, however, had contended that bequests were limited to Kris's lifetime but was overruled Monday.

#90071u1822 03/12/1990 ~United Press International

SOFIA, Bulgaria (MARCH 12) UPI - Communist Party and opposition leaders signed an agreement during round-table talks Monday giving pro-democracy groups a greater voice in determining the shape of a future democratic Bulgaria.

The accord makes the round-table talks the primary forum for deciding national issues and publicly commits all of Bulgaria's major political parties to the establishment of a multiparty democracy.

It was hailed as a breakthrough by both sides at the talks, which had been stalled for a month.

''This is a historic act, unprecedented in the last 45 years,'' said opposition leader Zhelu Zhelev, who praised the communists for agreeing to relinquish voluntarily some of their power.

Despite having renounced its monopoly on political power in December, the Communist Party controls all government posts and holds an overwhelming majority in the National Assembly.

Zhelev said the political forces represented at the talks can now begin

work on drafting laws setting guidelines for elections and political parties, as well as a whole new constitution.

Zhelev, president of the Union of Democratic Forces, a coalition of 15 opposition parties, said the election law should be enacted ''as quickly as possible.'' The ruling Communist Party has promised to hold democratic elections in June.

The round-table talks, which began in January, had been stalled for the last month with each side accusing the other of foot-dragging. In the last two weeks, President Peter Mladenov and other Communist leaders held private talks with opposition figures in an effort to get the discussions moving again.

One of the main stumbling blocks had been a dispute over the round-table itself. Zhelev and other opposition leaders complained the Communists were not taking the negotiations seriously and were unilaterally deciding how the country's future political and economic structure should look.

The decision to elevate the role of the round-table talks was clearly a victory for the opposition, but leaders of the Communist Party congratulated themselves as well, saying the accord was part of their overall plan for democratic reform.

The Communists embarked on a course of radical political and economic restructuring following the ouster Nov. 10 of Todor Zhivkov, Bulgaria's hard-line leader since 1954.

#90071u1832 03/12/1990 ~United Press International

CHICAGO (MARCH 12) UPI - Soybean futures made session lows about midday Monday on the Chicago Board of Trade, mainly on profit-taking and liquidation in the wake of last week's gains.

Wheat was narrowly mixed in quiet trading while corn and oats ended the day with moderate gains.

The entire floor was pressured by widespread rain during the weekend. Traders said the rain improved the soil moisture conditions and the prospect for a good crop, especially for winter wheat.

Professional selling of soybeans was attributed to liquidation and profit-taking. Reports of moderate country movement during the weekend also kept soybeans on the defensive.

Soybean oil was virtually unchanged while soybean meal was lower across the board in response to a quiet tone on European markets.

Corn turned higher late in the day as buying interest picked up. News that South Korea would be in the market next week for 150,000 tons of corn triggered some of the activity.

Basis levels were mixed.

At the close, corn was up 2 1/2 to 3 3/4, soybeans down 2 3/4 to 5 1/4, wheat up 1/2 to off 1 1/4 and oats up 1 1/4 to 2 cent.

#90071u1841 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - Payments to farmers under the 1989 disaster relief law have topped the $1.1 billion mark - far more than expected when the law was passed, the government announced Monday.

The law, the second enacted in two years in response to crop-killing weather, was estimated to $897 million when President Bush signed it into law last Aug. 14.

In the past month, 51,937 farmers and ranchers were given $229.6 million in assistance.

Six Wheat Belt states - Texas, Kansas, North Dakota, Nebraska, South Dakota and Oklahoma - have received 60 percent of the money. Texas leads the nation with $227.9 million in payments, an increase of $47.6 million from one month ago.

As of March 1, 291,615 producers had received $1.19 billion. More than $1 billion of the aid was compensation for crop losses.

The heart of the law is a four-tier formula that aids producers who lost at least 35 percent of a crop.

The law was inspired by drought and freeze damage to the wheat crop, spring floods in Cotton Country and excessive rainfall in the eastern Corn Belt. Since it was enacted, crops were damaged by Hurricane Hugo and by a devastating December freeze that hit citrus groves in Texas and Florida.

There is an April 2 deadline for applications for payments.

The states with the top payments are Texas, $227.9 million; Kansas, $179.9 million; North Dakota, $126.4 million; Nebraska, $64.2 million; South Dakota, $59.4 million; and Oklahoma, $52.5 million.

#90071u1848 03/12/1990 ~United Press International

MILWAUKEE (MARCH 12) UPI - A $411 million plant built by Miller Brewing Co. six years ago but never used because of a slump in beer sales could open in 1991, a Miller official said Monday.

Miller will watch this year's sales before making a final decision on whether to open the Trenton, Ohio, facility, said Peter Acly, corporate communications manager.

Additional brewing capacity is not needed immediately, and no definitive decision on a prospective opening date has been reached. But Acly said Miller's growth in recent years may dictate an opening in 1991.

"It's possible that we might see a softening in our sales figures, so we don't want people to be overly optimistic, although the trend now is positive," he said. "We are looking at opening the brewery as soon as possible."

Miller, a Philip Morris Cos. subsidiary based in Milwaukee, completed the brewery in 1984 but has not opened it because of an industry-wide slump in beer sales that occurred in the early 1980s.

"We are now reaching the point that it makes more sense to open the brewery," Acly said. "We've had four good years in a row and we feel we will have to look at our 1990 sales figures as they unfold."

The decision against opening the facility disappointed officials in Ohio's Butler County, who arranged tax abatements and improvements on the 1,070-acre plant site. Trenton is about 30 miles north of Cincinnati. The brewery could produce eight million barrels a year and employ about 1,500 people.

"It's possible we might not start by making 8 million barrels a year," Acly said. "The actual level of employment would depend on the amount of production."

Officials said the Trenton plant could produce any of Miller's products, including the fast-growing Genuine Draft brand. Miller recently announced plans to expand a brewery in Fort Worth, Texas, to brew Genuine Draft.

In 1989, Miller grew faster than its top rival, Anheuser-Busch of St. Louis, for the second time in a decade. Miller said its production grew 3.7 percent in 1989, to Anheuser-Busch's growth of 2.9 percent. But Miller's increase of 1.4 million barrels was overshadowed by Anheuser-Busch's increase of 2.2 million.

Anheuser-Busch, the biggest brewer in the world, has 42 percent of the total beer market in the United States, while Miller has a 21.8 percent

share.

WASHINGTON (MARCH 12) UPI - Yields for 13-week and 26-week T-bills increased again Monday at the government's weekly auction.

The Treasury Department auctioned $8 billion worth of 13-week bills at an average discount of 7.96 percent, up from 7.85 percent at last week's auction, and the highest since Aug. 21, when the auction yielded a rate of 7.99 percent.

The government also sold $8 billion worth of 26-week bills at an average discount of 7.89 percent, up from 7.79 percent last week - and the highest

rate since Oct. 2, when the rate stood at 7.92 percent. The discount rate understates the actual yield to investors.

The investment, or coupon-equivalent, rate was 8.24 percent on the 13-week bills at an average price of $9,798.80 per $10,000 face value. The investment rate on the 26-week bill was 8.33 percent at an average of $9,601.10 per $10,000.

#90071u1905 03/12/1990 ~United Press International

MONTREAL (MARCH 12) UPI - Canadian Pacific Ltd. Monday reported fourth-quarter earnings of $160.2 million, or 50 cents a share, down 8 percent from $173.5 million, or 55 cents a share, in the same 1988 quarter.

Revenues increased to $2.43 billion from $2.29 billion in the year-ago quarter.

For the year 1989, CP reported earnings of $625.9 million, or $1.97 a share, down from $688.9 million, or $2.23 a share, in 1988. Revenues declined to $9.17 billion from $9.25 billion in 1988.

CP said its earnings declined because of lower freight traffic, a strong Canadian dollar and weak newsprint markets.

William Stinson, chairman of CP, earlier forecast little improvement in 1990 earnings due to further declines anticipated in its forest products division.

Stinson reportedly will meet with Senator Alfonse D'Amato R-N.Y. and Conrail executives in Washington Tuesday to try to resolve a dispute over tracks rights. The dispute resulted in CP withdrawing a $35 million bid for Albany, N.Y.-based Delaware & Hudson Railway Co. last month.

CP is a diversified holding company with railroad, shipping, trucking, waste disposal, oil and gas, coal, forest products, real estate and telecommunication interests.

#90071u1922 03/12/1990 ~United Press International

(MARCH 12) UPI - Ex-Marine Lieutenant Colonel Oliver North raised the ire of a federal judge presiding at the Iran-Contra trial of former national security adviser John Poindexter today. An angry judge Harold Greene ordered North to answer questions and stop arguing with prosecutors over words and phrases. North was convicted of some Iran-Contra crimes last year. As in his testimony last Friday, North again today repeatedly said he could NOT recall key details of his dealings with Poindexter, to whom North reported at the White House.

Florida officials are searching today for a sniper who apparently fired from a highway overpass hitting a Greyhound bus yesterday near Jacksonville. Seven people were wounded, two seriously. Greyhound is offering a 25-thousand-dollar reward for information leading to the arrest and conviction of the sniper. Police do NOT know whether the shooting is related to the bitter 11-day-old strike against the bus line.

A chain reaction, rush-hour collision killed at least three people and injured 24 others today in Green Bay, Wisconsin. Authorities expect the casualty toll to rise as rescuers work to remove people still trapped in the wreckage. Police say the pileup occurred in dense fog on the Tower Drive Bridge and involved about 45 vehicles. The accident touched off a fire that turned into an inferno before firefighters brought it under control. At least three tanker trucks were destroyed in the blaze.

Lithuania's new president today announced that Australia recognizes the

Baltic state's declaration of independence. The Lithuania parliament yesterday declared independence from the Soviet Union. Lithuania's parliament burst into applause in Vilnius when Lithuania's leader announced that Australia recognized the state's independence. But in Moscow, a close aide to Soviet President Mikhail Gorbachev forecasts long negotiations before Lithuania finally leaves the Soviet Union.

#90071u1927 03/12/1990 ~United Press International

DETROIT (MARCH 12) UPI - The nation lost 337 new car dealerships last year, the largest decline since the recession year of 1982, according to a study released Monday by Automotive News.

In its annual survey, the weekly publication said profit drain was the main reason for the decline, although some stores closed due to death or retirement of an owner and a decision by the manufacturer not to refranchise the point. The U.S. dealership count stood at 24,576 new vehicle outlets as of Jan. 1, down from 24,913 at the start of 1989, the report said.

The nation's Big Three carmakers - General Motors Corp., Ford Motor Co. and Chrysler Corp. - accounted for the bulk of the decline, with 214 fewer outlets. There were also 123 fewer stores that sold import brands only.

The 214-outlet decline among the Big Three was mostly because of industry leader GM, which experienced a loss of 200 dealers. Ford lost 38 points, while third-ranked Chrysler was down by one, the survey showed. A change in the number of intercorporate dual-brand outlets minimized the net loss among those firms to 214, the report said.

During the year, Toyota's Lexus and Nissan's Infiniti luxury car divisions added 88 and 58 exclusive dealers respectively to the ranks, the study showed.

OAKLAND, CA (MARCH 12) UPI - Al Davis, who went to court for the right to move the Raiders to Los Angeles, said Monday the NFL franchise team will return to its original home in Oakland.

Davis, the Raiders general managing partner, ended seven months of negotation and suspense by agreeing to a 10-year deal with Oakland worth in excess of $600 million.

Included in the offer were a $54.9 million franchise fee, ticket and loan guarantees of $362 million and a $53.5 million package of improvements to the Oakland-Alameda County Coliseum.

The announcement was made by Oakland Mayor Lionel Wilson and Alameda County Supervisor Don Perata after a telephone call from Davis. Davis spoke with Oakland officials from the NFL owners meeting in Orlando, Fla.

''He will bring back the team to Oakland provided we get the County and City Council votes, but he's ready, and we're ready to go to our respective bodies,'' Wilson, wearing an Oakland A's hat, told a news conference. ''Now Oakland will become the sports capital of the world. We both expect to get our respective votes.''

WASHINGTON (MARCH 12) UPI - The State Department said Monday the question of independence for Lithuania should be settled through negotiations between the Baltic state and the Soviet Union.

The Lithuanian legislature declared the nation independent of the Union of Soviet Socialist Republics on Sunday, a major step toward regaining the sovereignty it knew before World War II.

Spokesman Margaret Tutwiler reaffirmed a U.S. policy statement of years - that Washington never recognized the forcible inclusion of Lithuania into the Soviet Union.

She said the United States will establish ''formal diplomatic relations'' with the new government, but said that would depend on such basic conditions as the control of its territory and the apparatus of the government.

Those conditions are now largely controlled by the Soviet government in Moscow, and Tutwiler said any changes should be settled in talks beween the Soviets and Lithuania, with some role for their European neighbors.

''We call upon the Soviet government to address its concerns and interests through immediate constructive negotiations with the government of Lithuania,'' Tutwiler said. ''We hope that all parties will continue to avoid any intimidation or encouragement of violence.''

The administration is being careful about the rush for independence in Lithuania, avoiding any statements that could be interpreted by opponents of reformist Soviet President Mikhail Gorbachev as overtly meddling in Moscow's affairs. Washington welcomes the independence movement in the Baltic, but wants to avoid actions that could provoke a military backlash.

''U.S. practice has been to establish formal relations with the lawful government of any state once that government is in effective control of its territory and capable of entering into and fulfilling international obligations,'' Tutwiler said.

''When we are satisfied that the Lithuanian government can meet these requirements, we will establish formal diplomatic relations with the new government.''

#90071u1945 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - The Commerce Department outlined new methods and policies Monday for the 1990 census in an effort to avoid undercounting blacks, Hispanics and other minorities.

The eight guidelines are part of a settlement to a lawsuit filed by New York City, Los Angeles, Chicago and other cities against a 1987 decision by the Reagan administration barring adjustments to ''undercounts'' in the census.

The adjustments could be used to boost population counts to compensate for people census takers may have missed. Prohibiting such adjustments by the Census Bureau could lead to lower counts and thus cuts in federal aid to cities, counties and states, and to changes in the boundaries of congressional and state legislative districts.

''The final guidelines are designed to ensure that the 1990 census is the most accurate population count that can be practically produced,'' said Michael Darby, an undersecretary of commerce who oversees the Census Bureau.

''We have launched unprecedented efforts to count each and every person

living in the United States, especially those traditionally hard to count, such as urban minority populations,'' Darby said.

The census, which is required by the Constitution and is conducted once every 10 years, will begin when questionnaires go into the mail March 23 to an estimate 106 million households. Census takers will go out later for interviews with those who do not return the mail forms.

New York and the other cities charged the 1987 decision to forbid census adjustment techniques was ''made with the knowledge that they would result in a disproportionate undercount of blacks, Hispanics and other chronically undercounted groups.''

In agreeing to settle the dispute with the cities, the Commerce Department said it would issue the new methods and, if an adjustment were necessary, correct any census undercount by July 15, 1991.

Among other things, the statistical and policy guidelines issued Monday state:

-The 1990 census shall follow accepted statistical practice, and no statistical or ''inferential procedure'' shall be used as a substitute for counting the population.

-Adjusted counts to the 1990 census ''must be of sufficient quality and level of detail to be usable for congressional reapportionment and legislative redistricting.''

-Before any adjustments are made in the 1990 census, officials will have to take into account the possible ''disruption of orderly transfer of political representation'' - such as delaying in reapportionment.

-Adjustments shall not violate the Constitution or federal statutes.

#90071u1952 03/12/1990 ~United Press International

(MARCH 12) UPI - Israel's religious affairs minister today presented political leaders with a compromise aimed at avoiding the collapse of the coalition government. Leaders of Israel's Labor and Likud parties are divided over the nation's peace process. The plan calls for approval of Secretary of State Baker's peace proposal... with the role of East Jerusalem Arabs to be decided by Parliament before Israeli-Palestinian talks are held in Cairo.

Former President Jimmy Carter arrived in Cairo today for the start of a Middle East tour aimed at rekindling the stalled peace process. Carter played a key role in Mideast peace more than a decade ago when he mediated

the Camp David accords between Israel and Egypt. A U-S diplomatic source says- ''Carter has always taken a keen interest in the Mideast peace process and obviously would like to see it progress.'' The nine-day fact-finding tour will also take Carter, his wife, Rosalynn, and an aide to Syria, Jordan and Israel.

#90071u1954 03/12/1990 ~United Press International

CHARLESTON, WV (MARCH 12) UPI - Leaders of two teacher unions were summoned to the governor's office Monday for talks aimed at ending a strike that kept classrooms closed a fourth school day in 38 of the state's 55 counties.

Teachers in at least two counties were ordered to return to work or be fired. Picketing was reported in 46 counties, four more than Friday, as teachers largely ignored Gov. Gaston Caperton's weekend offer of no loss of pay in return for an end to the strike Monday.

Counties that kept some or all of their schools open called in administrators and substitutes to man the chalkboards.

Caperton spokesman G.C. Morse said Monday morning the teachers' ranks appeared to be breaking, but the strikers disagreed.

''Well, maybe that should come from teachers,'' Fayette County teacher Carol Sullivan said while walking a picket line. ''There's not anyone unhappy here, or they wouldn't be here.''

Caperton called leaders of the West Virginia Education Associaton and West Virginia Federation of Teachers to a face-to-face afternoon meeting in his office ''so that we can put aside the harsh words and miscommunications of the past weekend and move on to the resolution of the present predicament.''

The WVEA represents about 16,000 of the state's 21,653 teachers, most of whom have been idled since the walkout began last Wednesday. Teachers became incensed when Caperton first made late Monday - then rescinded the following day - an offer of a 5 percent pay raise.

Caperton said he will deliver a major policy address on education Tuesday night.

A Jefferson County circuit judge ordered striking teachers to return to the classroom on Thursday. School officials there said they expected teachers to obey the order. In Greenbrier County, School Superintendent Steve Baldwin told teachers to return to work Wednesday or be fired.

''The (county school) board will meet in special session on Wednesday and I will recommend termination (at that time) for those who do not report,'' Baldwin said.

The state Education Department said the strike caused 29 counties to call off all classes Monday, affecting hundreds of schools and thousands of students and parents. Partial school closings were also reported in at least nine other counties, said spokeswoman Carolyn Spangler.

A state attorney general's opinion issued last week called the teachers srike illegal and said counties had the right to fire anyone on the picket lines.

#90071u1960 03/12/1990 ~United Press International

SANTIAGO, CHILE (MARCH 12) UPI - The Catholic Church called Monday for national reconciliation and newly installed President Patricio Aylwin prepared to deliver a symbolic speech in the national stadium, which was transformed into an infamous prison camp during a 1973 coup d'etat.

Aylwin was inaugurated as president Sunday, ending 16 1/2 years of government under Gen. Augusto Pinochet, who remains as commander of the army. The 71-year-old leader of the opposition to the military government spent the day receiving visits from foreign delegations.

Aylwin arranged to deliver a speech Monday night in the national stadium, which the military used as a prison camp after the coup that brought Pinochet to power. Human rights groups say that there were numerous prisoners were tortured and some were executed in the stadium. Aylwin advisers have called his speech there an ''exorcism'' of the facility.

The 80,000 people expected to attend were asked to bring candles to honor those who died there following the coup against the elected Marxist government of Salvador Allende.

Pinochet met Monday with new Defense Minister Patricio Rojas. In recent months, Pinochet had twice refused to recognize Rojas's authority and said he would deal only with Aylwin as army commander.

But he made no mention of the controversy when he talked to reporters after the meeting, saying the conversation was ''very friendly.'' Pinochet said he would take a week of vacation and then tour the country.

Aylwin attended a special church service Monday morning with national officials and foreign delegations in Chile for his inauguration.

Santiago Cardinal Juan Francisco Fresno said in his homily that the Catholic Church during the military government had dedicated itself to defending human rights. He called for an investigation of the abuses committed during the Pinochet government but then a pardon.

''This gives it (the church) the very special authority to ask today that the search for the truth be done objectively, serenely and with prudence '' he said as Aylwin looked on.

''The national reconciliation that today Chile claims demands much generosity, much renouncement, of not forgetting the message of God who asks that we not only love those who love us but also those who may have painfully hurt us.''

A top government official Monday denounced what he called aggression against policemen that marred the inauguration Sunday evening.

Police said 79 officers and 128 other people were injured during the disturbances that began in front of the presidential palace just after Aylwin had returned from the port city of Valparaiso, where the inauguration had taken place.

Some members of the huge crowd that gathered to greet Aylwin attacked police with rocks, sticks and other objects and they responded with tear gas and water cannons. Interior Minister Enrique Krauss visited the wounded policemen Monday and called the attacks ''stupid.''

''We hope people understand that this is not the way to express yourself in a democracy,'' he said.

Sen. Edward Kennedy, D-Mass., a member of the U.S. delegation to the inauguration, said Monday he was confident a U.S. arms embargo against Chile would be lifted. The embargo sponsored by Kennedy was enacted because of human rights violations and because of the 1976 murder in Washington, D.C., of former Foreign Minister Orlando Letelier, a Pinochet opponent.

''I am confident that the difficult and painful, but also justifiable, visions of that legislation will be achieved and that aspect of the relationship will be restored in the future,'' Kennedy told a news conference.

#90071u1974 03/12/1990 ~United Press International
BY GERALD NADLER - UPI

MOSCOW (MARCH 12) UPI - Lithuania's bold declaration of independence from Moscow may have tipped the first domino in the world's last major empire of disaffected nations.

''The information coming from there (the Lithuanian parliament) is alarming,'' Soviet leader Mikhail Gorbachev told Soviet legislators Monday.

No sooner had Lithuania declared it was going to break with Moscow, than the non-communist president of the Baltic state said of his neighbor to the north, ''Latvia will be free.''

The Lithuanian lawmakers, all nationalists and the majority non-communists thundered back, ''Estonia will be free.''

But the three Baltic republics, kidnapped by dictator Josef Stalin in 1940 in a secret deal with Adolf Hitler, are not the only former states so dragooned. Nearly all of these captured nations are straining to leave or gain greater autonomy, powered by national front movements and emerging political parties.

In the Ukraine, the Rukh nationalist movement seeks to regain the brief post-World War I independence that was lost in the early 1920s to Soviet pressure and the Red Army.

In Moldavia, a powerful national front wants to undo the seizing of Moldavia in 1940, also a part of the Stalin-Hitler machinations.

Georgia, which also broke free of Russia after 1917 only to be recaptured in 1921 by a Soviet invasion army, is awash in nationalist movements seeking independence for their Caucasus homeland.

And oil-rich Moslem Azerbaijan, once the most placid of republics until the strife of the last two years with Christian Armenia, is now virtually controlled by its national front.

To prevent mass defections, Gorbachev has pledged to build a new Soviet federation with unpecedented political and economic autonomy for all

republics.

But for those who want to leave anyway, the Soviet president is working on a law - what he calls a mechanism - that would allow a republic to secede.

Sergei Stankevich, a rising legislative star and member of the Inter-regional Group of Deputies faction, said time may be running out.

''I think it is inevitable, what is happening in Lithuania,'' Stankevich said. ''It is a great mistake for us to wait for this spontaneous disintegration of the Soviet Union.

''We should start immediate negotiations with all republics on developing a new basis of federation.''

Mass defections would cripple the Soviet Union, at least depriving it initially of Ukrainian coal, steel and wheat, Azerbaijani oil and Georgian citrus.

Should the independence fever strike the five Moslem republics in Central Asia (the Soviet Union has 55 millions Moslems), Moscow would lose its cotton supply.

Yet Gorbachev, like the founder of the state, Vladimir Lenin, whom he so admires, might be content to have loose treaties even with independent borderland states should they all bolt. So long as the secession process is orderly.

Foreign Ministry spokesman Gennady Gerasimov has compared secession to ''a divorce,'' just as a couple that splits must settle financial matters.

Georgy Shaknazarov, a close Gorbachev aide, said Monday secession is not a matter of merely declaring it.

''If a republic is going to leave the union, it is necesary to leave on the basis of law, agreements, political means - not on impulse and passion '' he said. ''You can't do such a thing in one month. Such questions as secession must be regulated over two to maybe three years.''

But, in Tallinn, Laure Vatra, a deputy to the independent Estonian congress, said, ''We can't change our policies according to the ideas of Mikhail Gorbachev.''

#90071u1977 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - The Food and Drug Administration has asked a drug company for more information about an experimental AIDS drug

following reports of six deaths from adverse reactions, officials said Monday.

Bristol-Myers Squibb Co. confirmed Monday that drug-related inflammation of the pancreas killed five of 8,000 AIDS-infected people who received dideoxyinosine (DDI) in a new ''expanded access'' plan, as well as one of 700 patients who got the drug through traditional tests.

The FDA said it wants Bristol-Myers to provide in-depth information on the deaths and about 40 non-fatal adverse reactions as soon as possible. In severe cases, inflammation of the pancreas, or pancreatitis, can lead to kidney failure, respiratory failure and death.

''The agency is working actively with the company to fully assess these cases to determine whether changes in the protocols may be needed,'' the FDA said.

The FDA also asked Bristol-Myers to write all doctors administering the drug ''urging them to monitor their patients closely.'' Kathryn Bloom, a spokeswoman at Bristol-Myers' New York headquarters, said her company will comply with the FDA requests.

When AIDS-related deaths are added to pancreatitis deaths, 290 of 8,000 patients taking DDI in the free ''expanded access'' distribution program have died, compared with two of the 700 patients in traditional tests, Bloom said.

Much of the disparity is probably due to the tendency of patients in the expanded access plan to be more ill than those participating in traditional tests required for FDA approval, the company spokeswoman said.

''We're dealing with a very, very sick population,'' Bloom said.

The expanded access program was started in the fall to give acquired immune deficiency syndrome patients who cannot tolerate standard treatment or who cannot take part in traditional tests - for either medical or travel reasons - early, free access to DDI. The distribution plan fits in with a growing move to develop a ''parallel track'' for testing drugs that may help the desperately ill.

A spokesman for the AIDS Coalition to Unleash Power, or ACT-UP, which pushed for the new program, said his group knew there was a risk of toxicity with DDI.

''That's a risk people agreed to take,'' the spokesman, Michael Harrington told The New York Times.

But Dr. Thomas Chalmers, associate director of the Harvard University

School of Public Health's technology assessment group, called the death rates in the new program ''an absolute disgrace,'' the Times said.

''I think it's a painful way to learn the lesson, but maybe it's the only way they'll learn that, to my mind, they did the wrong thing,'' Chalmers told the newspaper.

Proponents of the new system have said dying patients should be allowed to decide whether to risk taking a drug when its safety is unknown and its efficacy is unproven.

Critics claim expanded access represents a dismantling of the FDA, makes it difficult to recruit patients for traditional trials and places patients at greater risk of harmed from experimental drugs.

#90071u1984 03/12/1990 ~United Press International

PORT-AU-PRINCE, HAITI (MARCH 12) UPI - Former military dictator Gen. Prosper Avril and his family flew to Florida aboard a U.S. military jet Monday, two days after he resigned as president of Haiti in the face of violent anti-government protests.

Army Chief of Staff Herard Abraham, who took over as interim leader, quickly accepted the nomination of a woman Supreme Court justice who will eventually head the government in a plan arranged by opposition leaders.

Justice Ertha Pascal-Trouillot, who accepted the presidential nomination Sunday night, went into in hiding until her swearing-in scheduled for Tuesday at 10 a.m. EST, because of fear of possible violence.

U.S. Embassy spokeswoman Susan Clyde announced the ousted dictator Avril had flown to the United States with his wife, Marie-Ange, his daughter Carine, his son Philippe and a servant.

Clyde said U.S. Ambassador to Haiti Alvin Adams met with Avril at the international airport in Port-au-Prince before the plane left about 6:20 a.m.

Avril landed at Homestead Air Force Base in Florida at 8 a.m. aboard a U.S. military C-141 aircraft.

The U.S. Atlantic Command in Norfolk, Va., said Avril was to be driven to Boca Raton, Fla., where the ousted dicator is believed to own property but protesters at the Homestead gates delayed his movement.

In Port-au-Prince squads of heavily armed security forces - blue-uniformed police, white uniformed navy men and green-uniformed army troops -

circulated in the capital. Streets remained largely deserted and most businesses were closed.

Under the opposition plan, Trouillot would be president of a provisional government along with a 19-member council of state with regional representatives as well as representatives of the army, labor, industry and professional groups.

Opposition leaders met with Abraham at his office at army headquarters about midday Monday and Abraham accepted various letters nominating Trouillot.

''This is a historic moment,'' said Father Antoine Adrien, one of the opposition leaders, as he presented the letters to Abraham while Haitian and foreign television and other reporters witnessed the event.

Her swearing-in ceremony could come as late as Tuesday and still fulfill Abraham's pledge to turn over power in 72 hours after Avril's resignation.

Roy said the judge accepted the job after all other Supreme Court justices declined. She is a middle-aged judge from the northern city of Gonaives graduated from law school there in 1971 and became the first woman to be appointed to Haiti's supreme court about four years ago. She has a reputation for being non-political.

White House spokesman Marlin Fitzwater confirmed the United States was ''helpful in facilitating his (Avril'S) departure.''

Fitzwater said the United States was encouraged by the tranistion process in Haiti.

''We're watching it closely and we're hopeful. It is significant in the sense that it does make way for a change of government to a democracy,'' he said. ''But it still is the first step in the process and we've got quite a ways to go.''

One Haitain opposition source said the violence in Haiti was caused by the ''Duvalierists'' referring to the former family dynasty that ruled the island until Jean-Claude ''Baby Doc'' Duvalier fled into exile Feb. 7, 1986.

The source said remnants of the feared Tontons Macoutes, the disbanded secret police of the former ruling Duvalier family, roved the capital Sunday night killing residents randomly as Abraham's troops patroled to maintain order.

Since popular unrest against Avril's regime erupted a week ago, at least 15 people have been killed in Haiti, which shares the Caribbean island of

Hispaniola with the Dominican Republic. Some estimates put the death toll as high as 30.

Avril resigned Saturday after several days of violent protests and jubilant mobs celebrated his departure by ransacking the homes and offices of his supporters.

Most of Haiti's 6 million people are illiterate and live in abject poverty. Per capita income is $365 a year, one of the lowest in the world.

#90071u1993 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - A key House subcommittee chairman said Monday he prefers the idea of a two-tier price support system to curtail dairy supluses rather than the administration proposal for simply cutting the milk support price.

As part of its package for the farm policy law being written this year, the adminstration has requested greater flexibility in setting the support price.

The support price was lowered to $10.10 per 100 pounds of milk at the start of this year because of large government purchases of dairy products.

During a luncheon with reporters, Rep. Charles Stenholm, chairman of the House Agriculture subcommittee on dairy, said his panel was receptive to many of the ideas in a package proposed by the National Milk Producers Federation. However, he spoke against a repetition of the dairy herd buy-out program that paid farmers to go out of business.

The Milk Producers plan would set the minimum support price at $10.60. It would try to control surpluses through an assessment on excess amounts of specific products such as butterfat or skim milk. If that failed, the government would be ordered to reduce output through one of three methods - a two-tier price, a herd buy-out or a so-called diversion plan that would pay farmers to produce less milk.

''I have made myself extremely clear throughout the hearing process that I prefer as an invetory control mechanism the two-tier pricing system vs. 'supply management,''' Stenholm, D-Texas, said.

''I'm comfortable with leaving it (a herd buyout) out but I have not made a final decision on it. But my preference, my strong preference, is two-tier. ... I want the market to send the signals.

Under the administration approach, Stenholm said, the support price could drop as low as $8.60 per hundredweight, a level that he labeled as ''disastrous.''

At a subcommittee hearing last week, the National Cattlemen's Association strongly opposed herd buy-outs or milk diversion plans, warning either approach would put a glut of dairy cows on the slaughter market and depress beef prices. The association said cattle producers lost $26 million in a two-weak period in 1986 because of the dairy buy-out.

Under a two-tier price system, dairy producers would be eligible for the full support price for a predetermined amount of production. Milk marketings above that level either would face an assessment or simply would be sold at a lower price.

#90071u2013 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - The Institute on Religion and Democracy called on mainline churches Monday to change their policies toward Nicaragua following elections there that ousted the Sandinista government.

In letters to the Rev. Leonid Kishkovsky, president of the National Council of Churches, as well as leaders of other mainline Protestant churches, Institute Chairman Edmund Robb said Protestant churches and their missionaries in Nicaragua had a ''distorted vision of Nicaraguan reality'' in alleged support for the Sandinista government.

''When finally given a chance to express themselves freely, the Nicaraguan people resoundingly rejected their self-proclaimed liberators,'' Robb said. ''They voted to turn their backs on a misguided Marxist revolution '' he said.

Robb said U.S. missionaries in Nicaragua who supported the government ''must be brought home'' and that churches in the United States need ''to begin a fundamental reappraisal involving all who have been concerned

about Nicaragua and the church's mission there.''

The missionaries, he said, ''owe those who have supported them an account of their work'' and questioned whether they are ''the right individuals to be serving God in the new Nicaragua.''

''Given the Nicaraguan people's verdict on the Sandinista experiment, we can no longer accept missionaries serving and proclaiming the glory of the Sandinista Front,'' Robb said.

He said these missionaries are ''sadly compromised by their longtime commitment to the Sandinista regime.''

Robb's letter dismissed any notion that the election results might have been influenced by the 10-year economic sanctions imposed on Nicaragua by the United States or the U.S-financed war by the Contras.

Such an analysis, however, was raised by Jim Hershberger, a missionary with the Mennonite Central Committee in Nicaragua.

Hershberger, who served as an election observer with an international team of religious workers, reported to his denomination that the common theme among people standing in line to vote was, ''We do not want any more war. I have never heard anybody talk about a vote for freedom and democracy. This was a vote against war.''

Still, he added, he had not talked to anybody, ''even UNO (the opposition) supporters, who thought UNO would win.'' He said UNO members were ''pleasantly suprised and are scrambling to decide what to do with this 'free lunch.'''

In a statement following the election, the National Council of Churches' general secretary, James Hamilton, said the council hoped for and expected a ''peaceful, democratic transition in Nicaragua.''

''Though we have had fruitful contacts with the Nicaraguan government in the past, and hope this same cordiality will characterize our relationships with the new government, our primary bond to this country is through the churches and their cooperative agencies,'' he said.

Council officials said they had not yet seen the letter from the IRD.

Other denominations receiving the letter calling for the withdrwal of missionaries included the Mennonite Central Committee, the Episcopal Church, the United Methodist Church, the Presbyterian Church (USA), the Evangelical Lutheran Church in America, the United Church of Christ, the American Baptist Church, the Christian Church (Disciples of Christ) and the American Friends Service Committee.

MEXICO CITY (MARCH 12) UPI - The Cuban government arrested seven human rights activists, charging them with illegal association and protests, the official Cuban news agency said Monday.

Prensa Latina, in a dispatch monitored in Mexico City, quoted the Cuban Communist Party newspaper Granma as saying the arrests ''ratified the decision of the Cuban people'' not to allow any activity aimed at undermining the Cuban revolution.

''Seven counterrevolutionaries were arrested here because of their illicit meetings, protests and associations,'' Granma was quoted as saying. An eighth Cuban was detained for violating terms of house arrest imposed on him, the news agency reported.

Prensa Latina said the seven Cubans, who headed a pro-human rights party, were arrested Saturday and will stand trial. Their names were not disclosed.

''According to the newspaper, these individuals, most of them former common prisoners with frequent links with the U.S. interest office in Cuba were sending 'warm congratulations' March 7 to a U.S. delegation that presented a ... resolution against Cuba at the (U.N.) Human Rights Commission in Geneva,'' Prensa Latina said.

Last month Armando Valladares, the chief U.S. delegate to the commission, blasted the human rights situation in Cuba and presented a draft resolution.

U.S. officials said the draft avoided condemnation of Cuba, but sought the continued monitoring of the human rights situation in that country.

Valladares, a former political prisoner in Cuba, said a commission report on Cuba cited flagrant violations including torture and repression of basic freedoms.

Cuba has come under heavy fire in recent months for its refusal to budge from its Marxist-Leninist system despite changes toward democracy and capitalist-style economies in the Soviet Union and other Eastern European countries.

Cuban President Fidel Castro has repeatedly rejected the possibility of capitalism in Cuba, defending the one-party system and the principles of his Marxist revolution.

In Managua earlier this month, the Inter-American Press Association condemned Cuba as the ''public enemy No. 1'' of press freedom.''

DALLAS (MARCH 12) UPI - The Securities and Exchange Commission supports the ''T+3'' recommendation of an international private-sector group that would require all corporate securities transactions be settled by the third day after a trade, SEC Commissioner Mary Schapiro said Monday.

Speaking to the convention of the National Fiduciary and Securities Operations of the American Bankers Association, Schapiro said the T+3 method becomes more relevant with the phenomenal growth of cross-border securities activity.

With the increasing globalization of the securities markets, she noted, the ultimate goal of the world's major markets should be to promote simultaneous access by issuers and investors in the world's capital markets.

''The Group of 30 recommendations provide a critically important framework for upgrading and harmonizing clearance and settlement systems in both fully developed and emerging markets,'' she said. ''The Securities and Exchange Commission strongly supports these efforts by the Group of 30.''

Clearance and settlement procedures after the execution of a securites trade currently take from five days in the United States to as many as 30 days in some less-developed countries.

The Group of 30, a private sector group concerned with the workings of the international financial system, met in London last year to establish a uniform settlement procedure throughout the world.

The T+3, which is now in the implementation phase, would basically require all securities transactions be settled and cleared by the third day after a trade.

''A shorter settlement time period will reduce the number of outstanding trades, thereby reducing the counter-party risk and market exposure associated with unsettled securities transctions,'' Schapiro said.

To comply with the new procedure, U.S. markets would need to reduce their settlement cycle by two full days. Schapiro said a working commitee concluded that eliminating paper certificates in stock transactions would be a necessary prerequisite to accomplishing this.

While this could be implemented in the institutional market, Schapiro said

the retail market could pose problems.

A retail transaction often involves the physical presentation of the certificates to be sold to the broker, often done through the postal system. Customers also wait until they have received confirmation of the transaction before making payments to the broker.

Schapiro said the working committee concluded that unless the certificates are taken out of the system, T+3 cannot work in the retail market.

She said the SEC believes a number of steps would need to be taken before eliminating paper certificates.

Among other things, the industry must establish a workable system for custody and money transfer that is acceptable to individual investors and there must beconsideration of direct registration of ownership interests, according to Schapiro.

In addition, an extensive educational program designed to reassure investors they will not be harmed by the loss of their ability to obtain paper certificates and industry protection of the ability of issuers to have open channels of communication to shareholders are needed, she said.

Jeremiah O'Leary, senior vice president of Chemical Bank and chairman of the ABA's Fiduciary and Securities Operations Division, said the T+3 procedure is needed to bring order and efficiency to the market.

The procedure may be difficult to adopt in markets that are not technologically advanced, but he said such measures are needed in the current environment.

''They will have to comply if they want to participate in the emerging capital markets,'' O'Leary said. ''Eventually, these procedures will help to improve market safety and reduce the risks.''

#90071u2103 03/12/1990 ~United Press International

JERUSALEM (MARCH 12) UPI - Israel's Labor Party authorized its leaders Monday to leave the coalition government because of the Likud Party's refusal to approve a U.S. peace proposal.

The Labor Central Committee did not explicitly call for withdrawing from the coalition government but instead unanimously gave the party's Executive Bureau and Parliament members the power ''to decide on the parliamentary steps that this situation calls for.''

Labor could try to bring down the 14-month-old coalition government during one of eight no-confidence votes scheduled for Thursday in the Knesset, or Parliament. The committee's decision formalized the party's threat to quit the coalition, but left time for Israeli leaders, veterans of many government crises, to find a formula for compromise.

Meeting in Kfar Saba north of Tel Aviv, the 1,300-member Central Committee blamed Likud for halting the peace process by refusing to approve talks with a Palestinian delegation under a compromise offered by U.S. Secretary

of State James Baker.

''If the peace process is cut off, there is no point in the government,'' Defense Minister Yitzhak Rabin told fellow Labor Party members. ''How we take care of it is another question. It is preferable to find a compromise.''

Passage of a no-confidence vote will initiate a complicated political process and effectively end discussion of the peace process until a new government is in place.

Labor leaders decided to convene the Central Committee after Prime Minister Yitzhak Shamir, head of the Likud Party, refused to bring the Baker proposal to a vote during Sunday's Inner Cabinet meeting.

''We are not talking about the end of the unity government, but of the peace process, and we are working on what may happend if Shamir refuses to say yes to Baker,'' Labor parliamentarian Chaim Ramon said.

Labor Party leaders said the decision not to vote was a rejection of talks with a Palestinian delegation. Shamir said more time was needed to consider the U.S. proposal.

''Shamir wanted to go toward peace and his party will not let him,'' Labor Party Chairman Shimon Peres told the convention.

Before it will approve the plan, Likud ministers want assurances that East Jerusalem Arabs and the Palestine Liberation Organization will be excluded from the peace process. Labor accepts the Baker proposal that calls for talks with a Palestinian delegation including a deportee and Arabs with addresses in the West Bank and Jerusalem.

The Baker plan was designed to overcome differences between Likud and Labor on the role of East Jerusalem Arabs in the peace process. Likud fears their participation would lead to negotiations on Israeli control of the city. Labor is willing to allow East Jerusalem Arabs to join the Palestinian delegation, but it too rules out any discussion of Israeli sovereignty.

Early Monday, Religious Affairs Minister Zevulun Hammer presented leaders of Likud and Labor with a compromise plan to prevent the collapse of the government. Peres said the plan was well-intentioned but would not overcome Likud opposition.

Approval of the Baker plan would lead to a three-way meeting of Israeli and Egyptian foreign ministers and Baker to draw up a framework for Palestinian-Israeli talks in Cairo. The purpose of the Cairo talks is to plan elections in the occupied West Bank and Gaza Strip for selecting

representatives to talks on limited self-rule in the territories.

#90071u2140 03/12/1990 ~United Press International

BOSTON (MARCH 12) UPI - The new chief of the struggling Bank of New England Corp. warned Monday the company will need years to recover from debilitating losses, but he said he will try to avoid selling its Connecticut Bank and Trust subsidiary.

The chairman and chief executive officer, Lawrence K. Fish, said CBT, now with $8.2 billion in assets and about 160 branches, ''is part of the core franchise here'' and as such ''is not for sale at the moment.''

By contrast, he said, bank subsidiaries in western Massachusetts, Maine and Rhode Island may be sold. The troubled banking company previously said all those subsidiaries, including CBT, were on the block as part of an effort by the parent to reduce assets, restore its capital base and avoid insolvency.

Fish said he will meet next week with the chief executives of the company's subsidiaries in Maine and Rhode Island to determine whether their banks should be sold.

''We'll look at Springfield in time,'' he added, referring to the Bank of New England-West, based in Springfield.

Fish, 45, was named to the top post Friday. The announcement came nearly two weeks after there were widespread reports he would get the job.

Fish promised a ''slow, steady road back to full recovery ... not measured in days or weeks or months but in a number of years.''

In his first day of interviews with the media, Fish said ''the bank let its credit approval and administration processes slip and it has hurt the bank.'' But he declined to more specifically lay blame for the company's enormous real estate losses.

Bank of New England, which reported a loss of $1.23 billion last year, has ''over $2 billion worth of non-performing loans and we need to collect those loans'' or dispose of them, he said.

He added, ''I have no illusions about this being a very difficult process '' given the region's weakening economy and sinking real estate market.

''I still expect we'll have problem loans in the future,'' he said.

Fish, who spent 17 years with the Bank of Boston Corp., the first 12 of them overseas, said he would be making top-level management changes. Also, he said that''we're going to have to build a strong loan workout group'' and probably add personnel in that area.

His first priority will be to ''put a plan in place and implement a restructuring.''

Fish said he had not reviewed the company's previously announced plans for thousands of layoffs, but he added that ''this institution has gone from $33 billion to $25 billion (in assets), so we have to rationalize our cost basis.''He declined to estimate the future size of the company.

Despite an enormous outflow of funds by large depositors, Fish said: ''I feel the funding situation has stabilized. I'm talking about our (retail) customers. I'm not talking about wholesale capital market funding.''

Fish said it is important that ''over 98 percent of our retail customers have stayed with us. Our customers have been fabulously loyal.''

He said retail customers, through the subsidiary banks' extensive branch network, provide a funding base of $15 billion to $20 billion in core deposits for the company. He said the bank would start immediately to show its appreciation for the customer loyalty and ''go after those that have left us.''

As for the cease-and-desist orders issued recently by federal regulators, Fish said these are ''simply the way you run a good, sound bank.''

#90071u2157 03/12/1990 ~United Press International

ANCHORAGE, AK (MARCH 12) UPI - A supertanker captain defended Joseph Hazelwood's actions aboard the Exxon Valdez Monday and testified that the tanker's third mate and the Coast Guard were responsible for the grounding last March that caused the nation's worst oil spill.

In a tense morning of sparring between Capt. Shiras Michael Walker and prosecutor Mary Anne Henry, Walker told the jury that Hazelwood was not to blame for the wreck of the Exxon Valdez.

Cross-examination painted two radically different pictures of Hazelwood: Henry portrayed him as vodka-impaired and reckless, especially for leaving the bridge to unqualified crewmen; defense witness Walker characterized Hazelwood as a typical skipper whose actions were routine and proper.

Walker, who commanded tankers in Prince William Sound for eight years and now pilots ships in Florida's St. Johns River, blamed third mate Greg Cousins for the grounding. And he blamed the Coast Guard for not seeing the approaching disaster on radar and warning the Exxon Valdez.

Cousins, the Tampa, Fla., officer left in charge by Hazelwood, failed to make sure that his turn orders were carried out by helmsman Robert Kagan, said Walker, of Jacksonville, Fla.

Hazelwood left the bridge and went to his cabin during a detour around icebergs, telling Cousins to return to tanker lanes at a certain point. About 15 minutes after Hazelwood left, early on Mar. 24, the Exxon Valdez hit Bligh Reef and spilled nearly 11 million gallons of crude oil.

Cousins testified that he ordered a right turn to get around ice and avoid the rocks. Several witnesses and course recorder data indicated that Kagan - a helmsman with a reputation for having trouble steering - turned late, turned too little and canceled the right swing of the ship by turning back the opposite direction out of fear of turning too hard.

Cousins, if he was doing his job, should have seen on rudder indicator gauges that Kagan failed to turn as ordered, Walker said.

A number of witnesses have blamed Kagan for the wreck because he turned too little, too late. Some witnesses have faulted Cousins for burying himself in charts and radar screens without making sure Kagan followed his turn orders. Prosecutors have blamed Hazelwood for not taking charge of his subordinate crewmen and staying on the bridge during the detour.

But Walker became the first witness in Hazelwood's trial to single out Cousins directly for the blame because he was the officer on watch at the time and then to attack the Coast Guard for not preventing the wreck.

Walker said that if he were skipper he would have stayed on the bridge - a statement prosecutors tried to capitalize on by saying the accident never would have happened if Hazelwood were on the bridge.

Walker conceded, ''If Capt. Hazelwood had been on the bridge during those maneuvers, the accident wouldn't have happened,'' but he refused to fault Hazelwood for leaving the bridge, saying that was a skipper's prerogative.

He said Cousins had instructions to call Hazelwood for the turn and every skipper ''tries to pound into his junior officers' thick skulls to call me when you're in doubt.''

In fact, Cousins should have summoned Hazelwood back to the bridge when he saw the tanker was in trouble, Walker said. ''All he had to say was, 'Captain, please come up to the bridge.' Then this whole thing would have been avoided.''

Walker blamed the Coast Guard because he said it was supposed to monitor tankers in Prince William Sound.

''They spent $70 million to build that place (the vessel traffic center in Valdez) and keep an eye on vessels,'' he said, ''but, boy, they sure messed up here.''

Tanker captains sailed out of Valdez under the assumption that Coast Guard radar watchers were monitoring them, he said, declaring, ''The Coast Guard got it so screwed up, it's unbelievable.''

Prosecutors have said Hazelwood was reckless for leaving the bridge since

he was the only one with a Prince William Sound pilot license. But Walker, now a ship pilot himself in Florida, said, ''The pilotage regulations in Prince William Sound were a joke.''

Walker said tanker captains believed the Coast Guard had waived pilotage requirements when visibility was at least 2 miles, such as on the night the Exxon Valdez ran aground.

''This pilotage and non-pilotage is a bunch of hogwash,'' said Walker.

Walker, who commanded supertankers in Prince William Sound in 1977 and from 1979 to 1985, including Exxon-chartered tankers for three years, boasted that he had a spotless record but, ''I've walked several thousand miles in Capt. Hazelwood's shoes.''

Walker called Hazelwood's actions ''good seamanship'' but said there were indications that Hazelwood was beginning to crack under pressure after the grounding, evidenced by some of his contradictory remarks to the Coast Guard.

Hazelwood, 43, of Huntington, N.Y., faces up seven years, three months in jail and a $61,000 fine if convicted of reckless endangerment, operating the Exxon Valdez while intoxicated, negligent discharge of oil and criminal mischief.

#90071u2163 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - President Bush and former Japanese Prime Minister Noboru Takeshita met Monday to discuss what was described as the ''extraordinary efforts'' needed to defuse trade tensions between the economic superpowers.

Takeshita, still influential after being driven from office by scandal last year, flew to Washington over the weekend in a further sign of stepped-up high-level dialogue driven by rising concern over a huge trade imbalance.

The almost $50 billion Japanese trade surplus with the United States was the focal point of an unusual desert summit last week between Bush and Japanese Prime Minister Toshiki Kaifu at a swank country club in Rancho Mirage, Calif.

White House press secretary Marlin Fitzwater said Bush and Takeshita devoted much of their hour-long meeting to a similar discussion of economic problems ''and the fact that their solution will require extraordinary efforts on both sides of the Pacific.''

Takeshita assured Bush that Kaifu ''has become increasingly aware of the urgency'' to resolve those problems, Fitzwater said, and the two acknowledged ''the public pressures'' driving both sides ''to reinvigorate the relationship.''

Fitzwater said before the meeting that Bush wanted to ''emphasize again that the United States needs and wants access to Japanese markets, that we have strong protectionist pressures in the Congress and any help that the former prime minister can give us in relaying that message to the people and the government of Japan would be helpful.''

Even as Takeshita and Bush reviewed some of the same issues raised in the recent talks with Kaifu, Commerce Secretary Robert Mosbacher was en route to Tokyo to reinforce the U.S. demand for more open access to Japanese markets.

Before leaving Washington, Mosbacher said he hoped to reach ''a clear understanding'' on trade issues during three days of meetings with Japanese industrial leaders and government officials, including Kaifu.

The quickened pace of diplomatic activity has been prompted by a lack of tangible progress in negotiations on several product-specific trade disputes and in talks on the structural causes for the U.S.-Japanese trade gap.

With the trade talks approaching several critical deadlines, U.S. officials have warned that Japan could face additional charges of unfair trade and the threat of retaliatory sanctions from an increasingly impatient Congress.

As leader of the largest faction in the ruling Liberal Democratic Party, Takeshita remains a powerful figure in Japanese politics and comfortably won re-election to his seat in Parliament in nationwide elections Feb. 18.

Takeshita played a key role in elevating Kaifu from obscurity to prime minister last August and could have an important role in shaping the Japanese response to mounting U.S. demands for trade concessions.

Like the meeting with Kaifu, however, U.S. officials took pains to not give the Bush-Takeshita talks even the appearance of formal negotiations and denied any intent to detract from the earlier discussions with Kaifu.

Cognizant of sharpened sensitivities and political rivalries in Japan, where Kaifu's standing remains the subject of doubt, one official said the meeting with Takeshita was arranged as a courtesy and with no concrete results in mind.

ATHENS, GREECE (MARCH 12) UPI - President Christos Sartzetakis dissolved Parliament Monday, setting the stage for the third general election in Greece in ten months.

Officials said Sartetakis signed a presidential decree which was posted on the door of the Vouli, or Parliament, dissolving the single-chamber legislature and setting up an election for April 8.

The next Parliament will also elect the country's next president by a simple majority. Deputies in the Vouli went through three rounds of balloting to elect a new president last month, but failed.

The dissolution of Parliament was a constitutional formality, after its failure to elect a president. The three main political parties had already agreed earlier to hold fresh elections in April.

Greek voters went to the polls in June and November last year, but each time the balloting was inconclusive, with none of the three major parties winning an absolute majority in the 300-member Vouli.

Attempts to run the country with a coalition governments proved unworkable and the conservative New Democracy party began a series of moves last month aimed at forcing a general election in April.

The three parties, including New Democracy, the Pan-Hellenic Socialist Movement (PASOK) led by former Prime Minister Andreas Papandreou, and the Communist-led Alliance of the Left, began campaigning days ago for the next general election.

In the last elections in November, New Democracy won 148 seats, or three short of an overall majority, PASOK captured 128, and the Alliance of the Left took 21, with three going to independents.

New Democracy narrowly missed winning a clear majority both in June and in November.

Political sources said if New Democracy leader Constantine Mitsotakis fails to lead his party to victory for the third consecutive time in April he will probably have to step down from the party's leadership in favor of a younger member.

Papandreou vowed Sunday to put PASOK back in power with a clear majority. He was voted out off office in the June elections last year, after eight years in power, following financial and sex scandals that rocked Greece for months before the elections.

Dimitra Liani, the former air hostess he married after divorcing his American-born wife Margarite, appears regularly at his side in his current campaign.

MEXICO CITY (MARCH 12) UPI - Cuba's gross domestic product grew 0.9 percent to $11.625 billion in the first nine months of 1989, offset by external financial problems and low output of consumer goods, the official

Cuban news agency said Monday.

Prensa Latina, in a dispatch monitored in Mexico City, quoted a report from central bank Banco Nacional de Cuba saying the increase, as compared to figures for the same period in 1988, largely resulted from a recovery in construction, transport and other related industries and from increased sugar production.

"The persistent influence of the external financial situation is cited in the (bank's) report as the chief negative factor that impedes a better economic performance," Prensa Latina said.

Financial difficulties have meant greater restrictions on imports, affecting several areas of production, chiefly consumer goods and services the bank was reported as saying. Excluding these negative areas, growth would have been 3.4 percent in the January-September 1989 period, Prensa Latina said.

The bank report said that Cuba's foreign debt stands at $6.2 billion and that the nation's international reserves in dollars and precious metals stood at $93.4 million.

#90071u2190 03/12/1990 ~United Press International

(MARCH 12) UPI - An angry federal judge today ordered ex-White House aide Oliver North to stop nit-picking and answer questions in the Iran-Contra trial of John Poindexter. It's North's second day of testimony in the case against Poindexter, once his former boss and national security adviser to Ronald Reagan. North said ''yes'' when asked whether Poindexter told him to conceal from a congressional delegation to the White House, North's secret activities on behalf of Nicaragua's Contra rebels.

The White House is reacting mildly to a Democratic plan that would raise taxes to cut the federal deficit. The curious lack of strenuous opposition comes despite President Bush's constant ''read my lips'' talk of NO new taxes. Presidential spokesman Marlin Fitzwater said today the Democrats' plan ''probably facilitates'' discussions on an election-year budget deal. He said there's ''room to talk'' about the proposals, adding- ''we doN'T want to pour too much cold water on a plan that we might want to swing around in for a while.''

Union representatives for some nine-thousand striking Greyhound workers are meeting with federal mediators in a bid to end the bitter 11-day walkout against the nation's number one inter-city bus line. Mediators asked the union leaders to convene to discuss the dispute... but NO contract talks are scheduled and it's NOT clear whether the mediators will call in company officials to discuss the strike.

The meeting comes one day after a sniper fired on a moving Greyhound bus near Jacksonville, Florida, wounding seven passengers. Authorities today are trying to determine if the shooting is linked to the strike. The bus was driven by a replacement worker. Greyhound Chairman Fred Currey announced a 25-thousand-dollar reward for information leading to the arrest and conviction of the sniper.

#90071u2205 03/12/1990 ~United Press International

WARSAW, POLAND (MARCH 12) UPI - Poland and Hungary Monday declared support for neighboring Lithuania's declaration of independence and Western countries urged Moscow to open talks to allow a peaceful break with the Soviet Union.

In Washington, White House spokesman Marlin Fitzwater, called on the Kremlin ''to respect the will of the citizens of Lithuania,'' but did not speak directly of recognition.

The State Department said the question of independence for Lithuania should be settled through negotiations between the Baltic state and the Soviet Union.

The Lithuanian legislature declared the nation independent of the Union of Soviet Socialist Republics on Sunday, a major step toward regaining the sovereignty it knew before World War II.

Spokesman Margaret Tutwiler reaffirmed a U.S. policy statement of years - that Washington never recognized the forcible inclusion of Lithuania into the Soviet Union.

''We call upon the Soviet government to address its concerns and interests through immediate constructive negotiations with the government of Lithuania,'' Tutwiler said. ''We hope that all parties will continue to avoid any intimidation or encouragement of violence.''

In Rome the Italian government hailed Lithuania's unilateral declaration of independence and expressed the hope the issue will be solved through an ''open and respectful dialogue''.

''The Italian government, which has never recognized the annexation of Lithuania by the Soviet Union, hails the declaration of independence by the first freely elected Parliament of the Lithuanian Republic since the start of the second World War,'' Foreign Ministry spokesman Giovanni Castellaneta said in a statement issued to the press. The Belgian government issued a similiar statement.

The Polish government issued a carefully worded statement that expressed hope the new state and the Soviet Union can work out their differences peacefully.

''The government of the Polish Republic supports the self-determination of nations together with a self-determination leading to the achievement of a separate statehood,'' government spokesman Malgoszata Niezabitowska said in a statement read on Polish television and carried by the news agency PAP.

The government believes ''the interests of the East Central European nations require that all changes regarding just national aspirations should take place in a peaceful way with respect for stability in our part of the continent,'' the statement said.

Poland ''expresses its hope and conviction that Lithuania and the U.S.S.R. will solve mutual problems respecting the above principles.''

In Budapest, Hungarian Foreign Affairs Secretary Laszlo Kovacs told the government daily Magyar Hirlap Monday that Hungary was prepared to recognize Lithuanian independence.

''Not recognizing its independence would be like questioning the Lithuanian people's right to self-determination,'' he said.

Polish Foreign Minister Kryzstof Skubiszewski, referring to Poland's centuries-old common history with Lithuania, said Poland recognized the difficult process currently under way.

In Gdansk, Solidarity leader Lech Walesa said he greeted the decision with joy and with ''a wish that the process of it (Lithuania) taking control of its affairs takes place in as peaceful a way as it has been so far.''

Walesa also expressed hope that the Lithuanian nation, ''nurturing for years its identity, will show understanding for similar desires'' among its 400,000 ethnic Poles in the Baltic state, who have complained their culture is being suppressed.

#90071u2215 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - The Federal Aviation Administration said Monday it wants the hydraulic system of all DC-10s to be changed to avoid the type of failure that contributed to last year's United Airlines crash in Iowa that killed 112 people.

In an ''Airworthiness Directive'' issued Monday, the FAA would require modifications to all DC-10s to enable the jetliner to be flown and landed

safely even if its hydraulic system were severely damaged.

The proposed changes come in the wake of the July 19, 1989, crash of a United Airlines DC- 10 in Sioux City, Iowa. The jet's hydraulic system had been crippled by a rear-engine explosion, and the jet crashed short of the runway while attempting an emergency land- ing. Of the 296 people aboard, 109 were killed instantly and three died later. There were 184 survivors.

The modification proposed by the FAA would have to be made within six months on the DC-10-10 within a year on all other models of the DC-10. The jet that crashed in Iowa was a DC-10-10.

The modification was previ- ously proposed by McDonnell Douglas Corp., maker of the DC-10. It recently was flight tested by the FAA.

FAA spokeswoman Jo Ann Sloane said the agency will solicit public comment on the proposed airworthiness directive until May 1. After reviewing the comments, the agency will make a final decision later this year on the DC-10 modifications, Sloan said.

A National Transportation Safety Board hearing on the crash in Sioux City last fall focused on the failure of the DC-10's tail engine and its hydraulic system.

According to experts testify- ing at the hearing, the hydraulic system failure oc- curred after a General Electric tail engine apparently exploded during the flight, sending fragments through the DC-10's tail section. Investigators say the fragments severed all of the plane's hydraulic systems.

When the DC-10's hydraulic lines are cut, the rudder and elevators on the tail section - which enable the pilot to steer and control descent - stop working.

The modification proposed by the FAA Monday involves installing devices in the hy- draulic system that would keep the hydraulic fluid from leaking out when the hydraulic lines in the tail section are severed - thus giving the pilot some control over the craft.

During the Sioux City hearings, presiding officer Joseph Nall also focused on the DC-10's No. 2 engine, particu- larly its large titanium fan disk. Although no formal results have been released, investigators said they found a microscopic flaw in the disk that may have caused it to crack and disintegrate, leading to the engine failure.

In an earlier action aimed at preventing a recurrence of the accident, the FAA ordered ultrasonic inspection of DC-10 fan disks for possible defects.

#90071u2250 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - The federal government incurred more than $125 million in costs related to the Exxon Valdez oil spill off Alaska within the first six months of the accident, congressional auditors reported Monday.

Exxon has reimbursed the government for $80.8 million of those expenses as of Nov. 15, 1989, with the unrecovered balance including costs not yet billed to Exxon, bills still being processed and costs questioned by either Exxon or the Coast Guard, the General Accounting Office said.

The GAO report marks the first accounting of those costs since the supertanker Exxon Valdez spilled nearly 11 million gallons of crude oil into the waters of Alaska's Prince William Sound March 24, 1989.

In all, the report details $125.2 million in expenses the government incurred as of Sept. 30, 1989, for cleanup and disposal of the oil and the

assessment of enviornmental damage.

It does not include the amount of money it will take to restore the sound to its original condition, economic losses to the fishing industry or any costs to the state of Alaska for cleanup and damage assessment.

Cleanup and restoration costs beyond Sept. 30 are unknown, but ultimately they are expected to run in the hundreds of millions of dollars.

In the first six months since the spill - the worst in U.S. history - the largest share of costs to the federal government was $111.8 million for cleanup operations, the GAO said.

Of the remaining expenses, $12.3 million was spent on assessing environmental damage and $1.1 million went to other activities, including an investigation of how the spill contaminated the food supply of Alaska natives.

Exxon generally has promised to pick up the tab for cleanup costs, but the oil company has yet to reimburse the federal government for $44.4 million in expenses, the GAO said.

The billing process for more than half of that was incomplete as of mid-November, but the government's recovery of $21.6 million remained in doubt. Most of the uncertainty was due to questions raised by either Exxon or the Coast Guard, the agency coordinating the federal response, about whether costs were excessive or approved in advance.

In addition to out-of-pocket cleanup costs, Exxon faces lawsuits seeking hundreds of millions of dollars in damages plus up to $700 million in fines under a criminal indictment returned by a federal grand jury in Anchorage last month.

One aide to the House Interior Subcommittee on Water, Power and Offshore Energy Resources said Exxon has been ''reasonably cooperative'' in reimbursing the government's costs.

''The question is after they've been indicted, is their attitude going to change,'' the aide said.

The Alaska Legislature has authorized the state to spend about $118 million for spill-related expenses, of which $16 million has been paid back by Exxon, the governor's oil spill coordinating office said. Exxon has paid another $11 million directly to contractors on behalf of the state.

#90071u2258 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - Having promised to support a dramatic move toward democracy, President Bush is expected to take formal steps this week to restore economic ties with Nicaragua, administration officials said Monday.

In a move that could come as early as Tuesday, the officials said Bush would lift a trade embargo President Reagan imposed in May 1985 in a campaign of U.S. economic and military pressure against the Marxist-led Sandinista regime.

With the Sandinistas due to surrender power April 25 as the result of their defeat in the Feb. 25 elections, officials said Bush would begin to make good on a pledge to reward democracy with aid to rebuild the Nicaraguan economy.

Still not clear late Monday was how much economic assistance Bush would be prepared to announce beyond the repeal of sanctions that have brought two-way trade with Nicaragua to a virtual standstill in the last five years.

Deliberations continued on other direct and indirect aid, including loans, trade benefits and investment incentives, with the new government estimating as much as $300 million will be needed to help jump-start the economy.

Although Bush has been under pressure to deliver a quick show of good faith to President-elect Violeta Chamorro, questions about the vast problems facing her - and her ability to cope with them - have complicated the aid picture.

Two top advisers to Chamorro met last week with Secretary of State James Baker and other U.S. officials about Nicaragua's needs and said afterward only that their talks had been ''positive and encouraging.'' No dollar amounts were mentioned.

Since May 1985, the sanctions have banned imports from Nicaragua and the

export of most U.S. goods to Nicaragua and denied landing and docking rights to Nicaraguan airliners and ships.

In 1984, the last year before the trade embargo, Nicaragua exported $57 million in coffee, beef, bananas and other products to the United States and purchased $114 million in U.S. goods and services.

The trade issue, however, is just one of many challenges facing Chamorro. A decade of civil war, pitting the Sandinistas against the U.S.-armed Contra rebels, has left Nicaragua's economic base and social infrastructure in severe disrepair.

The day after Chamorro's upset victory, Bush said he would consult with other hemispheric leaders on ''appropriate trade and economic measures'' to help the new government.

Two days later, White House press secretary Marlin Fitzwater promised ''significant and meaningful'' U.S. aid after the devastated economy appeared to be a key factor in the repudiation of the Sandinistas, led by Presdient Daniel Ortega.

However, talk of a massive aid program - perhaps hundreds of millions of dollars over several years - comes at a time of competing cries for help from Panama and East European countries trying to shake off failed economic systems.

In part because of those budget realities at home, Bush has looked abroad - to allied governments and even to the Soviet Union - for wider international involvement in the costly rehabilitation of the Nicaraguan economy.

After the election, in an announcement welcomed by Bush, the Soviet Union, which had been pressured for years to curtail its military support for the Sandinistas, signaled a willingness to help the the new government.

Also, at a meeting in the California desert, Japanese Prime Minister Toshiki Kaifu told Bush he would ''promptly implement concrete measures'' to support the emergence of democracy in Nicaragua.

WASHINGTON (MARCH 12) UPI - Retail prices for fresh vegetables, up 20 percent due to freeze damage in the South, should drop to more normal levels by the end of this month, the government said Monday.

The December freeze wiped out the carrot crop in Texas and also cut into winter production of lettuce, celery, sweet corn and tomatoes in Florida and Texas.

''Retail prices for fresh-market vegetables are expected to average about a fifth above a year earlier during the first quarter of 1990,'' the Agriculture Department said said in an ''outlook'' report.

''In January, the Consumer Price Index for fresh vegetables surged 25 percent above a year earlier as fresh tomato prices more than doubled. Fresh vegetable prices are expected to return to more normal levels by the end of March.''

The price increases also have been felt at the farm level. Two weeks ago, the government reported the price paid to farmers for tomatoes, $122 per 100 pounds, was the highest on record and double the old record.

Farm prices for asparagus, broccoli, cauliflower and onions also were well above their February 1989 levels, while lettuce was down steeply. Celery was up slightly and carrots were down 80 cents per 100 pounds.

In its ''outlook'' report, the department said acreage devoted to processing vegetables, which include snap beans, sweet corn, cucumbers, green peas and tomatoes, was likely to exceed last year's 1.6 million acres. It said strong wholesale prices and continued tight supplies should encourage production.

Production of both fresh and processing vegetables was was up significantly last year from 1988's drought-cut levels.

#90071u2283 03/12/1990 ~United Press International

NEW YORK (MARCH 12) UPI - The stock market managed a gain in the slowest session of the year Monday as many investors sat on the sidelines and set their sights on economic reports to be released later this week.

The Dow Jones industrial average, which lost 12.84 Friday, rose 3.38 to close at 2686.71.

Among broader market gauges, the New York Stock Exchange composite index rose 0.33 to 186.51 and Standard & Poor's 500-stock index rose 0.74 to 338.67. The price of an average share gained seven cents.

Advances led declines 750-703 among the 1,951 issues crossing the NYSE tape. Big Board volume was 114,790,000 shares, compared with 150,400,220 shares traded Friday. Turnover was the lightest since the 77.6 million shares traded Dec. 26. The lightest volume this year had been 118.4 million shares Feb. 12.

Analysts said gains in Treasury bonds and the dollar helped erase early losses in the blue chips, which had been down as much as 14 points. Treasury bonds were 1/8 point higher in late trading after posting losses of about 1/8 point earlier. The dollar, extending its recent climb, was quoted in late trading at 1.7123 marks and 152.50 yen, up from 1.7032 and 151.27 late Friday in New York.

"I think we were dollar-driven today," said Alan Ackerman, senior vice president at Gruntal & Co. "That brought some buying into the market because when foreigners buy equities, they hope to be in a currency that's strong as well. Confidence in the yen and the mark have faded a bit and that's given the market a sense of comfort," he said.

Trading was quiet before the week's economic reports, which begin Tuesday with February retail sales and continue Friday with February housing starts, producer prices, capacity utilization and industrial production.

Trading was also subdued by anticipation of the quarterly "triple-witching" hour expirations Friday of stock-index futures, options on the futures and options on individual stocks.

On the trading floor, Rorer Group, the most active issue, surged 2 7/8 to 65 3/4 after the French company Rhone-Poulenc SA and Rorer signed an agreement for a $1.7 billion merger of their pharmaceutical sectors into a new company to be called Rhone-Poulenc Rorer Inc. The two groups said Rhone-Poulenc will acquire 50.1 percent of Rorer's outstanding common shares for $1.68 billion, or $78 a share.

Navistar followed, unchanged at 4 3/8. Philip Morris was third, up 3/4 to 38. Among the other blue chips, AT&T was up 1/8 to 41 1/8, IBM jumped 1 1/4 to 107 3/4 in active trading, Westinghouse fell 3/4 to 73 and General Motors, also actively traded, gained 3/4 to 47.

Elsewhere, General Development, one of Florida's oldest and largest real estate development companies, plummeted 2 1/8 to 3 5/8 after saying it is suffering "severe liquidity problems" in connection with a grand jury investigation into allegations of price gouging.

Grubb and Ellis jumped 5/8 to 4 5/8. Reports said the company plans to work with Resolution Trust Corp. to sell real estate holdings acquired through the thrift bailout.

Fabri-Centers of America added 1 3/8 to 18 1/2 after reporting a sharp jump in fourth-quarter earnings.

MGM/UA Communications climbed 5/8 to 17 1/2. Time Warner is said to be involved in talks on providing some of the financing for the company's planned takeover by Pathe Communications.

Allegheny Ludlum gained 1 7/8 to 41 1/2 after a Goldman Sachs analyst was said to have recommended buying the stock.

Nortek lost 3/8 to 3 3/8. The company and three officers agreed to a consent judgment stemming from violations of anti-fraud and beneficial ownership provisions of securities laws. Under a consent judgment, defendants neither admit nor deny guilt.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 139,738,040 shares, compared with 180,534,660 shares traded in the previous session.

Prices closed mixed in moderate trading on the American Stock Exchange. The Amex Market Value index rose 0.72 to close at 361.87. Declines led advances 271-256 among the 795 issues traded. The price of an average share rose two cents. Composite volume totaled 14,246,300 shares, compared with 18,719,085 shares traded Friday. Energy Service led the Amex issues, up 1/4 to 4 1/2.

The National Association of Securities Dealers composite index fell 0.20 to 436.56.

#90071u2293 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - Nearly a hundred wheelchair-users left their chairs behind and crawled up the steps of the Capitol Monday to draw attention to their demands for passage of a bill to expand civil rights for the disabled.

Almost a thousand marchers had wheeled and walked along Pennsylvania Avenue from the White House to the Capitol to rally support for the bill. They chanted, ''Hey, hey, we want access right away,'' and carried placards that read: ''Just Do it.''

''What we did with civil rights in the '60s, we forgot to do with people with disabilities,'' said Rep. Pat Schroeder, D-Colo., before many of the demonstrators struggled to climb 81 steps on the west side of the Capitol.

If passed, the Americans with Disabilities Act will provide protections against discrimination in the workplace, access to public places and transportation for the disabled.

The Senate passed the bill in September with the Bush administration's support. But the measure has since been under study by several House committees as lawmakers debated possible amendments. The disabled and their supporters mobilized Monday for ''a final push'' for passage.

''It's the final push on the bill and it's also a signal that there should not be any weakening amendments attached to the bill,'' said Ralph Neas, executive director of the Leadership Conference on Civil Rights.

Passage of the bill will mean that buses will have to be equipped with lifts and that buildings constructed in the future will have to provide access for the handicapped.

The bill has already passed through the House Education and Labor Committee. It still must be reviewed by the Energy and Commerce Committee, the Public Works and Transportation Committee and the Judiciary Committee before it reaches the House floor.

A spokesman for Rep. Steny Hoyer, D-Md., who is coordinating the bill's movement in the House, said the committee work will likely be finished by the end of the month and it should be voted on by early May.

But supporters of the bill said they are worried that the bill will be damaged by amendments before it even leaves the committee rooms.

Pat Wright, director of the Disability Rights Education and Defense Fund, said a public works subcommittee has already attached an amendment to the bill that will limit the number of cars accessible to the wheelchair-bound on commuter trains.

''It may be enough for all of us to pull from the bill if that amendment lives,'' she said.

Demonstrators also said the Bush administration has softened its support of the bill since the Senate approved it Sept. 7 by a 76-8 vote.

''The president needs to show his support by getting the House to move,'' said rally organizer Bob Kafka.

But Equal Employment Opportunity Commission Chairman Evan Kemp, a Bush administration official, said the president remains committed to the bill.

Kemp, who has been confined to a wheelchair for 19 years and who took part in the rally, was named commission chairman last week.

#90071u2306 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - The administration remains firmly committed to building the superconducting super collider in Texas, even though design changes will increase the cost by about $2 billion, the Department of Energy announced Monday.

Deputy Energy Secretary W. Henson Moore said the consensus of the Energy Department and White House officials meeting to discuss the gigantic scientific project last Friday was that the costly design changes are necessary and construction of the collider should proceed.

The design changes, primarily in the size and force of the supermagnets for the enormous particle accelerator, are expected to raise earlier cost estimates of $5.9 billion to around $8 billion, Moore said.

''After a long discussion the determination was this county risks being underfunded in basic research, this country risks losing its leadership in science if we don't make this type of investment,'' Moore told reporters.

''If we're talking about an $8 billion range, the project is still well worth it in the eyes of the White House and those with whom we talked,'' he said.

The officials attending the White House meeting Friday included White House chief of staff John Sununu, Office of Management and Budget director

Richard Darman, Energy Secretary James Watkins and White House science adviser Allan Bromley.

Moore repeatedly emphasized that ''almost all of the increased cost is due to changes in science, not overruns.''

He said the White House concurred with an independent advisory council of high energy physicists that the costly design changes are necessary to make the super collider ''do what it's supposed to do.''

Scientists hope to learn more about the fundamental properties of matter and energy through the collider, an underground tunnel of supermagnets 54 miles in circumference capable of smashing protons together at incredible speed.

The super collider is to be built at Waxahachie, Texas, and Moore said the exact ''footprint'' of the tunnel's location ''will be announced shortly.''

Moore said the $2 billion estimate for the design changes is only ''a very preliminary, almost back-of-the-envelope kind of figure.'' The Energy Department expects to have a firm total project cost by July or August, he said.

''We do not know and will not know until August, but at this point if we have to guess based on the guesses we've been given by the contractor we're looking at probably as much as a $2 billion increase, an $8 billion project,'' Moore said.

Reports of such a sizable cost increase over the past several weeks have given fuel to members of Congress who have already charged the project is a bottomless money pit and pork barrel for Texas.

The administration is seeking $318 million in fiscal 1991 funding for the collider and Moore said that request would remain unchanged and cost increases for the decade-long project would be absorbed in subsequent budgets.

#90071u2308 03/12/1990 ~United Press International

PITTSBURGH (MARCH 12) UPI - The United Steelworkers Union of America said Monday Wheeling-Pittsburgh Steel Corp. has offered inferior wages to members and will violate a bankruptcy court order by withholding reorganization plans if the two sides fail to sign a contract.

Union officials said during a news conference in Pittsburgh that negotiators from both sides have not met since mid-February and that the union will refuse to talk further until they know who is the lead

negotiator from among the steelmaker's officials, creditors, stockholders and investors.

''We're dealing with a three- or four-headed monster,'' said Andrew Palm, chief union negotiator and director of Steelworkers District 15. ''They (Wheeling-Pittsburgh executives) don't even know who's in charge.''

There was no comment from Wheeling-Pittsburgh officials at their headquarters in Wheeling, W.Va. The company operates several mills in eastern Ohio.

Wheeling-Pittsburgh has been reorganizing under Chapter 11 bankruptcy protection for the past five years. The current labor agreement, negotiated during a 98-day lockout in 1985, will expire after a plan of reorganization is approved by the court.

Union attorney Paul Whitehead said a status conference is scheduled Thursday before U.S. Bankruptcy Court Judge Warren Bentz in Pittsburgh. The judge's Feb. 27 order directed the company to file two reorganization plans - one from its secured creditors and one from its stockholders.

Bentz's order also said each plan ''may be expressly made subject to the future conclusion of negotiations for a collective-bargaining agreement within reasonable time limitations.''

Palm accused Wheeling-Pittsburgh of stalling the collective-bargaining and bankruptcy processes. He also said company negotiator Anthony Verdream twice told him the company would never file a reorganization plan unless the union agreed to a contract.

''In our opinion, that violates the court order,'' Palm said. Verdream could not be reached for comment.

Union officials also said the company's latest contract offer falls below the steel industry pattern, such as the proposal that was tentatively accepted last month by the union and the LTV Steel Co. of Cleveland. That agreement is under review by a bankruptcy judge.

Union negotiator Jim Smith said Wheeling-Pittsburgh's proposal is without a cost-of-living wage increase and offers neither recovery of employee sacrifices made since 1986 nor union involvement in a factory sale.

#90071u2328 03/12/1990 ~United Press International

ANALYSIS BY JOAN HANAUER

NEW YORK (MARCH 12) UPI - Babies born too soon and too small, of mothers

who have abused drugs and neglected prenatal health care - they are the people who make up the appalling infant mortality statistics in the United States.

You see the heart-breakingly fragile and damaged babies, their sad mothers and the dedicated professionals and volunteers who try to help them in ''48 Hours: Babies At Risk,'' to air on CBS Thursday, Mar. 15, 8-9 p.m. Eastern time.

Dan Rather, in introducing the documentary hour, presents what amounts to an indictment:

''A baby born in Hong Kong or Singapore has a better chance of surviving to its first birthday than a baby born here in Washington, D.C.''

Every 48 hours in the United States, 240 babies die, which adds up to 40,000 a year, Rather adds.

The first problem is lack of prenatal care. In Washington, a dedicated worker drives a van through a run-down neighborhood, jumping out when she spots a likely candidate, demanding, ''Are you pregnant?''

If the answer is yes, she asks if they are receiving prenatal care - and offers to drive them to a hospital clinic. She gets few takers.

Some are like the young woman who admits she had no early prenatal care because, ''I was to busy trying to hide it (her pregnancy) from my mother ...''

Now she has a high fever, her baby must be delivered prematurely by Caesarean section - and with respiratory problems.

Modern medicine can help this baby breathe until its lungs are ready to take over, but there is little medical machinery can do for the crack babies, often born addicted, brain damaged or otherwise compromised by their mother's drug abuse.

''The urge for the drug would overtake the concern I had for my child,'' one such mother explained. She did pray for her baby.

Lack of prenatal care presents an overwhelming problem in urban Washington and it also threatens the health of babies in rural West Virginia, where there is only one obstetrician in five counties who will accept Medicaid assignment.

A social worker who checks up on pregnant women and offers them transportation over as much as 50 miles to the one doctor who will care for them says, ''In this job you take the little successes and you hang

onto them.''

In Florida, they have a law - originally designed to trap drug dealers - that allows the state to arrest mothers who have ''delivered'' drugs to their unborn babies. Hospitals are supposed to test mothers and newborns who they suspect may be drug victims.

In Florida, ''48 Hours reports,'' there are 3500 reported cases of pregnant drug addicts a year and 135 residential beds for them.

The tragedy of the show is summed up by baby James, who weighed about one pound when he was born in Washington to an addict mother. James did not make it.

Janice is a little blond girl with leukemia and when Linus asks, ''Why, Charlie Brown, Why?'' there really is no answer.

That's the title and subject of the latest ''Peanuts'' special, to air on CBS Friday, Mar. 16, 8-8:30 p.m. Eastern time. It tells the story of the sick little girl and informs the other children on how to cope.

Serious moments mix with lighter notes. When the boys visit Janice in the hospital where she is receiving chemotherapy, they find Snoopy - dressed as the world's greatest surgeon - racing madly up and down the stairs.

''What the world's greatest surgeon doing running up and down the stairs?'' Linus asks.

''I imagine it's because he can't reach the elevator buttons,'' Charlie Brown replies.

Charles M. Schulz, the creator of the ''Peanuts'' gang, said in a telephone interview that the show evolved over several years.

''There was a nurse named Sylvia Cook who called me several years ago and wanted to know if I was interested in doing a short film that could be shown to children in hospitals about what they would have to go through,'' he said.

He discussed it with the animators, and over time the emphasis shifted.

''The direction of the film changed and we thought it would be better to do a film for the people around the child who is ill, about the problems the child has. Apparently brothers and sisters can be jealous because the child gets more attention, and kids in school can feel the same way.

''It occurred to me that this kind of thing is terribly expensive, and why not try to make it a regular CBS half hour show and let the sponsors pay

for the whole thing.''

Schulz had to read up on leukemia and sick children because, he said, he never draws anything unless he feels he knows a lot about it.

Fans of Snoopy, Charlie Brown, Lucy and the rest need not worry that the ''Peanuts'' gang is deserting humor for worthy causes.

''It occurred to me that I could help a bit,'' Schulz said. ''But I'm not out to save the world and do all sorts of meaningful shows.''

#90071u2333 03/12/1990 ~United Press International

(MARCH 12) UPI - A Greyhound bus was fired on Monday in Connecticut, the 11th day of a bitter and sometimes violent walkout against the nationwide carrier, while in Washington the union representing the 9,000 strikers expressed interest in resuming stalled contract negotiations.

No injuries were reported in the shooting in Farmington, Conn., which came less than 24 hours after another Greyhound vehicle was shot at near Jacksonville, Fla., injuring seven passengers. Authorities said they were investigating any possible links between the attacks and the bitter strike.

In Washington, meanwhile, Bernard DeLury, director of the Federal Mediation and Conciliation Service, said officials of the Amalgamated Transit Union ''indicated to us their willingness to return to the bargaining table as soon as possible.''

No contract talks were scheduled, but DeLury, who met with union President Jim LaSala, said the mediation service had made calls to Greyhound and was ''optimistic'' that the company would respond positively to a request to resume the negotiations. There was no immediate response from the company.

DeLury refused to comment on what was discussed in the meeting or the issues on which the union might be willing to compromise, if any, in the strike against the nation's No. 1 intercity bus service.

Greyhound Chairman Fred Currey offered a $25,000 reward for information

leading to the arrest and conviction of the person who fired on the bus Sunday in Florida, which was being driven by a replacement worker.

One bullet struck the bus and ''apparently fragmented,'' a sheriff's spokesman said. Of the seven passengers hurt, one of the two more seriously injured was struck in the throat, and the other was hit in the side.

The passenger with the neck wound was hospitalized in good condition Monday. Some of the other victims, most struck by debris, were released, and others were reported in stable condition.

The bus attacked Monday was traveling east on Interstate 84 between New York and Boston when it was fired on about 10:40 a.m. in Farmington, near Hartford, Conn., said state police Sgt. Richard Sealander. He said the shot apparently was fired from a car by a high-powered weapon.

The bus pulled into the Greyhound Terminal in Hartford, where a bullet hole was found in the door of the vehicle's left-hand luggage compartment, Sealander said. No injuries were reported.

The strike began Mar. 2, after negotiations in Scottsdale, Ariz., broke off on a new three-year contract for about 9,000 Greyhound employees represented by the Amalgamated Transit Union, including drivers, baggage handlers, mechanics, ticket agents and reservation clerks.

Greyhound spokesman George Gravley said that despite the strike, the company has been able to provide service, though only at 39 percent of capacity.

Greyhound, based in Dallas, carried 22 million passengers last year and is crucial to low-income travelers who live in smaller communities and as a carrier of emergency medical supplies.

Violent clashes, including one that led to the death of a man on a picket Mar. 3 in Redding, Calif., have marred the walkout as Greyhound has replaced striking drivers and some employees have returned to work.

Members of the Los Angeles County Federation of Labor and the union representing striking Greyhound workers held a rally and demonstration Monday in Los Angeles to support the strikers.

Greyhound has been granted temporary restraining orders in 13 cities, holding union leaders responsible for any violence.

According to company records, 1,800 union employees have returned to work despite the strike, including 358 drivers. The company also has hired 700 replacement workers.

The union says the hiring of replacement workers is illegal, and that actually only about 400 union members have crossed picket lines, with fewer than 100 union drivers returning to work.

Late last year Greyhound offered the union a new contract that included what the company described as a 6.9 percent increase in wages and benefits in the first year of the three-year contract. The union rejected that offer but has refused to disclose its demands.

The company has accused drivers, who now average $24,700 a year, of asking for wage hikes that could be financed only through a fare increase. Each side has accused the other of distorting its positions.

WASHINGTON (MARCH 12) UPI - Oliver North testified Monday that he saw his former boss, John Poindexter, tear up a politically embarrassing document signed by Ronald Reagan approving an explicit arms-for-hostages deal with Iran.

North, who had been scolded by U.S. District Judge Harold Greene for not cooperating as a witness at Poindexter's Iran-Contra trial, said he was there when the former national security adviser had the document retrieved from a White House safe and then tore it up.

The retired Marine testified he saw Poindexter ''tear it in two'' in Poindexter's White House office Nov. 21, 1986 - the same day Poindexter met with members of Congress in an effort to contain damage from the

scandal that marred Reagan's last two years in office.

Poindexter, 53, is charged with five felony counts of obstructing a congressional investigation into the scandal by lying and destroying documents.

Poindexter has already admitted destroying the document, but he made those comments to Congress under a grant of immunity. Since that confession cannot be used in the trial, prosecutors needed North to provide the evidence.

On Nov. 13, 1986, Reagan told the American people on national television that the United States had never traded arms for hostages.

Prosecutor Dan Webb asked North if Poindexter destroyed the document because it outlined a direct arms-for-hostages arrangement with Iran and would be even more embarrassing because of Reagan's denials.

''I don't know how it could be more embarrassing,'' North said.

Webb asked, ''It made Ronald Reagan out to have made a false statement to the people of the United States, right?''

''I suppose so,'' North said.

The document - a presidential ''finding'' - was signed by Reagan to retroactively justify the first secret shipment of U.S. missiles to Iran in late 1985.

While North said ''my theme was protecting the lives of the hostages,'' he later added, ''There's no doubt in my mind that I came to realize that finding was a disaster.''

Poindexter's lawyer, Richard Beckler, then began cross-examination of North in an effort to limit North's damage to his client, a retired Navy rear admiral.

Beckler, who was to continue his questioning Tuesday, sought to distance Poindexter from North by showing that Poindexter headed a large staff and did not know every detail of North's activities.

North, who engineered the secret operations to sell arms to Iran and provide covert help to the Nicaragua Contra rebels, testified that he tried to cover up both operations by shredding and altering documents at the direction of Poindexter's predecessor, former national security adviser Robert McFarlane.

Greene at one point became incredulous, asking North if he found it

''strange, bizarre, out of the ordinary'' to engage in destruction of documents that ''belonged to the United States government.''

North said he thought the effort to destroy or change documents was ''futile'' because there was so much related evidence in secret White House files.

North also testified that Poindexter approved the diversion of money from Iranian arms sales to the Contras and warned him to keep it secret.

In his second day of testimony, North, a retired lieutenant colonel, was again extremely reluctant to implicate Poindexter.

North continued to quibble with prosecutors over words and phrases, and claimed he could not recall numerous facts.

North's tactic, which he used for more than five hours Friday, angered the judge, who several times scolded North and told him to be more forthcoming.

''The witness, every time a question is asked of him, almost every time, says he doesn't remember,'' Greene remarked. ''It's like pulling teeth.''

Late in the day, Greene said North had become somewhat more cooperative.

North also said Poindexter had given him a ''general admonition'' that word of the Iran-Contra scheme should never leak out.

Poindexter was impassive as North testified. His wife, Linda, an Episcopal priest who has attended the proceedings sporadically, sat in the front row of the courtroom.

North, who last year was convicted of some crimes from the scandal and acquitted of others, also repeated earlier statements that he always believed Reagan was aware of the diversion of money to the Contras and that he had asked Poindexter to make sure the president had approved the plan.

The money diversion is not a central issue at Poindexter's trial, but the key question has always been whether Reagan knew about it. The president has insisted he was not aware of the plan and Poindexter told Congress in 1987 that he never told Reagan about it.

Poindexter is the highest ranking Reagan administration official to stand trial in the scandal and is the last of the original Iran-Contra defendants.

In another trial development, Greene said he would not allow the jury to be told about North's Iran-Contra convictions, or about counts on which

North was acquitted.

#90071u2364 03/12/1990 ~United Press International
LOS ANGELES (MARCH 12) UPI - Murder charges carrying a possible death sentence were filed Monday against two brothers accused of slaying their parents, a wealthy entertainment executive and his wife who were shot to death in their Beverly Hills mansion.

District Attorney Ira Reiner said the pair killed their parents last August in hopes of inheriting an estate estimated to be worth about $14 million.

He said the case was cracked after Beverly Hills Police seized tape-recorded conversations the brothers had held with a Beverly Hills psychologist, Dr. Jerome Oziel, following the murders.

Lyle Menendez, 22, and his brother, Erik, were charged with two counts of murder each.

They were also charged with three special circumstance allegations - murder for financial gain, murder while lying in wait and multiple murders - that make them eligible for the death sentence if convicted.

''We are alleging as a motive financial gain,'' Reiner told a news conference. ''I don't know what your experience is, but it's been our experience in the District Attorney's Office that $14 million provides ample motive for someone to kill somebody.''

Lyle, arrested Thursday outside the family mansion on Elm Drive, and Erik, arrested Sunday after voluntarily returning from Israel, where he had been playing in a tennis tournament, remain in custody without bail.

They were be arraigned in Beverly Hills Municipal Court later Monday.

The two are charged with the shotgun murders of their parents, Jose Enrique Menendez, the 45-year-old Cuban-born chairman and chief executive of Live Entertainment Inc. of Van Nuys, and his wife, Kitty, 44, inside their Beverly Hills mansion Aug. 20.

Menendez and his wife were killed with about 12 blasts from two 12-gauge shotguns fired at close range while watching television in their den.

Defense attorney Gerald Chaleff, who represents Lyle Menendez, has charged that the taped conversations with the psychologist are privileged material were illegally obtained by the police when they served a search warrant on Oziel's home and will not be admissible in court.

But Reiner said the tapes are not privileged because ''it is very clear in the law that the privilege does not apply when there is a continuing threat of violence to the safety of others.'' He declined to elaborate or to specify whom the alleged continuing threat was against.

However, Reiner said he has instructed his prosecutors to ask the judge to unseal the search warrant affidavit that contains details of the investigation and evidence against the brothers. Defense attorneys were expected to oppose the move.

Reiner said that, even without the tapes, which he called ''very important evidence,'' the prosecution has a strong case against the brothers.

''We've received a substantial amount of evidence. But we're not going to discuss it,'' he said.

#90071u2430 03/12/1990 ~United Press International

TRENTON, NJ (MARCH 12) UPI - Gov. Jim Florio signed into law Monday a bill to lower New Jersey's soaring car insurance rates, and the state's largest insurance company immediately said it would seek to have the measure declared unconstitutional.

Allstate Insurance Co. Vice President Edward Young said the company would file suit, probably in federal court, within 30 days, on the grounds that the law violates constitutional protections of due process. He said Allstate might seek an injunction blocking the law from going into effect.

New Jersey's insurance rates, averaging $1,000 a year, are among the highest in the nation and have been the target of a massive grass roots reform movement that about a year ago showered the governor's office with more than 100,000 letters demanding reductions.

''This strikes a blow for working people ... who have been oppressed by this unfair tax we call automobile insurance,'' Florio said. ''People wanted us to respond and respond quickly and we've done that.''

Insurers object to a requirement that insurance companies that sell automobile coverage in New Jersey pay off $1.4 billion of the $3 billion debt of the Joint Underwriting Association, the state's pool for high-risk drivers.

The pool has accumulated the debt in its six years of operation because insurance companies that write JUA policies instead of policies in their own names receive commissions but are not required to pay claims. The pool has grown to insure about half the state's 4 million motorists.

Florio's plan would replace the JUA with a new assigned-risk plan limited to 10 percent of the state's drivers, and would eliminate the $222 annual surcharge all insured drivers under 65 pay to subsidize the pool.

The surcharge makes up about 20 percent of the $1,000-a-year average car

insurance premium in New Jersey.

Doctors, lawyers and body shops - all blamed by Florio for driving up the cost of insurance - also would help pay off the JUA debt with a $100 annual increase in license fees. Motorists would chip in as well, with increases of between $15 and $50 in the current $27.50 annual vehicle registration fee.

Besides eliminating the JUA surcharge, the new law also allows motorists to save another $40 by having medical bills from auto accidents covered by their health insurance instead of by their car insurance.

(MARCH 12) UPI - Oliver North testified in Washington today that former national security adviser John Poindexter approved the diversion of money from Iranian arms sales to the Nicraguan rebels, and warned North to keep it secret. The judge in Poindexter's Iran-Contra case repeatedly scolded

North to answer the questions put to him.

U-S officials say former Haitian military dictator General Prosper Avril is in Florida... two days after resigning from power. Avril and his family left Haiti this morning on a U-S military jet and later arrived at Homestead Air Force Base. They could NOT leave the base as planned because of a crowd of protesters at its gates.

Federal mediators are meeting in Washington, D-C, today with leaders of the union representing nine-thousand striking Greyhound workers. NO contract talks were scheduled, but the mediators wanted to discuss the 11-day-old walkout that has been marred by violence. The meeting comes one day after a sniper attack on a Greyhound bus near Jacksonville, Florida, injured seven passengers.

Police in Green Bay, Wisconsin, say the number of fatalities from a fiery chain-reaction accident on Interstate 43 this morning may rise as crews reach motorists who were left trapped in their cars. At least three people were killed and two dozen others injured when more than 40 cars crashed in a dense fog on the Tower Drive Bridge.

People wore more shirtsleeves than sweaters today in the eastern half of the nation as summer-like weather dominated. Temperatures were headed into the 80's along parts of the Atlantic Coast. Sections of the Southwest already hit with weekend flooding are being threatened with more rain.

#90071u2502 03/12/1990 ~United Press International

(MARCH 12) UPI - A conservative leader of the Soviet Union's Politburo today ruled out the use of force against Lithuania. The Baltic republic declared its independence from Moscow yesterday. But Politburo member Yegor Ligachev says Lithuanians ''should think long and hard before they decide to leave.''

Also today, an opposition political leader called for Mikhail Gorbachev to face a popular election for president. Gorbachev is expected to be elected by parliament tomorrow. The opposition leader says his emerging inter-regional group prefers election by all voters.

The White House says it's willing to talk about a Democratic plan to kill off the federal deficit through higher taxes and spending cuts. But spokesman Marlin Fitzwater says ''there are a lot of problems'' with Illinois Representative Dan Rostenkowski's plan. Parts of the plan have previously been considered taboo by the administration.

The White House acknowledged today that U-S aid Panama is bottled up in Congress. Panamanian President Guillermo Endara is on a Lenten fast to

show solidarity with the poor. The White House says it's trying to get lawmakers to approve one-BILLION dollars in assistance.

Britain is warning Iraq NOT to execute a jailed British journalist who was convicted of spying along with a second Briton. British officials say the sentences are UNjustified and if carried out they would ''seriously damage good relations'' and disrupt trade. The second Briton was sentenced to 15 years in prison.

#90071u2547 03/12/1990 ~United Press International

DETROIT (MARCH 12) UPI - Several General Motors Corp. car assembly plants are said to be ''furiously'' bidding for future truck production to help GM correct an expected shortage of small truck capacity within the next two years, industry sources said Monday.

GM's Linden, N.J., car assembly plant, which currently builds the Chevrolet Corsica and Beretta 'L' cars also produced at its Wilmington, Del., plant, is vying to build the next generation of small pickup trucks, MetalWorking News magazine said in its latest issue.

However, other industry sources said Linden is just one of several plants in contention for production of the new truck line, code-named 'GMT325' and slated to replace the current Chevrolet S-10 and GMC S-15 pickup trucks by 1993.

''Linden is among four or five plants furiously putting together bids to get it,'' said William Pochiluk, head of Autofacts, Inc., a Paoli, Pa., automotive research firm. ''But nothing has been officially approved.''

While the Linden plant is considered the front-runner, GM plants in Pontiac, Mich., Oklahoma City, Okla., and Leeds, Mo., are also bidding for the work, Pochiluk said.

Also in the running is GM's Doraville, Ga., plant, now the sole source of Oldsmobile's mid-sized Cutlass coupes and sedans.

Although Doraville is unlikely to be picked, that means Cutlass production would have to be consolidated at GM's Fairfax plant in Kansas City, Mo., which now builds Grand Prix cars, in a bid to fully utilize that plant.

GM's small pickups are currently built at plants in Moraine, Ohio, and Shreveport, La.

One plan under consideration is to keep the Pontiac West plant that now builds compact sport utility vehicles and add capacity. Another is to move production out of Pontiac West to a larger plant that would build the

GMT325.

''GM will have a significant truck shortage in 1991 and 1992,'' Pochiluk said, adding that capacity must be added by either reactivating an idled facility or changing over an active car plant.

Changing the Linden plant to truck production by 1993 would make sense, since GM will be consolidating its smaller cars onto the Beretta/Corsica 'L' platform within that time frame, he said.

The 'N' cars, like the Pontiac Grand Am and Oldsmobile Calais built at GM's Lansing, Mich., plant, will be consolidated with the 'L' cars by 1992. The 'J' cars like the Chevrolet Cavalier and Pontiac Sunbird will be added to the platform in 1994.

Separately, an internal study done by GM within the last two months shows its Linden plant ranked 20th out of 21 North American passenger car facilities, with its cars experiencing 511 problems per 100 cars, or twice the number of problems experienced at the Buick City plant in Flint, Mich. GM's quality leader.

GM's Van Nuys, Calif. plant, which builds Chevrolet Camaro and Pontiac Firebird cars, ranked last in the internal survey. That plant will probably be idled sometime after 1992, when GM most likely shifts production to its plant in Ste. Therese, Quebec.

Rival carmaker Ford Motor Co. said last September it would invest $285 million to retool its Escort subcompact car plant in Edison, N.J., and begin building Ranger compact pickup trucks later this year.

#90071u2661 03/12/1990 ~United Press International

WASHINGTON (MARCH 12) UPI - The nation's capital will flower a brilliant pink and white later this week when the city's famed cherry trees sprout their blossoms, their earliest arrival ever, said the National Park Service.

''The most spectacular weekend for people to visit Washington and see the cherry trees around the Tidal Basin in their greatest glory will be this weekend,'' William Anderson, a National Park Service scientist, said at a newsconference on Monday.

The expected March 15 peak bloom would shatter the previous record set on March 20, 1945. Record-keeping began in 1927, the first year of the annual National Cherry Blossom Festival.

Peak bloom occurs when 70 percent of the trees are covered with red and

white pedals. The average peak date is April 7.

The premature bloom was prompted by record-high temperatures from early February and will mean that most of the blossoms will fall from more than 3,200 trees along the Tidal Basin, East Potomac Park and the National Mall before April's festival.

The weeklong festival is set to start April 1 and is expected to draw more than 500,000 tourists.

''I fear for this year's Cherry Blossom Festival, that the Yoshino cherry tree, the variety that's found in the greatest abundance ... will probably have peaked its blossoming by the time the festival begins,'' Anderson said.

By Monday blossoms were seen on a third of the trees along the Tidal Basin a large body of water near the Jefferson and Lincoln memorials and the Washington Monument, Anderson said.

With a record high of 88 degrees at Washington's National Airport Monday - and temperatures projected in the 80s again Tuesday and Wednesday - the buds were expected to bloom rapidly later in the week, he said.

No major changes are planned for the festival, which commemorates Japan's gift of 3,000 cherry trees to the United States in 1912.

Cherry trees were introduced to the city in 1909, when Helen Taft, wife of President William Howard Taft, planted 90 trees along the banks of the Potomac River.

#90071u2691 03/12/1990 ~United Press International

NEW YORK (MARCH 12) UPI - The ceiling of a restaurant in a landmark Manhattan hotel collapsed ''like an earthquake'' Monday, killing one diner and injuring as many as 17 other people, authorities said.

The ornate plaster ceiling of Croissant & Co. collapsed about 3:50 p.m., and water immediately began to gush from the restaurant's sprinkler system and briefly flood the restaurant, Fire Department spokesman Efrain Parrilla said.

The collapse, which appeared to have been confined to the restaurant on the ground floor historic Ansonia Hotel, may have been linked to construction or renovation on the floor above the restaurant, Parrilla said.

Some of the injured were trapped briefly in a shower of plaster, metal,

concrete and water, but everyone inside the restaurant was believed to have been accounted for, Parrilla said. The entire block-long building was evacuated as a precaution, the spokesman said.

''The building collapsed while we were sitting and having coffee,'' said one woman who was inside the chic restaurant at the time. ''It was like an earthquake.''

One woman, identified only as a customer in her 30s, was pronounced dead at the scene, Emergency Medical Service spokesman Charles DeGaetano said. He put the number of injured at 12, but police spokesman Officer Anthony Mazzola said 17 people were hurt.

The restaurant was left a gutted shell littered with shards of glass and 20-pound plaster cornices.

''I felt a vibration, and then I heard a big boom,'' said Elvin Rodriguez, a security guard at a nearby Barnes & Nobles bookstore. ''Water was gushing all over. This guy named Tony who sells books here on the street ran in and he pulled one person out. He was soaking wet.''

Police officer Desmond Stafford, who arrived at the restaurant moments after the collapse, said diners and employees ''were breaking out the windows from the inside. We were grabbing them, trying to get them out. But once they got outside they wanted to go back in and get the others still trapped inside.''

Ziggy Hirsch said he also arrived moments after the collapse and saw three bloodied people being led out of the debris. ''When I ran over, I saw a bloody jacket on the ground,'' he said.

Charles Smith, a spokesman for the city's Buildings Department which licenses construction and renovation work, said a large triangular section of the ceiling gave way. He said the old-fashioned ceiling was far heavier than those of modern-day construction.

''It was the original ceiling, and the pipes gave way,'' Smith said. ''We don't know why they gave way now. ... There's no evidence that a water leak weakened the ceiling.''

The Ansonia Hotel, an imposing structure on upper Broadway, was built in 1904 and has long been hailed as one of the city's architectural gems. Some of its more illustrious guests have included conductor Arturo Toscanini, soprano Lily Pons and composer Igor Stravinsky.

#90071u2729 03/12/1990 ~United Press International

GREEN BAY, WI (MARCH 12) UPI - Fifty-two vehicles collided in a fiery chain reaction on a fog- and smoke-shrouded bridge during the Monday morning rush hour. At least three people were killed and 30 others were injured, authorities said.

The accident, which left cars jammed together like an ''accordion,'' occurred about 6:45 a.m. on the Tower Drive Bridge, Green Bay's tallest structure, and touched off a fire fueled by leaking gasoline, police Capt. Larry Gille said.

Among the 52 vehicles in the mass wreck were three large trucks, including a fuel tanker, Gille said.

''It was like boom! boom! boom! every couple of seconds,'' said James Vandertie, 19, who escaped the crash.

Two people were burned to death near the flaming truck and a third was crushed in his small car that was caught between two other vehicles, police said. Of the 30 people injured, six remained hospitalized Monday night, including three in serious condition, hospital officials said.

Deputy Police Chief Robert Kreuser said a semi-trailer truck and two cars were involved in an initial accident, and that dense fog plus smoke from nearby factories limited visibility and drew more unsuspecting motorists into the wreck.

Police said the chain reaction apparently began when drivers slowed because of reduced visibility on the high-rise bridge, which crosses the mouth of the Fox River at the bay of Green Bay.

''We had the smoke coming over from the factories and we had the fog. That combined and the vehicles began slowing down because they could not see and we had a chain reaction, rear-end type collision,'' said Lt. Bob Bocher, one of the first officers to arrive at the scene.

Police Lt. John Thompson said the speed limit on the bridge is 55 mph and there are no signs for motorists to slow down in inclement weather. ''Maybe there will be after today,'' he commented.

''It was just an accordion type of thing, they just kept running into those vehicles already stopped,'' Gille said. ''There was a fire about the middle of it. A large truck was on fire, a semi truck. What it was carrying I have no idea. That is the area where we had our fatalities.''

Sharie Deicher, 39, who was involved in the accident but was not injured, called the burning truck ''just a mass of flames.''

The bridge was closed as firefighters brought the flames under control,

and authorities worked for hours to free trapped motorists. Police said 17 wreckers and a crane were brought to the scene to remove the wreckage.

''The fog was just like a thick blanket. There was no way of stopping,'' said Julie Vlies, 36, of New Franken, one of the drivers involved in the crash on the bridge that arches 200 feet above the Fox River.

Oklahoma truck driver Victor Brown, 30, said one woman was trapped in her vehicle at the bottom of a pileup and her car was ''bent up, just like a folded pancake. I heard her saying 'Help me, get me out of here.' I couldn't do anything to get her out.''

One of the injured, Leo Terry of Green Bay, said he was traveling 55 mph when he hit a wall of fog and plowed into a stopped car in front of him. ''You couldn't see nothing,'' he said.

Jim Reck, a spokesman at St. Vincent Hospital, said 23 people were treated for injuries and five of those were hospitalized, including three in serious condition. A spokesman at St. Mary's Hospital said seven were treated, including one hospitalized in fair condition.

#90071u2756 03/12/1990 ~United Press International

(MARCH 12) UPI - Oliver North testifies in the Iran-Contra trial of his ex-boss... A Soviet communist hardliner says Moscow woN'T try to force Lithuania NOT to secede... Latin American leaders press for speedy disarming of the Contras... U-P-I has these top stories and more, next.

Oliver North testified today that former national security adviser John Poindexter told him to keep secret the diversion of money from Iranian arms sales to the Nicaraguan Contra rebels.

North said Poindexter gave him a ''general admonition'' that word of the scheme should NEVER leak out.

North spoke in his second day of testimony in Washington in the trial of Poindexter. North's former boss is charged with five felony counts of obstructing the congressional investigation into the Iran-Contra scandal by lying and destroying documents.

North said Poindexter gave his personal approval each time profits from the secret arms sales to Iran were transferred to the Contras. Last week, North testified that Poindexter knew of all aspects of the covert plan to arm the rebels.

U-S District Judge Harold Greene today admonished North to answer the questions put to him. Greene complained that getting North to remember the

subject he's asked about is ''like pulling teeth.'' At one point, North claimed he did NOT remember what he had said on Friday.

-30- 1514

#90071u2786 03/12/1990 ~United Press International

KISSIMMEE, Fla. (MARCH 13) UPI - Walt Disney Co. executives Monday evening announced plans for a multimillion development on 4,000 acres of company land south of its theme parks in central Florida.

The development would be the first on Disney's Osceola County land, acquired in the 1960s for its theme parks.

''It's rural land now. It's undeveloped land. When you drive by now, you don't think much of it,'' said Tom Elrod, senior vice president for Disney attractions.

The development will include a 1.5 million square foot upscale shopping mall that would be the biggest in central Florida, Disney said.

Elrod said the mall should be open in four years.

Disney executives said the development would also include a residential element, but Elrod and Dick Nunis, president of Walt Disney World Cos., provided few details of the company's plans.

Osceola and Orange County officials told The Orlando Sentinel the development would include as many as 6,000 homes, starting at $90,000.

The project reportedly will include about 6 million square feet of commercial office space and 1.2 million square feet of light-industrial office and manufacturing space.

The project also would be subject to county authority, since Disney has agreed to de-annex the property from its Reedy Creek Improvement District. That would make the company subject, for the first time, to water, sewer and road impact fees.

The Reedy Creek district was established in 1967 and gives Disney virtual autonomy over its property and frees it of local government control.

#90071u2820 03/12/1990 ~United Press International

(MARCH 12) UPI - In Moscow, a conservative Communist policy-maker says the Soviet Union woN'T use force to keep Lithuania in its union. Yet, Yegor Ligachev warns the republic of Lithuania ''should think long and hard'' before seceding.

Lithuania has already declared itself independent, as of yesterday.

Soviet President Gorbachev calls the decision ''alarming.'' That despite Gorbachev's declared intention of devising a way for republics to leave the Soviet federation if they wish.

A close aide to Gorbachev forecasts long negotiations before Lithuania finally leaves the Soviet Union despite the declaration.

But some Soviet lawmakers see their colleagues as playing catch-up with events around them.

Rising legislative star Sergei Stankevich says Lithuania's decision should alert lawmakers that the Soviet Union is disintegrating. He urges, ''immediate negotiation with all republics on developing a new basis of federation.''

Another opposition leader called for Gorbachev to face a popular election, rather than the parliamentary election tomorrow which Gorbachev is expected to win easily.

Plans to move ousted Haitian dictator General Prosper Avril from Florida's Homestead Air Force Base to the town of Boca Raton were delayed by a group of protesters at the gates of the base today.

Avril and his family arrived at Homestead this morning aboard a U-S military jet... two days after he was forced to resign in the face of violent anti-government protests.

Avril was to be driven to Boca Raton where he's believed to own property... but the demonstrators blocked his movement. The crowd was made up of mostly Haitian refugees who're calling for the former military ruler's execution.

Refugees in nearby Miami say they'll ask U-S prosecutors to try Avril on charges of killing his opponents... violating human rights... and looting Haiti's treasury.

In Haiti, Army Chief of Staff Herard Abraham took over as interim leader after Avril's ouster. Abraham has now accepted the nomination of a Supreme Court justice who'll eventually lead the government under a plan arranged by opposition leaders.

But the justice went into hiding until her swearing-in... possibly later today... because of fears of a coup.

#90071u2826 03/12/1990 ~United Press International

NEW YORK (MARCH 13) UPI - Investor Harold Simmons, waging a proxy battle to replace the board of Lockheed Inc., said Monday he would, if successful, curb the company's diversification and focus on its core space, missile and aeronautics businesses.

Lockheed needs better management to profit in the face of projected declines in government defense spending, Simmons said at a meeting in New York to explain his plans to shareholders and industry analysts.

''I think the defense industry is shrinking today and you have to be able to manage effectively in a shrinking industry,'' he said.

Asked why Lockheed should concentrate its efforts in a contracting industry, Simmons replied, ''That's what they know best. I think that's where they can make money.''

The Texas investor, who owns nearly 19 percent of the aerospace giant's stock, has proposed a 15-member slate to replace the current board at Lockheed's annual meeting March 29.

Simmons and J. Landis Martin, president and chief executive officer at the Simmons-controlled NL Industries, said Lockheed must drastically cut overhead costs and curb diversification into areas such as commercial aircraft modification and maintenance.

''We think they've done a poor job in diversification over the past few years,'' Martin said.

Simmons said he would insist on a strategy of ''return on investment'' to run Lockheed, and non-core businesses would be required to achieve acceptable profitability, he said.

''Lockheed's greatest strategic weakness is they do not measure return on investment,'' he said. ''They talk about sales, they talk about marketshare, they talk about synergy.

''By working with return on investment as a goal, you can accomplish a lot '' Simmons told shareholders. ''I'd like an opportunity to do that and I think I'll make us all a lot of money.''

Martin said Simmons has received ''many indications of support, directly and indirectly,'' in the bid to take control of Lockheed and they planned to meet with major shareholders to muster support for their effort.

Should the effort fail, Martin said there were no plans to sell the stake Simmons holds in Lockheed through NL Industries nor engage in a stock swap.

''We're in for the long haul. We plan to hold our shares and make a difference here,'' Martin said.

''We have no plans to merge Lockheed with any NL company in any transaction that would force out shareholders involuntarily,'' he added.

Simmons also said he did not plan to acquire more Lockheed stock, but he quipped, ''If the stock goes to five bucks, I might buy some more.''

Lockheed closed unchanged at $35.625 a share Monday on the New York Stock Exchange.

Martin also said he projects real cuts in defense spending will reach 5 percent to 7 percent, and may go as deep as 10 percent.

''The real question is whether the management running Lockheed today has grasped the significance of their problems,'' he said.

If successful, Martin said they would not amend Lockheed's pension plan to take out any overfunding and would support stockholder rights such as confidential shareholder voting and elimination of a poison pill, or shareholder rights plan designed to prevent a hostile takeover.

They also said they would forbid lucrative golden parachutes for executives, unless shareholders approved them, and would oppose greenmail, a term used to for paying for stock from a potential raider.

Simmons also said he would not necessarily change the management of Lockheed, headed by chairman Daniel Tellep.

''I would be happy to work with Daniel Tellep if he's willing to work with me,'' Simmons said.

Included on his slate are former Texas Sen. John Tower and retired Adm. Elmo Zumwalt, former member of the Joint Chiefs of Staff.

Lockheed began an extensive restructuring last April after Simmons first disclosed he had acquired 5.2 percent of the stock. That program included cutting the work force in aeronautical and defense electronics, selling surplus real estate, divesting most of the information systems group and creation of an employee stock ownership program.

In a letter to shareholders dated Friday, Tellep said, ''We expect the benefits of Lockheed's restructuring program will be seen beginning in the current year.''

Tellep said parts of that restructuring have included the write off of

$465 million in fixed-price development contracts late last year, consolidating its electronic systems group and reducing the reliance on government military systems.

''We believe we are one of the leading contractors in the missles and space business,'' Tellep said, adding that the Lockheed will continue to exploit that area.

Tellep also said that Simmons has not proposed any plans to enhance Lockheed's programs.

#90071u2834 03/12/1990 ~United Press International

ONTARIO, Calif. (MARCH 13) UPI - Nearly 1,000 technicians and other workers with Lockheed Aircraft Service Corp. walked off the job Monday at four plants whereAir Force and Navy planes are maintained, officials said.

The strike, which came just after workers at Lockheed production plants approved a contract Sunday, was called over wages and bonuses began at 12:01 a.m. at maintenance and repair facilities in Upland and Chino and at two plants in Ontario, said union and company officials.

The 933 members of Local 821, District 120 of the International Association of Machinists and Aerospace Workers, AFL-CIO, were unhappy with a cost-of-living ''takeaway'' and a wage-freeze that would affect 49 percent of the membership, said IAMAW negotiator Bob Gregory.

Gregory said the company wanted to cut the workers' current cost-of-living allowance by 67 percent and planned to ''red-circle'' or freeze wages for people in certain job classifications.

He also said the company would not agree to give the maintenance workers a $2,500 signing bonus given to production workers after they accepted their contract Sunday.

''People are hurt that management was treating them this way,'' Gregory said. ''They've done a lot for the company in the last year, got it back on schedule ... For the company to come out with the takeaway, it's very distressing to them.''

Gregory also said the workers were upset about a plan to ban smoking on the plant grounds.

The aircraft service company would not comment on the specifics of the contract dispute, said.

''Our business is more sensitive to cost increases than the production

business,'' spokesman John Dailey when asked about the bonuses. ''So our offer is what we consider to be a fair offer but still keeps us competitive within the industry.''

Company and union officials broke off talks Saturday at noon. Neither side could estimate how long the strike would continue.

The four Lockheed facilities do maintenance and remodeling work for the Air Force and the Navy, Dailey said. He said the company was maintaining its work schedule by using managers to fill orders.

About 20 strikers were picketing peacefully throughout the morning at the main entrance to the Lockheed headquarters at Ontario Airport, Gregory said.

IAMAW members at Lockheed International plants in Palmdale, Burbank and Sunnyvale, Calif. and in Marietta, Ga. voted Sunday to accept a two-year contract. Those workers and the maintenance employees had been working on a contract that expired in November, officials said.

(MARCH 12) UPI - NO contract talks are scheduled today in the ongoing Greyhound bus strike. But discussions concerning the 11-day-old walkout are taking place in the nation's capital.

Federal mediators called leaders of the union representing nine-thousand striking Greyhound employees to Washington to discuss the dispute. It's UNclear if Greyhound officials will be asked to take part in the meeting.

The meeting is the first high-profile effort at ending the walkout which has severly cut service at the nation's top inter-city bus carrier.

The dispute has also been plagued by violence.

Today's meeting comes one day after a sniper attack wounded seven people on a Greyhound bus near Jacksonville, Florida. This morning, the driver and passengers aboard a bus on Interstate 84 reported they were fired at from a car near Hartford, Connecticut. A bullet hole was found in the luggage compartment door on the driver's side but NO one was injured.

Authorities say it's NOT clear if the shooting is related to the strike.

Greyhound Chairman Fred Currey has announced a 25-thousand-dollar reward

for information leading to the arrest and conviction of the Florida sniper.

The Food and Drug Administration is taking action today on two fronts aimed at fighting the deadly disease AIDS.

The F-D-A gave its approval for nationwide testing of a post-exposure AIDS vaccine developed by the scientist who pioneered the polio vaccine.

The vaccine developed by Dr. Jonas Salk will be given to 60 people who are infected with the AIDS-causing human immuno-deficiency virus ... but have NOT developed any symptoms of the disease.

The new vaccine consists of inactivated AIDS virus... and researchers hope it will spark an immune response that'll halt or reverse spread of the disease.

It has already been tested in chimpanzees and about 100 AIDS-infected people.

In its second course of action, the F-D-A asked a New York-based drug manufacturer for more information about possible adverse reactions to an experimental AIDS drug, known as D-D-I.

The Bristol-Myers Squibb Company reported a number of adverse reactions... including deaths. The company was also asked to distribute a letter to doctors using D-D-I in studies... informing them of the possible problems.

#90071u2903 03/12/1990 ~United Press International
(MARCH 12) UPI - The first Soviet soldiers began leaving Hungary today under a new withdrawal agreement.

The Soviets boarded a train heading for home, as a Soviet military band played the two countries' national anthems as the train loaded up in a small town west of Budapest.

Young pro-democracy protesters waved signs saying, ''Hurry home.''

Under an agreement signed in Moscow during the weekend, two-thirds of the Soviet troops and equipment in Hungary are to be pulled out by the end of 1990. The costs of the process will be covered by Moscow.

There are almost 50-thousand Soviet soldiers in Hungary as well as 27-thousand combat vehicles.

One departing soldier carried a guitar. Another had a large chess table under his arm. Most of them looked tense, and few seemed cheerful.

Latin American leaders today urged Vice President Quayle to push for the speedy demobilization of the Nicaraguan Contras.

In the middle of his Latin American tour, Quayle met in Santiago, Chile, with Costa Rican President Oscar Arias. The Nobel Peace Prize winner represented a group of regional presidents who greeted Chile's newly inaugurated president, Patricio Aylwin .

Quayle then attended a lunch with foreign dignitaries.

Arias said a U-S repatriation fund for the Contras would be a ''very attractive carrot.''

The Contras' refusal to immediately disband is seen as a major obstacle to the peaceful transition of power in Nicaragua.

Arias warned the Contras must NOT become ''an excuse'' for a troubled transition.

#90071u2960 03/12/1990 ~United Press International

LOS ANGELES (MARCH 13) UPI - Fox Inc., which operates both a movie studio and a television network, said Monday it plans to spend $200 million on a redevelopment and expansion of its studio facilities.

Fox said that it will replace some outdated buildings, remodel and renovate others and move KTTV Television, Channel 11, from Hollywood to the studio lot in West Los Angeles.

The film studio, Twentieth Century Fox, has occupied the lot since 1928. Fox Inc. Chairman Barry Diller said the renovated studio would continue to be low-rise and low-density in character.

Fox said it has retained ''world renowned'' architect Richard Meier to design the new facilities.

Meier is widely credited with popularizing sleek white hi-tech architecture in the 1970s. He designed the High Museum of Art in Atlanta and the $500 million Getty Museum now under construction in the Brentwood section of West Los Angeles.

Fox, a unit of News Corp., said the site would continue to be its headquarters and operating facility for the studio and the Fox network.

Fox will have to obtain approval for the project from the city, since the specific plan for that area reflects plans by Fox's previous owners to

develop offices, a hotel and 2,200 condominiums on the site. Building the condominiums, Diller said, would require the construction of three new streets and worsen the area's traffic problems.

Fox said it has started exploratory talks with the city of Los Angeles about its plans, which would increase its production, stage and office space at the 54-acre lot to 1.9 million square feet from 1.1 million square feet.

#90071u3049 03/12/1990 ~United Press International

(MARCH 12) UPI - The tower at Los Angeles International Airport is back in full operation after a telephone bomb threat forced evacuation of some air traffic controllers. Authorities say NO bomb was found, but the incident temporarily halted take-offs and landings at the nation's fourth-busiest airport.

A State Department spokeswoman says ousted Haitian ruler General Prosper Avril was flown to a U-S air force base in Florida to help restore order and democracy in Haiti. She says Avril is now free to travel wherever he chooses.

Nelson Mandela today met fellow African National Congress leader Oliver Tambo for the first time in 27 years. The two met in Stockholm, Sweden, and began discussing the future of the group's fight against South Africa's white minority rule.

The president of Tanzania today asked for the resignation of his entire cabinet. A presidential statement gave NO reason for the mass dismissal, but government sources say it's a prelude to tough action against corruption.

Investigators in Jackson, Mississippi, say they have new leads in the 1963 slaying of civil rights activist Medgar Evans. Investigators refused to give details of the findings, saying the case... which was recently reopened... is still an active investigation.

The Army reported today that two female soldiers who balked at driving troops into an area of heavy fighting in Panama will NOT be disciplined. A soldier on the scene replaced the two with other drivers. The Army said NO order was given or refused in the December incident.

China's leaders today... in an implied acknowledgement of discontent... told Communist Party members to strengthen their ties with the people. The Central Committee meeting in Beijing is believed to have also approved national policies for the next year.

Supporters of political extremist Lyndon LaRouche celebrated on the steps of an Oregon, Illinois, courthouse today after a judge declared a mistrial in the criminal case of three LaRouche employees. The mistrial was declared after the chief prosecution witness suffered a stroke.

New York police are preparing to question a 12-year-old boy about an attack which left him severely burned over half his body. David Aupont remains in critical condition nearly a week after the attack at the hands of a 13-year-old boy.

The summer-like weather in the eastern part of the nation is NOT making organizers of Washington, D-C's, annual Cherry Blossom Festival happy. The warm temperatures are expected to cause cherry trees to be in full bloom by the weekend... several weeks before the festival.

-30- 2796

#90071u3104 03/12/1990 ~United Press International

INDIANAPOLIS (MARCH 12) UPI - Janet Evans won the Sullivan Award on Monday night, symbolic of being chosen the top U.S. amateur athlete. Full comprehension of the achievement, she said, will take some time.

''It's kind of like the Olympics. It will hit me in a little bit,'' Evans said. ''After a while you realize your name goes down in history. It takes a while to sink in. For athletes, it's the greatest honor.''

Evans, who won three swimming gold medals at the 1988 Olympics, took the Sullivan for achievements in 1989. She won 18 of 20 races last year, set a world record of 8:16.22 in the 800-meter freestyle and added American records in the 1,000-yard freestyle (9:25.49) and 1,650-yard freestyle (15:44.98).

''It was just an honor to be one of the finalists,'' Evans told a crowd of 1,300 at the award dinner. ''Winning the award is even more of an honor. I know the hard work paid off. I'm really happy.''

Evans was the ninth swimmer to win the Sullivan, the first since Tracy Caulkins in 1978. She was the eighth three-time finalist to take the award.

The 18-year-old from Placentia, Calif., became only the 10th woman to win the Sullivan, but female athletes have taken the honor four of the past five years. Marathon runner Joan Benoit-Samuelson won in 1986, heptathlete Jackie Joyner-Kersee received the honor in 1987 and sprinter Florence Griffith Joyner won last year.

A record seven women were finalists this year, including 1988 Olympic speedskating champion Bonnie Blair, gymnast Brandy Johnson, diver Wendy Lian Williams, skiier Tamara McKinney, rower Kristine Karlson and modern

pentathlete Lori Norwood. Other finalists were two-time Olympic gold medalist Roger Kingdom, wrestler John Smith and canoe paddler Jon Lugbill. Kingdom and Blair missed the ceremony because they were competing in Europe.

''I was pleasantly surprised,'' Evans said. ''I didn't expect it, really. People told me, 'You and Roger Kingdom are favorites,' but I never pay much attention to those things.''

Evans, a freshman at Stanford, was previously named 1989 ''Sportswoman of the Year'' by the U.S. Olympic Committee and the Women's Sports Foundation.

Amateur Athletic Union officials select 10 Sullivan finalists, with the winner determined by a vote of 2,500 people, including AAU officials, past winners and sports reporters.

Winning the Sullivan was different from an Olympic title, Evans said, because she had no control over the voting, unlike her performances in the pool.

''It's the same great feeling but it's different,'' she said. ''I don't know how you could compare this to winning an Olympic gold medal. You can't control the situation like most athletes can. It's more of a chance-type thing.''

Stanford is coached by 1988 Olympic coach Richard Quick. Evans said Quick and the college training atmosphere has helped her improve.

''Richard has a presence on the deck,'' Evans said. ''He gets more out of you. You give it all and a bit more. It also helps to have a lot of people to train with, guys and girls. They push you to do better.''

Evans departs Tuesday to compete in her first NCAA women's swimming and diving championships. The meet begins Thursday in Austin, Texas. Quick was concerned about Evans appearing at the Sullivan ceremony, but she eased his worries by working out in the Indiana University Natatorium, a world class pool less than a mile from the awards dinner.

''Richard was a little concerned but I don't think it will hurt,'' Evans said. ''I won't have so long a flight or as tough an adjustment to the time, so I think it will help if I stay off my feet, as I stand here in high heels.''

-30- 3913

#90071u3326 03/12/1990 ~United Press International

(MARCH 12) UPI - Fire Department officials in New York say at least one person was killed when the ceiling of a Manhattan restaurant caved in on

diners late this afternoon. A shower of concrete, plaster and metal briefly trapped some of the 16 injured inside the Croissant restaurant on the Upper West Side. The entire block-long Ansonia-Hotel building was evacuated as a precaution, but the collapse was confined to the restaurant.

The judge in the Iran-Contra trial of former White House official John Poindexter says getting witness Oliver North to answer questions is ''like pulling teeth.'' U-S District Judge Harold Greene today scolded North for NOT cooperating with prosecutors. The former Marine officer eventually told the court that Poindexter approved diverting money from arms sales to the Contra rebels and warned him to keep it a secret.

Another Greyhound bus was fired on today. Police say a man in a car near Hartford, Connecticut, apparently used a high-powered weapon to shoot the luggage compartment. NO one was hurt. Yesterday, a sniper injured seven passengers on a Greyhound bus near Jacksonville, Florida. Today in Washington, federal mediators are talking with officials of the union that is on strike against Greyhound.

Bulgaria's Communist Party and opposition leaders are hailing an agreement signed today as a breakthrough in bringing democratic reforms in the East Bloc country. The accord establishes round-table discussions as the primary forum for deciding national issues.

Fears are on the rise in Beirut, Lebanon, that an UNeasy 10-day-old truce will fall apart. Security sources report feuding Christian soldiers shot bullets and rocket-propelled grenades at each other today. One person is reported dead and three injured.

West Virginia Governor Gaston Caperton today called for a meeting in Charleston with the leaders of two teachers' unions to try to end a statewide strike. The four-day-old walkout has closed classrooms in 38 of the state's 55 counties.

-30- 2183

#90071u3629 03/12/1990 ~United Press International

(MARCH 12) UPI - Authorities say one woman was killed today when the ceiling of a restaurant in New York's landmark Ansonia Hotel building collapsed. At least 16 other people were injured. A fire official said the collapse occurred in the Croissant and Company restaurant, apparently because of construction work on the floor above. The injured people were expected to survive. Witnesses said there was NO warning of the collapse.

Oliver North testified in Washington today that his former boss, John Poindexter, gave him a ''general admonition'' that word of the Iran-Contra scheme should NEVER leak out. North also testified in Poindexter's trial that the former national security adviser approved each transfer of

profits from arms sales to Iran to the Contra rebels in Nicaragua. Poindexter is charged with obstructing the investigation of the scandal.

In Anchorage, Alaska today, a super-tanker captain defended Joseph Hazelwood's actions at the trial of the former captain of the Exxon Valdez. Captain Shiras Walker blamed third mate Greg Cousins because he was the officer on watch last March during the accident that caused the nation's worst oil spill. Walker also criticized the Coast Guard because he said it is supposed to monitor tankers in Prince William Sound.

The U-S government says the Soviet Union should negotiate with Lithuania over the issue of the independence of the Baltic state. Lithuanian lawmakers declared their independence from Moscow yesterday. The State Department says the United States will establish formal diplomatic relations with Lithuania only when it controls its territory and can meet international obligations.

-30- 1836

#90071u3645 03/12/1990 ~United Press International

(MARCH 12) UPI - A breakup may be on the horizon for Israel's coalition government. The Labor Party gave its leaders authorization today to split from the government because of the Likud Party's refusal to approve a U-S peace proposal. The decision formalizes a threat to quit the government, but leaves time for a compromise to be worked out before eight NO-confidence votes scheduled for Thursday in the Parliament.

Temperatures along the Atlantic Coast today soared into what's normally the summertime range... climbing as high as 92 degrees in Baltimore. Several other cities, including Chicago, had readings in the 80's... leading many people to shed their winter clothes for tank tops and shorts. By noon, record-highs were already either set or tied in at least 19 cities.

The White House appears to be interested in a Democratic plan for cutting the federal budget by raising taxes. Despite President Bush's ''read my lips'' talk of NO new taxes... a presidential spokesman says the plan ''probably facilitates'' discussions on an election-year budget deal. The spokesman says the plan, however, does include some provisions that the White House caN'T support.

A key witness in last August's racially motivated gang slaying of a black teen-ager in a predominantly white Brooklyn neighborhood is now charged with second-degree murder in the case. John Vento changed his mind and refused to testify for the prosecution today. He was then arrested on the murder charge. Prosecutors say Vento took part in the attack on Yusuf Hawkins and had agreed to testify against his friends.

-30- 1759
#90071u3872 03/12/1990 ~United Press International
(MARCH 12) UPI - Oliver North's second day of testimony in his former boss's Iran-Contra trial linked former President Reagan to the arms-for-hostages scandal. North testified today that he saw his former boss, John Poindxter, rip up a politically embarrassing document signed by Reagan. According to North, the document gave Reagan's approval for an explicit arms-for-hostages deal with Iran. North will take the witness stand again when the trial resumes tomorrow.

Vice President Quayle flew to Paraguay this afternoon on the fourth leg of his tour. Earlier in Santiago, Chile... Costa Rican President Arias brought together Quayle and Nicaraguan President Ortega. Arias gave up his chair next to Quayle at a luncheon so Ortega could sit there. A U-S official says Ortega assured Quayle of a smooth transition of the Nicaraguan government next month.

In Washington, administration officials say President Bush is ready to lift the economic embargo against Nicaragua as early as tomorrow. The Sandinista government is due to give up power next month after losing last month's presidential election. And officials say Bush is ready to make good on promises to restore economic ties. The United States was one of Nicaragua's top trade partners before President Reagan ordered the embargo in 1985.

A Homestead Air Force Base spokesman says ousted Haitian dictator General Prosper Avril has left the Florida military installation for an undisclosed location. Avril and his family arrived at Homestead this morning from Haiti aboard a U-S military plane. They were to be driven to nearby Boca Raton, where Avril is believed to own property. But a protest outside the base delayed their departure.

#90071u4093 03/12/1990 ~United Press International
(MARCH 12) UPI - The latest news from across the nation and around the world... details and developments from the 'roiund-the-clock wires of United Press International.

Oliver North testified today that he saw former national security adviser John Poindexter tear up a politically embarrassing document signed by Ronald Reagan.

North said the document approved the deal to sell weapons to Iran in exchange for hostages.

North said Poindexter had the paper retrieved from a White House safe and

then tore it in two. The retired Marine said the incident occurred in 1986 on the same day Poindexter met with members of Congress who were investigating the scandal.

Poindexter is charged with obstructing the investigation by lying and destroying documents.

Poindexter has admitted destroying the document, but he made those comments to Congress under a grant of immunity, so they cannot be used in his trial.

The defense attorney sought to show that Poindexter headed a large staff and did NOT know every detail of North's activities.

Just over a week before the destruction of the document, Reagan declared on national television that the United States had never traded arms for hostages.

Administration officials say President Bush is ready to end the trade embargo against Nicaragua. Sources say the action could come tomorrow.

The move could bring Nicaraguan beef, bananas, and coffee to the United States. It might also provide a desperately needed transfusion of capital for the Nicaraguan economy.

Then-President Reagan ordered the economic embargo in 1985 to pressure the Sandinista government. The Nicaraguan economy has also been battered by mismanagement and the Contra war.

After losing last month's presidential election, the Sandinistas are due to give up power next month to the UNO coalition and its candidate, Violeta Chamorro.

Aides say in response, Bush is ready to honor a pledge to help democracy with aid.

But the White House said today there have been delays in getting a planned one-BILLION dollars in aid introduced and passed in Congress. Deliberations continue on just what aid will be provided at a time when Eastern Europe and Panama also are asking for help.

#90071u4111 03/12/1990 ~United Press International

(MARCH 12) UPI - Lithuania's new president today snubbed a Moscow Parliament session... refusing to take his seat for the meeting.

Lithuania's parliament broke into applause this morning when President

Vytautas Landsbergis announced that Australia had recognized the Baltic state's declaration of independence.

Landsbergis said the announcement also urged Moscow to open negotiations with Lithuania. A U-S statement received a cool welcome as it lent support to the Baltic region, but did NOT recognize its independence.

A Politburo conservative in Moscow ruled out forcing Lithuania back into the Soviet Union's fold... but he warned the republic to ''think long and hard'' before finally seceding.

The indepedence proclamation... made yesterday... is expected to lead to long negotiations with Moscow over full secession.

Soviet President Gorbachev has indicated he'll make heavy economic demands for the price of Lithuania's freedom.

Haiti's ousted dictator General Prosper Avril was thought to be headed for Boca Raton, Florida, today after spending the morning at Homestead Air Force Base.

Avril arrived at Homestead this morning accompanied by his family aboard a U-S military jet. U-S officials say the former military ruler was brought to the United States to restore order and democracy in Haiti following the angry protests that led to his resignation two days ago.

Avril had planned to travel immediately to Boca Raton... where it's believed he owns property. But Haitian refugees angered by his presence in the United States demonstrated outside the gates of the base. The protest delayed his departure.

But authorities now say Avril has left Homestead for an undisclosed location.

In Haiti, the whereabouts of Avril's eventual successor is NOT known either.

Supreme Court Justice Ertha Pascal-Trouillot in hiding until her swearing-in scheduled for tomorrow morning because of fear she may be the target of political violence.

#90071u4131 03/12/1990 ~United Press International
(MARCH 12) UPI - Another Greyhound bus became a target of gunfire today.

Police say a heavy white man in a car fired a high-powered gun at a bus with passengers on Interstate 84 near Hartford, Connecticut. The bullet

hit the luggage compartment, and NO one was hurt.

The shooting comes one day after a sniper opened fire on a Greyhound bus near Jacksonville, Florida, injuring seven passengers.

Investigators are checking possible links between the attacks and the 11-day-old strike against the bus carrier by the Amalgamated Transit Union.

Greyhound is offering 25-thousand dollars for information leading to the arrest and conviction of the sniper.

In Washington today, a federal mediator says the union is willing to return to the bargaining table ''as soon as possible.''

The mediation service had made calls to Greyhound and was ''optimistic'' that the company would resume talks. But there was NO immediate response from the company.

The union represents nine-thousand drivers, baggage handlers, mechanics, and ticket agents. Driver pay averages a little less than 25-thousand dollars a year.

A supertanker captain has come to the defense of Exxon Valdez skipper Joseph Hazelwood... who's on trial for the worst oil spill in the nation's history.

Captain Shiras Michael Walker told a jury in Anchorage, Alaska, today that Hazelwood was NOT to blame for last year's grounding of the Exxon Valdez.

Walker instead pointed the finger at third mate Greg Cousins. He also blamed the Coast Guard for NOT seeing the approaching disaster and warning the vessel.

Walker said it's a captain's prerogative to leave the bridge of his ship and that Cousins did NOT properly carry out Hazelwood's orders. He added, that once the Valdez was headed for trouble, Cousins should have asked Hazelwood to return to the bridge.

Walker commanded ships in Prince William Sound... the site of the spill... for eight years.

#90071u4147 03/12/1990 ~United Press International

(MARCH 12) UPI - A ceiling collapse which one witness described as ''like an earthquake'' killed one customer this afternoon at a New York hotel restaurant.

There were conflicting reports of how many people were injured in the accident at the Croissant and Company restaurant in the historic Ansonia Hotel on Broadway. Authorities say at least 12 people were injured... but a police spokesman placed the total as high as 17.

Officials say many of the victims suffered head injuries when the ceiling's plaster and concrete came raining down without warning. But they say none of the injuries appears to be life-threatening.

Some of the victims were trapped briefly in the debris and the entire block-long building was evacuated as a precautionary measure. But a fire department spokesman says it's believed everyone has been accounted for.

He says the collapse may have been linked to construction or renovation on the floor above the restaurant.

Authorities say a chain-reaction auto accident amid thick fog in Green Bay Wisconsin, killed three people and injured 30 more today.

52 vehicles were involved. Three people remain seriously hurt.

Police compared the pile-up to an accordion. One driver said he was traveling at 55 miles-an-hour- the speed limit- when he hit a wall of fog and plowed into the car in front of him.

Another motorist said the succeeding crashes produced booming sounds every few seconds. One witness said he saw a woman trapped in her folded car at the bottom of a pileup, but he couldn't get her out.

Vehicles were stacked up like firewood. One truck erupted in flames during the accident.

Police say the massive wreck was caused morning during rush hour when a semi-trailer and two cars collided on Tower Drive Bridge, the city's highest structure. The bridge carries traffic around the East Side of the city on Interstate 43.

#90071u4258 03/12/1990 ~United Press International

(MARCH 12) UPI - Testimony concluded for the day in the Iran-Contra trial of John Poindexter. When the proceedings resume tomorrow, Oliver North will take the witness stand for a third day. Today, North testified he saw Poindexter rip up a document signed by then-President Reagan, approving an arms-for-hostages deal with Iran.

President Bush is said to be about to take formal steps to restore economic ties with Nicaragua. Administration officials say Bush could- as

early as tomorrow- lift the trade embargo imposed in May 1985 as part of the Reagan administration's campaign against the Sandinista regime.

Vice President Quayle flew to Paraguay this afternoon on the fourth leg of his Latin American tour. Earlier, in Santiago, Chile, Quayle sat next to Nicaraguan President Ortega at a luncheon. A U-S official says the two talked about the disarming of the Contra rebels.

Haitian refugees in south Florida protested outside Homestead Air Force Base today. They want ousted dictator Prosper Avril sent back to Haiti to be tried and executed. Avril and his family was flown by a U-S military jet to the base earlier today. They later left, possibly for Boca Raton.

One woman was killed and as many as 17 other people were injured today when a restaurant ceiling in a landmark Manhattan hotel collapsed. The city building commissioner says the accident may be linked to recent renovations on the floor above.

A fiery chain reaction accident on a fog- and smoke-shrouded bridge in Green Bay, Wisconsin, left at least three people dead and 30 others injured today. 52 vehicles were involved in the morning rush-hour accident.

-30- 1814

#90071u4264 03/12/1990 ~United Press International

(MARCH 12) UPI - A telephoned bomb threat forced a partial evacuation of the main air traffic control tower at Los Angeles International Airport today. Authorities say landings and some take-offs were temporarily halted. NO bomb was found.

The F-A-A is seeking modifications of the hydraulic system of all D-C-10's that would allow the planes to be flown even if the system was badly damaged. Last July, a United D-C-10 crashed in Iowa after a rear-engine explosion crippled its hydraulic system.

Authorities in southwest Washington state say a helicopter carrying a U-S Geological Survey crew into the crater of Mount St. Helens crashed today near the volcano's lava dome. All three people aboard walked away unhurt.

Good news for consumers. The Agriculture Department says retail prices of fresh vegetables... up 20 percent due to freeze damage in the South last December... should drop to more normal levels by the end of the month.

Last month, President Bush complained about being ''overexposed'' to the media. Now, the White House says Bush plans to hold more news conferences this year than during his first year in office. In fact, spokesman Marlin Fitzwater hints at one this week... telling reporters- ''don't go on vacation.''

The National Park Service says record warm temperatures in Washington, D-C during the past few weeks means the city's famed cherry trees will break their record for the earliest bloom ever. Peak bloom is expected Thursday... breaking the old record set in 1945 by five days.

-30- 1693

#90071u4407 03/12/1990 ~United Press International

(MARCH 12) UPI - The U-S trade embargo against Nicaragua may soon be over. Bush administration officials say the president could- as early as tomorrow- lift the embargo imposed by then-President Reagan in 1985. The idea was to pressure the Sandinista government, which is due to give up power next month. In Managua, a spokesman for Violeta Chamorro says Bush telephoned the president-elect tonight to say he would end the embargo tomorrow and ask Congress to approve half-a-BILLION dollars in aid to her new government.

Oliver North told a federal courtroom in Washington, D-C, he saw John Poindexter rip up a presidential approval of a deal to trade weapons to Iran for hostages. North testified at the Iran-Contra trial of Poindexter, who was North's boss as national security adviser under then-President Reagan. North says Poindexter tore Reagan's authorization in half in 1986 on the same day Poindexter met with congressional investigators about the unfolding scandal.

A radical Soviet lawmaker is being criticized for his unprecedented verbal assault against Vladimir Lenin. The politician accused Lenin of institutionalizing ''a policy of mass violence and terror.'' The attack came during a debate today on Soviet President Gorbachev's proposal to create a new, more powerful presidency. The lawmaker's allies say the attack will likely cause a backlash of support for Gorbachev's proposal.

Stockholm, Sweden, was the site of the first meeting in 27 years between African National Congress leaders Nelson Mandela and Oliver Tambo. Mandela met Tambo today at Haga Palace, where they talked with retired Anglican Archbishop Trevor Huddlestone, who served in South Africa for 12 years. Tambo is recovering at a Swedish clinic after suffering a stroke last August.

LOS GATOS, CA (MARCH 13) BUSINESS WIRE - ShareBase Corp. (NASDAQ/NMS:SHBS) Tuesday introduced the newest member of its family of SQL database servers, the Server/8000 Model 250, which is 100 percent compatible with existing Server/8000 systems and offers an entry-level platform to ShareBase's latest client/server technology.

''The Server/8000 Model 250 represents a major technological breakthrough for the company,'' said ShareBase Vice President of Marketing Michael Reiff. ''We are now able to offer our customers the most advanced hardware and software client/server technology for $165,000.

The Server/8000 Model 250 runs the company's ShareBase II relational database software, which contains enhanced capabilities to support heavy throughput in mission-critical, production applications. The system can support more thanm 100 concurrent users running on heterogeneous client systems as well as concurrently support various communications protocols including DECnet, TCP/IP and 3Com.

The Server/8000 Model 250 is targeted at production applications where downtime for maintenance is not acceptable. The system contains many high availability features that are unmatched by other relational vendors.

In case of power or disk failure, the system guarantees recovery time of less than ten minutes, regardless of the number and size of the databases. This rapid recovery time is obtained by implementing a specialized disk cache algorithm, called SafeCache, which is only possible to implement due to the system's specialized server architecture.

Other high availability features include:
-- On-line disk formatting and mirroring
-- On-line database checking and correction
-- On-line database backup
-- On-line performance monitoring and tuning

Mitsui Systems Research and Nichimen Corp., ShareBase value added resellers (VARs) headquartered in Tokyo, have placed orders for six Server/8000 Model 250 systems, which will be delivered in the first quarter.

ShareBase designs, manufactures, markets and supports ShareBase relational database software and SQL database servers. The company maintains its corporate headquarters and manufacturing facilities in Los Gatos, with offices and representatives across the United States and Canada, Europe, Japan and Southeast Asia.

MENLO PARK, CA (MARCH 13) BUSINESS WIRE - Adia Services Inc. (NASDAQ:ADIA), a national supplier of personnel services, Tuesday announced the signing of a letter of intent to sell its StarMed Staffing Corp. subsidiary.

StarMed supplies medical personnel on a long-term contract basis to hospitals throughout the United States. Adia plans to sell the business to StarMed's president.

StarMed had 1989 revenues of $13 million. Adia plans to continue the development of its health care personnel specialty through its Nursefinders Division which provides per diem nursing personnel. In 1989 Nursefinders had total system sales of $135 million.

The letter of intent is subject to negotiation of a definitive agreement. Closing is tentatively scheduled for April 2.

ANAHEIM, CA. (MARCH 9) BUSINESS WIRE - Cycle Industries Inc., one of the nation's leading California Lifestyle manufacturers and t-shirt screen printers, announced the acquisition of STS Graphics.

The purchase is believed to make Cycle Industries the largest t-shirt screen printer in the country.

STS Graphics prints t-shirts under the licenses for Ocean Pacific Sunwear Ltd. and Newport Blue labels. Other licenses include Teenage Mutant Ninja Turtles, one of the country's leading children's characters, which have been recently popularized through television and comic books nationwide.

Cycle Industries manufactures the sportswear lines of Off Shore, Lineshots and Team Gear USA and holds the licenses for Hobie and Catchit T's.

California Lifestyle sportswear is one of the fastest growing segments of the overall sportswear industry, estimated at $1.5 billion in annual sales. With the acquisition of STS Graphics, Cycle Industries owns approximately 10 percent of that segment. Ocean Pacific Sunwear is the largest California Lifestyle manufacturer in the country. Last year, STS Graphics accounted for approximately 30 percent of Ocean Pacific's overall business.

''The STS Graphics purchase is one of the largest acquisitions in the young history of the California Lifestyle business,'' commented Jonathan Edelstein, a director and spokesman of Cycle Industries. ''We now have top marketshare in a primary industry segment and with it the foundation for strong future growth. The acquisition expands the depth and quality of our management team,'' added Edelstein.

''The strong financial backing of Cycle Industries comes at a time when STS Graphics is in a major expansion push,'' said Daniel Little, founder of STS Graphics. ''We are very pleased with this acquisition.''

Little will continue with an active management roll in the new company. The manufacturing and corporate offices of Cycle Industries will be relocated to the STS Graphics complex in Anaheim.

The combined t-shirt manufacturing divisions of STS Graphics and Cycle Industries will represent one of the leading t-shirt screen printing plants in the country, utilizing the latest technology in the industry.

James Jenks, president of Ocean Pacific Sunwear Ltd. added: ''STS Graphics is an integral part of Ocean Pacific. We feel this acquisition will have a positive effect for us as well as STS Graphics.''

In 1989, Ex-sto Capital Corp. and Merrill Lynch Interfunding Inc. purchased a controlling interest in Cycle Industries and helped establish the company as one of the most financially stable sportswear and t-shirt printing companies in the industry.

CULVER CITY, CA (MARCH 13) BUSINESS WIRE - MGM Grand Inc. (NYSE:MGG) Tuesday reported its earnings for the year ended Dec. 31, 1989.

The company earned $27.4 million or $1.30 per share compared with $6.2 million or 34 cents per share for 1988. Results for 1988 reflect the operations of the Sands and Desert Inn hotels from Feb. 1, 1988, the date of acquisition of these properties.

In April 1989, the company completed the sale of the Sands Hotel and Casino for $110 million, realizing a pretax gain of $26.5 million which has been included in the results for 1989.

Hotel/casino revenues for the year 1989 were $162.1 million, down 13 percent from $185.9 million in 1988. The decrease was due primarily to the sale of the Sands Hotel and Casino in April 1989, and the closure of a

significant number of hotel rooms for refurbishment at the Desert Inn during the year.

MGM Grand Air's revenues for 1989 were $29.7 million, up 35 percent from $22 million in the prior year. Passenger load factors improved from 63 percent to 74 percent. In addition, scheduled fares improved and charter operations were expanded during the year. Fuel prices increased by 11 cents per gallon or 21 percent over 1988.

For the three months ended Dec. 31, 1989, the company's net income was $1.5 million or 6 cents per share compared with $5.9 million or 28 cents per share in the 1988 quarter. Hotel/casino revenues were lower due to the sale of the Sands and room refurbishment projects at the Desert Inn.

In addition, the win percentage was low compared with the fourth quarter of 1988. Airline revenues rose in the fourth quarter on improved fares and load factors. However, these gains were offset by higher fuel prices.

In January and February 1990, the company acquired approximately 115 acres of land in Las Vegas consisting of the Marina Hotel, Tropicana Golf Course and adjacent land located on the corner of the Strip and Tropicana Avenue. The company intends to utilize this acreage to develop and build a 5000-room hotel/casino and theme park, with late 1992 being the estimated opening date.

RANCHO CORDOVA, CA (MARCH 13) BUSINESS WIRE - US Sprint Tuesday demonstrated its newly redesigned billing system to a group of public officials, employees, vendors and customers at its new facility in Rancho Cordova.

With some 7 million individual bills to process each month, US Sprint's senior vice president of information management said the company began a complete overhaul of its invoice processing system two years ago.

A key aspect of the process is the Western Regional Center (WRC) in Rancho Cordova, where some 900 US Sprint employees service customers, maintain the network, and process and distribute bills to customers across the country.

Completed recently, the latest building at the WRC contains approximately 102,000 square feet and houses more than 200 employees, plus US Sprint's newest Information Processing Facility (IPF). In addition to billing

operations, the IPF operates multiple mainframe computing systems which support various US Sprint business applications.

''This beautiful -- and functionally state-of-the-art IPF -- was put into service in a relatively short period of time. The only way this could have been accomplished is through the teamwork and 'can do' attitude that I find wherever I go in US Sprint. The timely completion of this facility has been key to the continued successful role-out of the major systems that support US Sprint's growing business,'' said Cliff Hall.

US Sprint, which offers the only nationwide all-digital fiber-optic telecommunications network, is a unit of United Telecommunication Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

SAN DIEGO, CA (MARCH 13) BUSINESS WIRE - Xerox Desktop Software has announced the extension of their Ventura Publisher Value-Pak promotional program unitl May 15, 1990.

The Value-Pak program is designed to make advanced desktop publishing more affordable to new customers.

Users who purchase copies of Ventura Publisher 2.0 or Network Server between Dec. 1, 1989 and May 15, 1990 will receive a free copy of Professional Extension, a product valued at $595.

Also included with the promotional program is the ability to upgrade to the new Ventura Publisher Gold Series for only $49. This includes the users choice of DOS (GEM) Edition scheduled for shipment in the second quarter of 1990, or Windows Edition or OS/2 Presentation Manager Edition scheduled for release in the third quarter of 1990.

''We are extending this program until May in order to provide our customers with the opportunity to take advantage of significant savings,'' said Pat Linehan, senior vice president Sales and Marketing for Xerox Desktop Software.

''Value-Pak gives potential desktop publishing customers even more power to create typeset-quality documents quickly and economically.''

Xerox Ventura Publisher 2.0 offers users complete desktop publishing

capabilities, including powerful document control, style sheets, automatic page-numbering, table of contents, indices and rich typographical controls. Professional Extension adds the capabilities of interactive table creation, equation editing, vertical justification and cross referencing.

It also contains a 130,000-word-hyphenation dictionary from Edco Services Inc. The Network Server allows multiple users to share resources including hard disks, printers and scanners. Currently, Novell, IBM and 3Com networks are supported.

The Ventura Publisher Value-Pak is available immediately to U.S. customers from participating dealers. To qualify for the offer, users must submit to Xerox their original warranty registration card and a sales receipt dated by May 15 and received no later than May 31, 1990. Xerox Ventura Publisher: Professional Extension will be shipped within four weeks of the date that Xerox receives the sales receipt.

Xerox Desktop Software is a leading supplier of publishing, forms processing and data base management software solutions for IBM PCs and compatibles. The business unit has been restructured as a wholly owned subsidiary of Xerox Corp. and has headquarters in San Diego.

SAN DIEGO (MARCH 13) BUSINESS WIRE - Senator Albert Gore, D-Tenn., addressed San Diego supercomputing leaders at a luncheon held Monday to applaud Supercomputing Solutions Inc.'s (NASDAQ:SUPR) unveiling of its new class of industrial supercomputer, called the CAPPS-9064.

Sen. Gore is the author of the National High-Performance Computer Technology Act of 1989, which calls for the establishment of a national supercomputer network, research and development, new software, new

supercomputer systems and basic research and education.

The bill is seen by many experts as a crucial next step in assuring United States dominance of the international supercomputer market. The plan calls for increased federal spending on supercomputers over the next five years up to $1.7 billion.

In his remarks Gore said that Supercomputing Solutions represents the entrepreneurial spirit in advanced technology firms that will be this country's greatest resource in revitalizing a strong industrial-based economy.

''This new partnership between advanced technology computing companies and industrial users will give our country the competitive edge necessary to ensure our worldwide technological leadership in the 1990's. These supercomputers are to the information age what coal and steam were to the industrial age,'' he stated.

Supercomputing Solutions Chairman Allan Simon unveiled the CAPPS-9064 with the help of TRW Project Director Ray Gluck. TRW has contracted for the first CAPPS-9064. The CAPPS-9064 is a production parallel supercomputer offering computational fluid dynamics, large scale simulations and computational electro-magnetics. Supercomputing Solutions will announce full-scale production of the CAPPS-9064 in June of this year.

The CAPPS-9064 is an affordable, industrial supercomputer because it provides the sustained speed performance levels of conventional supercomputers with a price/performance improvement ratio of 20 to 1.

''We have spent the last years since World War II developing advanced technology for our country's research and defense projects. Now, we have the opportunity to apply this technology and our fiscal investment into our industrial sector through new types of supercomputers such as the CAPPS-9064.''

''We are very enthusiastic about the CAPPS-9064 because it will demonstrate that a small, but dedicated company can dramatically improve the next generation of supercomputers, giving our U.S. companies a competitive edge in worldwide technological breakthroughs,'' said Simon.

Supercomputing Solutions is a San Diego firm that designs, manufactures and markets supercomputers and software for industrial and research applications.

SOLANA BEACH, CA (MARCH 13) BUSINESS WIRE - Kaypro Corp. (OTC:KPRO/KPROE) has appointed two key consultants to round out its top-level management team, announced president and chief executive officer Roy Y. Salisbury.

David W. Leigh, certified public accountant, and Charles W. Clark are principals with FCSGroup, a business management and corporate strategy consulting firm with offices in New Hampshire, Massachusetts, Tennessee, Michigan and New York.

Salisbury said that Leigh will be responsible for organizing and establishing new streamlined accounting systems for Kaypro. Leigh will also assist with SEC filings, tax reporting and NASDAQ information.

Clark will work directly with Salisbury on matters of high-level general administration. These areas will include coordination of legal counsel, investigation of financial options, sales administration, training and corporate marketing.

A certified public accountant, Leigh's background includes 19 years of experience in accounting, controllership and treasury activities for various small businesses. He has served as chief financial officer for businesses in both the computer and building industries. Leigh was also an auditor with Arthur Andersen & Co. He holds a bachelor of science degree in accounting from Northern Illinois University.

Clark's background includes the founding of the FCSGroup of Tennessee in Knoxville, where he specialized in assisting companies with business development, marketing and strategic planning. As a consultant, he has developed and launched new products and services for various regional businesses, including computer firms, horticultural companies and retail businesses. Clark holds a bachelor's degree from Muskingum College in Ohio.

Kaypro Corp. designs, manufactures and distributes a full line of microcomputers for businesses and individuals. Currently there is a user base of more than 500,000 computer systems around the world.

SAN FRANCISCO (MARCH 13) BUSINESS WIRE - McKesson Corp. (NYSE:MCK) announced Tuesday that it has commenced a tender offer for any and all publicly held shares of PCS Inc. common stock at a price of $20 per share in cash.

McKesson currently owns approximately 86 percent of PCS's outstanding shares.

The offer is scheduled to expire at 12 midnight EST on Monday, April 9. The offer is being made pursuant to a previously announced merger agreement between McKesson and PCS. Under the terms of the agreement, any PCS shares not purchased in the tender offer will be acquired by McKesson in a subsequent merger transaction at the same $20 per share cash price.

McKesson said that the tender offer will be made only by an offer to purchase and other offering documents, copies of which are being filed with the Securities and Exchange Commission and mailed today to PCS's stockholders.

Morgan Stanley & Co. Inc. is dealer manager for the offer and Georgeson & Co. Inc. is the information agent.

COSTA MESA, CA. (MARCH 13) BUSINESS WIRE - PDA Engineering (NASDAQ:PDAS) and LMS International of Leuven, Belgium, have singed a letter of intent to add the CAD I Neutral File Format to PDA Engineering's PATRAN software.

The CAD I common interface standard was co-developed by LMS International and is included in the LMS CADA-X software.

The CAD I interface standard, developed in Europe as part of the EEC-funded ESPRIT research project, was desinged to provide a common platform for the transfer of data from both structural and finite element analysis.

The project specifically studied techniques to integrate FEA and experimental test methods for structural analysis. The agreement between the two companies to incorporate this standard in PATRAN will provide PATRAN users and LMS customers with access to an integrated testing and analysis software system.

''The technology developed for the CAD I interface fills the need for an international standard between CAD and other areas of production,'' said Dr. Urbain Vandeurzen, chief executive officer of LMS International. ''This agreement responds to the increasing market demand for greater integration of the whole product development process.''

According to Dr. Louis A. Delmonico, president and chief executive officer of PDA Engineering, ''Combining LMS International's strength in experimental structural dynamic systems with PDA's MCAE analysis expertise for the first time provides a powerful, state-of-the-art tool that allows engineers to verify both analytical data and experimental findings in an integrated system.''

PALO ALTO, CA (MARCH 14) BUSINESS WIRE - Hewlett-Packard Co. has signed an agreement to license HP NewWave software to AT&T Computer Systems, both companies announced Tuesday.

Terms of the contract were not disclosed.

HP NewWave is a software applications environment that makes it easier for computer users to move and update information among different applications and to schedule routine tasks to be done automatically by the computer.

HP NewWave, which runs on top of Microsoft Windows, instantly integrates software applications and makes it possible to automate tasks. These capabilities are collectively known as the HP NewWave ''desktop.'' AT&T Computer Systems will use the HP NewWave desktop as a component of selected networked-computing solutions.

NCR intends to incorporate HP NewWave into NCR Cooperation, a forthcoming office-automation system that is based upon the company's Open, Cooperative Computing Architecture. Data General plans to use HP NewWave in the company's Distributed Applications Architecture and Common Electronic Office.

Canon and HP are developing a Japanese-market version of HP NewWave for computers that run on MS-DOS, OS/2 and UNIX operating systems.

More than 80 independent software developers are developing applications based on HP NewWave. In addition, more than 50 companies, including HP and AT&T, have joined the Object Management Group to establish a common applications environment that will improve the way computer hardware and

software from different manufacturers work together.

AT&T Computer Systems, based in Morristown, N.J., develops, manufactures, markets and supports a full line of networked computing solutions designed around open systems and industry standards.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

MS-DOS, Windows and Microsoft are registered trademarks of Microsoft Corp.

UNIX is a registered trademark of AT&T in the U.S.A. and other countries.

RENO, NV (MARCH 14) BUSINESS WIRE - GEXA Gold Corp. announced Tuesday that the start up phase at its 40 percent owned Mother Lode mine has been completed and the mine is now producing gold dore at a rate to meet the anticipated production level of 25,000 ounces of gold per year.

The Mother Lode Mine is owned and operated by U.S. Nevada Gold Search Joint Venture which is comprised of GEXA Gold Corp. (40 percent), U.S. Precious Metals Inc. (40 percent) and N.A. Degerstrom Inc. (20 percent).

GEXA Gold Corp. President Gary L. Rice stated that ''after encountering minor start up problems during commencement of mining and process operations, the anticipated monthly gold dore production was reached in February of this year with 2,308 ounces of gold dore produced with an average gold content of 89.82 percent.'' Rice also stated that anticipated production levels continued into March with 1,247 ounces of dore being produced during the first nine days with an average gold content exceeding 90 percent.

In other matters concerning the joint venture, President Rice announced that installation of the second half of the leach pad was completed during February and that the U.S. Nevada Gold Search Joint Venture Management Committee has approved an exploration budget through June of this year

totalling $307,840.

GEXA Gold Corp. is a public corporation traded on the National Association of Securities Dealers Automated Quotation system, ''NASDAQ,'' under the trading symbol of ''GEXA.'' The company's common stock is also listed on the Spokane Stock Exchange.

JOPPA, MD (MARCH 13) BUSINESS WIRE - Merry-Go-Round Enterprises Inc. (NASDAQ:MGRE) Tuesday reported record sales and earnings for the fourth quarter and for the fiscal year ended Feb. 3, 1990.

The following per share data have not been adjusted for the 4-for-3 stock split announced Feb. 22 payable March 16.

For the fourth quarter ended Feb. 3, net sales increased 72.9 percent to $184,619,000 from $106,758,000 for the like quarter last year. Net earnings rose 79.1 percent to $11,010,000, or 66 cents per share, from $6,148,000, or 40 cents, respectively, in the fourth quarter a year ago. Comparable store sales for the fourth quarter increased approximately 37 percent.

For the fiscal year ended Feb. 3, sales increased 60.2 percent to

$478,923,000 compared with $298,938,000 a year ago. Net earnings increased 99.3 percent to $22,245,000, or $1.39 per share, from $11,160,000, or 74 cents, respectively, for fiscal 1989.

Michael D. Sullivan, president and chief executive officer, stated: ''The record sales and earnings for the fourth quarter and for the fiscal year were the highest ever achieved in the company's history. Furthermore, the increases from the prior year are especially gratifying considering that the results from the fourth quarter of fiscal 1989 and the year were records as well.''

Sullivan commented that the company's positive sales growth trend has continued into the new fiscal year across all three operating divisions.

The company's expansion plans for fiscal 1991 include opening 50 stores including several in the New York metropolitan area.

Merry-Go-Round Enterprises Inc. is a leading specialty clothing chain selling contemporary fashions for young men and women in over 600 retail stores in 37 states.

#90072b0611 03/13/1990 ~Business Wire

MENLO PARK, CA (MARCH 13) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) Tuesday introduced its first Enterprise License Program, giving corporate customers an efficient and cost-effective way to implement an enterprise-wide information management solution with the Wingz graphic spreadsheet and SmartWareII integrated suite of office automation software.

Under the new program, customers purchase one license that covers the use of these products on workstations throughout their organization. The enterprise can be as centralized as one floor of a building or as geographically dispersed as several divisions throughout North America.

The new program also enables corporate users to easily take advantage of Informix's multiplatform strategy for Wingz. Customers can obtain one license for Wingz on mulitiple platforms, giving them a consistent, easy-to-use tool across a variety of graphical desktop machines. With Informix's recently introduced Wingz-DataLink technology, users will be able to access an Informix SQL database from any of the platforms Wingz supports.

Liberty Mutual Insurance, Boston, is one of the first corporations to sign an enterprise licensing agreement with Informix. Under the agreement, Liberty Mutual will install Wingz over the next two years on Macintosh OS- OS/2- and ULTRIX-based machines. Liberty Mutual selected Wingz because of its support for multiple platforms as well as for its graphic spreadsheet capabilities and HyperScript application development language.

Enterprise license fees are user-based, with categories ranging from 0 to 250, 251 to 500, 501 to 1,000, 1,001 to 2,500 and 2,501 or more users -- regardless of platform. The licensing program is currently limited to organizations in North America.

Informix is working closely with its resellers to implement this new licensing program. Resellers who sign an Enterprise License Reseller Agreement with Informix can license, duplicate, install and support Wingz and SmartWareII for their customers.

Customers can also license the products directly from Informix, who will then offer a rebate to an authorized reseller to provide local service and support. Products upgrades are available through the purchase of a maintenance contract with Informix.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

MENLO PARK, CA (MARCH 13) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) Tuesday introduced an Enterprise License Program that enables resellers to provide corporate customers with enterprise-wide information management solutions based on Informix's Wingz graphic spreadsheet and SmartWareII integrated suite of office automation software.

Under the new program, resellers who have signed an Enterprise License Reseller Agreement with Informix can provide corporate customers with one license that covers use of the products on workstations throughout their organization.

The enterprise can be as centralized as one floor of a building or as geographically dispersed as several divisions throughout the country. The new program significantly extends the sales opportunities available to resellers by enabling them to meet the volume purchasing requirements of

large corporations in North America.

An authorized Informix reseller will participate in every enterprise licensing agreement, receiving discounts on the software they purchase or rebates in exchange for providing local customer service and support.

Wingz is Informix's leading graphic spreadsheet that includes HyperScript, a powerful programming language that lets users develop custom graphical applications.

With Wingz-DataLink, users will be able to access corporate data from any Informix SQL database via the graphical environment of Wingz. Users can access this data directly into a Wingz worksheet, or use HyperScript to create a completely customized graphical database application.

Wingz is currently available for the Macintosh and is scheduled to be available during the first half of 1990 for OS/2 Presentation Manager, OSF/Motif, DOS under Microsoft Windows, NextStep for the NeXT Computer, and Open Look for Sun workstations.

SmartWareII includes database management, word processing, spreadsheet with graphics and communications capabilities. The product also includes the Smart Programming Language for application development across modules, and provides DOS-UNIX connectivity and seamless integration for easy data transfer between modules. SmartWareII is currently available for DOS.

Informix's complete line of database management software products may be included in the Enterprise License Program at a later data.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems robust application development tools, and graphical- and character-based productivity software for delivering information to every significant desktop platform.

The company has wholly owned subsidiaries in the United Kingdom, France, Germany, The Netherlands, Sweden, Australia, Singapore, Italy, Spain and Canada.

#90072b0614 03/13/1990 ~Business Wire

SEATTLE (MARCH 13) BUSINESS WIRE - Immunex Corp. (NASDAQ:IMNX) Tuesday finalized an agreement to license to Behringwerke AG, of Marburg, Federal Republic of Germany, the right to manufacture and market in Japan, soluble receptor products -- recombinant versions of proteins that may be used therapeutically to turn off the human immune system.

The receptors licensed to Behringwerke are potentially new treatments for a variety of autoimmune disorders, including rheumatoid arthritis, allergies and asthma, and diabetes.

Immunex will receive $3 million immediately for the Japanese rights, along with a royalty arrangement. Two additional payments are dependent upon Immunex achieving certain performance milestones. Although terms of the additional payments were not disclosed, the three installments combined will exceed the one-time charge of $7.3 million Immunex realized 1989 for the acquisition of marketing and manufacturing rights to products it enventually intends to market, said Stephen A. Duzan, Immunex chairman and chief executive officer.

Behringwerke's purchase of the Japanese rights to the receptors is part of

four agreements signed Tuesday with Immunex that finalize letters of understanding announced in September 1989.

Under the additional agreements Immunex receives manufacturing and co-marketing rights in the United States to Granulocyte Macrophage Colony Stimulating Factor (GM-CSF), Interleukin-3 (IL-3) and other CSF products. Immunex and Behringwerke's U.S. affiliate, Hoechst-Roussel Pharmaceuticals Inc., will separately and independently market yeast-expressed GM-CSF and IL-3 in the United States each using their own trademarks. Immunex filed a Product License Application with the U.S. Food and Drug Administration for Leukine, yeast-expressed GM-CSF, last month.

In return, Behringwerke will receive royalties from Immunex on its sales of the CSF products. Immunex also grants Behringwerke the sole and exclusive right to manufacture and market outside of the United States and Canada Interleukin-1 Receptor, Interleukin-4 Receptor, Interleukin-7 Receptor, Interleukin-8 Receptor, and Tumor Necrosis Factor Receptor.

In addition, Behringwerke has retained Immunex to make yeast GM-CSF for clinical and commercial use during 1990, with options to extend the contract through 1996.

Immunex is a leading biotechnology firm focused on the research, development, marketing and manufacture of immunological therapeutic products. The company has under development one of the biopharmaceutical industry's largest proprietary portfolios of cytokines and cytokine receptors.

Behringwerke AG was founded in 1904 by Emil von Behring, the first Nobel Prize winner for medicine. The company specializes in biological products predominantly plasma proteins such as immunoglobins, albumin and clotting factors, and also vaccines. Diagnostics account for one third of overall revenue. Behringwerke is a subsidiary of Hoechst AG, which ranks among the largest concerns worldwide, both in pharmaceuticals and chemicals. Behringwerke affiliate, HRPI, is part of the Life Sciences Group at Hoechst Celanese Corp.

SEATTLE (MARCH 13) BUSINESS WIRE - Immunex Corp. (NASDAQ:IMNX) Tuesday announced settlement of a lawsuit against Ajinomoto Co. Inc. brought by

Immunex regarding Interleukin-2 (IL-2).

The agreement settles unresolved claims by Immunex to royalties on sales of IL-2 by the Japanese company or its licensees in Japan, Korea, and Taiwan. Immunex will receive unspecified royalties on sales in these countries. Financial details of the agreement were not disclosed.

The dispute dates back to 1984, when a partial settlement was reached resolving the conflicting claims on development of IL-2 by Immunex and Ajinomoto. The 1984 settlement was applicable to all countries other than Japan, Korea, and Taiwan.

Immunex is a leading biotechnology firm focused on the research, development, marketing and manufacture of immunological therapeutic products. The company has under development one of the biopharmaceutical industry's largest proprietary portfolios of cytokines and cytokine receptors.

Ajinomoto Co. Inc. is a diversified manufacturer and distributor of food products, amino acids, pharmaceuticals and specialty chemicals.

#90072b0617 03/13/1990 ~Business Wire

SEATTLE (MARCH 13) BUSINESS WIRE - Immunex Corp. (NASDAQ: IMNX) and Hoffmann-La Roche Inc. Tuesday announced the settlement of a long-standing royalty dispute over worldwide sales of Interleukin-2 (IL-2).

The agreement between Immunex and Roche sets royalties payable to Immunex on all sales of of IL-2 and polyethylene glycol (PEG) modified IL-2 by Roche's licensee, Cetus Corp.

In addition, terms of the agreement include the re-purchase by Roche of an Immunex option to manufacture IL-2 for sale by Roche in the United States.

As a result of the agreement, Immunex will receive $5.5 million, plus unspecified ongoing royalties on sales of IL-2. Total revenues from the agreement are expected to cause Immunex to show a profit for its first quarter ending March 31, 1990, said Alan Frazier, Immunex's chief financial officer.

Cetus has received approval to sell IL-2 as a treatment for kidney cancer

in West Germany, Ireland, Denmark, the Netherlands, France and Spain. The Emeryville, Calif.-based company has filed an application with the Food and Drug Administration to market IL-2 in the United States.

Immunex is a leading biotechnology firm focused on the research, development, marketing and manufacture of immunological therapeutic products. The company has under development one of the biopharmaceutical industry's largest proprietary portfolios of cytokines and cytokine receptors.

Headquartered in Nutley, N.J., Hoffmann-La Roche Inc. is widely known for original research and development in the health care field. The company has produced numerous important prescription drugs and is a leader in biotechnology. Roche also provides a wide range of diagnostic products and clinical laboratory services and is a major producer of pure bulk vitamins and medicinal products used in the food, pharmaceutical, cosmetic and animal health fields. In addition, the company recently launched a new business that provides infusion therapy for patients who can be treated outside the hospital.

DENVER (MARCH 13) BUSINESS WIRE - USMX Inc. Tuesday reported record operating results for the year ended Dec. 31, 1989.

Unaudited net income after tax for 1989 was $2,435,000, or 18 cents per share, on total revenue of $14.67 million. This compares with a net loss of $55,000 on total revenue of $5.76 million for 1988.

The company's record 1989 results were attributable to a full year's production from the Green Springs mine, located near Ely, Nev. For the year, gold production amounted to 32,662 ounces compared with 12,974 ounces for 1988.

USMX realized an average selling price of $440 per ounce of gold sold during 1989, compared with an average market price of $382, based on the London P.M. fixing. USMX currently has approximately 6,100 ounces of gold sold under forward sales contracts to be delivered at various dates

during 1990 at an average selling price of $466 per ounce.

#90072b0637 03/13/1990 ~Business Wire

ZAANDAM, NETHERLANDS (MARCH 13) BUSINESS WIRE - Koninklijke Ahold nv, Holland's largest food retailer and one of the top 10 supermarket operators in the USA, today reported record results for its 1989 fiscal fourth quarter (12 weeks) and year.

Consolidated net earnings in 1989 amounted to Dfl 194.6 million, as against Dfl 145.7 million in 1988, a 33.6 percent rise. Consolidated sales amounted to Dfl 17.7 billion, a 15.7 percent rise as compared to 1988. Of this rise, 3.9 percent is attributable to the higher exchange rate of the dollar (Dfl 2.12 in 1989 as against Dfl 1.97 in 1988).

Sales in The Netherlands rose by 8.9 percent to Dfl 9.1 billion. In the United States sales rose by 15.5 percent to $4.1 billion.

Operating results amounted to Dfl 312.5 million in 1989, as against Dfl 238.2 million in 1988, a 31.2 percent rise. In The Netherlands, operating results rose by 31.4 percent to Dfl 167.0 million. The Albert Heijn store chain contributed most of this rise through a continued broadening of its assortment and effective cost control. Although operating results of institutional caterer Ahold Grootverbruik improved, they fell short of expectations. In the United States, 1989 operating results amounted to $69.0 million, a 22.2 percent rise. This increase was achieved despite a number of non-recurring costs at Ahold USA. Operating results at BI-LO, Giant and FNS all improved considerably.

Income from unconsolidated subsidiaries and affiliates in 1989 totaled Dfl 31.0 million as against Dfl 24.3 million in 1988. The increase was chiefly attributable to an increased interest in Schuitema and dividends received from participations.

The increase in interest expense which took place in the first three quarters of 1989 is attributable to major investment activities in 1988.

In 1989 the tax burden continued to decrease, partly as a result of lower tax rates in The Netherlands.

The higher average exchange rate of the dollar had a positive effect of about Dfl 4.1 million on net earnings.

Earnings per share in 1989 amounted to Dfl 8.43, as against Dfl 6.97 in

1988, a 21.0 percent rise.

Net earnings for the fourth quarter of 1989 amounted to Dfl 58.4 million, as compared to Dfl 41.7 million in 1988, a 40.0 percent rise. This rise in net earnings is chiefly attributable to significant growth in operating results and a lower average tax burden.

Fourth quarter sales to third parties in The Netherlands in 1989 amounted to Dfl 2,227.7 million, or a 8.9 percent rise. Sales in the United States totaled $978.8 million, representing a 12.4 percent rise as compared to the corresponding period in 1988.

Consolidated sales in guilders rose by 12.0 percent to Dfl 4,230.0 million. Contributing slightly (about 1.5 percent) to this rise was the higher exchange rate of the dollar (on average Dfl 2.05 vs Dfl 1.99 in the prior year's fourth quarter).

#90072b0647 03/13/1990 ~Business Wire
WALTHAM, MA (MARCH 13) BUSINESS WIRE - Parametric Technology Corp. announces Release 5.0 of its Pro/ENGINEER product family.

A parametric, feature-driven, solid-modeling system for mechanical design applications, Pro/ENGINEER's Release 5.0 provides a new Pro/MANUFACTURING module, new functionality and enhancements to the existing Pro/ENGINEER family, and support for the new IBM RISC System/6000. Release 5.0 is immediately available for customer shipments.

Release 5.0 includes over 150 new enhancements, expanding functionality to address specific requirements in the aerospace, automotive, electronic packaging, consumer industries. These enhancements target areas such as the importation of pre-defined surfaces and point information into Pro/ENGINEER, general requirements for user-definable Bill-of-Materials and Engineering Change Order (ECO) forms, performance enhancements that substantially improve working with large, complex models, and many other enhancements that expand system capabilities. New Pro/MANUFACTURING Module

Pro/MANUFACTURING is a new module that provides tools for the manufacturing engineer to characterize a Pro/ENGINEER model in terms of the necessary process steps and operations required to manufacture the design.

Pro/MANUFACTURING retains the intermediate physical shapes and associated

drawings of each process step in a single datastructure that also contains the product design definition. Interactive changes to the design model will propagate through the intermediate manufacturing process steps and update manufacturing instructions and documentation.

Pro/MANUFACTURING supports process plan generation, 2 1/2, 3, and 5 axis milling, display of completed tool paths, automatic material removal from the workpiece, capture and display of intermediate process steps and documentation, and output of cutter location files that can be post-processed into NC machining instructions. IBM RISC System/6000 Port

Parametric Technology's Release 5.0 provides support for IBM's new RISC System/6000 running AIX Release 3. Pro/ENGINEER is one of the first CAD/CAM/CAE products available on this new IBM workstation featuring the industry's most advanced floating point processor, new global superscaler processors, and optimized 3-D graphics. Pro/ENGINEER

Release 5.0 contains numerous enhancements and increased functionality to Pro/ENGINEER's Part, Assembly, Drawing, and Sketcher modes as well as modifications to the majority of its modules.

In Part mode, Pro/ENGINEER will now quickly regenerate features. In Assembly mode, the hole or shaft will be centered on the selected datum point to be normal to the surface where that point is located. The format of the Bill of Materials can be customized. In Sketcher mode, information can be obtained about sketch geometry.

Release 5.0 also provides user attribute information that can be output to an assembly Bill of Materials report. A new batch utility allows plot files of existing objects to be generated without having to enter Pro/ENGINEER. Pro/ENGINEER Module Enhancements

Parametric Technology Corp. (NASDAQ:PTMC) is emerging as a leader in the mechanical design automation industry. Its new generation of CAD/CAM/CAE technology is revolutionizing the mechanical design automation process with a strategy that emphasizes technological leadership, aggressive price/performance, hardware independence, worldwide distribution, and extensive customer support.

PALO ALTO, CA (MARCH 13) BUSINESS WIRE - Former Xerox Corp. Executive Dwight Ryan has joined Document Technologies Inc., a leading manufacturer of new generation image processing products, as chairman and chief executive officer, effective April 1, 1990, it was announced in Palo Alto Tuesday by Mark Potts, president.

Prior to joining DTI, Ryan was president of the Special Markets Group at Xerox Corp. He spent 28 years with Xerox, where he held such positions as vice president of marketing (1980-1981), president, Business Systems Group (1982-1986), and president, Special Markets Group, (1987-1989).

While at Xerox, Ryan managed organizations with up to 35,000 employees and $5 billion in sales. In the early '80s, he led the top-level executive team that redefined Xerox's major business strategies and designed the company's structure into business units to implement those strategies.

Potts, a DTI founder, has headed the company since inception, and will continue as president and chief operating officer. Potts' expertise is based on extensive technical, commercial and management experience across a wide segment of the computer industry, both in Europe and in the United States.

He was a founder and principal of RAIR Ltd., the first micro-computer company, which he grew to a U.S. $25 million company with U.S. and European subsidiaries.

DTI is a leader in developing and producing a new generation of image processing products. The company started shipping production units in 1989 through OEM agreements in the United States and Europe.

Ryan and Potts will share corporate management responsibilities. The new team will enable more emphasis on business opportunities internationally, with major manufacturers and with systems integrators worldwide.

Potts' focus will be on developing those new business opportunities and next generation product concepts. Ryan's priority will be on strengthening the marketing sales and customer support capabilities. A prime focus will be to set internal processes to assure customer satisfaction through the delivery of quality products and services.

DTI will be relocating in May to a new 20,000 square foot manufacturing, development and home office headquarters facility in Mountain View, Calif. to service several OEM agreements signed in the United States and Europe in 1989.

#90072b0652 03/13/1990 ~Business Wire

LAGUNA HILLS, CA (MARCH 13) BUSINESS WIRE - Community Psychiatric Centers (NYSE;BSE;MSE;PSE:CMY) Tuesday announced two acquisitions and utilization statistics for its psychiatric hospitals during the first quarter ended Feb. 28, 1990.

The acquisitions consist of the following:

(1) Harvard Medical Services - a mental health management service which specializes in the processing and placement of psychiatric referrals from Western Europe. During 1989, Harvard's marketing services produced approximately 9,000 patient days. A letter of agreement has been signed and final closing is set for late March 1990.

(2) Brea Neuropsychiatric Hospital - Community Psychiatric Centers has agreed to purchase this newly constructed 152-bed acute psychiatric hospital from Comprehensive Care Corp.. A letter of intent was signed March 12, 1990, and final closing is scheduled to occur on or about May 15 1990, coincidental with occupancy of the new hospital. The hospital is located in Orange County, California, on approximately 6.5 acres of land adjacent to the original Brea Neuropsychiatric Hospital, which is being replaced by the facility under construction. The addition of Brea to Community Psychiatric Centers' regional network of existing Southern California facilities is expected to contribute to earnings and establish greater operating and marketing synergy.

Community Psychiatric Centers announced Tuesday that total patient days in its psychiatric hospitals during the first quarter ended Feb. 28, 1990, were approximately equal to patient days in the same period last year. Patient days in established hospitals (those open for more than 12 months during the reporting period) declined by 2.6 percent. Total admissions were up .9 percent and admissions in established hospitals declined by 1.8 percent.

Financial results for the first quarter will be released at the end of

March 1990. The company's projection of earnings per share for fiscal 1990 remains at $1.80.

Community Psychiatric Centers owns and manages a chain of acute psychiatric hospitals. These facilities are located across the United States, primarily in the Western and Southeastern sections and in the United Kingdom.

#90072b0654 03/13/1990 ~Business Wire

LOS ANGELES (MARCH 13) BUSINESS WIRE - American Vanguard Corp. (NASDAQ:AMGD) Tuesday announced results for the fourth quarter and year ended December 31, 1989.

Financial results for the prior year have been restated to reflect the sale of the Company's ABSCO Distributing subsidiary.

Revenues from continuing operations for the fourth quarter of 1989 increased 27 percent to $3,482,400 from $2,736,000 one year earlier. Net income was $111,500 or $.05 per share, including a net gain from discontinued operations of $11,100 or less than $.01 per share. In the prior year's fourth quarter, net income totaled $409,200 or $.18 per share including income from discontinued operations of $52,700 or $.02 per share.

For the year ended December 31, 1989, there was a 66 percent increase in revenues from continuing operations, which reached $18,974,800 from $11,454,100 in the prior year. Net income in the current period reached $3,524,500 or $1.55 per share, including a net gain from discontinued operations of $2,255,100 or $.99 per share.

This compares to net income in 1988 of $1,475,900 or $.65 per share, including income from discontinued operations of $135,000 or $.06 per share and income of $113,000 or $.05 per share from the cumulative effect of change in accounting for income taxes.

The per share figures for 1988 have been adjusted to reflect the 5-for-4 stock split in November 1988.

The increase in revenues in the current fourth quarter and year is attributable to higher sales of Phosdrin(R) and other products. American Vanguard acquired Phosdrin(R) from DuPont in January 1989. Prior to the acquisition of Phosdrin(R), American Vanguard had been the major supplier of this crop protection chemical to DuPont.

Management noted that although American Vanguard experienced an increase in gross profits, net income in 1989 was effected by a significant increase in the Company's operating expenses. Selling expenses increased to $1,253,000 in 1989 from $367,000 in 1988 while freight, delivery and warehouse costs increased to $884,000 in 1989 from $182,000 the prior year. These increases are primarily due to the acquisition of Phosdrin(R) and the related costs to market and ship the product. Research and development costs increased to $1,947,000 in 1989 from $1,030,000 one year earlier. To a lesser extent, there was an increase in general and administrative expenses related to public and community relations costs, payroll and payroll related items, and certain outside professional fees.

Herbert A. Kraft, Chairman and Chief Executive Officer, commented, ''The acquisition of PhosdrinR played a key role in the Company's revenue growth in 1989. I'm pleased to note that during the fourth quarter of 1989, we liquidated the entire acquired inventory of Phosdrin(R) and we are now selling this product at production costs. Had Phosdrin(R) been sold at production costs in the whole past fiscal year, pre-tax income would have been approximately $1,458,000 higher and net income would have reflected an additional $.39 per share.

American Vanguard Corporation, through its wholly owned subsidiary AMVAC CHEMICAL, is a manufacturer and formulator of chemicals for crop, human and animal protection.

WESTBORO, MA (MARCH 13) BUSINESS WIRE - Data General Corp. and Recognition Equipment Inc. of Dallas, Texas announced Tuesday that they had signed a reseller agreement for Recognition to market its imaging applications on Data General systems and for Data General to provide marketing support.

The products and services to be purchased by Recognition have a projected value of up to $30 million.

The agreement was awarded to Data General after an exhaustive evaluation by Recognition of several leading computer companies offering open architecture systems. Recognition's document processing, imaging product the System 100, will be offered on Data General's new AViiON Server Line and DG/UX operating system, as well as the DASHER series of workstations. Recognition's System 100 is aimed at banking, insurance, government and transportation markets.

Recognition's System 100 is a departmental-based image processing system offering a full range of document processing capabilities, from image capture through information indexing, processing and accessing. The system will be exhibited at the Association for Information and Image Management (AIIM) show in Chicago, April 10-12.

Ron Skates, chief executive officer of Data General, said, ''Recognition's experience with high-volume document handling and optical character recognition provides a significant added value to the imaging technology from Plexus Software Inc. and should be a perfect match for our high-performance, industry-standard AViiON systems and DASHER workstations.''

''This agreement with Recognition reinforces Data General's strategy to align itself with experienced, leading technology experts and system integrators in order to provide specific solutions to customer needs in vertical markets,'' explained Skates.

Data General manufactures computer and communications systems for business. Recognition sells and service data capture, document scanning and image processing systems to customers around the world.

GREENWICH, CT (MARCH 13) BUSINESS WIRE - Stolt Tankers and Terminals (Holdings) S.A., (NASDAQ:STLTF) Tuesday reported that shares for Stolt Partner S.A., a new company being launched on the Oslo Stock Exchange, have been fully subscribed.

As previously reported, a subsidiary of Stolt presubscribed one third of the 10 million share issue with the remaining shares being purchased chiefly by investors in Norway, Sweden and the United Kingdom. The issue was not available to U.S. investors.

Stolt Partner S.A. will be the first foreign shipping company to be listed on the Oslo Stock Exchange. Formal listing is expected to take place in early April.

Stolt Partner will use the $63 million raised by the share offering in conjunction with bank financing to purchase six ships from Stolt Tankers for a price of $111 million. All aspects of marketing, operations and

ship management will be provided by Stolt Tankers under contract and the ships will continue to trade in the Stolt Tankers Joint Service for the account of Stolt Partner.

In contrast to its new affiliate, Stolt Tankers and Terminals (Holdings) S.A. is an international transportation company with 21 offices in 12 countries, deploying many different assets in the distribution of bulk liquids both by land and sea. Stolt Tankers and Terminals provides a total distribution service with its combination of more than 55 transoceanic and 30 coastal parcel tankers, totaling about 1.7 million deadweight tons; 2,500 intermodal tank containers in worldwide door-to-door service; five regional storage and distribution tank terminals in the United States, Northwest Europe and Brazil; as well as barges, railcars and tank trucks.

#90072b0667 03/13/1990 ~Business Wire

WOODBURY, NY (MARCH 13) BUSINESS WIRE - Comverse Technology Inc. (NASDAQ:CMVT) announced the relocation of its principal operations in the United States to 170 Crossways Park Drive, Woodbury, N.Y. 11797.

The new facilities comprised of approximately 9,500 square feet of general office, manufacturing and warehousing space, will house Comverse's growing United States operations, from which the company conducts its domestic sales, marketing and support activities and oversees its international distribution activities in Western Europe and the Far East.

David Chuchinsky, president of Comverse's USA Division, stated that ''The move to our new facilities, which are approximately three times the size of our previous space, has been necessitated by the rapid expansion of our domestic and international business over the past year. Comverse's emphasis on integrated fax and voice messaging products plus their major international alliances have contributed strongly to this expansion.

''This resulted in the growth of our US Division staff to 41 people, an increase of more than 60 percent since the end of 1988. The increased space will enable Comverse to provide more services to its customers, to ship a higher volume of product and to continue to expand its technical and support facilities.

While the move will cause a moderate increase in our cost of operations,

we believe that the investment is more than justified by the enhancement of the services we can deliver to our customers and the capacity to support the continued strong growth of our business into the 1990s.''

Comverse, located in Woodbury, develops, manufactures and markets high performance computer systems for commercial and defense communications applications, including integrated multi-media message management systems marketed under the name of TRILOGUE.

During the last two years, Comverse has marketed its products directly to major subscriber services provider organizations in the United States and internationally through leading distributors in Western Europe and the Far East, while developing advanced communciations processing systems for defense and other users under government contracts.

Its revenues have grown to approximately $12 million for the four quarters ended Sept. 30, 1989, an increase of more than 90 percent from the preceding four quarters.

#90072b0669 03/13/1990 ~Business Wire

WOODBURY, NY (MARCH 13) BUSINESS WIRE - Comverse Technology Inc., (NASDAQ:CMVT) announced that it has received orders to supply its Trilogue Message Management System to Metro Mobile, one of the leading cellular telephone service operations in the United States with over 100,000 subscribers in 17 markets.

The systems covered by the initial orders have been installed at the Greenville, S.C. and Charlotte, N.C. operations of Metro Mobile.

Jack Plating, vice president and general manager of Metro Mobile's Greenville office stated that, ''We chose Comverse's Trilogue because of the need to upgrade our voice messaging services to meet the growing demands of our markets in the Southeast.

''We feel that Trilogue will not only permit Metro Mobile to improve its present services, but also to position ourselves to capitalize on future enhanced service offerings, including the ability to offer both voice and facsimile messaging services through Comverse's FaxLogue option. In our view, such enhanced services will be an important element in our industry's future offerings to the mobile customer.''

Kobi Alexander, president and chairman of Comverse, stated that ''Our

Trilogue system is now providing messaging services in over 100 cellular MSAs in the United States as well as through international PTTs, and Comverse is committed to maintaining a leading position in the growing world market for messaging services.''

David Chuchinsky, president of Comverse's USA Division, added that, ''Metro Mobile is one of the most advanced cellular telephone companies in terms of the breadth and quality of its service offerings, and their selection of our product adds further emphasis to Comverse's already well proven capability as a leading provider to the cellular industry.''

Comverse, located in Woodbury, develops, manufactures and markets high performance computer systems for commerical and defense communications applications, including integrated multi-media message management systems marketed under the name TRILOGUE.

During the last two years, Comverse has marketed its products directly to major subscriber services provider organizations in the United States and internationally through leading distributors in Western Europe and the Far East, while developing advanced communications processing systems for defense and other users under government contracts.

#90072b0671 03/13/1990 ~Business Wire

MIAMI, FL (MARCH 13) BUSINESS WIRE - MetalBanc Corp. (NASDAQ: MBAN) announced Tuesday that its board of directors has approved the acquisition of a 51 percent interest in Jillian's Billiard Club, a chain of elegant, upscale billiard parlors.

The board also proposed a 1 to 4 reverse stock split and extended the expiration date of its three outstanding common stock purchase warrants.

''Reflecting our entry into the entertainment and leisure market, which will become our primary area of activity, we will change the name of the company to 'Carom Capital Corporation','' said President Howard M. Glicken. ''During the next year, we plan to add 10 locations to the chain which will be known as Jillian's Entertainment Corporation.''

Founded in Boston by Steven Foster, who will continue as president & CEO,

Jillian's has locations in Boston and Miami and plans to open new clubs in Seattle and Cleveland in the near future. ''Our plans dovetail with the surging popularity of billiard clubs nationwide,'' Glicken said. He noted that the industry has doubled in size to annual revenues of $2 billion since 1986.

''This acquisition is consistent with our diversification strategy for enhancing shareholder value through the acquisition of companies with a positive income stream,'' Glicken continued.

MetalBanc has been evaluating potential acquisition candidates since the sale of its precious metals business in the fourth quarter of fiscal year l989. Since that time, the majority of the company's operating revenues have been provided by Groshire Development Group, a wholly owned subsidiary active in residential building and development in south Florida.

The company's proposed 1 to 4 reverse stock split is subject to approval at the annual shareholders meeting in Miami on April 20, l990.

The expiration date of its three outstanding common stock purchase warrants (MBANW, MBANZ, MBANM) which were due to expire at 5:00 p.m., New York Time, on August 30, 1990, have been extended until 5:00 p.m., New York Time, on December 31, 1990.

The exercise price of such warrants, as well as the other terms and conditions thereof, will remain the same. The company said that it may, but is under no obligation to do so, lower the exercise price of the warrants from time to time for limited periods of time.

LOS ANGELES (MARCH 13) BUSINESS WIRE - International Movie Group (NASDAQ:IMGRF) reported Tuesday that its wholly-owned subsidiary, 'The Movie Group' consummated sales of $5.4 million with additional commitments still to be signed from the American Film Market held in Los Angeles from Feb. 22-March 2, more than doubling the company's success at the '89 festival.

Mr. Daniel Marquet, executive vice president for 'The Movie Group,' in

commenting said ''Impressive sales have been generated at the last two film markets attended - a similar successs story is anticipated in Cannes in May, where the company could easily succeed its $16.5 million sales projection for the '90 fiscal year ending in June.''

International Movie Group has been extremely successful in bringing marketable talent laden films to market; new titles include, ''The Runestone'' starring Alexander Godunov, ''By the Sword'' starring Eric Roberts and F. Murray Abraham, ''The Maid'' with Jacqueline Bisset and Martin Sheen, and ''Sweet Revenge'' with Rosanna Arquette and Carrie Fisher and others to be announced soon.

'The Movie Group,' a wholly owned subsidiary of International Movie Group, distributes independently produced North American and English language films to a total of 52 countries in Europe, Asia and Australia.

#90072b0678 03/13/1990 ~Business Wire

CORPUS CHRISTI, TX (MARCH 13) BUSINESS WIRE - Marine Drilling Co. announced that at a special meeting of shareholders held on March 12, 1990 the shareholders approved the previously announced proposed business combination of Marine with Keyes Offshore Limited Partnership and related Keyes entities.

In addition, Keyes Offshore Limited Partnership held a special meeting of limited partners on March 12, 1990, at which the limited partners approved the business combination.

It is currently expected that all the remaining conditions to the completion of the business combination will be satisified and that the business combination will be completed at the close of business today, Tuesday, March 13, 1990.

Upon consummation of the business combination, Marine, Keyes Offshore Limited Partnership and related keyes entities will become subsidiaries of Marine Holding Co., a newly formed Texas holding company.

In the business combination, each outstanding share of Marine's common stock and preferred stock will be converted into one share of Marine Holding Co.'s common stock and preferred stock, respectively.

In addition, Marine will acquire the keyes entities through the issuance of up to an aggregate of 4,438,772 shares of common stock and 50,000 shares of preferred stock of Marine Holding Co.

Marine and the Keyes entities are each engaged in the contract drilling of oil and gas wells in the U.S. Gulf of Mexico for independent and major oil companies. Marine has 16 mobile offshore jackup drilling rigs available for operation and the Keyes entities operate seven rigs.

Marine's common stock is traded on the National Market System of NASDAQ under the symbol ''MDCO.''

MOBILE, AL (MARCH 13) BUSINESS WIRE - Altus Bank (NASDAQ/NMS:ALTS) has reached an agreement to sell First Alabama Bank (NASDAQ/NMS:FABC) certain assets which include Altus branch facilities in the Birmingham, Ala., area.

The sale, involving two of the state's largest financial institutions, includes the Riverchase branch as well as five Super Money Market locations in Delchamps Super Markets, and will be finalized by the end of this week.

According to Chris C. DeLaney, chairman of the board, the sale is a significant step in the Altus reorganizational plan announced last year. DeLaney said, ''Previously, a presence by Altus Bank in Birmingham was a primary objective of this institution. However, restructuring efforts dictated the sale of these branches to be in the best interest of Altus.''

He added, ''This is a major hurdle in our plans of returning to profitability and will greatly benefit our shareholders and customers in other markets where Altus will now have 43 locations.''

DeLaney said that those previously employed by Altus in Birmingham would assume similar positions with First Alabama. Richard Horsley, vice chairman of First Alabama indicated that their new locations would give customers added convenience in the Jefferson County area and there would be no lapse in operations once the sale was finalized.

#90072b0680 03/13/1990 ~Business Wire

NEW YORK (MARCH 13) BUSINESS WIRE - IBM Tuesday announced The Platinum Series, an enhanced version of its powerful accounting and management information software program.

Enhancements to The Platinum Series include an upgrade to an industry-standard interface; comprehensive on-line help screens at the field, global and system levels; full implementation of pop-up data windows; extensive data verification and safeguards; and improved documentation.

Since acquiring exclusive marketing rights to the Platinum products in September, 1989, the development focus has been on enhancements to make The Platinum Series easier to use.

''We had the benefit of starting with a very powerful and popular software product,'' said Fernand Sarrat, vice president, IBM Desktop Software. ''This latest release of The Platinum Series will stand out even further in the accounting market due to its power and speed, especially now that its easier to use. Our intention is to put IBM resources behind The Platinum Series to make it even more useful as an accounting and MIS solution for now and into the future.''

The Platinum Series, developed by Advanced Business Microsystems, Inc. of Irvine, Calif., provides extensive accounting functions and capabilities, as well as MIS features for reporting and analyzing the comprehensive records it maintains. The Platinum Series accounting packages can be used on a stand-alone basis or on a local area network.

IBM Desktop Software, based in Milford, Conn., is a business unit within the IBM Application Solutions Division. Its mission is to bring to market leading application software for personal computer systems.

(a) Platinum is a registered trademark of Advanced Business Microsystems Inc. IBM, Operating System/2 and OS/2 are trademarks or registered trademarks of the International Business Machines Corporation.

MEMPHIS, TN (MARCH 13) BUSINESS WIRE - Construction of Saturn's first dealer facility in Tennessee begins Tuesday as Russell Gwatney, Saturn's Memphis dealer partner, and Saturn officials break ground here for the future home of ''SATURN OF MEMPHIS.''

Joining Gwatney in turning the first spade of ground were Donald W. Hudler Saturn vice president of sales, service and marketing, and John Michaud, Saturn UAW Local 1853 financial secretary.

''Russell Gwatney typifies our Saturn dealer partners,'' Hudler said. ''They are highly successful retail automotive experts with organizations committed to providing superior customer satisfaction and an exceptional sales and service experience.''

''We're focusing on providing a pleasant experience for each customer who walks through the front door of this dealership,'' Gwatney said. ''This key element of Saturn's philosophy will distinguish us in the marketplace.''

The stand-alone, uniform Saturn facilities will feature new concepts in merchandising and servicing cars including side-by- side sales and service entrances to focus on delivering a superior shopping, buying and owning experience.

Saturn currently has commitments from dealers for 95 market areas to build 112 dealer facilities across the United States. The automaker plans to introduce its cars first on the West Coast, Tennessee and the Southeast this fall, followed by a roll-out across the United States.

While construction of Saturn's dealer facilities is under way in California and the Southeast, construction of the automaker's new manufacturing and assembly complex in Spring Hill, Tenn., nears completion.

Saturn Corp., an independent subsidiary of General Motors, is based in Spring Hill, and Troy, Mich. The company's mission is to develop, manufacture and market a family of high- quality, affordable cars to compete in the subcompact and compact segments of the market. Saturn products will be built at a four million-square-foot manufacturing and assembly complex in Spring Hill. The first cars, two-door and four-door models, will be introduced in the fall of 1990.

#90072b0684 03/13/1990 ~Business Wire

HORSHAM, PA (MARCH 13) BUSINESS WIRE - Robec Inc. (NASDAQ:ROBC) Tuesday reported increased net sales and earnings.

Net sales rose 22 percent for the year ended Dec. 31, 1989 to $168,576,364 from $138,345,751, for the year ended Dec. 31, 1988. Net sales rose 20 percent for the three month period ended Dec. 31, 1989 to $46,045,530 from $38,426,283 for the same quarterly period in 1988.

''The increased sales resulted from the eight new offices added in 1988 and the increased performance from our existing offices,'' said Robert H. Beckett, chairman and chief executive officer. ''We were very pleased that our growth in earnings was greater than our growth in sales in view of the current trends in our industry,'' he further stated.

Earnings for the year ended Dec. 31, 1989 increased 23 percent to $4,719,775 from $3,822,176 for the year ended Dec. 31, 1988. Earnings for the three month period ended Dec. 31, 1989 increased 24 percent to $1,367,069 compared to $1,104,942 for the same period in 1988.

Earnings per share for the year ended Dec. 31, 1989 increased to $1.32 per share when compared to $1.18 per share for the year ended Dec. 31, 1988. Earnings per share were 30 cents for the three month period ended Dec. 31, 1989 as compared to 34 cents for the same quarterly period of 1988.

The reduction in fourth quarter earnings per share was primarily due to the fact that the calculation of earnings per share for 1989 included the common stock sold during the company's initial public offering on Oct. 3, 1989.

The attached data shows a summary and comparison of Robec Inc.'s financial data for both the year ended Dec. 31, 1988 and 1989 as well as the fourth quarter earnings for the period ended Dec. 31, 1988 and Dec. 31, 1989.

Robec Distributors is a national, value-added distributor of microcomputer systems, peripherals, spare parts, and accessories, providing product leadership and technological services to value-added resellers, dealers and computer retailers.

Robec is headquartered in Horsham, Pa. There are sales and warehouse locations across the United States including: Asheville, N.C.; Atlanta; Boston; Chicago; Columbus, Ohio; Dallas; Denver; Houston; Kansas City; Los Angeles; New York; Orlando, Fla.; Philadelphia; Phoenix; Pittsburgh; Reno, Nevada; Salt Lake City; San Francisco; Seattle; Washington D.C.; and Youngstown, Ohio.

FAIRFIELD, NJ (MARCH 13) BUSINESS WIRE - Cellcom Corp. (NASDAQ:CLCM) announced that Donald Magrini has joined the company to develop and implement a coordinated program with mass merchandisers.

This program will provide Cellcom's cellular telephone services to mass merchandisers in several major regional areas including the nation's two largest cellular markets, Metropolitan New York/Northern New Jersey and Los Angeles.

With a network of more than 600 cellular service agents nationwide, Cellcom has one of the largest retail ditribution networks of any reseller which includes car stereo shops, communications specialists, auto dealerships, consumer electronic stores and mass merchants.

As vice president, Magrini will also direct a support and technical staff which will exclusively service Cellcom's relationships with mass merchandisers.

Magrini, a former manager of the retail sales division of Metro One - one of the two FCC-licensed cellular telephone service carriers operating in the Metropolitan New York/Northern New Jersey cellular market - has over 13 years of experience in the cellular and telecommunications businesses.

At Metro One, Magrini created the sales support, servicing and operating procedures for its very successful turnkey retail program. Prior to joining Metro One, Magrini was with OKI Telecom's Cellular Telephone

division, as northeast regional sales manager, where his responsibilities included establishing and implementing an agent distribution network.

Additionally, Magrini has served in a variety of sales and management positions for Motorola Communications and Electronics Inc.

Cellcom Corp. is a leading reseller of cellular telephone services with operations in several major regional areas, including the nation's two largest cellular markets, Metropolitan New York/Northern New Jersey and Los Angeles.

The company also sells and installs a wide variety of cellular telephone equipment through an extensive base of over 600 retail service agents nationwide.

WINDLESHAM, ENGLAND (MARCH 13) BUSINESS WIRE - The BOC Group Tuesday announced a number of organization changes, in part to redirect and strengthen management focus on the more rapid growth of its health care business worldwide.

The group will take steps to place its existing four health care divisions into a separate management and legal entity within The BOC Group. Both steps should be accomplished over the next twelve months. The company expects this to lead it to seek a public market in the equity of its health care activities, as business and stock market conditions permit.

The management team for BOC Health Care will be based at the Group's offices in Murray Hill, N.J.

Desmond O'Connell, formerly Group Managing Director of the BOC Group, is appointed President and Chief Executive of BOC Health Care. He will relocate from Britain to the US and relinquish his other operational responsibilities within the Group.

The company also announced today that Patrick Dyer, a managing director of The BOC Group and its chief executive - Gases, who hitherto reported to Desmond O'Connell, will now report to Richard Giordano.

Following the retirement this month of James Baldwin as the group's managing director - Diversified Businesses, Danny Rosenkranz is appointed chief executive - Vacuum Technology and Distribution Services. He too will report to Richard Giordano and is also appointed a member of the group executive committee.

Deb Chatterji is appointed chief executive - Technical Activities and a member of the group executive committee. He will continue to report to David Craig, managing director - Technology and Engineering, who retires later this year.

The BOC Group - based in Windlesham, England and Murray Hill, N.J. - is an international corporation with operations in more than 50 countries around the world. Its principal businesses are industrial gases, health care products and services, and high vacuum technology. BOC's business and trade names include Airco, Ohmeda, Anaquest, Glasrock Home Health Care Transhield, Edwards High Vacuum, and Viggo-Spectramed.

#90072b0704 03/13/1990 ~Business Wire

GUERNSEY, Channel Islands (MARCH 13) BUSINESS WIRE - Insituform Group Limited (''IGL'') (NASDAQ National Market System: IGLSF (shares) and IGLWF (warrants)), Tuesday announced that it has renegotiated the Insituform license for France with Entrepose Montalev S.A., headquartered in Paris.

Under the terms of the new agreement, Entrepose will pay IGL a higher level of royalty increasing in two stages over the next three years. Entrepose Montalev, the exclusive Insituform licensee for France, now has the right to appoint sub-licensees.

Entrepose Montalev, with 1989 sales (including sales taxes) of 1.7 billion Francs, employs 2,200 in 81 locations. In addition to its Insituform business, Entrepose Montalev is France's largest scaffolding company and leads the market in the installation of gas pipes for Gaz de France.

Entrepose Montalev is also a major supplier of mechanical erection and heavy lifting equipment and a leader in the installation of industrial pipelines. Entrepose Montalev is a division of GTM Entrepose Group, a

major international corporation employing 30,000 which has operations in construction, engineering, power production among others. In 1989, GTM Entrepose Group's worldwide sales (including sales tax) were 21 billion Francs.

Gilbert Mercier, the divisional manager of Entrepose Montalev, stated, ''According to a major independent study conducted last year of France's 160,000 kms of municipal sewer pipelines, nearly 13,000 kms are in need of rehabilitation. With the assistance of IGL's technical and marketing support teams, we are confident that we will be able to grow the Insituform part of our business at an even faster rate.''

John Deacon, IGL's General Manager - Europe, Middle East and Africa Operations, stated, ''With 81 offices throughout the country, Entrepose Montalev is in an advantageous position to develop the Insituform market for the rehabilitation of gravity sewers. This organization has also applied to the French government authorities to get Insituform approved for use in the reconstruction of potable water conduits.''

Insituform Group Limited, through its wholly-owned subsidiaries, owns the worldwide rights to a system of pipeline and conduit rehabilitation known as the Insituform Process. With more than 18,000 successfully completed contracts in over 40 countries, Insituform retains market lead, having renovated 3,700 kms of pipeline to date.

By eliminating the need for disruptive excavation, the Insituform Process provides a cost-effective solution to the problem of deteriorating pipe systems. A flexible non-woven fiber tube (InsitutubeR), impregnated with a liquid resin, is inverted by water pressure through the damaged pipe and is forced firmly against the inside of the pipe. The resin is then cured, either by hot water or high frequency light, creating a durable new structural pipe within the old.

NEWTON, MA (MARCH 13) BUSINES WIRE - Staples Inc. (NASDAQ:SPLS) announced Tuesday record sales and earnings for the quarter and for the twelve months ended Jan. 27, 1990.

Staples earned $3,002,000, or 30 cents per share, for the quarter on sales of $57,892,000 compared with prior year earnings of $858,000, or 11 cents per share on sales of $34,841,000. Earnings for the quarter ended Jan. 27, 1990, include an extraordinary credit of $972,000 related to the utilization of net operating loss carryforwards.

Prior to such credit, earnings were $2,030,000, or 21 cents per share. Sales rose 66.2 percent over the comparable 1989 quarter, while sales for 22 comparable stores gained 25.5 percent over the comparable period.

For the full 12 months ended Jan. 27, 1990, Staples earned $5,745,000, or 61 cents per share, on sales of $181,699,000, compared with a prior year loss of $6,249,000, or 85 cents per share on sales of $97,477,000. Earnings before extraordinary credit for the 12 months ended Jan. 27, 1990 were $4,249,000, or 45 cents per share. Sales rose 86.4 percent over the prior year, while sales for comparable stores gained 36.6 percent over the prior year.

The company recently changed its fiscal year end to the last Saturday in January. Accordingly, it also reported financial results for the transition period representing the nine months ended Jan. 27, 1990.

The company ended the quarter with 38 stores, including new stores in Columbus, Ohio and Springfield, Pa., its eighth store in the Philadelphia market. The company will leverage its investment in infrastructure as it steps up its growth plan in 1990. It plans to add a total of 32 or more stores so as to end its fiscal year with at least 70 stores.

LONDON (MARCH 13) BUSINESS WIRE - March 13, 1990, British Gas (NYSE:BRG) Tuesday announced the appointment of George H. Langshaw, Managing Director, Global Gas.

Langshaw's appointment takes effect from April 1, 1990. He will serve on the Company's Group Executive, the top management committee which reports to the Board of British Gas and will report directly to British Gas Chairman, Robert Evans.

Langshaw will be responsible for the new business unit created to help

British Gas expand from its core UK business and develop into gas related activities across the world. These activities will encompass the transmission and distribution of gas outside the UK, the application and dissemination of gas technology and the generation of electricity in gas-fired power stations.

The existing Company departments of New Business Development and Technology Transfer will be incorporated into the Global Gas Unit. Previously Langshaw was British Gas Group Director of Personnel.

Liverpool-born, Langshaw was educated at the City's Institute High School before joining biscuit-makers, Crawfords, as a commercial apprentice in 1957 and working in the Financial Control Section of Littlewood Stores from 1964.

He joined the gas industry in 1967 as an accountant with the Mersey Group of the then North West Gas Board. He has held various posts in the Southern, North Western and Wales Regions and British Gas Headquarters; most recently as Regional Chairman of Wales region. He is a Trustee of the British Gas Pension Funds and sits on the Investment Subcommittees. He is also a Fellow of the Chartered Institute of Cost and Management Accountants and an Associate of the Chartered Institute of Secretaries and is a Companion of the Institution of Gas Engineers.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer services to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. British Gas American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten Ordinary Shares.

WEYMOUTH, MA. (MARCH 13) BUSINESS WIRE - Sheri Poe, president of athletic footwear marketer RYKA Inc. (NASDAQ:RYKA), Tuesday announced that the company had filed a Registration Statement with the Securities and Exchange Commission for a public offering of 2 million shares of common stock through the managing underwriter, Ladenburg, Thalmann and Co. Inc., of New York, N.Y.

Prior to the effective date of the registration statement, the company intends to effect a 1 for 2 reverse stock split.

Poe also announced that gross sales for the year ended Dec. 31, 1989, were $5,420,903 compared with gross sales of $1,435,191 for the year ended Dec. 31, 1988. Net loss for the year amounted to $3,552,583 or 30 cents per share compared with a loss of $1,527,390 or 16 cents per share in 1988.

RYKA Inc. designs, develops and markets high performance fashionable athletic footwear for women. The company's principal products are multi-purpose aerobic cross-training shoes.

TOLEDO, OH (MARCH 13) BUSINESS WIRE - The Ford Aerostar Electronic 4WD (4 wheel drive), selected as Motor Trend's 1990 award winner, incorporates a drivetrain and chassis system designed and developed by a joint Ford and Dana Corp. program.

Dana, the largest independent supplier of components to the vehicular industry, ships the front axle/crossmember module from its new regional assembly facility in Columbia, Mo., to Ford's nearby St. Louis vehicle assembly plant. In addition, Dana supplies the front axle shaft assemblies incorporating constant velocity joints, wheel-end assemblies, lower control arm assemblies, front and rear driveshaft assemblies and a new state-of-the-art transfer case. This revolutionary transfer case design is electronically actuated and features an ultra lightweight magnesium housing.

As a major supplier of drivetrain and chassis components, Dana has established itself as the industry's leading full service supplier with the capability of optimizing the drivetrain and chassis envelope within the vehicle configuration. For the Ford Aerostar Electronic 4WD, Dana worked with Ford to design and develop the entire 4WD drivetrain and chassis system, while also serving as the drivetrain/chassis program manager.

Dana provides line sequence delivery of drivetrain and chassis products or complete systems by establishing regional assembly facilities close to customers' vehicle assembly operations. The Ford Aerostar Electronic 4WD is only one of several Dana systems now being shipped from regional assembly facilities...many of which are dedicated to a specific customer.

As the program manager, Dana, in concert with a group of Ford technical personnel, employed simultaneous engineering while coordinating the interactions of the design, development and manufacturing disciplines within the Dana and Ford organizations. Motor Trend's prestigious award honoring the Ford Aerostar Electronic 4WD attests to the success of cooperative teamwork matching supplier and OEM (original equipment manufacturer) resources.

Dana Corp. established its Systems Engineering operation at the company's Center of Technology, in Ottawa Lake, Mich., to act as an extension of the OEM's engineering organization. This concept allows the OEM to minimize expenditure of its financial and human resources while relying upon the technological and manufacturing capabilities of Dana. It also eliminates the need for the OEM to work with the wide range of suppliers that historically has been needed to support a major new product introduction.

Dana's single interface organization, combining its resources with those of other suppliers that provide companion componentry, is a service designed to assist OEMs in bringing new models to the marketplace more

economically...and quicker than by traditional methods. Additionally, components or systems supplied from nearby Dana regional assembly facilities allow OEM plant inventories to be sharply reduced. The end result is significant financial and operational benefits to the OEM.

The recent accomplishments of Dana's North American Systems Engineering operation has resulted in the launching of additional engineering technical centers within its European, South American and Asian-Pacific regions. Dana's unique technical and broad product capabilities, spanning the entire vehicle spectrum from specialty passenger cars...to light trucks...to heavy duty trucks, are expected to soon serve the same vital role in these important international markets.

WORTHINGTON, OH (MARCH 13) BUSINESS WIRE - Liqui-Box Corp. reported record sales and earnings for 1989, reaching $102,760,000--a new high for the company, vs. $90,365,000 in 1988.

Earnings also achieved a new high of $8,651,000 vs. $8,169,000 with earnings per share of $3.69 vs. $3.54 for the year.

Record fourth quarter sales were also attained, but additional costs, partially attributed to the mid-year acquisition of B-Bar-B Corp., slightly reduced earnings for the quarter.

Several new markets were entered during 1990, a line of advanced fillers was developed and introduced, and manufacturing of 55-330 gallon large bags commenced. New markets included liquid detergents and maintenance chemicals. The Modular I fully automatic filler line not only provides unsurpassed performance for bag-in-box package filling, but also allows customers to upgrade fillers, for the first time, in their own plant locations.

Liqui-Box manufactures flexible bag-in-box packaging, molded containers and filling equipment for its packgaging products. Markets served include the beverage, bottled water, dairy, processed food, specialty, chemical, wine and international. The company ranked 67th on the Forbes list of ''200 Best Small Companies''.

BOSTON (MARCH 13) BUSINESS WIRE - Boston Edison, the Conservation Law Foundation, the Attorney General's office, the Massachusetts Division of Energy Resources and Massachusetts Public Interest Research Group Tuesday filed a comprehensive plan outlining state-of-the-art energy conservation programs that over the next five years will save the amount of electricity it now takes to power all of Arlington, Watertown, Weston and Stoneham.

Under the Energy Collaborative plan filed with the Massachusetts Department of Public Utilities, Boston Edison has agreed to spend about $215 million over the next five years to help hold down costs to its 640,000 customers and improve energy efficiency throughout the 40 cities and towns the utility serves in eastern Massachusetts.

The five-year effort is expected to help Boston Edison mitigate growth in the demand for energy by approximately 1 billion kilowatthours of electricity, and about 120 megawatts of power.

Bernard W. Reznicek, Boston Edison's president and chief operating officer hailed the Collaborative signing, ''as perhaps the most ambitious financial commitment to energy conservation by an urban utility in the nation.''

The five parties pooled resources together over the past year to develop the 250-page plan, which calls for a broad spectrum of residential, commercial and industrial energy efficiency programs.

''This Collaborative plan is another milestone in our commitment to being a utility that is on the cutting edge of providing exceptional customer

service and making it simple and easy for all of our customers to become as energy efficient as possible,'' Reznicek said. ''This partnership will help us reach our short and long-term goals of providing a balanced, cost-effective energy plan.''

Boston Edison's Collaborative programs will target outdated lighting, heating, cooling and other equipment in existing buildings and homes that is less efficient than technology available today. The plan is designed to help stabilize energy costs, hold down electrical demand and protect the environment, Reznicek added.

''With these Collaborative programs, Boston Edison joins ths front rank of New England utilities in electricity conservation,'' said Douglas I. Foy, executive director of the Conservation Law Foundation. ''The programs will benefit all of Edison's customer sectors and the visibility of energy conservation in Boston will have national impact. Moreover, the company's ability to reach agreement with CLF and other non-utility parties is a milestone in what has traditionally been an adversarial relationship.''

The comprehensive agreement puts a particular emphasis on making new buildings more energy efficient than current standards require and penetrating hard to reach markets, such as multi-family buildings and low-income urban areas.

''I am delighted with the comprehensive conservation plan being filed today,'' said Attorney General James M. Shannon. ''These are solid programs that will yield real benefits for ratepayers and the environment. It is particularly gratifying that $75 million of the required expenditures will come at no cost to customers.''

''These programs represent a major advance for Boston Edison in mining energy that is now wasted in our homes, offices and factories and turning it into an inexpensive and ervironmentally sound rssource,'' said Alan Nogee, energy program analyst with MASSPIRG.

''The programs in this filing will reach deep into the energy efficiency potential of the company,'' said Paul W. Gromer, commissioner of Energy Resources. ''Through this effort, consumers will save money and energy, and the company will reduce the need to build costly new generating plants.''

Under its recent rate case settlement approved by the DPU, Boston Edison has already agreed to spend a minimum of $75 million in energy efficiency programs over the next three years at no cost to the company's customers. Included is $25 million to benefit the elderly, low-income families, state facilities, public school systems and multi-family residential buildings.

BOSTON (MARCH 13) BUSINESS WIRE - At a health care conference sponsored by Cowen & Co. in Boston Tuesday, C.R. Bard Inc. (NYSE:BCR) described its commitment to improved FDA relations and to reentering the U.S. balloon angioplasty catheter market.

The presentation included an overview of Bard's financial performance for the full year 1989.

Bard's president and chief executive officer, George T. Maloney, stated that the company had a difficult time in the past 12 months in its relations with the FDA.

''The important thing,'' he said, ''is that we are committed to becoming a model citizen in all of our FDA dealings.''

He cited as an example the company's voluntary withdrawal from the market last week of its SPRINT and SOLO angioplasty catheters following the company's internal investigation which revealed labeling issues which need to be resolved with the FDA.

In response to questions, Maloney indicated, ''We do not know when we will be back into the U.S. balloon angioplasty market. That decision is currently in the hands of the FDA. But I can assure you that we will be back with SPRINT, SOLO and the NEW PROBE angioplasty catheters the moment they are FDA-approved.''

George A. Davis, Bard's chief financial officer, told conference attendees ''While we don't make forecasts, estimates by others suggesting that the balance of our business excluding domestic angioplasty has earning potential in 1990 of around $1.00 per share seem, at this time, reasonable to us.''

Bard reported earnings per share of $1.18 in 1989 on sales of $777.8 million.

C.R. Bard Inc., headquartered in Murray Hill, N.J., is a leading multinational developer, manufacturer and marketer of health care products.

RICHMOND, VA. (MARCH 13) BUSINESS WIRE - Scott & Stringfellow Financial Inc. (OTC: SCOT) has declared its third quarterly dividend for fiscal 1990 of six cents per share of common stock payable to shareholders of record March 30.

In making the announcement, Francis A. Pineno, president and chief executive officer said the dividend would be payable to shareholders on April 13. The company has 2,009,810 common shares outstanding as of Feb. 28.

Scott & Stringfellow Financial Inc. is the holding company of Scott & Stringfellow Investment Corp., a regional brokerage, financial services and investment banking firm headquartered in Richmond. The common stock of the holding company has been traded in the Over-The-Counter market since an initial public offering in November 1986.

On Oct.19, 1989, Scott & Stringfellow Inc. purchased substantially all of the assets of Investment Corp. of Virginia, headquartered in Norfolk. As a result of the joining of the two firms, Scott & Stringfellow Inc. changed its name to Scott & Stringfellow Investment Corp.

The firm, which now has combined capital of nearly $20 million has 23 branch offices throughout Virginia, West Virginia and North Carolina and 400 employees of which 160 have full-time Investment Broker positions.

#90072b0814 03/13/1990 ~Business Wire

COLUMBUS, OH (MARCH 13) BUSINESS WIRE - Consolidated Stores Corp. (NYSE:CNS) who last month announced a pre-tax charge to earnings of $17 million, principally for the cost of refocusing its business, Tuesday reported a fourth quarter after tax loss of $4.6 million or 10 cents per share compared to a 1988 fourth quarter earnings of $14.2 million or 31 cents per share.

Earnings for the year fell from $22.6 million in 1988 to a loss of $7 million in 1989, while net sales decreased from $626.6 million in 1988 to $608.7 million in 1989. Stores open for more than 24 months reported a sales decline of 11 percent adjusted for 1989's 53rd week.

William G. Kelley, chairman and chief executive officer, stated, ''The company spent the last two years putting in place the structure to manage its rapid growth from the 1980s. My direction for the 1990s is to return to our niche as an entrepreneurial close-out merchandiser. Recent improvements to our corporate structure have not restricted our customers' perception of our market. It has merely served to facilitate logistics to handling the enormous supply of opportunistic close-out merchandise that regularly presents itself to our buyers,'' Kelley concluded.

At the end of fiscal 1989, Consolidated Stores operated 336 specialty retail stores, selling close-out merchandise at substantial discounts. The company is one of the leading retailers and wholesalers of close-out merchandise in 13 states.

The following are the condensed operating results of the company (in thousands, except per store).

	14 Weeks Ended Feb. 3, 1990	13 Weeks Ended Jan. 28, 1989	Year Ended Feb. 3, 1990	Year Ended Jan. 28, 1989

#90072b0822 03/13/1990 ~Business Wire
CLEVELAND (MARCH 13) BUSINESS WIRE - Forest City Enterprises Inc. (AMEX:FCEA, FCEB) President Albert B. Ratner Tuesday announced that gross revenues for the year ended Jan. 31, 1990, were $324,249,000 compared to $293,150,000 for the year ended Jan. 31, 1989, an increase of 11 percent.

Cash flow from continuing operations increased 11 percent to $44,074,000 or $5.34 per share compared to $39,868,000, or $5.02 per share, in 1988. Per share cash flow for 1989 is based on weighted average shares outstanding of 8,251,517 compared to 7,948,268 shares in 1988. The increase in outstanding shares is due to conversion of debentures to Class

A Common Stock as a result of the call for redemption of the debentures made on Oct. 6, 1989.

Net earnings from continuing operations were $2,522,000, or 30 cents per share, compared to $2,161,000, or 27 cents per share, in 1988.

A gain on the disposition of properties of $3,269,000, or 40 cents per share, was recorded compared to a gain of $5,672,000, or 72 cents per share, in 1988.

In addition, the company had a loss from discontinued operations of $1,565,000 and extraordinary gain of $1,690,000.

The completed real estate portfolio is now in excess of $1 billion at cost of which approximately $148 million of properties were completed during 1989.

In 1989, seven projects were completed including two office buildings, three apartment projects and two retail centers.

The three completed apartment projects are located in California, Ohio and New Jersey. The retail centers are located in Pennsylvania and Arizona. The office buildings are located in Massachusetts and Ohio.

At the end of 1989, the company had in excess of $400 million in properties under construction. In 1990, the company's development program will result in the largest dollar amount of additions to the existing portfolio in a single year as more than 10 major projects will be completed.

Among those projects are major mixed-use developments at Tower City Center in Cleveland, MetroTech in New York and University Park at MIT.

The company sold Lakeway Woods, an apartment complex located in Mentor, Ohio, in 1989.

The company today announced that Boulevard Mall, located in suburban Buffalo, N.Y., will undergo a $35 million, 180,000 square-foot expansion that will include a fashion wing featuring six stores in the The Limited Inc.'s, fashion retailing group, a new food court and remodeling. Abercrombie & Fitch and Lerner stores will join expanded Limited-owned stores, including Express, the new Limited International fashion superstore, Lane Bryant and Victoria's Secret.

NEW YORK (MARCH 13) BUSINESS WIRE - Harris & Harris Group Inc. announced Tuesday that its wholly-owned subsidiary, H&H Venture Capital Inc., has obtained a 60-day option to buy 50 percent of the then-issued and outstanding common shares of Ag Services of America Inc.

If the option were exercised, H&H Ventures Capital would pay $3,250,000 in cash for these shares.

Charles E. Harris, chairman, president and C.E.O. of Harris & Harris Group would also assume the duties of chairman of Ag Services, and H&H Venture Capital would name three of Ag Service's six directors.

Ag Services is a financial-services company headquartered in Cedar Falls, Iowa. Ag Services provides short-term financing to farmers on the basis of fully collaterized loans secured by crops insured under the federal multi-peril insurance program.

The proceeds of these loans are used to purchase inputs for the year's crops (seed, fertilizer, agricultural chemicals, fuel), which Ag Services is also in the business of supplying.

Ag Services's first full year of business was the fiscal year ended February 1987. The results below have been audited, with the exception of the eleven-month period ended Jan. 31, 1990.

Harris & Harris Group is a financial-services company in three lines of business: insurance brokerage, trust-company activities, and venture capital.

NEW YORK (MARCH 13) BUSINESS WIRE - Martin Greenberg, Sterling Commodities Corp., has been elected to a two-year term as chairman of Commodity Exchange Inc. (COMEX).

Greenberg, a member since 1976, was chosen by COMEX members at the Exchange's annual meeting of members which was held Tuesday.

He has served on the Board of Governors since 1987.

Greenberg is chairman of the board, Sterling Commodities Corp., an exchange clearing member firm. He is also chairman of both COMEX's Margin and Supervisory Committees and serves on the New Products Committee.

Greenberg's previous committee service includes the Operations, Admissions Floor and Quotations Committees. He has served on the Comex Clearing Association Board of Directors since 1988.

Greenberg began his commodity futures career as an independent floor trader at COMEX in 1976. Previously, he worked in the stock brokerage business, focusing on common stocks and underwriting. Greenberg reeived his BBA from Hofstra University in 1960. He resides in New York City and has two children and two grandchildren.

The 25-member COMEX Board of Governors is comprised of seven representatives from each of the three Exchange membership groups - commission house, floor and trade -- plus three general/non-member representatives and the chairman.

COMEX is the only U.S. futures exchange to base its board membership on equal representation.

COMEX, the world's most active metals market, offers the opportunity to trade in a variety of futures and options on futures products.

WASHINGTON (MARCH 13) COMTEX - A trial lawyer testified before a House panel Monday that new federal criminal laws targeted specifically at the insurance industry are needed to curb widespread abuse and fraud.

Frederick Tulley, an attorney and a partner in the Baton Rouge, Lousiana law firm of Taylor, Porter, Brooks & Phillips, made his remarks before the House Oversight and Investigations Subcommittee of the House Energy and Commerce Committee. Tulley noted that unlike the savings and loan industries, the insurance industry lacks a specific set of federal criminal laws designed to prevent abuses and fraud.

Two weeks ago, the House Panel issued a report on the practices and events which have led to an increasing number of insurancy company insolvencies.

Rep. John Dingell, (D-Mich.), chairman of both the full Energy and Commerce Committee and the subcomittee, said the report found a "remarkable record of greed and incompetence by the persons responsible for managing those companies, including excessive under-pricing, bad underwriting, illusory reinsurance, reckless management, self-dealing, non-existent records, and a general concern only for the welfare of corporate insiders."

Although the report identified major weaknesses in solvency regulation of insurance companies, it reached no conclusion on how to improve the present system.

Congress delegated regulation of insurance companies to the states in 1945 "but current problems could give rise to reconsidering that delegation," the report said.

The subcommittee examined in great detail the failures of four insurance companies -- Mission Insurance Company, Integrity Insurance Company, Transit Casualty Company and Anglo-American Insurance Company. Collectively, these four failures are projected to cost more than $5 billion.

Tulley, acting as a liquidator of Anglo-American Insurance Co., identified a pattern faced by a liquidator or receiver of a failed insurance company. "In many such companies, record keeping is almost non-existent, little or no thought was given to sound underwriting and the generation of quick cash seems to have been the motivating factor in most management decisions " he said.

Tulley added that existing laws and regulations applicable to the insurance companies appear "less than adequate" in preventing money laundering, where cash and other assets are transferred out of the company, usually out of state or overseas. Tulley said other illegal practices he encountered include the use of overvalued assets to artificially inflate the surplus of a company and the roll over of business into other companies, which are typically licensed in other states or are offshore reinsurers or intermediaries.

Tulley gave the subcommittee a draft of proposed federal legislation he feels is needed to combat insurance fraud.

"All of the fraudelent activity I have discussed -- the laundering of money or assets, the use of bogus assets, the off-the-books premiums, and the roll over of business and assets from one insolvent company to another -- would be subject to federal criminal prosecution under these proposed new laws," Tulley said.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 5

GROUP LED BY WEBCOTT HOLDINGS OF LOS ANGELES, CA OWNS 917,100 SHARES (9.79%) OF DEL WEBB CORP (TICKER: WBB) OF PHOENIX, AZ.

ANNOUNCEMENT:

On March 12, 1990, Cotter notified Del Webb that he intends to designate three individuals for election as directors at Del Webb's annual meeting.

In addition, Cotter proposes that Del Webb reinstate its prior bylaws and repeal the current ones, redeem the rights issued under the shareholder rights plan, and terminate golden parachute agreements held by various executives.

Cotter has also suggested that Del Webb increase the size of the board to 12 members.

If Cotter is successful in having 3 members elected, they may take action to reduce expenses, improve company operating performance, eliminate barriers to acquisition proposals, restructure the company, sell certain

assets, or the entire company.

LATEST TRANSACTION:

Cotter bought 100 shares on March 6, 1990.

PURPOSE:

Election of directors.

TOKYO (MARCH 13) - Japan's trade surplus shrank 30.8 percent from a year earlier to five billion dollars in February, marking the tenth year-on-year decline in a row, the Finance Ministry said Tuesday.

Exports fell 1.9 percent to 21.96 billion dollars while imports climbed 11.9 percent to 16.95 billion dollars, the ministry said in a preliminary report.

A ministry official said the trend was likely to continue as exports of semiconductors, cars and steel were declining. Higher prices for crude oil are meanwhile inflating import figures and imports of manufactured goods are expected to remain brisk due to strong domestic demand, the official said.

Japan's trade surplus with the United States narrowed 28.5 percent to 2.96 billion dollars during the period. Exports fell 5.9 percent to 7.12 billion dollars while imports soared 21.4 percent to 4.16 billion dollars.

The trade surplus with Asia narrowed 16.3 percent to 1.49 billion dollars. Exports to Asian nations dropped 3.7 percent to 6.1 billion dollars while imports from the region grew 1.4 percent to 4.61 billion dollars.

The surplus with the European Economic Community shrank 3.2 percent to 1.88 billion dollars. Exports to the 12 nations rose 7.6 percent to 4.3 billion dollars while imports jumped 14.7 percent to 2.41 billion dollars.

Japan had a trade deficit of 1.43 billion dollars with the Middle East, 359 million dollars with China and 308 million dollars with Australia.

Frankfurt (MARCH 13) - West German inflation remained steady at 2.7 per cent above year-ago levels for the second month in February, the Federal Statistical Office reported Tuesday.

Prices were up 0.4 percent over January, according to the figures.

Inflation in December was 3.0 percent above 1988 consumer price levels, and November was 2.9 percent above November 1988.

TOKYO (MARCH 13) - Japan's Nomura Securities Co., the world's biggest stockbroking firm, said Tuesday it had set up a new Singapore unit to invest in companies in the Asia-Pacific region and provide consultancy services.

The new company, called Nomura-JAFCO Investment Asia Ltd., is capitalized at 15 million Singapore dollars (eight million U.S.) and is 50 percent-owned by Nomura's venture-capital affiliate Japan Associated Finance Co.

The rest is held by other companies within the Nomura group.

The new company will focus on venture-capital activities, a spokeswoman said. Nomura already has three companies in Singapore concentrating on securities trading, futures trading and research activities.

TOKYO (MARCH 13) - Japan's Nippon Telegraph and Telephone Corp. (NTT) said Tuesday it had developed a prototype device that could digitally switch data at 600 Mbps (megabit per second).

The successful development of the image switching device has paved the way for transmitting high-resolution video images such as high-definition TV pictures, the telecommunications giant said.

A news release from the company said that to date there had been no system that integrated high-speed data switching and distribution operations.

TOKYO (MARCH 13) - Japan's Matsushita Electric Industrial Co. said Tuesday it planned to set up a television research and development centre in Malaysia next month, the company's second in Southeast Asia.

The centre will be attached to a plant operated by Matsushita Television Co. (Malaysia) Sdn. Bhd. which makes 21-inch televisions for export markets in the Asia-Pacific region and the Middle East, the company said.

Matsushita, the world's biggest consumer electronics concern, said the number of employees at the centre would rise from 35 to 60 within two years.

"We hope that competent and promising Malaysian engineers will join us," the company said, "making the best use of local components and coping with

market trends for the betterment of video information media."

Matsushita, which already has a similar centre in Singapore, said last week that it planned to invest 124 million dollars in Malaysia over the next five years, making the country its biggest overseas base after the United States.

The planned investment is in connection with the company's two new subsidiaries in Malaysia which plan to produce film capacitors and motors with expected sales of 50 million dollars a year.

TOKYO (MARCH 13) - Japan's Toshiba Corp. said Tuesday it had formed a new holding company in Singapore to oversee the reorganisation of its electronics component activities in the Asia-Pacific region.

The new company, called Toshiba Electronics Asia (Singapore) Pte. Ltd. and capitalised at three million Singapore dollars (1.6 million U.S.), will be reponsible for direct sales in Association of South-East Asian Nations (ASEAN) countries, India and the Pacific, it said.

Toshiba, Japan's second-biggest producer of semiconductors, added that the new company would acquire its Singapore branch office next month and assume control of the parent's Hong Kong and Taiwan subsidiaries by 1993. Sales are expected to reach 210 million Singapore dollars (110 million U.S.) this year.

"The Asian market for semiconductors is expanding rapidly," the company said in a statement, adding that regional sales were expected to climb from five billion dollars in 1988 to 14 billion dollars in 1993.

"Many electronics manufacturers, the main customers for electronic components, have recently built production facilities in ASEAN countries, and the ASEAN area will be a major procurement base for those manufacturers."

ASEAN groups Indonesia, Thailand, the Philippines, Malaysia, Singapore and Brunei.

Toshiba already assembles transistors, bipolar integrated circuits and memories in Malaysia and is planning to produce television picture tubes and semiconductors in Thailand.

MANILA (MARCH 13) - Finance Secretary Jesus Estanislao said here Tuesday the government would continue to defend the Philippine peso against the U.S. dollar despite its commitment to market forces.

Mr. Estanislao had previously said there should be more "competitive exchange rates" in order to boost exports but stressed he was not calling for a rapid depreciation of the peso.

"We would like to allow market forces to determine things more but we do not want the Philippines to be hostage either to foreigners or to speculative tendencies... especially the blackmarketeers," Mr. Estanislao said.

He confirmed that a top law enforcer had been meeting with dollar blackmarketeers in an effort to stave off speculation on the peso which has depreciated sharply in recent weeks.

Alfredo Lim, head of the National Bureau of Investigation (NBI) had been meeting with the blackmarketers, Mr. Estanislao said.

The peso fell from 22.33 to the U.S. dollar early January to a low 22.85 on March 6 but has since recovered, due to Central Bank intervention on the trading floor, to 22.72 to the dollar Monday.

The fall of the peso has been blamed on recent reports of the country's dwindling foreign exchange reserves, its 2.6 billion dollar trade deficit in 1989 and speculative pressure by dollar-holders, particularly blackmarketeers.

Mr. Estanislao expressed confidence the government had enough foreign exchange to defend the peso, citing the recent completion of an agreement for more than 700 million dollars in fresh loans from the country's foreign banks.

The finance secretary said business leaders had expressed disappointment at the country's high interest rates Tuesday but said "they understand that we have no choice" but to keep rates high to control inflation, registered at 12 per cent last month.

Mr. Estanislao blamed the high inflation rate on the country's fiscal deficit which hit 15.3 billion pesos (701.8 million dollars) in 1989 and is expected to reach 17.5 billion pesos (769.6 million dollars) this year.

"I don't think the present government can continue supporting the peso," Opposition Senator Juan Ponce Enrile said Tuesday without stipulating whether he favoured a depreciation of the currency, widely believed to be overvalued.

#90072d3290 03/13/1990 ~French/German News Agency
PARIS (MARCH 13) - The French central bank said Tuesday that it could return to Lithuania more than two tons of gold deposited in France more than 50 years ago, following Lithuania's declaration of independence from Moscow.

The 2.2 tons of gold were sent to France in the 1930's when Lithuania was independent, before being annexed by Moscow in 1940.

"The Bank of France has always honoured its engagements," the central bank said. "It will restore the gold to the Lithuanian authorities once they have been recognised by the French government."

Soviet President Mikhail Gorbachev said on Tuesday that Lithuania's declaration of independence Sunday was illegal and rejected talks with the Baltic republic's leadership.

BEIJING (MARCH 13) - China and the Soviet Union signed an agreement Tuesday to increase trade between the two countries this year, the official New China News Agency (NCNA) said.

Zhang Tuobin, China's minister of foreign economic relations and trade, and his Soviet counterpart, K.F. Katushev, signed the agreement to boost trade through barter or currency, NCNA said, without specifying the level of trade increase planned.

China's Prime Minister Li Peng on March 6 expressed satisfaction with the "normalization" of Sino-Soviet relations, 10 months after the historic reconciliation between Beijing and Moscow.

Mr. Li is expected to visit Moscow at the end of April.

A spokesman at the Soviet Embassy here confirmed the agreement, but declined to give figures.

He said the Soviet Union would export machines, electric locomotives, and aeronautical equipment to China, while importing electrical equipment, radios, and fruit and vegetables.

Trade volume, which has grown steadily since relations warmed in the early 1980's, reached 3.91 billion dollars en 1989, compared to 2.8 billion dollars in 1988, according to China's statistics office.

Mr. Katushev, who arrived here on March 6, was to leave Beijing on Tuesday evening.

BRUSSELS (MARCH 13) - The European Economic Community signed a 10-year cooperation agreement with East Germany on Tuesday, five days ahead of the country's first democratic elections, an EEC spokesman said.

The agreement, which has yet to be formally completed and ratified by the European and East German parliaments, does not include a clause on association of East Germany with the EEC, said a spokesman for the European Commission, the EEC executive.

But "it could be useful as an instrument for preparing future developments " he added.

The agreement, like those already signed with the Soviet Union, Poland and Hungary, envisages the progressive lifting of EEC quotas on imports of East German products.

East German products are allowed free entry into West Germany, after which they are able to circulate freely throughout the EEC.

The agreement also lays down areas of potential cooperation including agriculture, tourism, industry, services and the environment.

East Germany is the EEC's second largest trading partner within the Eastern bloc trading alliance Comecon, after the Soviet Union, but most of the trade -- 7.5 billion dollars in 1988 - is with West Germany.

Trade with the other 11 EEC members in 1988 totalled only 2.8 billion dollars.

#90072d4590 03/13/1990 ~French/German News Agency

BERLIN (MARCH 13) - Many problems still exist in talks on German monetary union because of the unclear political situation, a West German official said Tuesday after a meeting of the commission preparing for the move.

It was the inter-German commission's third meeting, and its last before East German general elections on Sunday.

West Germany has said it is not prepared to enter into government-level talks until the new government is in place.

"Many problems remain," because of "the unclear political situation," West German secretary of state for finance Horst Koehler said of Tuesday's meeting in East Berlin.

But the head of the East German delegation, Minister without Portfolio Walter Romberg, said that "the path has been swept clean."

Both officials said that they wanted to see a monetary union system which would protect the interests of East Germans, saying it was important that the Deutsche mark should replace the Ost mark at parity.

West German Economy Minister Helmut Haussmann said in Leipzig in East Germany on Tuesday that the new East German government should take a decision on monetary union before the summer.

Tuesday's meeting of the commission was to draw up a report for the East and West German governments for negotiations on monetary union.

Mr. Haussmann said in Leipzig that he was in favour of East Germans' savings being converted into Deutsche marks at the rate of one to one against the Ost mark.

The rate should take effect on a fixed date and be limited to one account per head, Mr. Haussmann told a press conference.

#90072d4760 03/13/1990 ~French/German News Agency

BELGRADE (MARCH 13) - Some 21 Yugoslavian banks are facing bankruptcy as a result of the government's introduction of tight monetary policy, the Politika newspaper on Tuesday cited national bank deputy governor Mitja Gaspari as saying.

If these banks do not find new funds to bail them out and enable them to start operating under the new free market rules by the end of the month "they will be forced to close their doors," Mr. Gaspari said.

The banks affected are in Montenegro in the southwest and Kosovo province in the south, the country's two poorest regions.

Some 122 enterprises employing a total of 65,000 people have gone into liquidation since the government of Ante Markovic introduced a tight monetary policy in January, and many others face the same fate.

In December, some 600,000 workers were paid only after their employers obtained loans.

This month, some 1,400 enterprises have taken out loans to meet their wage

bills, officials said.

About 10 major companies in Belgrade are close to bankruptcy, while in Bosnie-Herzegovine in central Yugoslavia some 200 enterprises have asked for help to avoid closure.

According to official forecasts, the number of jobless is expected to double to 2.4 million by the end of the year.

The government is planning to set aside 150 million dollars to help redundant workers and encourage small private businesses, while Montenegro is expected to adopt a law next week setting up a fund to help the region's poorest people.

#90072d5230 03/13/1990 ~French/German News Agency

LONDON (MARCH 13) - Major British construction group George Wimpey on Tuesday reported a seven percent decline in pre-tax profit for 1989 compared to the previous year to 134.7 million pounds (215.5 million dollars)

Although Wimpey's 1989 sales grew to 2.065 billion pounds (3.304 billion dollars), up from 1.726 billion pounds the previous year, the company's profit was dented by a slump in Britain's property market.

The profit fell below the expectations of most analysts, who had forecast about 145 million pounds, and Wimpey's share price fell by one penny to 239 pence on the news.

The company's final dividend was raised to 6.50 pence from 6.25, bringing total dividend for the year to 10.5 pence, up from 9.25. Profit per share fell to 30.1 pence from 32.8.

Wimpey's pre-tax result for 1988 was 144.5 million pounds.

PARIS (MARCH 13) - Medias, the weekly French advertising and media trade magazine, is to cease publication on March 22, the publishers announced Tuesday.

Some 20 of the magazine's 50 employees will lose their jobs, director Eudes Delafon said. A new monthly trade magazine is to be launched in September to replace Medias, which has been losing 800,000 francs (about 140,000 dollars) a month since the beginning of the year.

-30- 595
#90072d5310 03/13/1990 ~French/German News Agency
BANGKOK (MARCH 13) - The Thai government has launched a large-scale relief operation to aid victims of drought affecting 30 provinces, Interior Ministry officials said Tuesday.

More than 1,000 trucks carrying water were dispatched to the worst hit areas in southern and northeastern Thailand, the officials said.

The drought has affected some 350,000 families in 137 districts and 160,000 hectares (400,000 acres) of farmland as well as a number of factories.

Thai Provincial Water Work Authority (PWWA) governor Thawat Wichaidit said the drought was caused by low rainfall and the inadequacy of a system to manage water reservoirs.

Mr. Thawat said it underscores an urgent need to protect forests, conserve and develop water sources and develop public awareness on the value of water.

The PWWA governor said widespread forest destruction had adversely changed the country's climate and resulted in a 10 per cent drop in rainfall this year while demand for water has increased.

According to official 1988 estimated figures, the country was covered by only 15 to 20 per cent of forest compared with about 30 per cent in 1982.

The government banned logging nationwide following flash floods in southern Thailand in November 1988 due to heavy rain and deforestation.

#90072d5880 03/13/1990 ~French/German News Agency
LONDON (MARCH 13) - British industrial gases, health care and vacuum products company BOC Group on Tuesday announced plans to run the health care side of its business separately.

A stock market flotation of an unspecified portion of the business will follow the establishment of separate management "as business and stock market conditions permit".

BOC, the world's second biggest producer of industrial gases, said it was making the move because the type of health care companies it wanted to acquire often saw its structure as a predominantly industrial group as inconsistent with their cultures, making them unwilling to sell out.

Richard Henderson, chemicals analyst with Nomura Research Institute here, predicted that BOC would only need to float about 10 or 15 percent of the health care business to achieve its objectives, with the remainder staying under the direct control of the group.

He said such an amount would be sufficient to provide both a real valuation of the business and enough liquidity for the owner of any company acquired to sell the paper he received in exchange with ease if he wants to.

Mr. Henderson said the market saw the projected explicit valuation of the group's health care business and the unbundling principle it represents as good for BOC's future share value and a protection against takeover bids.

Shares in the group climbed 16 pence to 527 pence on the London stock market following the news.

Before any flotation, the group plans to place its four existing health divisions into a separate management and legal entity within the BOC Group some time in the next 12 months, to be managed from the United States with current group managing director Desmond O'Connell as President and Chief Executive.

Health care accounted for about a quarter of BOC's 2.8 billion pound (4.5 billion dollar) turnover in 1989, and contributed 27 percent of its operating profit the same year with 106 million pounds (170 million dollars).

A decade ago health care accounted for just 10.5 percent of BOC's turnover, but since chairman and chief executive Richard Giordano took over the reins in 1979 it has expanded the sector.

#90072d6620 03/13/1990 ~French/German News Agency
NICOSIA (MARCH 13) - Raouf Denktash, the Turkish Cypriot leader, announced Tuesday he is resigning, effective Thursday, as president of the Turkish Republic of Northern Cyprus (Tnrc).

Denktash told a press conference, however, he would run for the presidency again in the general elections in northern Cyprus scheduled for April 22.

Political observers here said his resignation was directly connected with the failure of talks he has been conducting with Greek Cypriot leader Jorgos Vassiliou and U.N. Secretary General Javier Perez de Cuellar in New York.

It was pointed out that the U.N. Security Council rejected as unacceptable the demand of Denktash that Turkish Cypriots should be granted the right of self-determination.

The Tnrc was set up in 1983, following the invasion of northern Cyprus by Turkish troops in 1974, and is not internationally recognized except by Turkey.

#90072d6740 03/13/1990 ~French/German News Agency
NEW DELHI (MARCH 13) - Indian Prime Minister Vishwanath Pratap Singh warned Pakistan on Tuesday against planning any "misadventure" in Kashhmir.

His statement came as two of his cabinet colleagues admitted the Moslem militant-spawned situation in the sensitive border state was serious.

Former prime minister Rajiv Gandhi, now in the opposition, blasted the National Front government for lacking a policy on Kashmir and for being "soft" on the militants.

Mr. V.P. Singh said in parliament that India would "react not only swiftly but also decisively" if Pakistan "attempted any misadventure in Kashmir."

"I do not want to be hawkish, but there should be no confusion... (such a misadventure) will not be without cost to it (Pakistan)," he said during a debate in the upper house.

India wanted improved ties with Pakistan, which also claims Kashmir, but "such feeling should not be misunderstood as our weakness."

Mr. V.P. Singh rejected Pakistan's claim on Moslem-majority Kashmir based on co-religiosity, saying India had the larger number of Moslems and that Indian Moslems had boldly asserted their support for India's unity and integrity.

"I assure you that things are not lost in Kashmir and I am confident we will meet this challenge," he said.

He responded positively to Mr. Gandhi's suggestion that the premier should visit Kashmir, where more than 200 people have died by unofficial count since the start of the year in militancy-linked violence.

George Fernandes, the railway minister named Monday to also take charge of the new cabinet portfolio of Kashmir affairs, called for an intensive political campaign to counter the Moslem militants' demand for an end to Indian rule of northern Jammu and Kashmir state.

#90072d6900 03/13/1990 ~French/German News Agency

COTTBUS (MARCH 13) - West German Chancellor Helmut Kohl, speaking before 100,000 people at a campaign rally in Cottbus five days before the East German elections, said Tuesday that Germany's neighbors should have no fears about German unification.

Commenting on apprehensions in Poland about German unity, Kohl said the Germans wanted ''reconciliation with all our neighbours... and I name the Poles first of all.''

The chancellor said: ''We want the Poles to be able to live within secure borders. That is the will of the Germans.''

On the proposed currency union now under discussion between experts from the two Germanys, Kohl said East German marks would be exchanged for West German marks at a rate of one-to-one for small savings accounts, although the same rate could not apply to all further steps of the monetary union and large sums of money.

#90072d6920 03/13/1990 ~French/German News Agency

ABIDJAN (MARCH 13) - Tracts were circulating here Tuesday calling on Abidjan's residents to hold a mass demonstration Wednesday followed by a general strike the next day against planned austerity measures.

The leaflets were unsigned, like those which brought people on to the streets in the Ivory Coast economic capital for unprecedented mass protests against the government's austerity plans on March 2.

Copies of foreign press reports, pamphlets and statements have been passing discreetly round for several days, handed out in buses, in eating places and in queues.

Some of these documents, made available to Agence France-Presse, are very harsh on President Felix Houphouet-Boigny, 84, and call for a multi-party system in the Ivory Coast.

The government, which last week cut prices of certain essential goods and services, has planned to reduce pay for its 110,000 civil servants and increase charges on the private sector.

Ivory Coast's economy is in dire straits because of the collapse of world market prices for its chief export crops of cocoa and coffee.

Mr. Houphouet-Boigny on Saturday announced that he would publicly intervene in the next few days. Late Monday, he said in an interview on French television that he would name his successor within a year.

MADRID (MARCH 13) - A 30-year-old prison warden was shot dead in the northern Spanish coastal resort of San Sebastian Tuesday evening by suspected members of the Basque separatist organization Eta.

Police said two unidentified young men fled after firing on the warden as he was about to get into his car accompanied by his wife.

Eta has carried out numerous attacks on prison staff. Around 500 members of the Basque separatist group are interned in Spanish jails.

ISLAMABAD (MARCH 13) - The mastermind of last week's abortive coup in Afghanistan said Tuesday that the putsch was directed "against the Soviet Union," which he said responded with military support for President Najibullah.

General Shah Nawaz Tanai told the Afghan News Agency (ANA) that Mr. Najibullah was aware of the coup plan, "so he had taken refuge in the Soviet Embassy along with Russian advisors and from there they conducted the military units."

During the coup attempt, Pakistan, which allows U.S. aid to transit to the Afghan resistance, said that Mr. Najibullah was running the country "from an embassy he can trust."

The sacked defense minister said, "The coup d'etat was completely launched against the Soviets, so they were assisting Najib, and we were backed by infantry and air forces."

Gen. Tanai's forces "were operating the coup plans from the defense ministry (in Kabul)," he said.

"From there we made contacts with local headquarters situated in Bagram air base (north of Kabul)," which sent planes on bombing missions to Kabul seeking Najibullah loyalist positions, he added.

ANA, closely linked with the mujahedeen faction led by Gulbuddin Hekmatyar, reported that Soviet planes were involved in the fighting last Wednesday, the day after the coup was launched.

But Mr. Najibullah, speaking to reporters Thursday in the foreign ministry's conference hall, stressed that the failed coup, which he described as a well-planned conspiracy between Mr. Hekmatyar and Gen. Tanai, had been quashed without any outside assistance.

Gen. Tanai said, "The direct attack by Soviet jets and bombing of our headquarters disrupted the radio contacts between us and our military units in different parts of Afghanistan."

He acknowledged that only "some mujahedeen commanders around Kabul province cooperated with us," but warned that "we still have many supporters in the different military units and garrisons of Afghanistan."

Gen. Tanai came to Pakistan on Wednesday evening, but apparently has returned since to Afghanistan, Western diplomats here say.

Other diplomats said that the renegade general, who heads an anti-Najibullah faction of the ruling party, was well acquainted with his country's defense structures and could now join forces with Mr. Hekmatyar, leader of the fundamentalist Hezb-i-Islami faction.

SANTIAGO (MARCH 13) - New Chilean President Patricio Aylwin will look into a mysterious German colony in the mountains south of here which has been linked to the former secret police and to human rights abuses.

West German Labor Minister Norbert Bluem, one of many foreign dignataries here for Mr. Aylwin's inauguration on Sunday, reported the new president's decision after meeting with him in private.

Colonia Dignidad, as it is known, was founded some 30 years ago in a secluded mountain valley 400 kilometers (250 miles) south of here, by a group of German war refugees headed by former sergeant turned Baptist preacher, Paul Schaefer.

Amnesty International and other human rights groups have said many opponents of former military leader Augusto Pinochet were tortured and killed in the colony.

Requests by Bonn to investigate Colonia Dignidad were repeatedly turned down by General Pinochet, who Sunday stepped down after 16 years in power.

The West German Labor Minister said Mr. Aylwin had told him he would not tolerate a "state within a state" in Chile.

Mr. Bluem said he handed the new Chilean president a letter from West German Chancellor Helmut Kohl.

#90072d7150 03/13/1990 ~French/German News Agency

BUCHAREST (MARCH 13) - Members of Romania's interim government managed to stave off an opposition bid Tuesday to postpone the general election planned for May.

The session of the ruling coalition Provisional Council of National Unity voted to hold the election as planned despite demands by some opposition parties for more time to organize. All opposition groups were banned under

the iron rule of Nicolae Ceausescu,

All council members present voted to hold the election on May 20, with only 13 votes cast against the poll.

Opposition groups have argued that the election should be postponed until they can organize effective campaigns, saying that the National Salvation Front which seized power after the dictator's fall in December is the only group that has managed to set up a nationwide network of supporters.

The front has come under fire for including leaders tainted by their links with the hated Ceausescu regime.

Parliament convened Friday to discuss an election bill, but the initial discussions were soon bogged down as MPs proposed a multitude of minor amendments to the bill in an apparent attempt to delay its passage. Once passed, the election must be held within 60 days.

The 253-member Council has both executive and legislative powers, and is the provisional leadership until free elections are held.

Some National Salvation Front members have accused the opposition of filibustering, or obstructing parliamentary procedure to stop the bill going through.

But several opposition leaders said they were arguing on points of principle, as the law also outlines the basis for a future constitution that would give Romania a dual-chamber parliament.

The assembly erupted into furious argument when it discussed a move to bar former communist party members from running for president.

A counter-proposal to ban candidacies by former political exiles triggered another row, before the assembly finally agreed to scrap an amendment requiring presidential candidates to have lived in Romania for at least two years before running for the office.

The condition would have sidelined several key opposition figures who fled the horrors of Ceausescu's Romania, including the deputy president of the Council of National Unity, Radu Campeanu, secretary of the National Liberal Party.

But an opposition move to extend the election deadline to 90 days from proclamation of the new law was rejected.

In addition to the election bill, parliament is also to consider two other proposed laws, one to allow foreign-financed companies to be launched in Romania, and another to alter the conditions and length of compulsory

military service.

Some MPs seized on the debates as an opportunity to denounce the "atmosphere of fear and lack of freedom" in Romania.

Constantin Latea, a representative of an association of former political prisoners, launched a blistering attack on the new authorities shortly after Mr. Ilescu opened the meeting.

He blamed them for what he called "the atmosphere of fear and the lack of freedom currently existing in the country", claiming that "again people are being followed by specialized shadows".

Mr. Latea also condemned the "destruction of the archives of the Securitate", the hated Ceausescu secret police. He called for a law that would give stiff jail sentences to "all those who order or participate in the destruction of such archives and secret files".

TUNIS (MARCH 13) - The ministerial council of the Arab League at a meeting in Tunis on Tuesday called on the United States to cease threatening Libya in connection with the alleged poison gas factory at Rabta.

The foreign ministers in a communique reaffirmed ''the solidarity of the Arab countries with Libya'' and demanded that all international sanctions imposed against that country should be lifted.

The ministers expressed concern over what they described as military cooperation between Israel and Iran ''in all fields'' and Israel's policy of settlements in the occupied Arab territories.

It was claimed at the conference that Israel was making plans for 2,000 new settlements in the West Bank for Soviet Jewish immigrants and to build a ''belt of settlements'' around Jerusalem in order to ''encircle the entire region and make it Jewish.''

Furthermore, Israel was settling Falashas (black Jews from Ethiopia) in the southern Lebanese villages Rashia el Fahar and El Gub, a move that threatened the region and the international situation, a report said.

Earlier on Tuesday, the foreign ministers had urged the Arabs to intensify the dialogue with the European Community.

The ministers agreed that contacts with the E.C. should be strengthened so as to induce the Europeans to lift their sanctions against Syria and Libya.

The council welcomed the changes in Eastern Europe and expressed the hope that this would not cause the former East Bloc countries which have been friendly to the Arabs to change their policies.

#90072d7220 03/13/1990 ~French/German News Agency

HAVANA (MARCH 13) - When Cuban President Fidel Castro attends the inauguration ceremony of Brazilian President-elect Fernando Collor de Mello Thursday, the staunch communist will again confirm Cuba's return to the Latin American fold, observers said.

Against a tide of democratic reforms under way in the Soviet Union, Eastern Europe and Latin America, Mr. Castro still clings to the Communist Party line.

But he has stepped up his public appearances in Latin America since August 1988, when he attended the inauguration of Ecuadoran President Rodrigo Borja in Quito.

That appearance among his counterparts marked the first thaw in his longtime estrangement from developments on the continent, except for bilateral talks in Mexico, observers said.

Mr. Castro ventured forth again in November 1988 for the inauguration of Mexican President Carlos Salinas de Gortari and, in February 1989, for the installation of Venezuelan President Carlos Andres Perez.

Observers here said Brazil's invitation and Mr. Castro's acceptance underscored Cuba's welcome in the Latin American family, despite the island nation's political isolation in the new international shuffle.

Mr. Perez has criticized Cuban politics. But Monday, at the inauguration of Chilean President Patricio Aylwin in Santiago, the Venezuelan leader expressed warmth for Cubans.

"What we can say to the Cubans, is that Latin America is their territory, their homeland," he said. "Although we are far from their ideology," they have "an extraordinary talent and a determination to fight to the finish."

Proposals by several Latin American countries to reintegrate Cuba into the Organization of American States also illustrates the friendly spirit in the hemisphere, according to analusts. In the United Nations, Cuba was recently proposed for one of the 15 non-permanent seats on the Security Council by the Latin American group at the U.N.

Mr. Castro remains a phenomenon and will find himself a star among the 20

chiefs of state and government leaders assembled in Brazilia, observers said.

Changes in the Soviet Union's foreign policy and the collapse of the communist camp have distanced the Cuban leader from Europe, they said.

Cuba now seems closer to Latin America, with which it shares the Spanish language, culture and a number of problems, notably foreign debt. Cuba owes 6.5 billion dollars to Western countries and 15 billion rubles to the Soviet Union.

Reforms in the Eastern Bloc, with which Cuba has had privileged relations for 30 years, have forced the island nation to reconsider all its economic relations, and Latin America seems to be a natural market, the observers said.

For the past three years Cuba has increased its trade missions and agreements with Brazil, for example.

However, there are limits to Brazil's welcome. In Brasilia, the secretary general of Brazil's Foreign Ministry, Paulo Tarso Flecha de Lima, Tuesday called a Cuban shipment of arms to protect Mr. Castro during his visit "an excess of zeal."

According to newspapers in Brazilia, federal agents prevented the unloading of 10 tons of arms -- including anti-aircraft missiles, machine guns and grenades -- Saturday from a Soviet-built Ilyushin airplane.

Mr. Flecha de Lima, who did not confirm the amount of arms reported by the press, told Agence France-Presse that "the quantity of arms brought by the Cubans was not compatible with international norms."

He said the Cubans were allowed to deplane with only the weapons they could carry.

BUENOS AIRES (MARCH 13) - General Isidro Caceres, Argentina's army chief, underwent heart surgery early Tuesday, military officials said.

His personal physician said Gen. Caceres responded satisfactorily to initial treatment but at least 48 hours were needed before a clear prognosis could be made.

General Martin Felix Bonnet will take over the army commander provisionally, officials said.

PRETORIA (MARCH 13) - Another seven people were killed in fierce fighting in South Africa's black townships late Tuesday, bringing the day's death toll to 23, police said here.

An interim "unrest" report issued by police said four people, including a woman and a child, had been killed in a series of clashes in Kwaguza township, near Witbank east of here. The Star newspaper reported another five dead -- three of whom had been stoned and set alight.

Police said they fired birdshot and rubber bullets at "mobs" who hurled stones and petrol bombs at them. Four people were killed in the fracas. Another 78 were reported injured -- 38 by police action, 26 in "as yet unknown circumstances" and 14 in factional fighting, police said.

In Khutloang township in Orange Free State province, police found the bodies of two black men and a youth who had been shot dead.

Earlier Tuesday, police said eight people were killed in Natal Province, where fighting between supporters of the socialist United Democratic Front (UDF) and the more conservative Zulu Inkatha has claimed more than 2,800 lives in three years.

Of the eight, five were stabbed to death, one shot dead, one burnt to death and the other "necklaced" -- where a victim's hands are tied behind his back and a burning car tyre is placed around his neck.

In their earlier "unrest" report which gives scant details of countrywide political violence, police listed 57 serious incidents, including a string of stone-throwings, petrol-bombings, stabbings and shootings.

WARSAW (MARCH 13) - The Polish government said here Tuesday it is seeking to begin talks with the Soviet Union on the phased withdrawal of around 50,000 Soviet troops currently stationed in Poland.

The Polish national defense committee said it also wanted to discuss re-negotiating the conditions under which the Soviet troops were stationed.

But Soviet troop cuts in Poland should take place in accordance with international developments, said the committee. Its members include Polish President Wojciech Jaruzelski and Prime Minister Tadeusz Mazowiecki.

EAST BERLIN (MARCH 13) - East German Prime Minister Hans Modrow said here Tuesday his party, the country's former ruling communists now renamed the Party of Democratic Socialism (Pds), wanted to form a ''constructive opposition''.

Organizers said a crowd of some 50,000 people attended to hear Modrow speak at a speedway stadium in the New Brandenburg district where he will stand in Sunday's first ever free general elections.

Modrow told a press conference afterwards a strong opposition was needed in the Volkskammer parliament to stop East Germany turning into a free market economy devoid of social safeguards.

''Publicly-owned property must remain so. Land reform must not be repealed '' said Modrow, adding that the Pds did not want to see East German society become aggressive and selfish.

It was the East German premier's first major election campiagn appearance and is likely to be his last before Sunday's polls.

Latest opinion polls suggest the Pds will win between 15 and 20 percent of the vote in the general election.

#90072d7600 03/13/1990 ~French/German News Agency
PARIS (MARCH 13) - Representatives of the five permanent U.N. Security Council members ended their third meeting on Cambodia here Tuesday with an appeal to the country's warring factions to delegate national sovereignty to a U.N. transitional authority.

A communique issued after the two-day meeting said "the Cambodian parties themselves" should decide on the composition of a Supreme National Council which "will delegate to a United Nations Transitional Authority in Cambodia (UNCTAC) all necessary powers including those to conduct free and fair elections."

The communique said that the council would occupy Cambodia's seat at the U.N. General Assembly, which is currently held by a coalition of three guerrilla movements fighting the Vietnamese-backed government in Phnom Penh.

The representatives -- senior diplomats from China, the Soviet Union, the United States, Britain and France -- said they hoped to hold their fourth meeting in New York by mid-May, and to reconvene later in Paris to consult directly with the Cambodian factions "if the conditions are ripe."

The five permanent members of the Security Council began meeting in Paris in January, four months after the collapse of an international conference on the 11-year-old Cambodian conflict in Paris.

HARARE (MARCH 13) - Dr. Goonam Naidoo is eager to go back home. Eleven years ago she handed her passport in to the South African embassy in London for a renewal, and soon after received a curt note saying her document had been ''destroyed''.

Dr. Naidoo, 78, is a woman of impeccable credentials among anti-apartheid activists. South Africa's first woman Indian doctor, she was in jail in the town of Ladysmith for protesting against forced separate housing when she learnt that the cheering in the street outside was for the electoral victory of D.F. Malan, the prime minister who laid the foundations for apartheid.

That was in 1948. When she left in 1977, Naidoo was head of the Natal Indian Congress, founded by Mahatam Gandhi during his sojourn in South Africa, and was fleeing her 18th arrest ahead of a warrant for her detention.

''I so very, very badly want to go home,'' Naidoo said in a recent interview in the geriatric clinic she runs at Harare's main Parirenyatwa hospital. ''I want to see my people, my children, my family.''

She is one of thousands of South Africans for whom the long era of exile is closing, a change made possible by South African President F.W. de Klerk's unbanning of the African National Congress and other hitherto outlawed anti-apartheid organisations on February 2, and accelerated on February 23 when the Anc's national executive committee in Lusaka took the policy decision of urging exiles to return.

Like Dr. Naidoo, there is a strong urge to go home among nearly all exilees living in Zimbabwe. But so far, the repatriation flow has barely begun.

#90072d8600 03/13/1990 ~French/German News Agency

WELLINGTON (MARCH 14) - New Zealand owed 46.6 billion New Zealand dollars (27.4 billion dollars U.S) to foreign creditors on September 30, 1989, government statistician Steve Kuzmicich said Wednesday.

His figures indicate that the figure has fallen by 800 million dollars (470 million dollars) against the revised December 1988 figure.

The ratio of debt to the value of exports fell from 251.8 percent of the value of goods and services sold overseas, at December 1988, to 247.6 percent last September.

Mr. Kuzmicich said the new quarterly overseas debt figures showed 40 per cent of the nation's debt was held by the private sector, a further 40 per cent directly by the government, and the remaining 20 percent was owed by other government agencies including state owned enterprises.

#90072e0003 03/13/1990 ~Latin America New Agency

BUENOS AIRES (MARCH 13) - The president of Argentina's Central Bank, Enrique Folcini, resigned Tuesday, becoming the bank's fourth chief to step down since President Carlos Menem took office eight months ago, officials said.

Folcini said he resigned because of pressure on the bank from from the business sector which he said was made worse by criticism from politicians and members of the government.

He complained that the government had granted official credit to two private banks while refusing to give the same facilities to state banks at a time of economic austerity.

He said the granting of credit to the private banks was "a mere excuse to discredit the Central Bank".

Officials said a new Central Bank president would be named within a few hours.

#90072e0015 03/13/1990 ~Latin America New Agency

BRASILIA (MARCH 13) EFE - Brazil Tuesday confirmed it had turned away a Cuban plane carrying a 10-tonne arsenal of weapons and missiles destined to protect Fidel Castro during the inauguration of President-elect Fernando Collor de Mello.

Foreign Ministry Secretary Paulo Tarso Flecha de Lima said authorities were willing to accept the diplomatic team but not the arms, which reportedly included a ground-to-air rocket launcher, missiles and machine guns.

The daily Jornal do Brasil Tuesday had reported that the plane, a Soviet-built Ilyushin, carrying 15 crew, 83 diplomats and some 10 tonnes of arms was turned away Sunday after more than nine hours of negotiations

with Brazilian authorities.

"What was not portable could not be taken off (the plane)," said Flecha de Lima, adding that the arsenal was evidence of an "excessive mistrust on the part of those in charge of (Castro's) security."

On Monday, the foreign ministry confirmed that Castro would be among 25 heads of state attending Collor de Mello's inauguration ceremonies Thursday.

Castro last visited Brazil 30 years ago during the building of the administrative capital, Brasilia.

Brazilian Federal Police chief Celso Soares Monday expressed his concern for Castro's security because the Cuban leader is frequently besieged by press and supporters wherever he travels.

The visit has attracted extra attention owing to Castro's all-out rejection of democratic reforms being introduced in Eastern Bloc countries Cuba's traditonal allies.

The defeat of Nicaragua's leftist Sandinista government in elections last month has also increased Castro's isolation in the western hemisphere.

Meanwhile, a group of Brazilian center and center-right politicians have announced that they will present Castro with a petition to hold urgent free and open elections in Cuba.

#90072h0129 03/13/1990 ~Chinese News Agency

CAIRO (MARCH 13) XINHUA - A PLO OFFICIAL TODAY URGED THE UNITED STATES TO TAKE "NECESSARY AND LOGICAL MEASURES" TO FORCE ISRAEL TO CHANGE ITS "POLICY OF INTRANSIGENCE" TOWARD THE MIDDLE EAST PEACE PROCESS.

PALESTINIAN AMBASSADOR TO EGYPT SAEED KAMAL WAS QUOTED BY THE MIDDLE EAST NEWS AGENCY AS SAYING THAT ISRAELI PRIME MINISTER YITZHAK SHAMIR IS VACILLATING TO WASTE TIME AND EVADE MIDDLE EAST PEACE EFFORTS.

KAMAL MADE THE REMARKS IN RESPONSE TO THE COLLAPSE TODAY OF ISRAEL'S RULING COALITION AFTER SHAMIR, WHO HEADS THE HARDLINE LIKUD BLOC, DISMISSED FINANCE MINISTER SHIMON PERES, LEADER OF THE LABOR PARTY. LABOR'S 10 OTHER MINISTERS RESIGNED AS A RESULT. THE COLLAPSE CAME AFTER SHAMIR'S LIKUD BLOC FAILED TO MAKE A DECISION TO OPEN PEACE TALKS WITH PALESTINIANS MONDAY.

"WHAT INTEREST THE PLO IS THAT THERE SHOULD BE AN ISRAELI GOVERNMENT CAPABLE OF HOLDING TALKS WITH THE PALESTINIANS," KAMAL SAID, AFFIRMING THAT THE PLO WOULD NOT INTERFERE IN THE INTERNAL AFFAIRS OF ISRAEL.

KAMAL SAID PERES'S DISMISSAL INDICATED THAT SHAMIR "IS ENGAGED IN FUTILE ACTIONS AIMED ONLY AT WASTING TIME ...

AND IS CONSISTENTLY EVADING INTERNATIONAL DEMANDS FOR LAUNCHING A PEACE PROCESS AND CO-EXISTENCE BETWEEN THE PALESTINIAN AND ISRAELI PEOPLES."

THE AMBASSADOR SAID THE PLO, IN CLOSE COORDINATION WITH EGYPTIAN LEADERS, HAS UNDERTAKEN THE NECESSARY PEACE ARRANGEMENTS OVER THE PAST SIX MONTHS

IN LINE WITH THE FIVE-POINT FORMULA PROPOSED BY U.S. SECRETARY OF STATE JAMES BAKER FOR STARTING ISRAELI-PALESTINIAN PEACE TALKS.

EGYPT, THE ONLY ARAB COUNTRY THAT HAS REMAINED AT PEACE WITH ISRAEL SINCE 1979 AFTER SIGNING A PEACE TREATY WITH THE JEWISH STATE, HAS MADE NO REACTION TO THE ISRAELI POLITICAL CRISIS SO FAR.

NAIROBI, MARCH 13 (XINHUA) -- KENYAN PRESIDENT DANIEL ARAP MOI TODAY CALLED ON ALL KENYANS TO CLOSE RANKS, STRENGTHEN UNITY AND CONTINUE TO MOVE FORWARD AS ONE UNITED AND DETERMINED NATION.

OPENING THE THIRD SESSION OF THE SIXTH PARLIAMENT OF THE COUNTRY, PRESIDENT MOI ARGUED THAT WITHOUT PEACE AND TRANQUI- LITY THERE CAN BE NO DEVELOPMENT. NO ADVANCE CAN BE MADE IN AN ATMOSPHERE OF TURMOIL, HE STRESSED.

POLITICAL INTRIGUE, HE WENT ON, IS OF NO BENEFIT TO ANYONE. "THERE IS NO ROOM IN PRESENT DAY KENYA FOR PERSONALITY CLASHES AND HOLLOW ACCUSATIONS."

PRESIDENT MOI URGED KENYANS TO BE VIGILANT AGAINST POSSIBLE ILL-MOTIVES OF ENEMIES OF THE COUNTRY'S DEVELOPMENT.

ALL KENYANS SHOULD DEVOTE MORE ENERGY AND TIME TO CREATIVE IDEAS AND WAYS TO FURTHER ENHANCE THE COUNTRY'S DEVELOP- MENT RATHER THAN INVOLVE IN IDLE GOSSIPS, HE CAUTIONED.

ANKARA (MARCH 13) XINHUA - A NINE-YEAR-OLD TURKISH GIRL HAS GIVEN BIRTH TO A MALE BABY THROUGH CAESARIAN OPERATION AT A MATERNITY HOSPITAL IN AFYON, 300 KILOMETERS SOUTHWEST OF ANKARA, THE STATE-RUN RADIO REPORTED TODAY.

THE REPORT QUOTED DOCTORS AS SAYING THAT BOTH THE MOTHER AND THE BABY, WHO WEIGNS 2.3 KILOGRMS, WERE IN GOOD CONDITION.

DOCTOR MEHMENT TELEK WHO PERFORMED THE OPERATION SAID THE GIRL AND THE BABY WOULD BE ALLOWED TO LEAVE HOSPITAL WITHIN SIX DAYS.

THE GIRL, IDENTIFIED AS S.B., CAME FROM THE VILLAGE OF DEVEDERESI IN AFYON'S CAY DISTRICT. SHE WAS RAPED BY AN UNKNOWN MAN MONTHS AGO.

THE PROSECUTOR'S OFFICE IN THE CAY DISTRICT IS STILL CONTINUING SEARCH FOR THE ATTACKER.

ATHENS (MARCH 13) XINHUA - CYPRUS PRESIDENT GEORGE VASSILIOU TODAY REITERATED HIS CALL FOR THE DEMOLITION OF THE "LAST WALL" IN EUROPE DIVIDING THE MEDITERRANEAN ISLAND OF CYPRUS.

"OUR TARGET IS TO TEAR DOWN THE LAST WALL LEFT IN EUROPE," VASSILIOU SAID AFTER BRIEFING GREEK CONSERVATIVE NEW DEMOCRACY PARTY LEADER CONSTANTINE MITSOTAKIS ON LATEST DEVELOPMENTS IN THE CYPRUS ISSUE.

VASSILIOU SAID BOTH CYPRUS AND GREECE SHOULD "JOIN FORCES TO TEAR DOWN THIS LAST WALL."

MITSOTAKIS SAID THAT IMPROVEMENT OF GREEK-TURKISH RELATIONS WAS CONDITIONAL ON A SETTLEMENT OF THE CYPRUS PROBLEM, "WHICH LED TO THE CRISIS BETWEEN THE TWO COUNTRIES."

A JUST SETTLEMENT OF THE CYPRUS PROBLEM WOULD BE ALSO IN TURKEY'S INTERESTS, BECAUSE, OTHERWISE TURKEY "WILL ALSO SUFFER AND WILL CREATE MORE GENERAL PROBLEMS IN THE REGION AND IN GREEK-TURKISH RELATIONS."

SOCIALIST PASOK PARTY LEADER ANDREAS PAPANDREOU, WHO WAS ALSO BRIEFED BY VASSILIOU, SAID IN A STATEMENT THAT THE RECENT U.N. SECURITY COUNCIL

RESOLUTION WAS A "MAJOR VICTORY" FOR THE CYPRIOT GOVERNMENT'S POLICY.

EARLIER TODAY, VASSILIOU MET WITH GREEK PRESIDENT CHRISTOS SARTZETAKIS AND PREMIER XENOPHON ZOLOTAS.

THEY ALL EXPRESSED SATISFACTION OVER A U.N. SECURITY COUNCIL RESOLUTION REAFFIRMING THE ROLE OF THE U.N. SECRETARY-GENERAL IN HIS EFFORT TO REUNITE THE DIVIDED ISLAND OF CYPRUS.

TAKAMATSU (MARCH 13) KYODO - JAPANESE GLOVE MANUFACTURER SWANY CORP. OFFICIALLY AGREED TUESDAY TO PAY A COMBINED 150 MILLION YEN IN COMPENSATION TO EMPLOYEES OF ITS FORMER SOUTH KOREAN SUBSIDIARY CLOSED DOWN LAST YEAR.

THE JAPANESE COMPANY ALSO APOLOGIZED TO A UNION OF FORMER KOREAN WORKERS FOR A SITUATION WHICH HAD DEVELOPED INTO A LABOR DISPUTE.

IN ADDITION TO PAYING BACK WAGES, SWANY AGREED TO EXTEND FINANCIAL SUPPORT TO UNION MEMBERS ATTENDING NIGHT SCHOOLS UNTIL THEIR GRADUATION.

IN RETURN, THE LABOR UNION CONCEDED ALL ITS MEMBERS WILL RELINQUISH THEIR CLAIMS TO JOBS AT ASAIA SWANY GLOVE FACTORY IN THE SOUTHEAST KOREAN CITY

OF IRI.

THE AGREEMENTS WERE CONTAINED IN OFFICIAL DOCUMENTS SIGNED BETWEEN THE MANAGEMENT OF SWANY'S HEAD OFFICE IN TAKAMATSU AND VISITING LEADERS OF THE SOUTH KOREAN LABOR UNION.

ASIA SWANY CLOSED DOWN ITS KOREAN FACTORY AND DISMISSED 217 LOCAL EMPLOYEES LAST DECEMBER.

THE EMPLOYEES' TRADE UNION HAD SINCE ARGUED UNILATERAL CLOSURE OF THE FACTORY IS A VIOLATION OF SOUTH KOREAN LABOR LAWS, AND DEMANDED THE JAPANESE FIRM RESUME OPERATIONS.

AFTER THE SIGNING, YANG HEE SUK, LEADER OF THE SOUTH KOREAN LABOR UNION, TOLD REPORTERS HIS UNION MADE CONCESSIONS BECAUSE THE JAPANESE EMPLOYER APOLOGIZED FOR THE SHUTDOWN OF ITS KOREAN SUBSIDIARY AND FACTORS BEHIND THE MOVE WERE FOUND ACCEPTABLE.

#90072k0085 03/13/1990 ~Japanese News Agency

BANGKOK (MARCH 13) KYODO - THE CREW OF A THAI FISHING BOAT FOUND WHAT APPEAR TO BE TWO LARGE METAL PIECES FROM THE MAIN SECTION OF A SOUTH KOREAN AIRLINER WHICH DISAPPEARED IN THE ANDAMAN SEA IN 1987, POLICE AUTHORITIES IN THE SOUTHERN THAI PROVINCE OF RANONG SAID TUESDAY.

THE PIECES, APPARENTLY CLADDING FROM THE LEFT SIDE OF THE PLANE HAVE A TOTAL OF EIGHT WINDOWS AND BEAR THE FIVE-RING OLYMPIC SYMBOL WITH THE WORDS ''... OFFICIAL AIRLINE SEOUL 1988'' CLEARLY WRITTEN IN ENGLISH, ACCORDING TO RANONG POLICE.

KAL'S BOEING 707 WENT MISSING OVER THE ANDAMAN SEA IN NOVEMBER 1987 WITH 115 PASSENGERS AND CREW ON BOARD. IT WAS ON A FLIGHT FROM THE MIDDLE EAST TO BANGKOK EN ROUTE TO SEOUL.

TWO NORTH KOREAN AGENTS ALLEGEDLY INVOLVED IN THE CASE WERE ARRESTED IN BAHRAIN. ONE OF THE TWO, AN ELDERLY MAN, COMMITTEED SUICIDE DURING INTERROGATION BY CHEWING A POISON-LACED CIGARETTE. THE SURVIVING YOUNG WOMAN LATER CONFESSED TO SOUTH KOREAN AUTHORITIES THAT THEY HAD PLANTED EXPLOSIVES ON THE PLANE.

POLICE SAID THE WRECKAGE WAS NETTED BY THE FISHING BOAT, V. CHUMPOL NAWEE 8, WHICH CALLED AT RANONG ON MONDAY AFTERNOON.

OTHER OBJECTS ALSO FOUND BY THE BOAT INCLUDED SHIRTS, PAJAMAS, MALE UNDERWEAR, TORN CLOTHING AND TWO KOREAN COINS, POLICE SAID.

THE OWNER OF THE BOAT DID NOT DISCLOSE DETAILS OF HOW AND WHERE THE CREW

FOUND THE WRECKAGE. BUT THE CREW OF ANOTHER THAI FISHING BOAT WHICH EARLIER REPORTED FINDING WRECKAGE FROM THE PLANE TOLD REPORTERS IN RANONG THAT THEY HAD NETTED THE WRECKAGE IN ANDAMAN SEA ON MARCH 5 IN AN AREA IMMEDIATELY SOUTH OF TAVOY POINT IN MYANMAR.

RANONG POLICE IMPOUNDED ALL ITEMS FOUND FOR FORWARDING TO AUTHORITIES IN BANGKOK. THEY HAVE ALSO CONFISCATED ITEMS FOUND LAST WEEK BY THE FIRST BOAT FROM A SHOP WHICH BOUGHT THEM FROM THE BOAT'S OWNER.

#90072k0091 03/13/1990 ~Japanese News Agency

TOKYO (MARCH 13) KYODO - MATSUSHITA ELECTRIC INDUSTRIAL CO. TUESDAY ANNOUNCED THE DEVELOPMENT OF A POWERFUL LASER THAT COULD BE USED IN MASS-PRODUCING NEXT-GENERATION COMPUTER CHIPS.

NEXT-GENERATION LARGE-SCALE INTEGRATION (LSI) CHIPS ARE L6- TO 64-MEGABIT DYNAMIC RANDOM ACCESS MEMORY (64M DRAM) CHIPS. A SINGLE 16-MEGA DRAM CAN HOLD INFORMATION EQUIVALENT TO ABOUT 64 PAGES OF AN ENGLISH-LANGUAGE NEWSPAPER, SUCH AS NEW YORK TIMES, A VOLUME THAT WOULD REQUIRE 16 ONE-MEGABIT DRAM CHIPS, NOW THE MAIN MEMORY CHIP.

THE NEWLY DEVELOPED DEVICE IS AN EXCIMER (EXCITED DIMER) LASER THAT IS VERY DIFFERENT FROM EXISTING ONES, SAID TAKEO MIYATA, LEADER OF A RESEARCH TEAM.

THE NEW LASER HAS A CONTINUOUS OUTPUT OF 5 WATTS AND A MAXIMUM OUTPUT OF 10 WATTS, OR FIVE TIMES THAT OF THE CONVENTIONAL TYPE. IT HAS A LIFE OF ABOUT ONE YEAR, OR 10 TIMES LONGER THAN LASERS IN OPERATION, MIYATA SAID.

HE SAID THE LASER BEAM IS MADE UP OF TWO LIGHTS -- P, OR PARALLEL, LIGHT AND S, OR PERPENDICULAR, LIGHT. THE NEW-STRUCTURE LASER RESONATOR HAS THE FUNCTION OF BOOSTING THE OUTPUT OF S LIGHT AND WEAKENING P LIGHT. THE RESONATOR HAS A MIRROR THAT LETS ONLY P LIGHT PASS THROUGH IT AND THROWS BACK S LIGHT.

MIYATA SAID THE NEW EXCIMER LASER USES KRYPTON FLUORIDE, A COMBINATION OF FLUORINE AND KRYPTON GASES.

THE LASER IS USED IN THE LITHOGRAPHIC PROCESS OF CHIP PRODUCTION. THE DEVELOPMENT OF THE NEW POWERFUL EXCIMER LASER WAS REPORTED BY MATSUSHITA AT A RECENT INTERNATIONAL ACADEMIC CONFERENCE ON LITHOGRAPHY IN SAN FRANCISCO, THE RESEARCHER SAID.

HE SAID THE NEW LASER HAS BEEN DEVELOPED WITH THE COOPERATION OF RESEARCHERS FROM MATSUSHITA ELECTRIC INDUSTRIAL, MATSUSHITA RESEARCH INSTITUTE TOKYO INC. AND MATSUSHITA ELECTRONICS CORP.

WICHITA, Kan. (MARCH 13) PR NEWSWIRE - Air Midwest Inc. (NASDAQ: AMWI) today announced that it has completed the sale of two SF340A aircraft as part of its continuing fleet restructuring following the Braniff Inc. bankruptcy in September 1989. The two SF340 aircraft had been operated by the company since 1984 under cross-border Swedish tax leases.

As part of the sale, the company will lease-back the aircraft for no greater than a two-month period. Sale proceeds, including funds held in escrow, after application to lease termination values, less expenses arising from the sale, provided the company with approximately $2.9 million in cash. The company's long-term capital lease obligations were reduced by approximately $8 million. The net book gain realized on the sale of these aircraft is approximately $1 million.

JOPLIN, MO (MARCH 13) PR NEWSWIRE - Tom White hopes his franchise will someday be America's favorite place to wash cars.

"The high price of automobiles is forcing drivers to keep their cars longer," explains White, president and owner of Raco Car Wash Systems Inc. "Drivers also are taking better care of their cars, which means you know what," the Missouri car wash entrepreneur observes casually.

Raco has made car wash equipment since 1967, and has been franchising its Spot-Not Car Wash system since 1985. The company has sold 38 units in Missouri, Illinois, Indiana, Wisconsin, Ohio and Colorado. New units are currently under development in 20 Midwest locations. (Entrepreneur Magazine has rated Spot-Not the top car wash franchisor in America the last three years.)

"We're selling the McDonald's concept here," says White. "Quick in. Serve yourself. Reasonable price. Not everyone wants to pay $10 for a full-service car wash. There's our niche. Spot-Not will do it for $4.

The cost for a typical eight-bay Spot-Not Car Wash runs around $850,000, including the cost of the land, equipment, construction, and the $25,000 franchise fee.

Larry Haak of Hammond, Ind., Spot-Not's first franchise owner, recently opened his second Spot-Not unit -- a 13-bay wash -- at a cost of $1.2 million.

Haak's wash sells for $3; others in the 38-unit system -- 18 of which are clustered around Chicago -- average $3 to $4.

Charles Mehl and John Johnson of North Royalton, Ohio recently opened the first of eight Spot-Not units planned for the Cleveland area. "We talked to other franchise owners," Mehl said. "Not only does Spot-Not fill a niche in the marketplace, but the equipment is sound. Spot-Not has a reputation in the car wash industry for having workhorse equipment. It doesn't break down."

Raco provides a turnkey set-up of its Spot-Not franchise, including site selection, design, construction, and installation of equipment. All equipment packages are fabricated at the company's plant in Joplin. Spot-Not's de-mineralized rinsing system supplies the "No-Spot" rinse, from which the franchise drew its name.

A 1964, ME graduate of Oklahoma State University, White admits he is a "nuts and bolts kind of guy."

"The people who buy our franchises are not always mechanically minded. Our owners include an architect, lawyers, a college professor. It is important that our equipment be reliable."

White says good, old-fashioned Ozarks craftsmanship has gone a long way towards insuring the dependability of his Spot-Not equipment. "We have a good work ethic in this part of the country."

Before he and his brother bought Raco Car Wash Systems in 1978, White was employed in Tulsa, Okla., designing off-road trucks, and later worked three years in Saudi Arabia as a pipeline designer.

"I think like an engineer. I'm more interested in building good reliable equipment than marketing. But I figure if we build reliable equipment that works like it should, the sales will come.

"We sometimes wash more than just cars," White grins, recounting the story of an area hog farmer who frequently ran truckloads of squealing product through the wash before delivering them to market.

"The farmer said they were worth more clean." White swears the story is true.

PITTSBURGH (MARCH 13) PR NEWSWIRE - Chambers Development Co. Inc. (AMEX: CDVB) a leading national environmental and security services firm, today announced four acquisitions that are expected to generate annual revenue of more than $2.5 million.

The acquisitions included the assets of one solid waste collection and hauling company and three security firms.

Chambers acquired the assets of Little River Trash Service of Little River S.C. The company will be consolidated with Chambers' operation in Conway S.C.

Alexander Rangos, Chambers' executive vice presient of corporate development, said the acquisition was excellent for Chambers because the company has established an outstanding record of quality service and personal attention to its customers.

The security services acquisitions were made by Security Bureau Inc. (SBI) a wholly owned subsidiary. They include two California firms and one Georgia company.

Panoply Patrol Service and F.B.J. Security operate in the San Rafael and Napa, Calif., areas and will be consolidated into SBI's Oakland operation.

Security Systems Specialists of Georgia is located in the Gainesville, Ga. area and will be consolidated with SBI's Atlanta operation.

Gordon Ellis, SBI's president and chief operating officer, said, "In the rapidly expanding security business, SBI is making well-planned acquisitions which complement the company. We are proceeding within the strategy and business plan developed to achieve a premium security business operation.

Chambers Development Co., headquartered in Pittsburgh, with offices in Providence, R.I., Richmond, Va., Charlotte, N.C., Atlanta, Dallas and Indiana, is a leading environmental firm offering services in collection, hauling disposal, recycling and landfill development.

SBI is also headquartered in Pittsburgh and is the 14th largest security firm in the United States. The company provides a full range of uniformed officer services, security surveys, loss prevention, investigative and consulting services.

MOUNTAIN VIEW, CA (MARCH 13) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced NetVisualyzer(TM), the industry's first network diagnostic tool to offer real-time visual feedback of network traffic flow. NetVisualyzer is an easy to use, cost-effective solution to network administration and diagnostics.

Using a graphical interface, NetVisualyzer allows network administrators to acquire and display network data on a Silicon Graphics IRIS(R) computer without the need for a dedicated system or special hardware. For top-level problem determination, the user can get a real- time, graphical representation of network traffic and network topology. Along with this ability to visually monitor network traffic between gateways, routers and hosts, NetVisualyzer also includes a network analyzer for diagnosing protocol-related problems, network traffic storms and packet routing

problems. In addition, NetVisualyzer also provides several other tools that perform diagnostic functions.

"Combined with the capabilities of our high speed graphical workstations, NetVisualyzer will quickly and effectively assist network administrators in diagnosing problems and maintaining smooth and optimized operation," said Jim Barton, vice president and general manager of Silicon Graphics' System Software Division. "This product demonstrates Silicon Graphics' commitment to providing innovative and powerful networking solutions."

NetVisualyzer is the first in a series of network management tools that will include support for industry standard protocols such as Simple Network Management Protocol (SNMP). NetVisualyzer is priced at $3,000 and will begin shipping within 90 days.

Silicon Graphics Inc. is the leading manufacturer of high performance workstations and computing systems for visual processing applications. These workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulation of three dimensional products. The company's stock trades on the New York Stock Exchange under the symbol SGI.

CINCINNATI (MARCH 13) PR NEWSWIRE - A softness in LSI's (NASDAQ: LYTS) indoor/outdoor commercial lighting business, particularly in the automotive dealership market, has reduced LSI's Lighting Group sales and operating profits.

As a result, LSI anticipates that operating results for the current quarter ending March 31, 1990 will be substantially below the $.12 net income per share achieved last year in the quarter ended March 31, 1989.

Management has taken corrective actions to stimulate Lighting Group sales, and believes that the recent decline in those sales does not reflect a long-term trend.

Sales of LSI's domestic Graphics Group remain strong, and LSI's expansion into the European lighting and graphics markets is ahead of plan. LSI is currently installing lighting and graphics in prototype gasoline facilities in six European countries.

LSI designs, engineers, manufactures and markets a wide range of high-quality indoor, outdoor and landscape lighting fixtures and graphic products.

The company is the leading supplier of outdoor lighting and graphic products to retail gasoline facilities and a major supplier to the fast-food restaurant and automotive dealership markets. The company's common shares are traded on the NASDAQ National Market System under the symbol LYTS.

CONTACT: Bob Ready or Jim Cox, both of LSI Industries, 513-793-3200.

INDIANAPOLIS (MARCH 13) PR NEWSWIRE - Anacomp, Inc. (NYSE: AAC) said today it has obtained agreements with its senior and subordinated lenders which eliminate the company's technical defaults on its bank debt and Increasing Rate Notes.

The company further announced that it has finalized the sale of its flexible disk business to Hanny Magnetics, Ltd., the final step in Anacomp's exit from that business.

Anacomp said it has obtained waivers of certain provisions of its lending agreements from its bank lenders and holders of its Senior Subordinated

Increasing Rate Notes, due 1991. A year-end non-cash write off related to the shutdown of its flexible disk division had put Anacomp in violation of those provisions, which primarily dealt with maintenance of minimum net worth amounts. The waivers remove Anacomp from technical default on the outstanding debt. Anacomp is committed to refinancing the majority of its long-term debt by the end of August 1990.

The company further said it has closed the sale of its flexible disk business to Hanny Magnetics, Ltd. In December, the Hong Kong firm signed an agreement in principle to purchase most of the division's fixed assets and marketing rights to certain brand names, including Dysan. Terms of the transaction were not announced.

Anacomp chairman and chief executive officer Louis P. Ferrero said, "With these announcements, we put behind us the problems which were created by the only operating division at Anacomp which has been a disappointment to us, the flexible disk business.

"Today's news eliminates the one area of uncertainty which has clouded our outstanding micrographics operating results. We expect the continuing success of the core businesses to allow us to move forward quickly to complete the refinancing of our outstanding debt. To that end, we are working with several investment banking firms to assist with the refinancing."

CONTACT: Corporate Communications at Anacomp, Inc., 317-844-9666; or Stanley Rubenstein of RW & Co., 212-661-4343, for Anacomp, Inc.

MONONGAHELA, PA (MARCH 13) PR NEWSWIRE - Coventry Care Inc. announced today that Coventry Care and Providence Health Care Inc. have agreed that the due diligence period during which Providence has the right to terminate its previously announced acquisition agreement with Coventry Care has been extended to Monday, March 19, 1990.

Under the terms of the agreement, Coventry Care would be merged into a wholly owned subsidiary of Providence. In addition to Providence's right to terminate the agreement during the due diligence period, consummation of the merger is subject to a number of conditions, including approval of the merger plan by each class of stock of Coventry Care and various licensing approvals.

Coventry Care is primarily a provider of long-term nursing care and also operates a machine shop and medical supply buisness. Coventry Care operates five nursing homes in western Pennsylvania and provides in-patient care at the intermediate, skilled and sub-acute care levels.

Coventry Care's principal office is located at 1277 Country Club Road, Monongahela, Pa., 15063.

Providence is a privately held provider of long-term nursing care based in Berea, Ohio. Providence and its subsidiaries own and operate 14 nursing care facilities in Ohio and Vermont. Providence's principal office is located at 181 Front St., Berea, Ohio, 44017.

WHITE PLAINS, NY (MARCH 13) PR NEWSWIRE - NYNEX Information Solutions Group, through its London-based subsidiary The BIS Group, made its first major entry into the Eastern European market with the sales of its BIS Midas(TM) ABS (Advanced Banking and Securities) banking software systems to two Hungarian banks.

Midas ABS is a flexible modular-based software system which allows customers to do full transaction processing across all business areas, including front office and internal and external communications.

Inter-Europa Bank purchased a full range of ABS modules, including BIS LEO(TM) (Letter of Credit Operations System), which will support its planned growth in the trade finance area. The bank provides priority financing to businesses contributing to the export capacity of Hungarian industries. The module will allow the bank to automate all aspects of letters of credit, banker's acceptance, collections, reimbursements and bills finance.

"Significantly, Inter-Europa Bank will run our software on an IBM(A) AS/400, making it the first bank in Hungary to utilize such a sophisticated hardware/software combination," said David Tebbs, chairman-BIS Banking Systems.

The second sale to Hungarian Credit Bank, the country's largest commercial and investment bank, calls for Midas ABS modules to support the bank's treasury division. The modules will support foreign exchange and money market transactions, treasury management, and payments and communications functions.

In addition, Inter-Europa Bank and Hungarian Credit Bank have licensed BIS Midas/Q, a software module designed to let Midas ABS software users create complex, customized financial reports easily and more efficiently. Hungarian banks are required to submit detailed financial reports to National Bank of Hungary, the country's centralized governing body for the banking community.

NYNEX Information Solutions Group, Inc., a subsidiary of NYNEX Corporation (NYSE: NYN), is a leading provider of application software, professional services and systems and network integration worldwide. Based in White Plains, the company has 6,000 employees in more than 30 U.S. cities and 13 countries.

#90072p0047 03/13/1990 ~PR Newswire

NEWPORT BEACH, CA (MARCH 13) PR NEWSWIRE - The fiscal year ended Dec. 31, 1989, was the most profitable year in the history of Pacific National Bank according to figures released by the independent Newport Beach-based financial institution.

Pacific National Bank concluded 1989 with net income of $847,000, as compared with $654,000 in the previous 12-month period, while its holding company, PNB Financial Group, reported year-end consolidated earnings of $566,000, up 38 percent from $410,000 in 1988.

In addition, Pacific National Bank's assets rose to $115,890,000, an increase of 11 percent over 1988 year-end figures, and deposits reached $108,153,000, 10 percent higher than at the close of the previous year. On a consolidated basis, assets were $117,147,000 and deposits totaled $106,016,000 as of Dec. 31, 1989.

With the posting of these results, Pacific National Bank has again achieved the prestigious designation of "premier-performing bank" from the authoritative banking industry newsletter, Findley Reports. To make the premier list, banks must deliver, among other criteria, a return of at least 1.25 percent on average assets and 12 percent on equity.

In addition, Pacific National Bank maintained a conservative loan-to-deposit ratio of 58 percent with net loans of $62,934,000 and shareholders' equity in PNB Financial Group increased from $5,397,000 in 1988 to $10,220,000 in 1989.

Donald L. Solsby, president and chief executive officer of Pacific

National Bank and PNB Financial Group, said, "The shareholders' equity figures represent an 89 percent increase in capital -- the most important criteria to banking in the 1990s. That, combined with our conservative loan-to-deposit ratio, gives the bank great flexibility, through a strong equity position, to maneuver through any crises that the economy may face."

Solsby also noted that the bank's achievements in 1989 included the opening of a new loan production office in Santa Ana and the relocation of its Irvine Spectrum regional office to a more convenient location offering full-service banking.

Pacific National Bank is a full-service banking association offering executive personal banking services as well as commercial, consumer/installment and short-term construction loans, with an emphasis on short- and medium-term loans. The bank's residential mortgage division originates mortgage loans on behalf of other lenders.

#90072p0048 03/13/1990 ~PR Newswire

AUSTIN, TX (MARCH 13) PR NEWSWIRE - Dell Computer Corporation (NASDAQ: DELL) today reported continuing strong worldwide demand for its personal computer products in the fiscal year and fourth quarter that ended Feb. 2, 1990.

Sales for the year increased 51 percent to $388.6 million, compared with sales of $257.8 million in fiscal 1989. Net income was $5.1 million or $.27 per share on 19.2 million shares outstanding, vs. $14.4 million or $.80 per share on 18.0 million shares outstanding in the previous fiscal year.

Fourth quarter sales were $109.8 million, up 37 percent over sales of $80.1 million in the comparable quarter of the prior year. Net income was $1.1 million or $.06 per share on 19.2 million shares outstanding, compared with net income of $3.3 million or $.17 per share on 19.4 million shares outstanding in the fourth quarter of fiscal 1989.

Increased demand for the company's personal computer products among major corporate, governmental and educational accounts led the quarterly sales gains in both domestic and international markets.

International sales in the quarter were especially strong, increasing to 27 percent of total revenues, up from 18 percent in the fourth quarter a year ago. The company opened a subsidiary in France in the fourth quarter and also has international operations in the United Kingdom, Germany,

Canada and Sweden. The Swedish subsidiary was opened in the first quarter of fiscal 1991.

The company also earned PC MAGAZINE's "Editor's Choice" for its first laptop, which was announced and delivered in the fourth quarter.

Earnings for the fourth quarter and fiscal year were negatively affected by higher-cost inventories of components purchased in late fiscal 1989; significant investments in international expansion, research and development and customer support activities; and delays in the introductions of certain new products.

Dell said the company entered its new fiscal year in a much stronger financial position. Inventories were reduced by $36 million during fiscal 1990 and short-term debt decreased by $21 million to $6.5 million. A $65 million line-of-credit executed by the company during the year will be sufficient to meet the company's working capital needs for the foreseeable future, he said.

Dell Computer Corporation designs, develops, manufactures, markets, services and supports a complete line of personal computers compatible with industry standards. The company is recognized in independent surveys as having the highest customer satisfaction level in the industry for its line of personal computers.

MOSCOW (MARCH 13) PR NEWSWIRE - In the first month of operation more than one million customers have visited the new McDonald's in Moscow. Daily 40,000 to 50,000 Soviets crowd into the restaurant for their first taste of a Big Mac.

"The response has been incredible," said George A. Cohon, vice chairman of Moscow-McDonald's and president and chief executive officer of McDonald's Restaurants of Canada Limited. "The Soviets have embraced McDonald's with overwhelming enthusiasm. This is a rubles-only restaurant; its for the Soviet people, they know that, and they have adopted it as their own."

To satisfy the Soviets' new passion for Big Macs and french fries, the restaurant serves two tons each of Soviet Beef and potatoes every day. French fries are the menu favorite, with 100,000 orders served each week. Running close seconds are the world-famous Big Mac, with more than 80,000 served each week, and hot apple pie, with a weekly demand averaging 75,000.

More than 800 restaurant crew, operating three daily shifts at the world's largest McDonald's, served up fast and friendly service with a smile -- McDonald's style. "The crew is the backbone of this restaurant," said Vladimir Malyshkov, chairman of the board of Moscow- McDonald's and General Director of Mosobshepit. "Because of the number of customers we are serving, everyone works very fast, but smiles never leave their faces. They are as excited as they were on their first day; we're very proud of them."

Moscow-McDonald's is a joint venture partnership between McDonald's Restaurants of Canada Limited and the Food Service Administration of the Moscow City Council. The largest ever Soviet-Canadian joint venture agreement with a food company, the Moscow-McDonald's agreement provides for an initial 20 McDonald's restaurants, as well as the 10,000-square-meter food production and distribution center, now in operation.

#90072p0050 03/13/1990 ~PR Newswire

ATLANTA (MARCH 13) PR NEWSWIRE - The Home Depot (NYSE: HD) today reported that it achieved record earnings of $111,954,000 ($1.42 per share) for the 1989 fiscal year, the 52 weeks ended Jan. 28. That is a 46 percent increase over fiscal 1988, when the company earned $76,753,000 ($1.00 per share).

The company also set an earnings record for the fourth quarter of fiscal 1989, earning $29,585,000 ($.37 per share), a 57 percent increase over fourth quarter 1988, when the company earned $18,887,000 ($.24 per share).

For the 1989 fiscal year, net sales rose 38 percent to a record $2,758,535,000 compared to $1,999,514,000 during fiscal 1988, making The Home Depot the largest home center retailer in the nation.

Net sales during fourth quarter 1989 rose 36 percent to $713,249,000 compared to $524,773,000 for the comparable 1988 quarter. On a comparable store-for-store basis, sales were up 13 percent for both fourth quarter 1989 and the fiscal year.

"We are extremely pleased with our fourth quarter and fiscal 1989 results " said Home Depot Chairman and CEO Bernard Marcus. "In fact, our earnings were above Wall Street's expectations."

Marcus attributed the record earnings to "improved profit margins, volume discounts from vendors during the fourth quarter when the company met certain volume thresholds, a lower tax rate in the fourth quarter, and the

company's successful day-in-and-day-out low pricing philosophy which motivates more people to buy all the tools and materials needed for a project at one time instead of making selective purchases and waiting for other needed items to go on sale."

Marcus also noted that the company seems "recession resistant," explaining that "when the real estate market is down, people fix up their old homes and when the market is up, they fix up their new homes." He said that The Home Depot is "not affected too much by new housing starts."

Looking ahead to the new year, Marcus said he believes fiscal 1990 "will be another record year" adding that "homeowners are doing more do-it-yourself projects than they have ever done before."

Weighted average weekly store sales rose 11 percent to $515,000 during fiscal 1989 from $464,000 during fiscal 1988. For fourth quarter 1989, the weighted average weekly store sales rose 12 percent to $496,000 from $444,000 during fourth quarter 1988.

During fiscal 1989, there were 84,494,000 customer transactions, 32 percent more than the 64,227,000 transactions during fiscal 1988. During fourth quarter 1989, there were 22,334,000 transactions, 33 percent more than during fourth quarter 1988.

The average customer sale rose 5 percent during fiscal 1989, to $32.65 from $31.13 during fiscal 1988, and 2 percent for fourth quarter 1989 to $31.94 from $31.23 during fourth quarter 1988.

Inventory turnover also continued to improve, from 5.8 during fiscal 1988 to 5.9 during fiscal 1989.

At the close of fiscal 1989, The Home Dpot was operating 118 stores, compared to 96 stores at the end of fiscal 1988. During fiscal 1990, The Home Depot plans to open approximately 30 new stores, of which one -- in Lakewood, N.J. -- has recently opened. During fiscal 1990, the company also expects to remodel 12 stores, expanding 10 of them by a total of approximately 241,000 square feet.

The Home Depot currently operates warehouse-style home center stores in 30 markets in 12 states. Ranging in size from 67,000 to 140,000 square feet, the stores sell approximately 30,000 different kinds of building materials and home improvement and lawn and garden products primarily to the do-it-yourself market. The company is widely regarded as the leading retailer in the home center industry and its stock is traded on the New York Stock Exchange under the symbol, "HD."

#90072p0054 03/13/1990 ~PR Newswire

DETROIT (MARCH 13) PR NEWSWIRE - In a strategic move to continue to improve its profitability, Perry Drug Stores, Inc. (NYSE: PDS) plans to leave the Wisconsin market by mid-May and has sold its one store in Indiana, Jack A. Robinson, the company's chairman and chief executive officer, told shareholders at the annual meeting in Detroit today.

Robinson said the plans to leave Wisconsin and Indiana are in line with Perry's strategy of maximizing assets by divesting unproductive units and improving overall profitability.

"The culling of unproductive stores, stores which were recording losses, will make us a more profitable company," he said.

He said the company sold two stores and sub-let another in Wisconsin in the last two days, leaving three stores in the state.

At the same time, he reported that in fiscal 1990 Perry will open 10 new stores, primarily in Michigan, the company's major market. Perry already has opened two new stores in the Traverse City area, a new market for Perry, and has signed leases for six others. Perry plans to open 20 new stores in fiscal 1991.

When the divestiture of all six stores in Wisconsin is completed, Perry will be operating 166 drugstores in Michigan, 16 A.L. Price stores in Michigan, and 24 conventional drugstores in the Chicago area.

Robinson reported the significant progress made by Perry in fiscal 1989 in which it earned $7.1 million, or 70 cents per share.

He said the earnings momentum continued in the first quarter -- the best first quarter in the past four years -- in which pre-tax earnings were $4.5 million compared to $4.2 million in fiscal 1989. With the first-quarter performance, the company recorded six consecutive comparable quarters of improved earnings.

Net earnings in the first quarter, which included an income tax provision of $1.5 million this year, totaled $3 million, 30 cents per share, compared to $4.2 million in 1989. However, Robinson emphasized that had the first quarter of 1989 included a tax provision at the statutory rate, net earnings would have been $2.8 million or 28 cents per share.

WHEAT RIDGE, CO (MARCH 13) PR NEWSWIRE - Matrix Membranes Inc. (PSE: MMI P) reports that U.S. Patent 4,906,240 was issued to it on March 6, 1990.

The patent covers a broad range of synthetic wound dressings, including the Mitrathane(TM) wound dressings that are currently marketed for Matrix in the United States and Canada by the Calgon Vestal Laboratories unit of Merck & Co. Inc.

The invention concerns adhesive-backed absorbent polyurethane sheets used as wound dressings. These medical products control wound exudate and maintain a moist wound bed with reduced patient care costs and improved wound healing. Patent protection covers Mitraflex(TM) dressings, which include an adhesive-backed, absorbent polyurethane sheet with pores that are large on the side of the sheet facing the wound, and which decrease in size through the sheet.

The patent protects multi-layered wound dressings, such as Mitraflex(TM), where a liquid impermeable, but moisture vapor permeable, film is attached on one side of the absorbent sheet, with an adhesive on the other.

The combination of both the absorbent membrane, and the "breathable" film permits the management of large amounts of wound exudate in a thin-profile dressing that is highly conformable to body contours.

A range of potential wound care products, in addition to the current Mitraflex(TM) wound dressings, are protected by the patent.

The size and distribution of the pores in the polyurethane sheet, and the breathability of the film, may be adjusted to obtain more or less absorbent dressings, resulting in a product which manages exudate, maintains a moist wound bed and is most suitable for the exudate levels of a particular wound.

RICHMOND, B.C. (MARCH 13) PR NEWSWIRE - MTC Electronic Technologies Co. Inc. (NASDAQ: MTCEF), announced today that it has resumed shipping FAX machines to the Yin Jiang Telephone Company of China.

According to Miko Leung, president of MTC, "This 5,000 unit order signals the resumption of shipments to the Yin Jiang Telephone Company under an exclusive trade agreement which had been disrupted by the political events in China last June. The agreement calls for MTC to import sub-assembled

FAX machines, which are then completed in Chinese factories and subsequently sold to Chinese companies by the Yin Jiang Telephone Company."

"While MTC's import business continued undisturbed throughout the period of trade setbacks with China, the company's FAX machine export business was disrupted after only one shipment early last year. Sales of FAX machines are controlled through the Chinese government-controlled telephone company, in that the only way industry can purchase FAX machines is through the telephone company. MTC's exclusive agreement for the importation of FAX machines into China provides the company with a unique opportunity to be the major player in a multi-billion dollar industry."

Leung further commented that FAX machines are rapidly becoming a crucial communications link for Chinese manufacturers, and that the demand for machines far exceeds the company's present importing capability.

MTC Electronic Technologies is an 18-year-old manufacturer, distributor and importer of over 160 products imported from the Far East, including televisions, stereo equipment and VCR's.

WOODLAND HILLS, CA (MARCH 13) PR NEWSWIRE - Dataproducts Corporation (AMEX: DPC) announced that The Bank of Boston, acting as depositary for the company's self-tender for up to four million shares of Dataproducts common stock, has informed the company that a final count of tendered shares shows that 17,771,620 shares have been tendered and that the final pro-ration factor is .22508.

Therefore, 22.508 percent of the shares tendered by each shareholder will be purchased by the company (at the $10 per share tender price). Dataproducts anticipates that the payments for the tendered shares will be mailed on March 14, 1990, with stock certificates for the tendered shares that were not purchased to be mailed on March 15, 1990.

After the company purchases four million shares of stock, Dataproducts' outstanding common stock will be reduced to 15,804,392 shares. Based on Dataproducts' December 23, 1989 financial statements, the book value of the shares that remain outstanding will be $8.64 per share.

Dataproducts is one of the world's leading computer printer manufacturers. Its product line includes band, line matrix, serial matrix, laser, solid ink, thermal transfer and TEMPEST printers, as well as printer supplies. Dataproducts' products are sold through the company's large OEM customer

base, extensive distribution and VAR network, plus 27 domestic and international offices.

PITTSBURGH (MARCH 13) PR NEWSWIRE - Japonica Partners said today that it was firmly committed to maintaining the headquarters of Allegheny International in Pittsburgh if its reorganization plan for the company is approved by the constituencies of Allegheny International.

Japonica also said that PNC Merchant Bank, an affiliate of Pittsburgh National Bank, had joined Japonica Partners' investor group as an equity partner in their reorganization plan.

Japonica Partners said, "Allegheny International has been a part of Pittsburgh for many years. We are committed to maintaining its corporate headquarters in this city and continuing to contribute to Pittsburgh's economic vitality in the future. PNB's confidence in our reorganization plan and in the future of Pittsburgh are both underscored by their participation with Japonica Partners in our reorganization plan."

"Our decision is based not only on a desire to uphold Allegheny International's long-standing presence in this city, but also on the hospitable business environment we've found here and the receptivity of the Allegheny County Commissioners office to continuing Pittsburgh's tradition as an attractive location for company headquarters," Japonica Partners said.

Japonica Partners, a New York based investment and merchant banking firm, began its formal review of Allegheny in July of last year.

#90072p0072 03/13/1990 ~PR Newswire

NEW YORK (MARCH 13) PR NEWSWIRE - Reginald F. Lewis, chairman and chief executive officer of TLC Beatrice International Holdings, Inc., today announced three senior executive appointments:

-- Mark J. Thorne has been named to the position of vice president-finance and chief financial officer of TLC Beatrice International. Thorne comes to Beatrice from Deloitte & Touche, the international accounting firm, where he was a senior audit manager on the TLC account as well as

the New York Times Company, Chanel International and Union Pacific Corporation. He joined Deloitte & Touche in 1979. A graduate of Montclair State College, he was awarded his M.B.A. in finance from New York University in 1985.

-- Dennis Jones was named senior vice president for planning and development. Jones is a veteran of Beatrice, having joined the company in 1978 and having served for his entire career as part of the international unit of Beatrice. He was responsible for the design of the strategic planning and financial reporting systems that monitored the entire international network. A graduate of Miami (Ohio) University, he received his M.B.A. in finance from the University of Miami.

In his new position, Jones will be focusing on planning for existing operations.

-- Tony Cabban has been named vice president and financial director for the grocery products division. Based in Brussels, Cabban has spent seven years with Beatrice, joining the company in 1982 as group controller for Southern Europe. He has served as division controller for the dairy and beverage divisions and as financial director for the grocery products divisions.

Cabban began his career with the chartered accountants, Ogden Parsons, in London and moved to Phillips Petroleum in 1965, serving in London, Brussels and Oslo. In 1971, he joined Warner Lambert as financial analyst rising to finance manager for Europe and later financial director for Spain. He moved to Playtex Spain in 1977 as financial director.

In announcing these three appointments, Lewis pointed out that they will play an important role in the continued expansion of TLC Beatrice International in Europe. "Our residual core is strong -- our network of supermarkets in Paris, the seven ice cream companies spread across Europe and our Irish potato chip company that dominates its market," Lewis said. "We plan to keep a conservative balance sheet, aggressively manage cash flow, grow our earnings and look for opportunities.

"Of course the hot area right now is Eastern Europe. Our European managers are very excited about market opportunities there and I have established a task force to look into the situation," Lewis said.

TLC Beatrice International Holdings, Inc., is an international food company involved in wholesale and retail food distribution in France and the manufacture and sale of ice cream, processed snacks, and other grocery products throughout Western Europe. It operates through 15 companies, many of which hold significant positions within their respective markets.

The company is one of the largest ice cream manufacturers in Europe, with

operations across the continent from Denmark to the Canary Islands.

EATONTOWN, NJ (MARCH 13) PR NEWSWIRE - Roberts Pharmaceutical Corporation (NASDAQ: RPCX) today announced revenues of $382,800 and a net loss of $1,092,000, or 24 cents per share, for its second quarter ended Dec. 31, 1989. Revenues and net losses for the six months then ended were $774,200 and $2,018,200, or 45 cents per share.

The results for the second quarter compare to revenues and net income of $2,247,700 and $656,700 for the quarter ended Dec. 31, 1988, which included significant revenues from licensing and development agreements. Robert A. Vukovich, Ph.D., president and chief executive officer, stated that the second quarter results are consistent with those of the previous quarter and reflect the company's concentration on development programs which do not generate current revenue.

Vukovich noted that, as previously announced, the company has received approval to market its first product in foreign markets. Midon, a cardiovascular drug, has been approved for use as an orthostatic hypotension agent in the Republic of Ireland. A May 1990 launch is expected. Additionally, Roberts' international affiliate, Monmouth Pharmaceuticals, will commence marketing of Rowachol(R) and Rowatinex(R)

in the United Kingdom for gall and kidney stone therapy. Both of these products were licensed from Rowa Pharmaceuticals for exclusive distribution in the United Kingdom. "The launch of these products represents continuing progress for our U.K. organization," said Vukovich.

Roberts Pharmaceutical Corporation is engaged in the development of drugs for use in the treatment of cancer, asthma, cardiovascular disease, endocrine disorders, acute and chronic pain, urinary incontinence and iron overload conditions in the United States and abroad. The company is currently developing 19 drugs, one of which is the subject of a U.S. Food and Drug Administration new drug application, four of which are in advanced stages of clinical development, two of which are in earlier phase clinical trials and 12 of which are in the pre-clinical stage.

In January 1990, the company completed an initial public offering of 2,000,000 shares of common stock and in February 1990 issued 300,000 additional shares through the exercise of the underwriter's overallotment option. These transactions provided net proceeds of approximately $12,000,000 which will be used primarily to fund the company's product development programs.

PITTSBURGH (MARCH 13) PR NEWSWIRE - Allegheny International Inc. (AI) (NYSE: AG) announced today the consummation on March 12 of the sale to Baroid Corporation (NYSE: BRC), Houston, of AI's remaining interest in Titanium Metals Corporation of America (TMCA).

Baroid paid a total of $50 million to purchase AI's holdings of TMCA common stock and to purchase a related $3.25 million note payable by TMCA. AI said that additional cash consideration could become payable in the future if TMCA or Baroid enters into certain transactions relating to TMCA such as a sale, liquidation or certain securities issuances, prior to Jan. 1, 1992.

AI's common stock holdings represented approximately 30 percent of TMCA's outstanding common stock following the exercise by Baroid prior to the closing of its warrant to purchase additional shares of TMCA stock. As a result of the transaction, Baroid now owns 100 percent of TMCA.

The transaction had previously been approved by the U.S. Bankruptcy Court, Western District of Pennsylvania, where AI's Chapter 11 proceedings are under way.

AI is a major manufacturer and marketer of consumer products, many of which are sold under the "Sunbeam" and "Oster" brand names. Baroid Corporation is a worldwide supplier of services and equipment for oil and gas well drilling and titanium metals, which are widely used in aerospace and industrial applications.

HARRISBURG, PA (MARCH 13) PR NEWSWIRE - The Kaufmann's department store chain has paid $5,500 to settle allegations that it used misleading advertising in connection with the sale of imitation pearl jewelry.

"We allege that the chain's ads didn't make clear to prospective purchasers that the jewelry offered for sale was simulated pearl and not genuine pearl," said Attorney General Ernie Preate Jr.

The allegations are included in an assurance of voluntary compliance filed today in Allegheny County Common Pleas Court by the Pittsburgh office of Preate's Bureau of Consumer Protection.

The assurance alleges that Kaufmann's didn't include an adjective such as "imitation" or "simulated" in its ads to make clear that the items offered for sale weren't genuine pearls as defined by the jewelry industry.

"Consumers rely on advertisements to make decisions about their purchases " Preate said. "Eliminating false or misleading advertising helps all consumers in the marketplace."

The assurance alleges that Kaufmann's ads violated both the Unfair Trade Practices and Consumer Protection Law and Federal Trade Commission guidelines.

Under terms of the agreement, Kaufmann's doesn't admit wrongdoing but agrees to "cease and desist" from the alleged illegal practices. It also paid a $4,000 civil penalty and $1,500 in costs of investigation.

Kaufmann's stores are operated by Kaufmann's-May of Pittsburgh Inc. The stores are located in downtown Pittsburgh; Beaver Valley Mall, Monaca; Century III Mall, West Mifflin; Monroeville Mall, Monroeville; Shenango Valley Mall, Hermitage; Ross Park Mall, Pittsburgh, and Westmoreland Mall, Greensburg.

The assurance was filed by Deputy Attorney General Caren L. Mariani, attorney-in-charge of the Bureau of Consumer Protection's Pittsburgh office.

Preate said the bureau is actively involved in monitoring the advertising practices of retailers across the state.

SPRING VALLEY, NY (MARCH 13) PR NEWSWIRE - Par Pharmaceutical, Inc. (NYSE: PRX) announced today the appointment of two individuals to critical management positions in the areas of quality and regulatory affairs.

Both of the individuals that have joined Par's management team have extensive experience in both the branded and the generic pharmaceutical industry, and are well respected throughout the industry.

Francis K. Chow, Ph.D., will serve as Par's group vice president- quality control. Chow has held significant positions of responsibility in the research and development areas in both generic and brand-name companies.

Prior to joining the industry, Chow was an instructor at the Albert Einstein College of Medicine in New York. He was awarded his Ph.D. in analytical chemistry from the State University of New York at Buffalo. In addition to his membership in the American Chemical Society, Chow has authored over fifteen scientific publications.

Diana L. Sloane has been named Par's group vice president-regulatory affairs. Sloane has held regulatory and compliance positions at several pharmaceutical companies, and is very active in industry organizations including the Regulatory Affairs Association, American Pharmaceutical Association and the National Association of Pharmaceutical Manufactures.

She has participated or contributed in numerous educational forums sponsored by government and private interests. Sloane received her degree in pharmacy, Summa cum laude, from the University of New York at Buffalo and attended the St. John's School of Law.

CALGARY, Alberta (MARCH 13) PR NEWSWIRE - Ranger Oil Limited (Toronto: RGO) today announced its financial and operating results for the year ended Dec. 31, 1989.

Earnings before extraordinary items for 1989 increased by 128 percent to U.S. dollars 23.2 million (U.S. dollars 0.27 per share) from U.S. dollars 10.2 million (U.S. dollars 0.12 per share) in 1988.

Earnings, after the effects of extraordinary items resulting from utilization of prior years' tax losses were U.S. dollars 51.9 million (U.S. dollars 0.63 per share) compared to U.S. dollars 15.4 million (U.S. dollars 0.19 per share) for the prior year.

Funds generated from operations were up by 33 percent to U.S. dollars 66.9 million (U.S. dollars 0.84 per share) from U.S. dollars 50.4 million (U.S. dollars 0.67 per share) in 1988 primarily due to increased oil and gas production and higher oil prices. Working capital at Dec. 31, 1989 was U.S. dollars 135.7 million compared to U.S. dollars 108.9 million at Dec. 31, 1988. Total cash and short-term investments at Dec. 31, 1989 were U.S. dollars 156.4 million.

Total revenues for 1989 increased 40 percent to U.S. dollars 132.9 million from U.S. dollars 94.7 million in 1988. Net oil and gas revenues after royalties increased to U.S. dollars 114.6 million, up 47 percent from U.S. dollars 78.0 million in 1988 as a result of higher oil prices and production. Oil prices increased an average of 24 percent to U.S. dollars 17.92 per barrel. Oil and gas production increased 22 percent and 26 percent, respectively, to 17,741 barrels of oil per day and 33.3 million cubic feet of gas per day.

MIAMI (MARCH 13) PR NEWSWIRE - Five months ahead of schedule, Humana Medical Plan, Inc., Florida's largest health maintenance organization (HMO), has successfully met its goal of balancing commercial and senior Medicare membership.

All HMOs are required by the federal government's Health Care Financing Administration (HFCA) to have no more than 50 percent Medicare memberships.

Humana announced that they met that goal in November 1989 -- five months ahead of schedule.

"Our health plan's success proves that our integrated health care system is attractive to every segment of the market," said Daniel J. Moen, vice president of market operations for South Florida. "Many of our business clients have improved health care services and cut spiraling health care costs by choosing our plan."

Current membership, which stands at 337,000, comprises 182,000 commercial members and 155,000 Medicare members. Humana Medical Plan coverage is avialable in South Florida, the Tampa Bay area and the Orlando/Daytona

Beach area.

When Humana acquired the HMO from the ailing International Medical Centers in June 1987, there were 117,500 Medicare members and only 36,000 commercial members.

Humana Medical Plan's original membership goals, based on HCFA requirements, called for a 70 percent Medicare and 30 percent commercial mix by April 1988, a 60/40 mix by April 1989 and the final 50/50 mix by April 1990. All of those goals were met ahead of schedule.

During the three years it has operated Humana Medical Plans, Humana added 139,000 commercial members and 33,500 Medicare members.

Such important organizations as Luria's, the Hillsborough County School Board, Orange County Government, AmeriFirst and the City of Fort Lauderdale have joined Humana Medical Plans in recent years.

Humana Inc.'s Florida operations include 19 hospitals, a PPO with 103,000 members and Medicare supplement insurance for 29,000 subscribers.

BENSALEM, PA (MARCH 13) PR NEWSWIRE - David Wachs, chairman and chief executive officer of Charming Shoppes Inc. (NASDAQ: CHRS), the retail women's apparel chain, reported today its sales and earnings for the fiscal year ended Feb. 3, 1990, and for the fourth quarter.

Earnings for the fiscal year ended Feb. 3, 1990, decreased 5 percent to $36,410,000 or $.72 per share, against earnings of $38,151,000 or $.76 per share for the prior year. Sales for fiscal 1990 increased 12 percent to $808,637,000 from $725,197,000 for fiscal 1989. Sales for fiscal 1990 include 53 weeks vs. 52 weeks during the prior year.

For the 14 weeks ended Feb. 3, 1990, earnings were $10,657,000 or $.21 per share, vs. $17,017,000 or $.34 per share for the fourth quarter last year. Fourth-quarter sales increased to $242,720,000 as against sales of $221,460,000 during the 13-week period of the prior year.

During the past year, the company added 109 stores, while closing 22, resulting in 87 net additional units, and ended the year with 1,013 stores in 40 states along the Eastern seaboard, in the Midwest, South, Rocky Mountain and Pacific Northwest areas. Wachs said that this year's expansion of approximately 130 stores will be concentrated principally in

the second half of the current year.

Wachs stated that the fourth quarter operating results were unfavorably impacted by a highly promotional retail environment leading to higher-than-normal markdowns during the period.

The board of directors has declared the regular quarterly cash dividend of 3 cents per share, payable on April 16, 1990, to shareholders of record on March 26.

#90072p0096 03/13/1990 ~PR Newswire

NEW YORK (MARCH 13) PR NEWSWIRE - Ramtron Australia Ltd. (ADRs-NASDAQ: MEMRY) today announced that George J. Stathakis has been named chairman and chief executive officer of Ramtron International Corporation, the U.S.-based subsidiary of Ramtron Australia Ltd.

Stathakis succeeds Ramtron International's Australian co-founder and Chairman Ross Lyndon-James, who remains as vice chairman.

The move coincides with the company's entry into commercial production of its break through Ferroelectronic Random Access Memory (FRAM) products which prevent loss of data in computers in the event of a power failure.

This appointment also follows a series of international alliances established between Ramtron and NMB Semiconductor Company Ltd. of Japan (NMBS), Seiko-Epson Corporation of Japan and the West German subsidiary of ITT Corporation. Under the terms of its multi-million dollar agreements with NMBS, Ramtron is earning development and licensing fees as well as ongoing royalties from the sale of all of the co-developed 4- megabyte DRAMs.

"The addition of Mr. Stathakis to Ramtron's management is consistent with our international strategy and anticipated rapid growth," said Lyndon-James. "Mr. Stathakis' broad based international experience and contacts strongly complement the existing management team."

Commenting on his appointment, George Stathakis said, "I am extremely excited about joining this company which is well positioned to be a major force in the global semiconductor industry."

According to Dataquest, the market research subsidiary of Dun & Bradstreet Corporation, the worldwide semiconductor market which Ramtron is addressing is addressing will grow from $14.7 billion in 1990 to more than $34 by 1995.

Stathakis brings more than 35 years of experience in international investment banking, marketing, operations, and senior management. In the three years prior to joining Ramtron he was chairman and chief executive officer of International Capital Corp., a subsidiary of American Express. Previously, Stathakis spent 32 years with the General Electric Company in various management and executive positions, most recently as president and

chief executive officer of the General Electric Trading Company, where he was instrumental in developing several billion dollars of export opportunities for General Electric.

Stathakis graduated from the University of California at Berkeley in 1952 with B.S. and M.S. degrees in engineering. He was appointed by President Reagan in 1985 as a member of the President's Export Council. He is also a director of the Atlantic Council.

Ramtron International Corporation is a majority-owned subsidiary of Ramtron Australia Ltd. The company was formed in 1984 to develop leading semiconductor memory products based on proprietary ferroelectric materials and advanced processing and design technologies. In 1987, Ramtron produced the world's first non-volatile Ferroelectronic Random Access Memory device. The company is currently characterizing its first commercial FRAM product family and has begun initial product deliveries to customers.

In addition to the development and manufacture of non-volatile FRAM products, Ramtron also designs and develops very advanced high performance Dynamic Random Access Memories (DRAMs) which are expected to be commercially available during the second half of 1990.

Ramtron Australia's stock price is found in the NASDAQ supplementary column of The New York Times and in the NASDAQ Bid and Asked Quotation column in the Wall Street Journal under RAMTR.

CONTACT: Ross Lyndon-James of Ramtron International, 212-752-1717; or Matt Haines or Mark Cohen of Cameron Associates, 212-683-4545, for Ramtron.

CORPUS CHRISTI, TX (MARCH 13) PR NEWSWIRE - Marine Drilling Company (NASDAQ: MDCO) today announced that at a special meeting of shareholders held on March 12, the shareholders approved the previously announced proposed business combination of Marine with Keyes Offshore Limited Partnership and related Keyes entities.

In addition, Keyes Offshore Limited Partnership held a special meeting of limited partners on March 12, at which the limited partners approved the business combination.

It is currently expected that all the remaining conditions to the completion of the business combination will be satisfied and that the business combination will be completed at the close of business today.

Upon consummation of the business combination, Marine, Keyes Offshore

Limited Partnership and related Keyes entities will become subsidiaries of Marine Holding Company, a newly formed Texas holding company. In the business combination, each outstanding share of Marine's common stock and preferred stock will be converted into one share of Marine Holding Company's common stock and preferred stock, respectively. In addition, Marine will acquire the Keyes entities through the issuance of up to an aggregate of 4,438,772 shares of common stock and 50,000 shares of preferred stock of Marine Holding Company.

Marine and the Keyes entities are each engaged in the contract drilling of oil and gas wells in the U.S. Gulf of Mexico for independent and major oil companies. Marine has 16 mobile offshore jackup drilling rigs available for operation and the Keyes entities operate seven rigs.

LONDON (MARCH 13) PR NEWSWIRE - The Rank Organisation Plc (NASDAQ: RANKY) announced today that it has signed an agreement to acquire the Deluxe motion picture film processing laboratory division of Fox Inc. The closing of this transaction is subject to the applicable waiting period under the Hart-Scott-Rodino Anti-Trust Improvements Act of 1976, following which a further announcement will be made.

Commenting on the transaction, James Daly, managing director of Rank's film and television services division, said:

"The acquisition of the Deluxe Hollywood laboratory will enable Rank to compete for the film processing business of the major U.S. motion picture studios. Deluxe is a long established laboratory which has important relationships with major American customers which Rank plans to strengthen and develop further."

The assets of Deluxe include the trademarks, the fully equipped film laboratory on its freehold site and appropriate working capital. The acquisition will be for a cash consideration of US$150 million.

NEW YORK (MARCH 13) PR NEWSWIRE - Avon Products, Inc. (NYSE: AVP), today announced that the following letter from James E. Preston, chairman, president and chief executive officer, has been mailed to all shareholders:

In my letter to shareholders contained in our 1988 Annual Report, I described to you our aggressive plan to restore Avon's financial health and build real new value for shareholders by reducing debt, exiting from the health care business and increasing cash flow.

We believe that plan is working: We've reduced our debt since the end of 1988 by half a billion dollars; we're reached an agreement to sell our last health care operations; we've cut our costs as a percentage of net sales significantly. Operating results for 1989 showed a 26 percent (see note below) increase in earnings from continuing operations and an 8 percent increase in sales.

We're back to concentrating on our basic business -- beauty and direct selling -- and we believe the future is bright for Avon.

It appears that someone else has noticed the progress we're making. Chartwell Associates has amassed over 9 percent of Avon's common stock, in what we believe is the first step of an effort to take over Avon. Chartwell is a limited partnership formed by John Rochon, the vice chairman of Mary Kay Corporation, along with Gordon Getty and the Fisher brothers. Mary Kay is a major competitor of our company -- and Mary Kay has put up part of Chartwell's funding.

Chartwell has said it intends to nominate four candidates for election as Avon directors and to seek the sale of our company or a merger with Chartwell. You should know that, even if elected, the Chartwell nominees would constitute only a minority of the entire board. Chartwell has not made an offer to purchase Avon.

Please consider the following: -- Chartwell's nominees offer only to seek the sale of the company, at an unspecified price and on unknown terms. But we believe that Avon shareholders are best served by completing the long-term program we've begun. Chartwell has not offered any plan for completing that program. In fact, Chartwell has not put forward any plan for the long-term growth of Avon.

-- Chartwell is taking the first steps toward gaining control of our company. But they are not offering to pay you, or any other shareholder, for that privilege. Chartwell is not committed to pay any premium to any Avon shareholder if it gains control.

CONTACT: John Cox, 212-546-8471 (media); or Margro Long, 212-546-8549, or Ann Scavullo, 212-546-6737 (investors), all of Avon Products.

MINNEAPOLIS (MARCH 13) PR NEWSWIRE - The Aveda Corporation has announced plans to hold a nationwide Aveda Earth Day "Cut-A-Thon" on Sunday, April 22, as a kickoff for Earth Day 1990's year-long environmental campaign.

Aveda, a major corporate sponsor of Earth Day 1990, aims to raise over $500,000 for Global ReLeaf, the American Forestry Association's national tree planting campaign. The announcement was made by Horst Rechelbacher, the Minneapolis-based company's chairman and founder.

The Aveda Corporation and salons across the country will participate in a day-long Cut-A-Thon -- all proceeds from haircuts on April 22 will be donated to help Global ReLeaf achieve its goal of planting one billion trees by 1992. Global ReLeaf will use the proceeds from the Cut-A-Thon to plant and care for trees until they are able to survive on their own.

The Aveda Corporation manufactures and distributes natural hair, skin, body and environmental products made from pure, distilled flower and plant essences to professional beauty salons throughout the United States, Canada and Europe.

As an environmentally concerned company, Aveda advocates the use of pure, natural, plant-derived compounds in place of synthetic or animal- tested products. Aveda strongly encourages the planting of trees to sustain and replenish our natural resources. The company is also implementing a nationwide recycling program in the professional salons where its products are sold.

Americans everywhere will be able to take part in this environmental campaign. Media representatives and consumers who wish to locate the nearest salon participating in the Aveda Earth Day Cut-A-Thon may call 1-800-328-0849.

CONTACT: Mary Kay Bastian of Aveda, 612-379-5560, or Deborah Semel of Loving & Weintraub, 212-935-1033, for Aveda.

PHILADELPHIA (MARCH 13) PR NEWSWIRE - U.S. Healthcare Inc. (NASDAQ: USHC) the Pennsylvania-based health maintenance organization (HMO) has been named the title sponsor of the annual Corporate Sports Battle that benefits the Big Brother/Big Sister Association of Philadelphia, according to Paul N. Sandler, president.

The 1990 Corporate Sports Battle to be held on June 9 and 10 at LaSalle University is one of the premier fund-raising events for Big Brother/Big Sister, and last year raised more than $70,000 for Philadelphia's children many of whom come from single-parent households.

"We are delighted that U.S. Healthcare has taken the lead in terms of sponsorship and are extremely excited about their upcoming participation in the battle," Sandler said. "It's a real bonus to work with an organization that is not only an advocate of health and fitness, but one that also has a sincere commitment to young people as well as the community."

Sandler said that the battle, professionally produced and held across the country, is a combination of serious athletic events as well as wacky ones for people of all ages. In addition to track and field, swimming and volleyball, athletes also compete in a hot bikini wheel barrel race, a double donut relay and the infamous Kentucky derby relay. Marcy Abramson, vice president of operations at U.S. Healthcare, said that the battle is an event that the company has a real interest in supporting. "All of us are looking forward to participating in the Corporate Sports Battle. Helping kids is one way we can contribute to a healthy future and it's one small way we as a company can help."

Other local sponsors include: ARA Services, The Philadelphia Business Journal and Sun Marketing and Refining Co., all of whom have donated money or in-kind services to support Big Brothers/Big Sisters of Philadelphia. Proceeds of the battle will help to fund programs designed to provide additional adult support, guidance and friendship on a one- to-one basis to children who are living in single-parent families.

U.S. Healthcare Inc. is one of the nation's leading operators of federally qualified health maintenance organizations (HMOs). Founded in 1976, the organization has more than 1 million members in the mid-Atlantic, Greater New York and New England marketplaces. U.S. Healthcare is dedicated to providing quality health services to its members while aggressively seeking solutions to the spiraling costs facing our current health care system.

MIAMI (MARCH 13) PR NEWSWIRE - Burger King Corporation announced today that C. Ronald Petty, 45, president and chief operating officer, Burger King U.S.A., is leaving the company.

"Ron has been with Burger King for 12 years, coming back to the USA business from international just before the acquisition by Grand Metropolitan," said Barry J. Gibbons, chief executive officer of Burger King Corporation. "We both decided we would get right down to the urgent

tasks at hand and take a year or so to decide whether we wanted to work together long term. We have had that review and decided to change. I would like to pay open tribute to Ron for his contribution to Burger King over the years, and in particular to our progress over the last 12 months."

Pending a futher announcement, Barry Gibbons will assume the additional responsibilities of chief operating officer for the U.S.A. as well as those of chief executive officer.

Burger King Corporation was acquired by Grand Metropolitan in January 1989. One of the United Kingdom's largest international companies, Grand Metropolitan is a world leader in the food, drinks and retailing businesses. U.S. subsidiaries also include The Pillsbury Company, Alpo Pet Foods, Carillon Importers, Heublein, Inc., The Paddington Corporation, and Pearle, Inc. Burger King Corporation and its franchisees operate more than 6,000 restaurants in 34 countries worldwide. In fiscal year 1989, the company had systemwide sales of $5.7 billion.

HOUSTON (MARCH 13) PR NEWSWIRE - Iroquois Brands, Ltd. (AMEX: IBL) (Iroquois) announced today that it has completed the sale of its Pharmacaps subsidiary to Sobel U.S.A. (Sobel), a subsidiary of Sobel B.V. of the Netherlands. The agreement included the sale of all of the issued and outstanding shares of Pharmacaps to Sobel for $9 million cash and an 8 percent royalty interest in Pharmacaps expanding generic drug business. This royalty will apply to 12 products over a 10 year period.

Management is actively focusing Iroquois on expanding its interests in

branded industrial products, primarily in the machinery and equipment area. In that regard, Iroquois is in the process of acquiring companies that would accelerate corporate growth in branded industrial products markets. As a result of Iroquois' growing strength in hydraulic equipment technology, particular corporate emphasis is centered on expanding Iroquois' hydraulics lines, which are seen as the base for its machinery and equipment future.

Iroquois Brands, Ltd., is based in Houston with subsidiaries in the United States and the United Kingdom. The company business focuses on branded industrial products operating primarily in the machinery and equipment area. Other subsidiaries operate in the industrial and petroleum areas, primarily gasoline station/convenience stores in the United Kingdom.

GREENVILLE, SC (MARCH 13) PR NEWSWIRE - Multimedia, Inc. (NASDAQ-NMS: MMED) announced today that it has executed a letter of intent to sell the Company's Winter Haven, Florida newspaper, The News Chief, and the weekly

Auburndale (FL) Star to Stauffer Communications, Inc. (NASDAQ: STAU).

Announcement of the transaction was made jointly by Walter E. Bartlett, Chairman of the Board of Multimedia, and Stanley H. Stauffer, Chairman of the Board of Stauffer Communications. Consummation of the sale is contingent on completion of a definitive purchase agreement. The purchase price was not disclosed.

Bartlett said that sale of The News Chief and The Auburndale Star is mutually beneficial to Multimedia and Stauffer.

"The Winter Haven and Auburndale newspapers are our only Florida properties," he said. "Stauffer has made a significant investment in print media in Polk County and the Winter Haven area. This acquisition would add substantially to their presence there."

Additionally, Bartlett said that Multimedia, a publicly held diversified communications company, was satisfied that Stauffer "would be good stewards of the Winter Haven News Chief and The Auburndale Star."

"Our knowledge of Stauffer goes back a long way. We know they are capable operators with a keen sense of community responsibility," he said.

Stauffer is a publicly held media company headquartered in Topeka, Kansas. It owns and operates 22 daily and eight weekly newspapers, and six television and five radio stations in 15 states. The company also publishes two nationally circulated periodicals, Grit and Cappers, and operates the Kansas City Royals radio network.

Many of Stauffer's newspapers are afternoon dailies, as is The News Chief. In Polk County, Stauffer publishes the Lake Wales Daily Highlander, the Haines City Herald, and weekly shoppers serving Lakeland, eastern Polk County, and part of Osceola County.

Multimedia, Inc., a diversified media communications company, headquartered in Greenville, S.C., publishes 14 daily and 50 non-daily newspapers, owns and operates 4 television and 7 radio stations, operates more than 100 cable television franchises in four states and produces and syndicates quality television programming, including the Phil Donahue and Sally Jessy Raphael shows.

ROCKVILLE, MD (MARCH 13) PR NEWSWIRE - The GEnie online information

service from GE Information Services has added an IBM Product Support RoundTable for online access to various vendors of IBM PC and compatible software and services.

The following software and services vendors are currently providing online support and information in the RoundTable:

-- The Software Link - provides multiuser operating systems (PC-MOS), and LAN products (LANLINK).

-- Volkswriter, Inc. - markets a full line of word processing and page processing software including Volkswriter and Total Word.

-- Computer Technologies Online - offers support for Mitsubishi, Osicom, and The Complete PC.

-- Spectra Software - the publisher of PowerBASIC, provides a full-featured programming environment.

-- ISD - provides DynaCADD, a new CADD program for the IBM PC and compatible market. In the coming months, ISD will be porting its best-selling software for the Atari ST to the IBM platform.

Charles Strom, manager of the IBM PC RoundTable, said: "The intention with this new IBM Product Support RoundTable is to make the GEnie service the key service to use for online access to many vendors of IBM PC and IBM PC-compatible software and support services. More vendors will be added to the RT in the near future."

Each of the five current participating vendors will have a dedicated Bulletin Board area in the IBM Product Support RoundTable where messages will be posted covering news and rumors as well as technical questions and answers by all members.

Each vendor in the RT also will have a software library where they will post product announcements, technical and application notes, and bug fixes which will be available for downloading by GEnie service subscribers.

For further information in the United States and Canada on the GEnie service, please call 1-800-638-9636. GE Information Services, a division of General Electric Company (NYSE: GE), is headquartered in Rockville, Md. The GEnie service is one of the fastest growing online information services with more than 191,000 individual subscribers throughout the U.S. and Canada and in Japan.

SAN FRANCISCO (MARCH 13) PR NEWSWIRE - San Francisco-based PLM International Inc. (AMEX: PLM) today reported the results of its operations for the fourth quarter and year ended Dec. 31, 1989.

For the year ended Dec. 31, 1989, PLM International reported record consolidated revenues of $94.2 million, compared to $78.7 million for 1988 a 19.7 percent increase. Net income available for common shares and earnings per share were $12.3 million and $1.21, respectively for the year ended Dec. 31, 1989, also records, representing respective 15.2 percent increases over amounts earned for 1988.

Revenues reported for the fourth quarter were $23.5 million compared with $22.7 million for the fourth quarter of 1988. Net income available for common shares was $2.9 million or 29 cents per share, a 16 percent increase over the 25 cents per share for the like quarter of 1988.

The following table sets forth a summary of certain operating statistics for the quarters and years ended Dec. 31, 1989 and 1988:

CERTAIN OPERATING STATISTICS (i)

	Three months ended		Year ended	
	12/31/89	12/31/88	12/31/89	12/31/88
Total Revenues	$23,459	$22,723	$94,211	$78,748
Operating Income	$ 8,472	$ 8,217	$34,964	$31,177
Preferred Dividends	$ 1,763	---	$ 2,565	---
Net income	$ 4,695	$ 2,507	$14,870	$10,679

Net Income Available for Common Shares	$ 2,896	$ 2,507	$12,305	$10,679
Average Common Shares Outstanding	10,154	10,154	10,154	10,154
Net Income per Common Share	$ .29	$ .25	$ 1.21	$ 1.05

(i) Figures are in thousands, except per share data.

PLM International also reported record equity syndication sales for the year ended Dec. 31, 1989, of $208.5 million, a 29.9 percent increase over the $160.5 million completed in 1988. Equity syndication sales for the fourth quarter of 1989 were $56.6 million.

PLM International is an integrated equipment leasing company engaged in the leasing and management of transportation equipment and in operating leases domestically and internationally, and in the syndication of capital equipment leasing investments. The company operates and manages over $1.2 billion of transportation equipment and related assets for its account, various investment partnerships and third party accounts.

LIVINGSTON, NJ (MARCH 13) PR NEWSWIRE - The National Telecommunications and Information Administration (NTIA) of the U.S. Department of Commerce announced today that Bellcore, the nation's largest research consortium, will provide technical assistance to Poland in an effort to upgrade that country's deteriorated telecommunications system.

Bellcore's owners, the seven regional telephone companies, unanimously agreed to a Commerce Department request to lend non- commercial humanitarian assistance. Financing of the project will be equally shared by Bellcore's owners. No government funding will be sought, although NTIA will play a major coordinating role in the program.

The mission's goal is to provide the Polish Ministry of Communications and the Polish Postal Telegraph & Telecommunications Service (PPTT) with technical support in the areas of network planning and regulatory and business management.

Bellcore representatives were part of a U.S. delegation -- led by Janice Obuchowski, assistant secretary for NTIA -- that met with PPTT and Polish Ministry officials last month in Warsaw to explore areas where assistance might be given.

Generally, Bellcore will be providing expertise in network planning and telecommunications management to assist the Polish people in planning the most effective and efficient way to evolve their network to meet immediate and future needs.

The scope and cost of the project will be determined once Bellcore representatives evaluate information provided by the PPTT and develop specific work proposals.

"This mission represents the willingness of the American private sector to cooperate with the U.S. and Polish governments in pursuing a common objective -- to see to it that the government of Poland be accorded every opportunity to achieve its goals," said Bellcore vice president John A. Morgan.

"Bellcore and its owners believe that this effort will make a very positive contribution toward supporting our nation's desire for a free Eastern Europe," he added.

Any information provided to the Polish government by Bellcore will first be reviewed by the U.S. Bureau of Export Administration in Washington.

Work is slated to begin later this month and to be completed by the end of the year. It is not known how many Bellcore employees will be working on this project.

Bellcore's primary mission is to provide technical support to the telephone companies of Ameritech, Bell Atlantic, BellSouth, NYNEX, Pacific Telesis, Southwestern Bell Corp. and U S West.

CONTACT: John Lucas, 201-740-6113, or Peter Settles, 201-740-6181, both of Bellcore, or Eileen Doherty of NTIA, 202-377-1551.

IRVINE, CA (MARCH 13) PR NEWSWIRE - Fidelity National Financial, Inc. (AMEX: FNF), a leading title insurance underwriter, today reported sharply higher net income on a 27 percent increase in first-quarter revenues.

For the quarter, which is typically the weakest quarter for Fidelity's title insurance subsidiaries, net income was $747,000, or 22 cents per share, a 579 percent increase over the $110,000, or 3 cents per share, recorded for the comparable fiscal 1989 quarter. Revenues for the quarter were $44,813,000, up 27 percent from the $35,309,000 in revenues for the prior-year opening quarter.

The quarter included a $500,000 pre-tax gain from the sale of an inactive California underwriting subsidiary and a $600,000 pre-tax reserve in connection with the acquisition by Fidelity of a condominium project in Florida in settlement of the company's largest pending litigation. After taxes, the impact of the two items was to reduce earnings by 1.8 cents per share.

William P. Foley, II, president and chief executive officer, said: "The first-quarter earnings, coming in what is traditionally our weakest time of the year, provide a tremendous springboard for the rest of our fiscal year." He added that Fidelity's business in California, which provides the bulk of the company's revenues, remains strong.

Fidelity National Financial, Inc. issues title insurance and performs other title-related services in 31 states and the District of Columbia through Fidelity National Title Insurance Company, Fidelity National Title Insurance Company of California, and Fidelity National Title Insurance Company of Tennessee.

CONTACT: Frank P. Willey, executive vice president and general counsel of Fidelity National Financial, 714-852-9770, or Mark Perlgut, 212-661-8030, or after 7 p.m., 212-799-9263, or Holly Goldin, 312-266-7800, both of the Financial Relations Board, for Fidelity National Financial.

#90072p0136 03/13/1990 ~PR Newswire

SEATTLE (MARCH 13) PR NEWSWIRE - U.S. Bancorp (NASDAQ: USBC) today announced plans to transfer branches of its wholly owned subsidiary First National Bank in Spokane (First National Bank) to its flagship Washington bank, U.S. Bank of Washington, National Association (U.S. Bank). In addition, First National Bank will apply to relocate its main office to Idaho. Completion of the transactions is dependent upon regulatory approval.

"First National Bank has been a part of the U.S. Bancorp system since the acquisition of Old National Bank in 1987," said Gerry Cameron, president of U.S. Bank. "We are taking these actions now so that we may provide all of our customers in the Inland Northwest region with the best service at the most reasonable price, regardless of which branch they bank in and regardless of which side of the state line they're on."

"For us, this means a more complete range of services and resources for our customers and our employees," said John Oliveri, president of First National Bank. "We welcome this opportunity and are glad to be a more visible member of the U.S. Bank family."

Due to an overlap in service areas, U.S. Bank plans to consolidate the

North Division and University City branches of First National Bank into existing U.S. Bank branches. The Third and Stevens, and Fairwood branches will become U.S. Bank offices.

Oliveri said that First National Bank customers, including those at the main office, who have their accounts transferred will move to the U.S. Bank branch of their choice. There will be no disruption in service. Customers will still see many of the same faces since most of First National's employees will be transferred to U.S. Bank branches. He also stated that the relocation to Idaho would provide additional opportunities for other First National Bank employees. The customers of First National Bank who reside in Idaho will have the option of staying with First National Bank when it relocates its main office to Idaho. Oliveri will continue as president of First National Bank through the transition and will also remain with U.S. Bancorp as president of The Compass Group, a commercial lending company.

"We are analyzing all of our staffing and branch location requirements in light of the conversion. Through attrition, we do anticipate a reduction in some areas," stated Cameron.

"U.S. Bank and U.S. Bancorp are committed to Spokane, to Eastern Washington and to the I-90 Corridor, which includes Idaho," said Cameron. "We see this conversion as a logical extension of the way people and companies already do business and we are excited about the opportunities for us, our customers and this region."

U.S. Bancorp is the largest financial holding company based in the Pacific Northwest with current assets of approximately $17 billion.

MINNEAPOLIS (MARCH 13) PR NEWSWIRE - International Multifoods (NYSE: IMC) will begin an $11.4 million expansion this spring of its surimi seafood plant in Motley, Minn.

Multifoods is the largest producer of surimi seafood in the United States and the expansion project, to be completed in early 1993, will more than double its annual production capacity of 28 million pounds.

"This is one of several capital projects we're undertaking this year to build our core businesses and leadership positions in the foodservice industry," said Tony Luiso, Multifoods chairman, president and chief executive officer. "Our surimi seafood operation has grown dramatically since we built the Motley plant in 1987 and this project will give us capacity to meet the growing demand for surimi products in the marketplace."

The U.S. market for surimi seafood, now at an estimated 150 million pounds is growing at an annual rate of 8-12 percent. Besides the Motley facility, Multifoods also operates a surimi seafood plant, acquired a year ago, in Los Angeles.

Surimi is made from Pacific whitefish and blended with other natural seafoods such as crab, shrimp and lobster. High in protein and low in fat and cholesterol, surimi seafood is used as an alternative to these higher-cost seafood products. Multifoods' surimi seafoods are marketed under the SeaFest CrabTasties brand to foodservice and industrial customers, and under the Captain JAC label to supermarkets and delicatessens.

"Motley has been a great place for this business," said Loren Morey, president of SeaFest/JAC Creative Foods, Multifoods' surimi seafood business. "We have an excellent, hard-working group of employees in Motley who have helped build this business from scratch. In addition, we've had excellent support from local and state government which has been important to our expansion here."

The state of Minnesota has approved a $500,000 grant to the city of Motley for the expansion project, contingent on the availability of state grant funds. "This plant means more jobs and a brighter economic future for the

community and the surrounding region," said Governor Rudy Perpich. "This exemplifies the real benefits of a sound public-private partnership for economic development."

The expansion, when completed, is expected to result in a 60 percent increase in employment at the plant to 320. The town of Motley has a population of about 400.

The expansion will include a new 66,000-square-foot addition to house three more production lines as well as additional office space. The increased capacity will be added in phases over the next three years. The first phase, to be compleed in December of this year, will involve construction of the addition and installation of one new production line.

Besides the surimi seafood expansion, Multifoods is expanding its processing facility in Riverside, Calif., which produces burritos and other Mexican entrees for the foodservice industry. The company also will open several new specialty distribution warehouses this year serving the U.S. vending industry and West Coast bakeries. In the 1989 calendar year, the company's capital spending program totaled about $35 million.

International Multifoods Corp., with fiscal 1989 net sales of $1.9 billion is a diversified food company with major operations in the United States, Canada and Venezuela.

CONTACT: Linda K. Berg (media) 612-340-3755 or Yolanda M. Scharton (investors) 612-340-3621, both of International Multifoods.

#90072p0141 03/13/1990 ~PR Newswire

BOSTON (MARCH 13) PR NEWSWIRE - Ray Stata, President and Chairman of the Board of Analog Devices, Inc. (NYSE: ADI), at today's annual shareholders meeting said that Analog is poised to participate in a technological revolution comparable to the one that occurred in digital VLSI technology during the 80s. He told the audience, "The 90s will see progress in mixed-signal VLSI technology that will make it practical to combine large numbers of analog and digital circuits on very large-scale chips to create what are now called VLSI mixed-signal or mixed-mode ICs. The impact of products based on this technology will not be so much to displace the functional ICs used in today's equipment as it will be to facilitate the design of entirely new classes of products and systems that are not feasible with today's functional IC technology."

Stata noted that as the market leader in real-world signal processing, Analog is unusually well-positioned to be a major player in the developing market for mixed-signal VLSI devices. He pointed to Analog's success in data conversion as a major reason why the company can expect to be

successful in mixed-signal VLSI. "Data converters--a technology we pioneered--were really the industry's first mixed-signal ICs. We have the largest market share and broadest product line in the industry, and fully 60 percent of our business comes from these types of products," he said.

To provide some indication of what the future holds, Stata indicated that Analog expects to have a sub-micron mixed-signal process in production by the mid-90s. "With this technology," he said, "we can anticipate system ICs with hundreds of thousands of components. This compares to about 10,000 components on the most complex mixed-signal chip we have designed so far."

While Analog is making large investments in the development of VLSI mixed-signal technology in support of the long-term opportunities this technology represents, functional ICs with lower levels of integration will continue to be the company's "bread and butter" business for the next five years. "Most signal processing equipment currently in production was designed with functional ICs," said Stata. "Furthermore, most of the equipment designed over the next two to three years will continue to use functional ICs until such time as the development costs for system-level chips decrease to where they are practical for lower-volume applications."

With sales for fiscal 1989 of $453 million, Analog Devices is a leading manufacturer of precision high-performance integrated circuits used in analog and digital signal processing applications. The company also manufactures board-level products used in computerized data acquisition and measurement and control applications. The company employs approximately 5,100 people worldwide, and has manufacturing facilities in Massachusetts, North Carolina, the United Kingdom, The Philippines and Japan.

JACKSON, MI (MARCH 13) PR NEWSWIRE - Consumers Power Company's typical residential natural gas customer will receive a bill credit of about $19 in April as part of approximately a $35 million refund by the utility. The refund stems from money received by Consumers Power from interstate natural gas pipeline companies, an initial reconciliation of 1989 natural gas costs and other miscellaneous items.

The Michigan Public Service Commission (MPSC) today approved a settlement agreement in this matter, signed by the Michigan Attorney General's office the MPSC staff, the Residential Rate-payers Consortium, the Association of Businesses Advocating Tariff Equity and Consumers Power.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties. It is the nation's eighth-largest gas distribution utility, serving 215 cities and villages including suburban Detroit, Bay City, Flint, Jackson, Kalamazoo, Lansing, Pontiac and Saginaw in 40 of the 68 Lower Peninsula counties.

RIVIERA BEACH, FL (MARCH 13) PR NEWSWIRE - The high-performance, limited-production mid-engine GTP by Consulier sports car has been approved for sale by the federal Environmental Protection Agency.

Powered by a Chrysler turbocharged 2.2 liter engine, the two-place composite coupe can go from 0 to 60 mph in under five seconds, has a top speed greater than 150 mph, yet has been rated at 21 miles per gallon in the city and 27 mpg on the highway by the EPA.

"Our emphasis on lightweight construction for optimum performance, handling and braking, with relatively modest engine power, obviously brings a side benefit of superior performance-car fuel economy," explained Warren Mosler, Consulier Industries (NASDAQ: CIND) president and founder.

Manufactured here, the two GTP by Consulier models feature composite unibody construction, independent suspension, four-wheel disc brakes with hydraulic anti-lock, five-speed transmission and race-track proven performance.

"We believe our performance is superior to all other full-production vehicles sold in the United States," said Mosler. "We will pay $25,000 to anyone who can pilot another full-production car around a race track faster than a GTP Sport by Consulier."

Consulier Industries offers the GTP Sport by Consulier for $48,900 and the GTP LX by Consulier (which includes leather upholstery, air conditioning, cruise control, sunroof, AM/FM/CD audio system and power windows, mirrors, locks) for $58,900.

ANNANDALE, VA (MARCH 13) PR NEWSWIRE - Ameribanc Investors Group (NASDAQ-NMS: AINVS), the holding company for Ameribanc Savings Bank, a $1.3 billion asset bank headquartered in Annandale, announced the bank has received the necessary approval to convert from a Virginia-chartered savings bank to a federal savings bank.

The new charter is expected to be issued in the near future. James H. Harrison, president and chief executive officer of Ameribanc Savings Bank, announced, "The adoption of the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) effectively eliminated all the advantages a Virginia-chartered savings bank previously enjoyed." Harrison noted Ameribanc would save approximately $100,000 per year in licensing fees. Ameribanc's official name will change to Ameribanc Savings Bank, FSB, and deposits will continue to be insured to $100,000 by the Federal Deposit Insurance Corp.

Ameribanc operates 37 retail banking offices in Northern Virginia and

Hampton Roads. Ameribanc has reported full compliance with all regulatory capital requirements. The bank continues to believe its business plan for 1990 will enable it to meet those requirements.

CONTACT: James H. Harrison, 703-658-1002, or Peter C. Williams, 703-658-1004, both of Ameribanc.

WEST CHESTER, PA (MARCH 13) PR NEWSWIRE - Roy F. Weston Inc. (NASDAQ: WSTNA) (Weston) is nearing completion of phase one of the $5 million planning design engineering project to expand the Los Angeles- Glendale Water Reclamation Plant (LAGWRP).

In one of the largest municipal design projects undertaken by Weston, the firm is planning and designing an expansion that will increase plant capacity from the current 20 million gallons per day (MGD) to 50 MGD. The project also includes the planning and design of major improvements to the plant's collection system including five miles of Glendale/Burbank interceptor sewers.

The LAGWRP expansion project is part of the City of Los Angeles' 12- year, $3 billion to $4 billion wastewater Capital Improvement Program scheduled for completion in 1998.

Work on the project is divided into three phases, including conceptual design, preliminary design and final design. Weston is nearing completion on the conceptual design phase, which provides planning for the maximum treatment capacity at the current plant site as well as flexibility to accommodate potential future treatment requirements. The processed wastewater is of a high enough quality that it can be reclaimed and used for irrigation and industrial cooling purposes.

Weston Vice President Don Dates, P.E., is project director on the Los Angeles project. Dates, a design expert, has worked on similar projects in

Houston, Chicago, New York and Detroit. In total, Dates design expertise accounts for more than a billion gallons of water being treated each day in treatment plants around the country.

Weston is a recognized leader in providing comprehensive public works infrastructure management; engineering and science consulting services to all levels of local government.

The company's full-service approach includes planning, design, regulatory compliance, financing alternatives, construction and facility management for water, wastewater, solid waste, storm water, and hazardous waste projects. Weston has designed more than 60 wastewater treatment plants across the United States.

Weston's clients include most major cities. Weston is headquartered in West Chester, and operates 42 offices nationwide, including Los Angeles, Houston, Chicago, Atlanta, Boston, New York and Washington.

CONTACT: Jack Chicca and Don Dates, both of Roy F. Weston's Woodland Hills, Calif., office, 818-596-6900.

HOUSTON (MARCH 13) PR NEWSWIRE - Bellwether Exploration Company (NASDAQ: BELW) has reported earnings of $106,833 ($0.006 per share) for its second fiscal quarter ended Dec. 31, 1989 compared to net income of $31,253 ($0.002 per share) for the same quarter last fiscal year.

Revenues were $764,127 for the quarter ended Dec. 31, 1989, up from $706,266 for the quarter ended Dec. 31, 1988.

For the six-month period ended Dec. 31, 1989 Bellwether recorded earnings of $262,477 ($.014 per share) compared to earnings of $69,786 ($.004 per share) for the six-month period ended Dec. 31, 1988.

Revenues were $1,604,965 for the six-month period ended Dec. 31, 1989, up from $1,345,626 for the six-month period ended Dec. 31, 1988.

The 242 percent and 276 percent increases in earnings and the eight percent and 19 percent increases in revenues for the second quarter of fiscal 1990 and the six-month period ended Dec. 31, 1989, respectively, are due to two acquisitions completed during the second quarter of fiscal 1989 and a greater than 30 percent increase in the company's average oil sales price.

Bellwether Exploration Company, headquartered in Houston, is engaged in oil and gas exploration and development, and the acquisition of producing

properties in the United States.

NEW YORK (MARCH 13) PR NEWSWIRE - The board of directors of Rockefeller Center Properties, Inc. (RCPI) (NYSE: RCP) declared today a regular dividend of 47 cents per share of common stock for the quarter ended March 31, 1990, payable April 30, 1990, to stockholders of record at the close of business on April 9.

The company said that it intends to make distributions to its stockholders on the last Monday of April, July, October and December of each year in an aggregate amount equal to substantially all cash flow generated from operations in that year.

RCPI, which commenced operations on Sept. 19, 1985, was formed to permit public investment in Rockefeller Center. RCPI's principal asset is a $1.3 billion participating mortgage loan to the owners of Rockefeller Center with an option, exercisable on Dec. 31, 2000, to convert the loan into a 71.5 percent ownership interest in Rockefeller Center.

As of March 12, there are 37,510,000 shares of the company's common stock outstanding.

#90072p0186 03/13/1990 ~PR Newswire

NEW YORK (MARCH 13) PR NEWSWIRE - The Hong Kong and Shanghai Banking Corporation today announced the following results for 1989: HongKongBank The HongKong and Shanghai Banking Corporation Limited Incorporated in Hong Kong with limited liability

The directors announce that the profit for the year ended Dec. 31, 1989 attributable to the shareholders of the Bank was HKD4,774 million (1988: HKD,300 million), an increase of 11.0 per cent. The profit was arrived at after providing for taxation and after making transfers to inner reserves.

World economic growth advanced at a slower pace in 1989. The slow down became more evident during the second half. Rising inflationary pressures in the developed countries and reduced import demand, notably in the United States, fed through into lower growth rates in most of the

Asian economies.

The Group's major banking operations in Asia reported continued profit growth. In Hong Kong, despite a marked slowdown in the economy, loan demand remained buoyant and the performance of the banking sector was encouraging. Elsewhere however results were mixed, and in some areas disappointing. In Australia, where the corporate sector has been adversely affected by a downturn in the economy and sustained high interest rates, Hongkong Bank of Australia reported a significant loss. And in the United States, although Marine Midland reported a profit, it was well below expectations. Both these subsidiaries, and the Bank-s own commercial banking operations in the United States and the United Kingdom, have deemed it prudent to make conservative provisions against specific parts of their loan portfolios. These provisions have of course affected the reported result.

This picture was relieved by improved performance elsewhere. The British Bank of the Middle East, helped by a strong recovery by The Saudi British Bank, reported the best results in its history in its centenary year. Hongkong Bank of Canada reported another excellent result.

The performance of the Group's capital markets businesses also improved in 1989. The Wardley Group again had a successful year and reported a further increase in profit. The James Capel Group recovered strongly from the previous year's loss to make a modest profit in 1989, and CM & M reported a significantly reduced loss.

We continue to develop our relationship with the Midland Group and to discuss the form and nature of a closer business association between the two groups. These are preliminary discussions and a further statement will follow if appropriate.

In November an independent professional valuation of properties held by the Bank and its wholly owned subsidiaries was carried out. Hang Seng Bank, the Bank's 61.48 per cent owned subsidiary, carried out a similar valuation in 1989. The surplus of HKD13,786 million resulting from these valuations has been credited to published reserves. These moves, which bring into the open a part of the Group's hidden reserves, have led to a further strengthening of the Group's capital base.

The directors propose the payment of a final dividend of 28 cents per share on May 8, 1990 to shareholders whose names are on the Register of Shareholders on May 2, 1990. Together with the interim distribution of HKD812 million already paid the total distribution for 1989 will amount to HKD2,440 million (1988: HKD2,094 million) an increase of 16.5 per cent, the total dividend per share for 1989 will be 42 cents (1988 36.36 cents adjusted), an increase of 15.5 percent. The dividend will be payable in cash, with a scrip alternative, in accordance with and subject to the

Regulations of the bank.

TAMPA, FL (MARCH 13) PR NEWSWIRE - Billy G. Sasser, 44, was elected chairman of the board and reappointed president and CEO of Reeves Southeastern Corporation, at its recent directors' meeting, which followed the annual meeting of shareholders. Other directors re-elected were L.W. Ponte, executive vice president; Miles L. Lenhart, vice president-finance, secretary and treasurer; and W.K. (Kelly) Neuman who was named vice chairman of the board.

During the annual meeting, Sasser reviewed the third successful operating year for the company since the management buyout in December 1986. The favorable results were achieved despite the downturn in construction activity during fiscal year 1989, which ended Oct. 31.

At the subsequent directors' meeting, all previous officers were re-elected including the recent addition of Michael Augello, 34, as chief operating officer of the Southeastern Wire marketing division. Also, an improved pension plan for all employees was approved calling for fewer years of service required prior to full vesting and retirement benefits.

Sasser reported that the company had made substantial progress in strengthening its management team during the year, plus acquiring four additional branch locations, bringing its total to 27. Consequently, it is positioned to accelerate its growth in the future.

Reeves it a privately held manufacturer and distributor of metal and wood fencing products, access control systems, wire reinforcing mesh, and does custom galvanizing. The company has manufacturing locations in Tampa and Midfield, Ala., and 27 distribution centers in 11 states. Reeves employs 370 people corporate-wide of which 225 are located in Central Florida.

#90072p0197 03/13/1990 ~PR Newswire

JACKSON, MI (MARCH 13) PR NEWSWIRE - Consumers Power Company is launching the most comprehensive energy-conservation program ever undertaken in Michigan. The $23.9 million program was approved today by the Michigan Public Service Commission. Implementation of the program will begin in the next 90 days.

The utility estimates the program can save over the next three years the equivalent output of a small electric generating plant and enough natural gas to serve 6,500 homes annually. Consumers Power has experienced six consecutive years of record electricity sales. Substantial energy savings through conservation and improved appliance efficiency are options for addressing future energy capacity needs, according to the utility.

"Consumers Power Company today is committing itself to real, substantial energy-savings targets through this multifaceted program. Unlike previous energy-audit programs that simply offered advice, these plans include actual installation of energy-saving equipment at no cost in homes," said Michael G. Morris, the utility's executive vice president for natural gas and marketing.

The energy-savings targets for the entire program over the next three years are 62,263 megawatt-hours of electricity and 896,943,000 cubic feet of natural gas.

Of the program's nine plans, six are for residential customers, two are for commercial customers and one targets industrial firms. A small monthly surcharge will pay for the program.

Conservation for residential customers includes a home energy fitness plan including free installation of low-cost conservation devices, such as a hot-water heater-wrap, low-flow showerheads, up to two long-life fluorescent lightbulbs and other devices. Customers can also receive up to $1,000 from Consumers Power for taking major energy- saving measures, such as installing attic insulation.

Residential customers purchasing high-efficiency replacement appliances can receive a $50 bonus on refrigerators, freezers, ranges and other appliances exceeding the 1990 Federal energy-conservation guidelines by 15 percent.

Special plans will be geared to combination customers, using both gas and electricity, who are building new energy-efficient homes, and low-income customers who are clients of the Michigan Department of Social Services.

Plans for commercial customers include a state-of-the-art energy audit and bonus payment for energy-saving equipment meeting certain requirements. Large industrial customers installing energy-efficient equipment will also be eligible to receive bonuses.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility, serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

TULSA, OK (MARCH 13) PR NEWSWIRE - Kern River Gas Transmission Company today announced it has signed a firm contract with Amoco Energy Trading Company for 50 million cubic feet per day (MMcfd) of natural gas on its proposed pipeline from Wyoming to California.

"Kern River's firm, long-term contracts now total 655 MMcfd," noted Cuba Wadlington Jr., executive vice president of Kern River. Initial capacity of the 36-inch diameter line will be 700 MMcfd.

The 904-mile Kern River pipeline will originate in southwest Wyoming and terminate in Kern County, Calif., where the gas will be used for enhanced oil recovery, distribution by utilities, production of electricity, cogeneration of electricity and steam and other industrial applications.

Amoco Energy Trading Company of Denver is a subsidiary of Amoco Production Company of Chicago. Kern River is a joint venture of The Williams Companies, Inc. and Tenneco Inc.

The Williams Companies, Inc. (NYSE: WMB) is a Tulsa-based corporation that operates a nationwide digital telecommunications network and more than 25,000 miles of pipelines, which transport natural gas and petroleum products.

Tenneco Inc. (NYSE: TGT) is a Houston-based, diversified company with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals and minerals.

PHILADELPHIA (MARCH 13) PR NEWSWIRE - Sears Logistics Services today announced it will finish converting its Philadelphia catalog merchandise distribution center at 4640 Roosevelt Blvd. to a retail replenishment center effective June 30, 1990.

Plans for the change were announced more than a year ago. The new retail center will require some 350 full-time and 350 part- time employees, the company said. The catalog center currently has some 1,400 full-time and 1,100 part-time employees.

A full range of employee assistance programs will be available to help employees who will not be part of the staffing for the retail center, said Edward J. Coleman, regional manager for Sears Logistics Services, which operates the center. A subsidiary of Sears Merchandise Group, Sears Logistics Services provides distribution services at competitive costs to Sears business units.

Coleman said assistance programs will include educational skills training, job search programs in cooperation with local and state government, job training programs, interview and resume writing classes and career interest surveys and counseling.

Coleman said that since some employees in the center are represented by a union, the company will be required to negotiate about their severance benefits. He noted where similar facilities have been closed, employees have been offered a combination of severance pay, leave of absence to protect insurance benefits and a special early retirement package.

Fewer employees will be required since the new center will specialize in moving larger quantities of merchandise to fewer locations, he said.

Plans to convert the facility to a retail replenishment center were initially announced in January 1989 as part of a restructuring of Sears distribution system which began in 1987.

"The Philadelphia center will assure a steady flow of merchandise from suppliers to more than 150 Sears retail stores in nine northeastern states and the District of Columbia in support of Sears everyday low pricing program," Coleman said.

As announced earlier, the catalog merchandise distribution functions of the center are being shifted to Sears Logistics Services facilities in Greensboro, N.C., and Columbus, Ohio.

One of Sears Logistics Services oldest distribution centers, the five million-square-foot Philadelphia facility was opened in 1920.

NEW YORK (MARCH 13) PR NEWSWIRE - ABC Radio Networks announced today that it is using a fiber optic, terrestrial digital network developed by MCI Communications Corporation (NASDAQ-NMS: MCIC) to link its operations centers in New York and Los Angeles.

ABC is the first radio network to use coast-to-coast terrestrial digital

service for audio and data applications.

ABC is currently employing MCI's terrestrial digital network to feed audio and data from Los Angeles to New York prior to satellite transmission. Tom Snyder's "Radio Show" is currently being broadcast with the help of the new terrestrial digital network, along with other news and features programming. The "Radio Show" is a national radio call-in program broadcast to nearly 200 local stations nationwide.

ABC Radio has equipped the new terrestrial digital network with Intraplex channel banks in New York and in Los Angeles to connect with existing T-1 voice and data lines.

According to Robert Donnelly, general manager of satellite systems for ABC Radio, "MCI's terrestrial network is a valuable addition to our satellite capability. While we do not expect that terrestrial technology will replace satellite networks, there's no question that terrestrial networks offer us valuable economy, quality and reliability. For example, with terrestrial transmission, you eliminate the problem of atmospheric interference, such as from thunder and lightning."

"As far as efficiency is concerned," Donnelly continued, "terrestrial technology provides for simultaneous, multiple channel routing of monaural and stereo broadcasting, which can be controlled from our New York operations center. For this specific application, it's a considerable plus compared with current satellite technology."

Nate Kantor, president of MCI's Northeast Division, said: "ABC Radio's use of MCI's terrestrial digital service is part of our evolving partnership with leading broadcasters. As the technology of broadcasting continues to change in the 1990s, it's clear that telecommunications will be playing a strong role. MCI looks forward to working with innovators like ABC Radio in bringing new technology to this dynamic industry."

MCI, headquartered in Washington, provides a full range of telecommunications services to businesses, residences and government agencies. The company owns and operates the world's second largest communications network, employing advanced fiber optics, digital microwave satellite and digital switching technologies.

DENVER (MARCH 13) PR NEWSWIRE - Denver-based Manville Corp. (NYSE: MVL)

announced today that it has acquired the assets of Ceel Co., a privately-held industrial products manufacturing firm headquartered in Lakewood, Colo. This facility is Manville's only Colorado-based manufacturing plant. Terms of the acquisition were not disclosed.

Ceel Co., which employs 20 people, is a manufacturer of PVC fitting covers jacketing and custom shapes for process piping. The company is the leading supplier of these PVC products in such industrial markets as food plants and other USDA regulated processes, petrochemical plants and pulp and paper mills.

"We have worked with Ceel Co. in the past, so this acquisition is a natural outgrowth of a long-term relationship," said Joe Fullmer, vice president and division general manager of Manville's Engineered Products Division.

"Ceel Co.'s operations complement our existing PVC business," said Fullmer. "Our primary emphasis has been in the commercial, institutional and office building markets. Ceel Co. now brings a strong recognition and reputation for product quality and service within the industrial market."

"We're proud that Manville acquired Ceel Co.'s operations," said Ken Valis chairman of the board for Ceel Co. "Manville is a responsible corporation and has the resources to expand the Ceel-Co(R) product line and service new markets."

Fullmer said that Manville will continue to market products under the Ceel-Co. name and through Ceel Co.'s existing manufacturer's representative network, which he described as "excellent."

Manville Engineered Products, a division of Manville Sales Corp., is a leading manufacturer and supplier of thermal and acoustical insulation and filtration products worldwide. Products are marketed directly to original equipment manufacturers and by a network of distributors, contractors and fabricators.

Manville, founded in 1858, is an international manufacturing and natural resources company with two principal operating subsidiaries, Manville Sales Corp., headquartered in Denver, and Manville Forest Products Corp., headquartered in West Monroe, La. The company's primary businesses include paper and wood products, packaging, fiberglass and industrial insulation products, roofing systems and filtration and minerals. The corporation's headquarters is in Denver.

#90072p0215 03/13/1990 ~PR Newswire
LOS ANGELES (MARCH 13) PR NEWSWIRE - Movietime announced today that it will change its name to E! Entertainment Television when the basic cable network is relaunched June 1. The new name was announced by Lee Masters, president and chief executive officer.

"The network is expanding its focus, and E! Entertainment Television is a name that takes in the all-encompassing world of popular entertainment that we're going to be programming: movies, television, music, books, magazines, theater, fashion, art, and other genres. Celebrities from all these fields will find a home on E!," said Masters. "Our new name stakes out a broad territory -- the world of entertainment -- and solidifies the franchise of the network. It's strong and exciting, and that's what gives it impact.

"Calling the network E! distinguishes us from the usual run of three- and four-letter abbreviations. The name is vibrant, contemporary, and forward looking.

"As Movietime evolved, its name became unsuitable because many people confused it with a movie service. Others thought it only showed motion picture previews. Movie coverage will continue to be an integral part of our format, as we expand to include all forms of entertainment and celebrity information. We will feature news, interviews, gossip, and behind-the-scenes footage about celebrities and the world of entertainment presented with an attitude that is fun, stylish and imaginative," said Masters.

The name change will be accompanied by a new logo, new graphics, and a new on-air look -- all parts of the planned relaunch of the network. Other parts of the redesign include a new format and a predictable schedule, based on an hour-long "wheel" format with features scheduled at regular times within the hour.

The network will be known as Movietime on air and for administrative purposes until the relaunch.

Launched in 1987, the network is currently offered by about 500 cable systems serving approximately 14 million subscribers. The advertiser-supported basic service provides viewers with news and feature segments highlighting the celebrities and the entertainment industry.

PHILADELPHIA (MARCH 13) PR NEWSWIRE - Midway Airlines on May 1 will begin non-stop service from its Philadelphia International Airport hub to Port Columbus International Airport in Columbus, Ohio.

The three daily round-trips between Philadelphia and Columbus will operate on the following schedule:

PHILADELPHIA TO COLUMBUS		COLUMBUS TO PHILADELPHIA	
Depart	Arrive	Depart	Arrive
8:55 a.m.	10:20 a.m.	8:20 a.m.	9:22 a.m.
2:12 p.m.	3:35 p.m.	1:40 p.m.	2:42 p.m.
7:51 p.m.	9:15 p.m.	6:55 p.m.	7:57 p.m.

Midway Airlines will fly DC9-30 aircraft on the Philadelphia to Columbus route.

Introductory one-way fares between Philadelphia and Columbus, effective May 1 - May 31, are: $79 non-refundable coach, $119 unrestricted coach and $139 for unrestricted first class.

With the introduction of Philadelphia to Columbus service, Midway Airlines will offer non-stop flights to 19 cities with 58 daily departures from the Philadelphia International Airport hub that the airline inaugurated Nov. 15. Columbus travelers can connect conveniently in Philadelphia with Midway flights to several destinations in the Northeast and Canada including: Albany, Boston, Buffalo, Hartford/Springfield, Montreal, Providence, Rochester and Toronto.

Midway also serves Columbus non-stop from the airline's Chicago hub at Midway Airport, with four daily round-trips.

"Columbus is a proven market for Midway Airlines, and a business center that we feel has been underserved," said John P. Tague, vice president of marketing and planning. "We look forward to our increased presence there and we are pleased to offer more airline service options to business and leisure travelers in Columbus."

Midway Airlines offers coast-to-coast service from its hubs at Chicago's Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve more than 60 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

PORTLAND, OR (MARCH 13) PR NEWSWIRE - Hyundai Motor America (HMA) today celebrated the completion of its new $12.2 million vehicle processing facility in Portland at a special grand opening ceremony held at the port. Officials from the port, government, and HMA, as well as other guests, participated in the event.

"Today, I feel doubly proud," said U.S. Senator Bob Packwood (R-Ore.). "First, of course, to witness firsthand the very successful completion of these impressive, new facilities that will benefit both Hyundai and the greater Portland community.

"But, also because I can say I was literally 'on board' from the start. Five years ago, when Hyundai first came to the U.S., I witnessed the arrival of the first Excel here at our port. Since then I've watched as the blush of a new relationship has blossomed into a healthy and mutually satisfying business partnership."

Construction of Hyundai's expanded facilities began last June and was completed in just eight months. The new project includes a large dock area, a 45,000-square-foot processing building and a 75-acre holding lot for incoming cars.

Since 1986, when Hyundai first began importing cars through Portland, more than 240,509 Excel subcompacts and Sonata midsize automobiles have passed through the Port of Portland on their way to any one of 27 of the 49 states in which Hyundai now has dealers. From Portland, cars are shipped as far east as Ohio and Kentucky. Hyundai also imports its vehicles through ports in Los Angeles, Brunswick, Ga., and Port Elizabeth, N.J.

Hyundai expects to import approximately 100,000 cars a year through the expanded facility. Port officials estimate that each new Hyundai accounts for an additional $240 in income to the local economy, representing and estimated $24 million in annual revenues. In addition, more than 50 workers will be employed at Hyundai's Portland facility within approximately the next 18 months.

"As I look ahead in the coming months to the sale, in just four years, of our one-millionth car in the U.S.," commented H.W. Baik, president of HMA, "I am reminded of and gratified by what can be accomplished when people work together for their mutual benefit. Clearly, Portland has been good for Hyundai; I trust and believe that Hyundai, too, will be good for your city."

Headquartered in Fountain Valley, Calif., Hyundai Motor America has sold more than 900,000 vehicles since entering the U.S. market in 1986. Besides its popular Excel and Sonata models, Hyundai soon plans to introduce a new sporty car, Scoupe, aimed at young buyers looking for fun, stylish yet economical transportation. The first shipment of Scoupe vehicles should arrive at the Port of Portland in July.

NEW YORK (MARCH 13) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) has ordered three responsible parties to carry out the terms of EPA's decision at the Forest Glen superfund site near Niagara Falls, N.Y.

That decision, dated Dec. 29, 1989, called for purchase of properties from more than 50 families who live in a mobile home part atop the contaminated site and relocation of those families to permanent alternate housing. The three parties are the Goodyear Tire and Rubber Company, USA Campsite Inc., and Guy T. Sottile.

According to EPA's order, many of the chemicals found to be contaminating the site are consistent with materials that Goodyear disposed of under contract with a transporter at the site. USA Campsites subsequently subdivided the property, and Sottile was the developer who sold lots to the current residents.

The order, which was signed on March 12 by EPA's Regional Administrator Constantin Sidamon-Eristoff, gives the three parties 13 days to respond as to whether or not they will undertake they work. If the parties do not agree to carry it out, EPA will proceed with the buyout and relocation, which is expected to cost around $6 million, and seek treble cost recovery from the parties. The parties have already declined previous offers from EPA to enter into consent agreements for this site.

According to Eristoff, "We are doing everything we can to move the people of Forest Glen to good alternate housing as soon as possible. These people have suffered long enough and must be relocated permanently away from this contaminated site. If the responsible parties do not carry out the terms of this order, they will be subject to heavy penalties."

Because of its wish to avoid continuing exposure of the residents to the chemicals, EPA last July offered temporary relocation to them while a more permanent remedy was being developed. So far, 26 of 53 families have accepted temporary relocation.

The temporary relocation has been managed by the Federal Emergency Management Agency (FEMA), which will also be responsible for the permanent relocation if the responsible parties do not agree to do the job. Since EPA's Dec. 29 decision, FEMA has been conducting appraisals of the Forest Glen properties and will shortly be prepared to make offers to the residents.

EPA's ability to carry forward with the remedy is contingent upon two other events. First, New York State must signify its acceptance of EPA's conditional approval of the state's capacity assurance plan. This approval was announced on March 9. Secondly, EPA and the New York State

Department of Environmental Conservation must site a state Superfund contract regarding this site.

GRAZ, AUSTRIA (MARCH 13) PR NEWSWIRE - Chrysler Corporation (NYSE: C) and Steyr-Daimler-Puch Fahrzeugtechnik Ges.m.b.H., (SFT) today signed the final agreement and laid the cornerstone for a joint automotive plant in the Austrian town of Graz, marking the start of the new joint venture. In the spring of 1991, Eurostar Ges.m.b.H., the joint venture company, will begin production of Chrysler's popular minivans, marketed in Europe as the Chrysler Voyager.

Taking part in the historic event were Chrysler Chairman Lee A. Iacocca, Otto Voissard, chairman of Steyr-Daimler-Puch AG (SFT's parent company), and Dr. Franz Vranitzky, Chancellor of Austria representing the Austrian governmental units. Direct participants in the joint venture company are the newly formed Chrysler Austria Ges.m.b.H and Steyr-Daimler-Puch Fahrzeugtechnik, with each owning 50 percent of Eurostar.

The agreement provides for the production of all Voyagers for the European market in the joint venture plant in Graz starting in 1991.

Steyr-Daimler-Puch was selected as Chrysler's partner in this joint venture because of the company's high production quality, its skilled workforce and unique expertise in the field of all-wheel drive.

The new plant is being built beside the existing Steyr-Daimler-Puch facilities in Graz. In the initial phase, Chrysler and Steyr-Daimler-Puch expect annual production of approximately 25,000 Voyagers in Graz, employing 1,200 new workers. When all four planned phases have been realized, Eurostar's long-term production capacity could be expanded to around 125,000 units per year, with new jobs totaling 4,200. Additionally, the joint venture will provide approximately 5,000 jobs in the Austrian supplier industry.

Chrysler has been importing Voyagers for the European market from North America, where the minivan is by far the best-selling vehicle in its class. Current demand for Chrysler minivans exceeds Chrysler's annual minivan production capacity of approximately 500,000 units.

In 1991, the Voyager will also offer a four-wheel-drive option, in addition to the standard front-wheel-drive version. Steyr-Daimler-Puch Fahrzeugtechnik developed the new 4x4 concept for the Voyager and also will manufacture major components for it.

In addition to the four-wheel-drive Voyager, Chrysler is also preparing a Diesel version especially for Southern Europe, as well as a model with an additional swinging rear door on the left side for greater access.

For Chrysler, the joint venture with Steyr-Daimler-Puch is the third major step in its successful return to the European market. In its first step two years ago, Chrysler resumed sales of its North American- built vehicles in Europe. In 1989, Chrysler shipped nearly 50,000 vehicles to Europe.

The second step was the formation of ARCAD, Chrysler's 50/50 joint venture with Renault. Through ARCAD, which stands for the Association of Renault and Chrysler for Automotive Development, the two companies jointly will produce a small sport utility vehicle code-named "JJ" starting in 1992. Vehicles for the European market will be built at a plant in Valladolid, Spain, while vehicles for the North American market will be produced at a yet-to-be-determined Chrysler facility in North America.

STAMFORD, CT (MARCH 13) PR NEWSWIRE - Savin Corporation (NYSE: SVB) today declared that, subject to shareholder approval of its proxy at the special meeting scheduled to be held on March 22, 1990, shares of its preferred stock will be issued as the quarterly dividends on Savin's cumulative convertible Series B, C and D preferred stocks. Record date for the dividend will be March 22, 1990; payment date will be April 2, 1990. The dividend shares to be issued were calculated using the average market price for each preferred share during January 1990 (Series B - $5.4813, Series C - $5.6156 and Series D - $5.75).

The dividends will be paid as follows:

Preferred Stock	Dividend per Share
B	.03649 shares per Series B preferred
C	.01781 shares per Series C preferred
D	.00435 shares per Series D preferred

Fractional shares will be rounded up to the nearest whole share. Savin Corporation, founded in 1959, distributes a full line of office copiers and facsimile products through a North American network of over 380 dealers and ten-company owned branches at more than 600 selling and servicing locations. Savin also markets certain products in Europe through the HCS/Savin joint venture. Savin is the only distributor of copier products in North America offering the customer a choice of toner technologies.

NEW YORK (MARCH 13) PR NEWSWIRE - Thomas H. King, a long-time executive of McGraw-Hill Publications Company and a former president of American Business Press, today was elected president and chief executive officer of Schnell Publishing Company, effective July 1. He has been a director of Schnell since 19887.

King was also named publisher of Schnell's three major publications: Chemical Marketing Reporter, its 118-year-old weekly for the chemical process industries; Chemical Business, its monthly magazine for chemical executives, and the OPD Chemical Buyers Directory, its annual sourcebook of commercial chemicals.

King will succeed Arthur R. Kavaler, who has been with Schnell for 42 years and has been its president and CEO since 1972. Kavaler will continue with the company in a consulting capacity.

King comes to the Schnell presidency from Maxwell Communications Corporation, where he was president of Webb Publishing Company.

In a 23-year career with McGraw-Hill, King held a number of executive posts, including group vice president, vice president of manufacturing, publisher of Fleet Owner and National Petroleum News, as well as sales manager of Chemical Engineering.

In addition to Chemical Marketing Reporter, Chemical Business and the OPD Chemical Buyers Directory, Schnell Publishing produces business aids and operates the CompuReach software division.

BRANCHVILLE, NJ (MARCH 13) PR NEWSWIRE - Citing its 63-year tradition of providing a stable and consistent insurance market for New Jersey residents, Selective Insurance has described the New Jersey Automobile Reform Bill of 1990 signed by Gov. Jim Florio as so seriously flawed that the ability of insurance carriers to provide an orderly, financially sound market will be severely impaired.

Frederick H. Jarvis, Selective's chairman and chief executive officer, added, "We want to continue to be a good corporate citizen, but this law will inhibit our organization from fulfilling its primary obligation to our stockholders, policyholders, producers and employees."

In a statement coinciding with the governor's bill-signing ceremony, Jarvis stated that Selective is reexamining all alternatives to determine the company's next step.

Selective Insurance, which is licensed to sell insurance in 16 states, insures more than 100,000 automobiles in New Jersey.

Selective Insurance Group, Inc. (NASDAQ: SIGI) is a holding company with four insurance subsidiaries: Selective Insurance Company of America and Selective Way Insurance Company, based in Branchville; and Selective Insurance Company of the Southeast and Selective Insurance Company of South Carolina, based in Charlotte, N.C.

ST. PAUL, MN (MARCH 13) PR NEWSWIRE - Northwest Airlines will add San Jose, Calif., to its 41-state domestic route network May 15.

Northwest said it will inaugurate service with two daily roundtrip flights linking San Jose with its major traffic center at Minneapolis/St. Paul.

San Jose passengers will have connecting service in the Twin Cities to 240 flights serving 65 destinations.

The airline said it was attracted to San Jose because of the city's large local travel market.

In addition, Northwest said it recognizes an affinity of travel interests between San Jose and the Twin Cities because both economies are closely focused on computer and other high-tech industries.

Northwest said its flights will leave San Jose at 7 a.m. and 11:50 a.m. and will arrive in Minneapolis/St. Paul at 12:28 p.m. and 5:18 p.m. respectively.

Service will be provided aboard 146-passenger Boeing 727-200 jetliners. Northwest is America's fourth largest airline, serving 135 cities on three continents -- Asia, Europe and North America. The airline's domestic route network centers on hubs at Minneapolis/St. Paul, Detroit and Memphis.

Internationally, Northwest is America's leading airline to Asia, serving 12 destinations from eight U.S. gateway cities. It also flies to five top business destinations in Europe.

GREENVILLE, SC (MARCH 13) PR NEWSWIRE - Following its annual stockholders' meeting today, Fluor Corp.'s (NYSE: FLR) board of directors declared a quarterly dividend of 6 cents per share on the company's common stock. The dividend is payable April 17, 1990, to holders of record at the close of business on March 27, 1990.

David S. Tappan Jr., chairman of Fluor, said, "Engineering and construction is in the early stages of a long-term recovery. There is opportunity for unprecedented growth through the nineties due to a greater emphasis on expansion of the world economy instead of military confrontation."

"To capitalize on these positive trends, our focus will be to expand our investment in technical skills, systems and communications to meet the growing needs of our clients worldwide," continued Les G. McCraw, vice chairman and chief executive officer.

In response to questions regarding the company's natural resource activities, the two executives said, "We have nothing new to report concerning strategic changes in either coal or lead. Over the past year we have been responding to inquires from companies interested in purchasing Fluor's 57.5 percent interest in Doe Run Lead Co., however, there has been no resolution. Pending acid rain legislation, which is expected to be enacted in 1990, could have a very positive impact on the value of low-sulfur coal reserves. Fluor said that several options are being explored to enhance its investment in A.T. Massey Coal Company, a major producer and broker of low-sulfur coal. Management said it is premature to speculate about what actions, if any, would result. Both Doe Run and Massey are strong contributors to Fluor's current results.

Last week the company reported net earnings of 28.2 million for its first quarter ended January 31, a 31 percent increase over the same period a year ago. While both natural resource units were profitable, Massey Coal's significantly improved results from a year ago were more than offset by lower earnings from Doe Run. New awards for engineering and construction advanced 14 percent to $1.8 billion for the quarter and backlog was up 25 percent to $8.7 billion.

Fluor Corp. is an international engineering, construction and technical services company with investments in coal and lead.

DEARBORN, MI (MARCH 13) PR NEWSWIRE - CMS Energy Corporation (NYSE: CMS) announced that the Midland Cogeneration Venture (MCV), of which it is a 49-percent owner, Monday completed the closing of the equity funding of the MCV and the partnership bridge financing.

Monday, equity partners contributed an additional $423 million to the partnership. CMS Midland Inc., an affiliate of CMS Energy, contributed $207 million of plant assets as its equity contribution. The remaining equity partners contributed $216 million in cash.

In addition, a bank group led by Citibank provided $480 million of bridge loan financing which was utilized to pay off the construction loan. The bridge loan provides for the MCV to undertake a sale/ leaseback financing of the facility. The bank loan also permitted the issuance of $500 million of MCV Notes, which CMS Energy also received Monday. The balance of the $1.2 billion of CMS Notes will be issued upon the permanent financing of the facility which is expected within the next 90 days.

The MCV is a limited partnership with seven partners formed to convert the former Midland nuclear plant into a gas-fired, combined- cycle cogeneration plant. As America's largest cogeneration plant, it will generate as much as 1,370 MW of electricity and up to 1.35 million pounds per hour of process steam for industrial use. Commercial operation of the facility is expected this week.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth- largest combination utility.

BOISE, ID (MARCH 13) PR NEWSWIRE - Morrison Knudsen Corp. (MK) (NYSE: MRN) announced today that an MK-led joint venture has commenced work as

program manager on a 14-project, $75-million municipal works project for Monroe County, Fla.

The contract was awarded by the Board of County Commissioners to the joint venture consisting of MK and Edward J. Gerrits Inc. of Miami. The scope of work includes a 570-bed jail, a separate 350-bed jail and sheriff's substation, airports, a 25,000-square-foot office building and civic auditorium, a 7,700-square-foot records center and renovation of three county buildings, including the courthouse in Key West. Construction is scheduled for completion in five years.

The multi-discipline project spans the entire 100-mile length of the Florida Keys and includes work in Key Largo, Marathon, and Key West.

The contract is expected to be ratified by the county commissioners on March 28.

Construction and construction management of prison facilities have been major lines of business for MK since the early 1980s. During that time, the company has managed construction of prisons or jails in nine states, with a combined capacity of more than 15,000 beds.

WILTON, CT (MARCH 13) PR NEWSWIRE - Preferred Health Care, Ltd. (AMEX: PY) announced today that a definitive agreement was signed to acquire all the assets of The CareSys Company for $1.2 million in cash and $360,000 of

Preferred Health Care stock.

The CareSys Company has developed systems to provide quality assurance and cost containment services in the workers' compensation area. It specializes in muscoskeletal injuries.

David J. McDonnell, president and CEO of Preferred Health Care, said: "CareSys will nicely complement our managed care business for psychiatric and substance abuse treatment. Many of our existing clients have serious workers' compensation cost problems and are likely candidates for the new service. We believe that our existing infrastructure can accommodate the new product line without significant new costs to Preferred beyond those directly allocable to the workers' compensation product."

The acquisition was made through a limited partnership in which a special purpose subsidiary of Preferred Health Care is the sole general partner and owns 44 percent of the partnership. The limited partnership is known as CareSys Partners, L.P. CareSys, Inc., a corporation owned by the principals that conceived and developed the workers' compensation product, and certain outside investors, owns the remaining 56 percent of the partnership. These principals will continue to be employed in business.

Preferred has a call option to purchase all of the stock of CareSys, Inc., and, if the new enterprise attains certain performances standards, will purchase such stock via a put option that it granted the CareSys, Inc. stockholders. The put and call strike price is $4.2 million, subject to adjustment based on certain contingencies.

The parties expect the transaction to close in the next month.

CONTACT: George Neidich, senior vice president of Preferred Health Care, 203-762-0993.

SEATTLE (MARCH 13) PR NEWSWIRE - Winmar Co. and Mervyn's have reached an agreement to locate a department store in Redmond Town Center, Redmond, Wash.

Richard Eichler, president of Winmar Co. said that he is "extremely pleased that Mervyn's has joined the other fine retailers at Redmond Town Center. The addition of Mervyn's provides a diversified market base that enhances the balance of merchandise and services to the Redmond community.

The involvement of Mervyn's emphasizes Winmar's commitment to add diversification to this project; we couldn't be more pleased with their participation in meeting that objective."

Mervyn's will occupy 82,000 square feet in the northwest corner of the center. The store design will follow a two-level floor plan similar to many of the Mervyn's stores in regional malls and mixed-use centers in California.

"Seattle is an important market for Mervyn's," said Vic Stephens, Mervyn's director of real estate. "We're delighted to have the opportunity to join with Winmar in serving the Redmond community."

Mervyn's has provided fashion, quality and value to retail shoppers for over 40 years. The chain operates 221 stores in 15 states. Mervyn's is a wholly owned subsidiary of the Dayton Hudson Corp. (NYSE: DH), and currently operates 11 stores in Washington state.

J. Randy Kyte, project director for the Redmond Town Center and assistant vice president of Winmar, concurs that "Mervyn's will add to the overall depth of merchandising that the Redmond Town Center needs to provide appropriate choices for the eastside shopper."

Kyte plans for construction to begin this summer on the 1.4 million square foot center anchored by Frederick & Nelson and The Bon Marche, along with Mervyn's. The mixed-use center will be complemented by a class A office complex, a hotel, multi-plex cinema, specialty shops and restaurants. The center is scheduled for a summer 1992 opening.

Winmar develops and manages regional shopping centers and major office buildings across the country. It is a wholly owned subsidiary of SAFECO Properties Inc., the real estate holding company of SAFECO Corp. (NASDAQ: SAFC).

SEATTLE, (MARCH 13) PR NEWSWIRE - U.S. Bancorp (NASDAQ: USBC) today announced plans to transfer branches of its wholly owned subsidiary First National Bank in Spokane (First National Bank) to its flagship Washington bank, U.S. Bank of Washington, National Association (U.S. Bank). In addition, First National Bank will apply to relocate its main office to Idaho. Completion of the transactions is dependent upon regulatory approval.

"First National Bank has been a part of the U.S. Bancorp system since the acquisition of Old National Bank in 1987," said Gerry Cameron, president of U.S. Bank. "We are taking these actions now so that we may provide all of our customers in the Inland Northwest region with the best service at the most reasonable price, regardless of which branch they bank in and regardless of which side of the state line they're on."

"For us, this means a more complete range of services and resources for our customers and our employees," said John Oliveri, president of First National Bank. "We welcome this opportunity and are glad to be a more visible member of the U.S. Bank family."

Due to an overlap in service areas, U.S. Bank plans to consolidate the North Division and University City branches of First National Bank into existing U.S. Bank branches. The Third and Stevens, and Fairwood branches will become U.S. Bank offices.

Oliveri said that First National Bank customers, including those at the main office, who have their accounts transferred will move to the U.S. Bank branch of their choice. There will be no disruption in service. Customers will still see many of the same faces since most of First National's employees will be transferred to U.S. Bank branches.

He also stated that the relocation to Idaho would provide additional opportunities for other First National Bank employees. The customers of First National Bank who reside in Idaho will have the option of staying with First National Bank when it relocates its main office to Idaho. Oliveri will continue as president of First National Bank through the transition and will also remain with U.S. Bancorp as president of The Compass Group, a commercial lending company.

"We are analyzing all of our staffing and branch location requirements in light of the conversion. Through attrition, we do anticipate a reduction

in some areas," stated Cameron.

"U.S. Bank and U.S. Bancorp are committed to Spokane, to Eastern Washington and to the I-90 Corridor, which includes Idaho," said Cameron. "We see this conversion as a logical extension of the way people and companies already do business and we are excited about the opportunities for us, our customers and this region."

U.S. Bancorp is the largest financial holding company based in the Pacific Northwest with current assets of approximately $17 billion.

#90072p0283 03/13/1990 ~PR Newswire

WASHINGTON (MARCH 13) PR NEWSWIRE - AT&T announced today it has won a three-year contract from the Army-Air Force Exchange Service (AAFES) for a project to make it easier and more economical for military personnel stationed in Europe to call the United States.

As part of the estimated $200 million contract, AT&T will establish calling centers at U.S. military installations in eight European countries: Germany, Italy, the Netherlands, Belgium, Spain, United Kingdom, Greece and Turkey. More than 700,000 service personnel and their families will be able to use public telephones and the AT&T Card to access AT&T's USADirect(R) Service, which directly connects international callers to an AT&T operator in the United States.

"We want to make it easy for military personnel stationed abroad to keep in touch with family and friends back home," said Ray Butkus, AT&T international communications services director, "and we do that by making

it easier for them to phone back to the states and by bringing a piece of the states to the soldiers through sponsorship of U.S.O. tours and other activities."

AT&T said this is the first time AAFES, the self-funded Department of Defense organization that operates post and base exchanges (PX/BX) at military bases worldwide, has awarded such an overseas contract.

"We're extremely pleased to be part of a groundbreaking contract award that will expand the use of USADirect and the AT&T card overseas," said Keith Springen, vice president-international for AT&T federal systems. "This contract represents a major milestone in AT&T's continuing effort to broaden our services to internationally based customers."

As part of the project, AT&T will make it easier for military personnel to obtain AT&T Cards by distributing applications for the card at post and base exchanges and other key locations.

The project will include installation of 2,065 public telephones in the eight European countries. Many of them will be configured to automatically access USADirect Service so a caller would only have to lift the receiver to be connected to the AT&T operator in the United States.

USADirect Service, now available in 73 countries, is economical because calls are billed at AT&T operator-assisted rates and callers generally avoid hotel surcharges. It is also convenient, AT&T said, because the use of American operators avoids language difficulties and because charges appear on the caller's regular U.S. phone bill.

NEW YORK, (MARCH 13) PR NEWSWIRE - The Elders IXL board has announced a reconstruction plan for the 1990s which results in focused businesses in brewing and agriculture. With this plan the assets of Elders Finance Group will be sold over time, and a new shareholder is being sought for Elders Futures Inc.

According to Ken Jarrett, chief executive of Elders Finance Group Limited: "Elders Futures is a well-performing and profitable company and we expect that the transition will be very smooth. Over the past four years with Elders Finance Group support Elders Futures has become a significant force in several sectors of the futures industry. We are optimistic that the potential buyers we are holding discussions with will ensure that the company gets the support it deserves. While Elders Finance Group

maintains its ownership, we will continue to provide the support the company has enjoyed to date and all commitments to clients and counterparties will be met as usual."

#90072p0289 03/13/1990 ~PR Newswire

BOSTON (MARCH 13) PR NEWSWIRE - U.N.A. Corporation (OTC) today reported the results of its operations for the six months ended Jan. 31, 1990. For the current six month period, a net loss of $923,000, 15 cents per share was reported, compared to net income of $361,000, 6 cents per share in the comparable six month period of l-(-mear. Revenues, which consist primarily of commission income, were $1,894,000 compared to $3,447,000 in the six month period ended Jan. 31, 1989.

A net loss of $583,000, 9 cents per share was reported for the second quarter compared to net income of $64,000, 1 cent per share in the comparable quarter ended Jan. 31, 1989. Revenues, which consist primarily of commission income, were $807,000 compared to $1,448,000 in the prior year's quarter.

Schwartz commented, "The decrease in revenues and the loss in the second quarter and six months of fiscal 1990 was due to the continued weakness in the United States manufacturing sector which caused a weakened demand for the products sold by the company. This in turn resulted in competitive pressures on selling prices which resulted in decreased operating margins, the basis on which the company earns its revenues. The company is continuing to make every effort to control its expenses and improve the results of operations. The sales of the products from which the company derives its revenues (commissions) decreased to $10,068,000 from $12,172,000 in the six months ended Jan. 31, 1989 and decreased to $4,651,000 from $5,678,000 in the second quarter of fiscal 1989."

U.N.A. Corporation is a leading distributor and processor of specialty steels.

HARRISBURG, PA (MARCH 13) PR NEWSWIRE - Gov. Robert P. Casey announced today that the state has petitioned the Commonwealth Court for a temporary injunction against Pen Pac Inc. to stop the New Jersey trucking company from using Pennsylvania highways to transport trash unless and until it stops violating state safety and environmental laws.

Pen Pac Inc., of Totowa, N.J., is the owner of the garbage trucks with defective brakes that recently caused one fatal accident and another serious accident in Scranton.

"This has got to stop," Casey said. "We are going to do everything that we possibly can under the law to bring a stop to this illegal and unsafe conduct."

"We want to make it very clear to the dumpers and the garbage haulers that once they come into our state they better follow our laws. They better not hurt or kill our people."

The state's petition for a temporary injunction was filed this afternoon in Commonwealth Court in Harrisburg by the state Department of Transportation (PENNDOT).

HOUSTON (MARCH 13) PR NEWSWIRE - NL Industries Inc. (NYSE: NL), which is engaged in a proxy contest in opposition to the current board of directors of Lockheed Corp. (NYSE: LK), announced today that, if the proxy contest is successful, NL will recommend that the newly-elected board add a 15th director who will be representative of the employees who own Lockheed shares through Lockheed's Employee Stock Ownership Plan (ESOP).

Harold Simmons, chairman of the board of NL, stated: "We believe the employees in the Lockheed ESOP deserve board representation. These employees, as a group, have over 1 million shares of allocated stock, compared to approximately 69,000 shares (excluding options) owned by the 14 incumbent directors who are seeking reelection. We believe the ESOP employees constitute an important shareholder constituency that can make a positive contribution in the boardroom. If we are successful, it would be our plan to meet with ESOP participants to get their input and recommend a director who fairly reflects the ESOP employees' vision of Lockheed's future."

#90072p0300 03/13/1990 ~PR Newswire

DEARBORN, MI (MARCH 13) PR NEWSWIRE - Ford Motor Company (NYSE: F) and Sun Refining and Marketing Company have announced the start of a joint research effort to help meet the alternative fuels requirements being considered for the Clean Air Act.

In Dearborn next week, a Sunoco service station will open a methanol fuel pump to provide a fueling point for Ford's research Flexible Fuel Vehicles (FFVs). This is the second such pump located in a commercial gasoline station in the entire country outside of California.

President George Bush attended the opening of the first methanol pump

outside of California in Washington, D.C., today.

For the joint research project in Dearborn, Ford is supplying the Flexible Fuel Vehicles -- a fleet of about 30 Tauruses, Crown Victorias and Econolines. These FFVs help bridge the gap in commercial availability of alternative fuels because they can run on either gasoline or methanol or any mixture of the two.

Sun is blending the fuel -- a mixture of 85-percent methanol and 15-percent unleaded gasoline, called M85 -- and providing a fueling location at its Dearborn service station.

Since the early 1970s, automotive exhaust requirements have focused essentially on vehicle design as a means of reducing pollutants and little attention has been given to fuel composition. Researchers now believe that a better understanding of the vehicle and fuel as a single system could lead to further emissions reductions.

Together, the two companies hope to learn more about methanol use as a transportation fuel in a real-world environment. For example, the cooperative venture will allow for evaluation of the service station tank and pump materials as well as customer refueling impressions.

The Ford research vehicles will fill up on M85 at John Krisko's Sunoco Ultra Service Center, on Monroe Avenue at Outer Drive in Dearborn, while they are undergoing a variety of tests at Ford's Research and Engineering Center. These include emission testing, calibration development to meet other performance and driveability standards, fuel systems materials testing, and validation of the reliability of the components unique to the FFV, such as the fuel sensor.

WHITE PLAINS, NY (MARCH 13) PR NEWSWIRE - Texaco Inc. (NYSE: TX) announced today that its wholly owned finance subsidiary, Texaco Capital Inc., is issuing $250 million of 30-year bonds in a public offering.

These securities, which will mature on March 15, 2020, are being offered at a price of 100 percent of par with an interest coupon rate of 9.75 percent. Texaco Inc. will unconditionally guarantee the securities.

Proceeds from the sale will be loaned to Texaco Inc. or its subsidiaries to be used for the refinancing of existing debt. During 1990, scheduled debt repayments will approximate $900 million.

Texaco's total debt now stands at approximately $6 billion, including this new issue. The company has achieved a debt reduction of nearly $2 billion from the year-end 1988 debt level.

The sale is being offered through an underwriting group led by Salomon Brothers Inc and co-managed by Morgan Stanley & Co. and the First Boston Corporation. The debt securities are issued under a shelf registration statement that was filed with the Securities and Exchange Commission in

February 1990.

#90072p0346 03/13/1990 ~PR Newswire

SAN ANTONIO, TX (MARCH 13) PR NEWSWIRE - Adtec Inc. (NASDAQ: JAIL), a San Antonio-based manufacturer of prison locking devices and detention hardware, reports that it has entered into an agreement with Jack Hunter Investments Inc. ("HUNTER"), a San Antonio-based venture capital company for HUNTER to make an equity investment in Adtec. Adtec currently is in the midst of a severe liquidity crisis and the proposed equity investment by HUNTER has been negotiated in order to resolve Adtec's financial difficulties. The agreement is expected to close on Friday, March 16, 1990 at which time both Jack Hunter, and Adtec president, Samuel Youngblood will be available for public comment.

Under the agreement entered into between HUNTER and Adtec, HUNTER will purchase two million shares of Adtec's $0.01 par value common stock, 65,494 shares of Adtec's 1 cent par value 12 percent Series A Cumulative Convertible Preferred Stock, and an 8 percent Subordinated Convertible Debenture in the original principal amount of $2 million. The Series A Preferred Stock can be converted by HUNTER into Adtec's 1 cent par value common stock at the rate of 10 shares of common stock for each share of preferred stock. The Debenture is also convertible into Adtec's common stock at a conversion price, subject to certain adjustments, of $1.50 per share based on the unpaid principal amount of the Debenture at the time of the conversion. Upon closing of the transaction, HUNTER will become the majority stockholder of Adtec.

HUNTER has entered into an agreement with Adtec's bank pursuant to which HUNTER has the right, on or before March 19,1990, to acquire all of Adtec's approximately $5.7 million debt to the bank for cash, and by causing a new class of Series B Convertible Preferred Stock to be issued

by Adtec to the bank. Upon conversion of the preferred stock, the bank will become the holder of five percent of Adtec's total outstanding common stock. If the proposed transaction with HUNTER closes, this will respond to the bank's demand on March 12, 1990, that Adtec's debt service obligations be brought current. The common stock, the Series A Convertible Preferred Stock, and the convertible Debenture to be issued to HUNTER will be in exchange for HUNTER's purchase and retirement of Adtec's indebtedness to the bank.

Adtec and HUNTER have been negotiating with certain lenders for new sources of working capital credit for Adtec. Adtec has not yet entered into an agreement to obtain a new working capital line of credit. However, negotiations are continuing and Adtec management is optimistic that a new working capital line of credit will be secured. Upon closing of the transaction with HUNTER, the new working capital provided by a new line of credit or by HUNTER, when combined with the elimination of Adtec's $5.7 million debt to its bank will resolve Adtec's current liquidity crisis.

Adtec designs, produces, markets and installs detention equipment for correctional facilities.

HOUSTON (MARCH 13) PR NEWSWIRE - Quanex Corp. (NYSE: NX), the Houston-based metals company, announced today that it has notified the striking Progressive Steelworkers of Hammond Inc., at its LaSalle Steel Co. plant in Hammond, Ind., that the company is officially withdrawing its current offer. The proposal was turned down by a union vote on March 12, 1990. The union has been on strike since its contract expired at midnight Feb. 14.

"The union employees at LaSalle already had the highest wage and benefit package in the cold finished bar industry, and the offer they rejected on Monday was higher than any of the known settlements of our competitors," said Robert C. Snyder, president of Quanex.

"We, as management, have a responsibility to our employees and our shareholders to protect our ability to compete effectively in the market place. At present, no future meetings are planned. We remain willing to meet with the union whenever such a meeting would be productive," Snyder said.

"The supervisory personnel at LaSalle are doing an excellent job operating the plant. We expect that the impact of the strike will only amount to

approximately five cents per share per month," Snyder continued.

Quanex is a technological leader in the manufacture of specialty metals including steel, aluminum and titanium products for transportation, capital equipment, home building and remodeling and energy processing markets.

#90072p0366 03/13/1990 ~PR Newswire

GEORGE TOWN, GRAND CAYMAN, BRITISH WEST INDIES (MARCH 13) PR NEWSWIRE - The Florida Employers Insurance Company (NASDAQ-NMS: FLAEF) announced today that it has recorded a consolidated net loss for the year ended Dec. 31, 1989 in the amount of U.S. $2.265 million, or $1.00 per share. Net income for the prior year was $3.75 million, or $1.66 per share.

Reinsurance operations of the company resulted in a net loss in 1989 of $3.9 million. This was due to adverse claim development on the company's 1987 and 1988 reinsurance business. During 1989, the company posted increases in its claim reserves for the 1987 and 1988 policy year in the amounts of $.4 million and $8.1 million, respectively. Of these increases $7.75 million was recognized in the fourth quarter of 1989. These reserve increases were based on recommendations contained in the recently completed independent actuarial review.

Operations of the U.S. subsidiaries of the company produced a net profit for 1989 of $1.6 million. These operations consist of providing insurance administrative services, agency activities, and group health and life insurance.

Total assets of the company as of Dec. 31, 1989 were $34.2 million and total shareholders' equity was $9.5 million. The company has 2,257,035 outstanding shares which are traded through the NASDAQ National Market System.

At a meeting of the board of directors held on March 12, 1990, Eldon R. Lindsey was elected a director of the company to fill the vacancy left by the resignation of Patrick Hopper late in 1989. Lindsey has been involved in the outdoor advertising business in Florida for over 30 years. At present, he owns approximately 115,000 shares of the company's stock. Lindsey's term as director of the company will expire in 1992.

The board of directors of the company announced an increase in the quarterly dividend from 6 cents per share to 7 cents per share, commencing with the next scheduled quarterly dividend payment on May 31, 1990.

CORPUS CHRISTI, TX (MARCH 13) PR NEWSWIRE - Marine Holding Co. (NASDAQ: MDCO) announced today that the previously announced business combination of Marine Drilling Company with Keyes Offshore Limited Partnership and related Keyes entities has been completed. Marine Drilling Co. and Keyes Offshore Limited Partnership are now subsidiaries of Marine Holding Co., a new holding company.

Pursuant to the terms of the acquisition agreement, Marine Holding Co. has acquired the Keyes entities through the issuance of up to an aggregate of 4,438,772 shares of common stock and 50,000 shares of preferred stock of Marine Holding Co. The transaction is expected to constitute a tax-free reorganization both for unitholders of Keyes Offshore Limited Partnership and for shareholders of Marine Drilling Co.

Unitholders of Keyes Offshore Limited Partnership receive nine and one-half shares of Marine Holding Co. common stock for each of their units representing limited partner interests or an aggragate of 2,689,089 shares of Marine Holding Co. common stock. In addition, holders of the minority interests in Keyes 303 Venture receive 200,000 shares of Marine Holding Co. common stock in exchange for their minority interests. The preferred stock and balance of the common stock (1,549,683 shares) of Marine Holding Co. have been issued to William O. Keyes in exchange for all of the stock

of Keyes Offshore Inc. which owned various assets, including partnership interests in Keyes Offshore Limited Partnership and Keyes 303 Venture.

Each outstanding share of Marine Drilling Co. common stock and Marine Drilling Co. preferred stock has been converted into one share of common stock and one share of preferred stock, respectively, of Marine Holding Co.

Marine Holding Co., headquartered in Corpus Christi, is engaged through subsidiaries in the contract drilling of oil and gas wells in the U.S. Gulf of Mexico for independent and major oil companies. Marine Holding Company operates 23 mobile offshore jackup drilling rigs, which management believes is currently the largest jack-up rig fleet operating in the Gulf of Mexico. As of today Marine Holding Co. has, on a combined basis, 20 rigs under contract in the U.S. Gulf of Mexico.

ST. LOUIS (MARCH 13) PR NEWSWIRE - The following was released today by Southwestern Bell Telephone:

For North American telephone companies large and small, it's a challenge to maintain network quality. And high among many requirements is the continuing job of properly pressurizing cable.

Here's why pressure is important: There's a sheath around each telephone cable. Dry air is pumped into the sheath, providing a positive pressure buffer. In the event of a small crack or tear in the cable, the air keeps moisture from getting in.

Telephone companies' problem: balancing the use of semi-automated pressure and remote monitoring systems with cost-effective employee work scheduling. Because when the pressure goes down on those cables--creating a service disruption--the "pressure" really goes up on the monitoring and maintenance personnel.

The solution: Automatic Pressure Evaluation System software (APES). The software was developed by Southwestern Bell Telephone (SWBT) and is marketed exclusively in the United States and Canada by Mark Products, Inc., of Sunnyvale, Calif.

APES collects data from conventional pressure and remote digital monitoring systems, analyzes it and distributes prioritized reports to field locations and telephone-company alarm handling and dispatch centers.

Ed Cholerton, SWBT's sales manager for software services, said the success of telephone companies' pressurized networks often depends on manual procedures.

"Field personnel can have the responsibility for not only alarm detection, but also alarm analysis, dispatch and resolution," he noted. "We developed the APES system to simplify alarm handling and the maintenance of cable pressure and digital remote systems. This results in an overall improvement in network performance."

SWBT's use of the software in support of centralized alarm and dispatch centers has led to significant cost savings within SWBT, through automation and mechanization, Cholerton noted.

Mark Products Inc., markets advanced air pressure system monitoring and test equipment, training, and engineering services. The company is headquartered in Sunnyvale in the Silicon Valley.

Southwestern Bell Telephone is a wholly owned subsidiary of Southwestern Bell Corp. and provides network exchange service to nearly 9 million customers in Kansas, Oklahoma, Arkansas, Texas and Missouri.

CLERMONT-FERRAND, FRANCE (MARCH 13) PR NEWSWIRE - Francois Michelin said today that he remains very confident that the United States government will approve Michelin's proposed acquisition of The Uniroyal Goodrich Tire Company. Michelin added that informal remarks on this topic made Monday at a lunch had apparently resulted in a misunderstanding of his actual views.

Michelin stressed that the proposed transaction, which has received the overwhelming and virtually unanimous support of the customers and employees of both companies, will enhance rather than diminish competition in global tire markets.

Michelin noted that, just yesterday, the Canadian anti-trust authorities had approved the transaction, concluding after a long and careful study that the acquisition would not result in a lessening of competition in the North American tire markets.

Michelin said that his company has been advised by the U.S. government that its review of the transaction is not yet complete but that he expects a favorable decision in the near future.

(MARCH 13) UPI - Chile's new president is urging a probe of human rights abuses during the 16 years of military rule that ended Sunday with his inauguration. Patricio Aylwin spoke Monday night at the national stadium in Santiago where numerous prisoners are said to have been tortured and killed after the 1973 coup that brought General Pinochet to power. Many of the 80-thousand people in the audience lit candles to commemorate the victims.

Haiti is getting a new, civilian president Tuesday... three days after the ouster of military dictator Prosper Avril in the face of violent protests. She is a justice on the Haitian Supreme Court and eventually will head the government in a plan arranged by opposition leaders. But she has gone into hiding until her swearing-in because of fears of possible violence.

Avril and his family were flown by U-S military jet to Florida's Homestead Air Force Base in a bid to help restore democracy and order in Haiti. They later left for an undisclosed destination... although it's believed Avril owns property in Boca Raton.

NO strenuous objections from the White House to a plan by House Ways and Means Chairman Dan Rostenkowski to cut the federal deficit by raising

taxes. In fact, presidential spokesman Marlin Fitzwater says the idea unveiled Sunday by the Illinois Democrat ''probably facilitates'' budget discussions. On Capitol Hill, the head of the Senate Finance Committee... Texas Democrat Lloyd Bentsen... calls the plan- quote- ''a bold proposal that marks a good starting point on deficit reduction.''

(MARCH 13) UPI - TV HIGHLIGHTS:

WEDNESDAY, MARCH 14

6:30 p.m.
PBS, ''Nightly Business Report.''

7 p.m.
(Note: In some regions, news is broadcast at 6 and 6:30 p.m. Check with local affiliates for details.)
ABC, ''World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m.
ABC, ''Growing Pains.''
CBS, ''Grand Slam'' - Hardball has to come up with $12,000 fast - or go to jail - but his and Gomez's next case gets tricky when it involves Gomez's old girlfriend, who's married to the bail-jumper they're after.
NBC, ''Unsolved Mysteries.''

8:30 p.m.
ABC, ''Head of the Class'' - Simone feels grateful to Dennis after he saves her from drowning but when she agrees to repay him with some serious dating, Charlie and her fellow students think she's carrying gratitude too far.

9 p.m.
ABC, ''Doogie Howser, M.D.''
CBS, ''Jake and the Fatman'' - A health resort proves hazardous to wealthy, lonely people in search of excitement.
NBC, ''Night Court.''

9:30 p.m.
ABC, ''Anything But Love.''
NBC, ''Dear John.''

10 p.m.
ABC, ''China Beach'' - Nurse McMurphy and Beckett join their friends on a rock 'n' roll mystery tour of Vietnam's ghostly Firebase

Geronimo, where K.C. gets an extraordinary chance to recall a more innocent time by renewing her relationship with a high school sweetheart.
CBS, ''Wiseguy'' - Vinnie bolts from Lynchboro after witnessing Sheriff Stem's electrocution suicide, and Roger Lococco is called in to nail Volchek.
NBC, ''Quantum Leap.''

11:30 p.m.
ABC, ''ABC News Nightline.''
CBS, ''The Pat Sajak Show.''
NBC, ''The Tonight Show Starring Johnny Carson.''

12:30 a.m.
CBS, ''Night Heat'' - A young girl witnesses her brother killing a friend. Not knowing where to turn, she confesses to Father Torres, which puts him in jeopardy.
NBC, ''Late Night With David Letterman.''

1:30 a.m.
CBS, ''CBS Nightwatch.''
NBC, ''Later With Bob Costas.''

(MARCH 13) UPI - His days with the New Jersey Nets apparently numbered, Sam Bowie began playing Monday night for his future.

Bowie, embroiled in a contract dispute with the Nets, scored 29 points and pulled down 13 rebounds Monday night, but the Nets dropped their fourth straight game. Reserve Ricky Pierce scored 39 points to lead the Milwaukee Bucks to a 109-104 victory.

Bowie, who has been hampered by a string of injuries during his pro career is enjoying his finest season with the Nets, averaging 14 points and 10 rebounds a game. Bowie hopes to sign a long-term contract with the Nets, but New Jersey management is weary of signing him to one due to his medical background.

So Bowie is going out and showing the rest of the league that he can play.

''What the future holds for me is nothing but brightness,'' Bowie said.

''I've just got to go out and play hard and have fun,'' he said. ''I indicated I wanted to be here and I wanted to end my career here. There's a very good chance I will go out and entertain other teams.''

The Nets indeed indicated that Bowie was their future last summer, trading their best player Buck Williams to Portland for Bowie and the Trail Blazers' No. 1 draft pick (Mookie Blaylock). But in recent negotiations the Nets have only offered a one-year deal to Bowie, leaving him bitter and confused.

''Management is making me say I don't want to be here next year,'' Bowie said. ''I like the guys I'm playing with, but I got to do what's best for me and my family. I don't want the public to think I'm a bad guy, but management is making me say these things.''

Unfortunately for Bowie there isn't much ''public'' when it comes to the Nets, only 7,000 fans showed up for the game Monday night.

Bowie has battled the flu the past few days, making his performance that much more noteworthy.

''For a guy who was sick for as long as he was, he did a hell of a job tonight. It was great performance,'' Nets Coach Bill Fitch said.

''The last few days I was really sick,'' Bowie said. ''The flu was an understatement. I was hooked up to the IV and dehydrated and as sick as I could be. I wanted to play the last two games. I played more minutes tonight than I thought I would.''

Bowie, who has played in 54 of the Nets' 62 games, has been been the lone bright spot in a bad season. The Nets have lost 22 of 25 and, at 15-47, are 24 1/2 games out of first place.

-- AROUND THE NBA --

Elsewhere in the NBA, the LA Lakers topped Charlotte 107-102, San Antonio edged Minnesota 92-88, Seattle crushed Orlando 130-105 and Golden State nipped the LA Clippers 112-109.

LAKERS 107, HORNETS 102

At Charlotte, N.C., James Worthy scored 26 points and Magic Johnson added 19 points and 15 assists to give the Lakers their fourth straight victory. The Lakers are the league's best road team with a 20-10 record. Kelly Tripucka's season-high 31 points led the Hornets.

SPURS 92, TIMBERWOLVES 88

At Minneapolis, David Robinson scored 21 points and Terry Cummings had 20 to pace the Spurs. Rod Strickland added 13 points and a career-high 17 assists for San Antonio. Minnesota got 21 points and 12 rebounds from Randy Breuer and a career-high 19 points from Tod Murphy.

SONICS 130, MAGIC 105

At Seattle, Dale Ellis scored 24 points and seven SuperSonics scored in double figures. Seattle outscored the Magic 68-36 in the second half. Ellis made 10 of 15 shots in his first home game since January 11 when he suffered a collapsed lung in an automobile accident. Orlando's Reggie Theus had game-high honors with 26 points.

WARRIORS 112, LA CLIPPERS 109

At Los Angeles, Chris Mullin scored 24 points and Mitch Richmond added 23 to lead Golden State over the Clippers. Manute Bol blocked 10 shots for the Warriors. Danny Manning came off the bench to score 25 points and Benoit Benjamin added 24 to lead the Clippers.

#90072u0300 03/13/1990 ~United Press International

(MARCH 13) UPI - Bush administration officials say the president is expected to take formal steps this week to restore economic ties with Nicaragua. They say one of those steps will be the lifting of the trade embargo imposed in May 1985 as part of the campaign against the leftist Sandinista regime.

In Managua, a spokesman for presidential-elect Violeta Chamorro ... who defeated Sandinista President Ortega at the polls last month... says Bush told Chamorro he'll end the embargo Tuesday. The spokesman says Bush also told Chamorro by telephone Monday he'll ask Congress for 500-Million dollars in aid to her new government during its first months in office.

Teachers in West Virginia will remain on the picket lines Tuesday. Governor Gaston Caperton and education leaders met late into the evening Monday in Charleston, but failed to reach an agreement to end the state's first school strike. Teachers walked off the job last Wednesday after their union accused Caperton of reneging on a five-percent pay raise offer.

The month-long campaign is over. Now voters on the tiny, English-speaking spice island of Grenada will go to the polls Tuesday to choose a new government for the next five years. 76 candidates from six political parties are vying for 15 parliamentary seats. A public opinion poll gives the National Democratic Congress the edge. Whichever party captures a majority in the parliament will form the Caribbean nation's next government.

-30- 1626

#90072u0308 03/13/1990 ~United Press International

(MARCH 13) UPI - A restaurant in a landmark Manhattan hotel has been left a gutted shell following the collapse of its ceiling in a shower of plaster, metal and concrete. New York authorities say one woman was killed and as many as 17 other people injured in the accident Monday. The city's buildings department commissioner says the collapse may be linked to recent renovations on the floor above.

The government says a North Carolina toy maker is recalling more than 40-thousand musical crib mobiles that may pose a choking hazard to small children. The toys affected by the voluntary recall are the Musical Mother Goose Mobile and Musical Carousel Crib Mobile. Officials with the Consumer Product Safety Commission advise consumers to immediately take the toys away from children and return them to the store where they were purchased for a refund or exchange.

-30- 1020

#90072u0360 03/13/1990 ~United Press International

ST. GEORGE'S, Grenada (MARCH 13) UPI - Six political parties ended their month-long election campaign to influence voters choosing a government Tuesday for the Caribbean island nation that U.S. forces invaded in 1983.

Officials said 58,268 Grenadians - 10,000 more than in the 1984 general election - are eligible to vote in Tuesday's elections to select from 76 candidates vying for 15 parliamentary seats. Six of the candidates are women.

The parties concluded their one-month campaigns Monday with rallies and motorcades throughout the tiny, English-speaking spice island north of Venezuela.

Polling stations were scheduled to stay open Tuesday for 12 hours, and results were expected Tuesday night.

A public opinion poll has given the National Democratic Congress the edge, saying it is likely to capture a majority in the Parliament, which will allow the party to form the next government.

Also strong contenders, according to political observers, are the Grenada United Labor Party led by one-time Prime Minister Sir Eric Gairy and Keith Mitchell's National Party.

Other parties in the battle are The National Party, led by incumbent Prime Minister Ben Jones, the Maurice Bishop Patriotic Movement, headed by Cuban-trained doctor Terry Marryshow, and the Good Old Democracy party led by Justin Francis McBurnie.

Jones took office when former Prime Minister Herbert Blaize died in

December.

Gairy, one-time prime minister, was overthrown in March 1979 by Maurice Bishop of the New Jewel Movement party. Bishop installed himself as prime minister, but was ousted and killed by dissidents within his administration led by Bernard Coard.

Coard was removed in October 1983 when 5,000 U.S. troops accompanied by 250 police from Jamaica, Dominica, St. Lucia, Antigua, St. Vincent and Barbados invaded the island.

About 800 Cuban construction workers who were building an airstrip on Grenada left the island after the invasion.

Most of Grenada's 110,000 people are mixed descendants of white settlers, African slaves and Caribbean Indians. The dominant religions are Roman Catholicism and Protestantism.

Grenada, about 100 miles north of Venezuela at the southern end of a string of volcanic islands, is renown for its nutmeg, cocoa and cinnamon. It is home to the American-owned St. George's University, a medical school with an enrollment of 600 students, most of them U.S. citizens.

#90072u0411 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Sen. Lloyd Bentsen, D-Texas, the chairman of the powerful Senate Finance Committee, says he is not encouraged by a guarded White House reaction to a Democratic plan to raise taxes to cut the federal deficit.

Speaking to reporters in San Diego Monday, Bentsen hailed the proposal advanced by Chairman Dan Rostenkowski, D-Ill., of the House Ways and Means Committee as a ''bold'' plan with some ''solid ideas.''

In the same breath, he warned that ''squabbling isn't over'' on Capitol Hill, saying it will take a ''tough approach'' and leadership from the Bush administration to make it work.

''There's no way you can get that through without a president ready to sit down and go into the details,'' said Bentsen of Bush, whose no new taxes pledge was a cornerstone of his 1988 presidential campaign.

Though at a loss to cite specific provisions of the plan that the administration could accept, White House spokesman Marlin Fitzwater said, ''It's a thoughtful approach and we're willing to talk about it, but obviously there are a lot of problems with it.''

Whether hinting at a possible change in policy or simply hoping to paint the Democrats as big taxers, Fitzwater said the plan ''probably facilitates'' discussions on an election-year budget deal.

Despite some ''well-known provisions that we couldn't support,'' most notably tax increases, Fitzwater said there was ''room to talk.''

In an op-ed piece published Sunday in The Washington Post, Rostenkowski sought to reframe the budget debate by calling for rejection of any new tax cuts, a freeze on spending, and higher taxes to bring down the deficit.

Rostenkowski chastized Democrats as well as Republicans for playing politics with the budget and urged compromise all around to cut the deficit by more than $500 billion over five years and end ''a national embarrassment.''

The plan was welcomed by a Republican member of the Ways and Means Committee, Rep. Bill Frenzel, R-Minn., who said it ''may be what is needed to start the stalled congressional budget debate moving again.''

Frenzel said the plan ''has many flaws,'' but he commended Rostenkowski for stepping forward to offer a counterproposal to the administration's budget plan.

The Rostenkowski plan would supersede the Gramm-Rudman balanced-budget law which uses the threat of automatic across-the-board spending cuts to enforce its mandate of steady annual reductions in the deficit through fiscal 1994.

In place of that system, Rostenkowski would derive savings from a freeze on spending and benefit programs, a combination of tax increases and 3 percent annual cutbacks in defense spending.

While reiterating Bush's opposition to ''messing around with Social Security'' or tampering with higher taxes, Fitzwater welcomed the proposals as ''the first comprehensive and thoughtful kind of plan we've seen.''

''We want to begin discussions on the budget that are serious,'' he said. ''So that's why I don't want to go into specifics, because clearly when you get into specifics, we're going to get pretty negative.''

An aide to Rostenkowski said the chairman's next move depends on reaction to the plan.

Rostenkowski's tax proposals tread on areas the administration declared off-limits in previous deficit-reduction talks, including higher consumption taxes on oil, pollutants, alcohol and tobacco and eliminating

a provision in current law that does not require the wealthiest taxpayers to pay the highest tax rate on income.

His plan would raise the top tax rate on the highest earners to 33 percent from 28 percent and flatly rejects Bush's proposed cut in the tax on capital gains, the profits from certain investments.

#90072u0428 03/13/1990 ~United Press International

AUSTIN, Texas (MARCH 13) UPI - The three top contenders in Tuesday's Democratic gubernatorial primary were running neck-and-neck, while on the Republican side, a flamboyant west Texas millionare hoped for a big victory.

Officials predicted an estimated 2.6 million voters would cast ballots, ending what some have labled a superficial primary of heavy television spending, angry personal attacks and questionable campaign tactics.

The heated Democratic contest features Treasurer Ann Richards, former Gov. Mark White and Attorney General Jim Mattox, all of whom engaged in frenzied last-minute campaigning on Monday.

Clayton Williams, who once rode a horse on the Capitol steps to protest a legislative issue, appeared to be in good shape to caputre at least 50.1 percent of the GOP vote, the amount needed to proceed to the Nov. 6 general election.

It is almost a certainty that two of the three Democratic contenders will face each other in an April 10 runoff, and election eve polls indicated that one of the two spots probably would go to Richards.

A recovering alcoholic, Richards was once thought to be unbeatable, especially after her stirring keynote address to the 1988 Democratic National Convention that made her a national political figure and enhanced her fund-raising capabilities.

But her refusal to say whether or not she has used illegal drugs has cut into her support.

Nevertheless, she pressed on at a campaign appearance Monday night at the Smith County Democratic Hed nat

#90072u0452 03/13/1990 ~United Press International

(MARCH 13) UPI - The defending Stanley Cup champion Calgary Flames Monday pulled farther away in the Smythe Division race.

Theoren Fleury scored his 27th goal of the season at 1:40 of overtime, rallying the Flames to a 5-4 victory over the Jets and goalie Bob Essensa, who had beaten Calgary four times this season. The Flames expanded their first-place lead in the division to six points over the Edmonton Oilers and 10 points over Winnipeg.

The victory was Calgary's second in two days over the Jets, winning 6-4 in Winnipeg Sunday. The Flames extended their unbeaten streak to six games (5-0-1).

Fleury took a pass from Paul Ranheim and wristed a 15-foot shot past Essensa for the game-winner. Winnipeg held second-period leads of 3-0 and 4-2 before Calgary scored twice in the third period.

''I hung onto it with the intention of getting it back to Paul (Ranheim), but when I saw the chance, I took it.'' said Fleury, who has four game-winning goalsthis season.

Essensa said he was expecting Fleury to be the playmaker; not the shooter.

''He held it coming across the slot and I thought he was going to feed it to Ranheim so I sat back,'' Essensa said. ''When he fired it, it caught me by surprise.''

Winnipeg led 4-2 after two periods, but Calgary tied the score with third-period goals by Gary Suter and Brian MacLellan.

The Jets, who had defeated the Flames in five of six games prior to the last two games, jumped ahead 3-0 in the second period on goalie Rick Wamsley.

Dave McLlwain opened the scoring at 4:34, taking a pass from Dave Ellett and wristing a shot over Wamsley's shoulder.

Eight minutes later, Dale Hawerchuk scored his 26th goal of the season to give the Jets a 2-0 lead. Doug Evans scored his ninth of the season to expand the Jets' lead to 3-0.

The Flames could not penetrate Essensa's defense in the first period. They managed 14 shots but could not put one in the net.

''In that first period if he (Essensa) is not in there, we're up five goals,'' Calgary Coach Terry Crisp said. ''He's had a pretty good stranglehold on us.''

Gary Roberts drew Calgary within 3-1 at 15:22, putting a rebound past Essensa for his 32nd goal. Essensa had defeated the Flames in all four

meetings this season.

However, a controversial goal by Winnipeg just over a minute later re-established a three-goal cushion.

Doug Gilmour of the Flames skated out of his own end along the left side when Paul MacDermid tripped him from behind. The puck harmlessly slid off Gilmour's stick into the center of the ice where Fenton picked it up, and beat Wamsley from 25 feet out with a high wrist shot.

Calgary drew to 4-2 before the period ended when Ranheim capitalized on a rebound, shooting it past Essensa for his 24th goal of the year. The score capped a flurry of five goals in less than five minutes.

Calgary outshot Winnipeg 39-21 in the game, including 12-4 in the third period.

-- AROUND THE NHL --

Elsewhere in the NHL, Los Angeles defeated the New York Rangers 6-2 and Minnesota dumped Toronto 4-1.

KINGS 6, RANGERS 2

At New York, Tony Granato and Tomas Sandstrom returned to haunt their former team, each scoring a goal and combining for five points to lead Los Angeles.Granato and Sandstrom were traded to the Kings during the All-Star break for Bernie Nicholls. Kelly Kisio tied the score 1-1 with his 19th goal of the season, but the Kings scored three goals in the second period.

NORTH STARS 4, MAPLE LEAFS 1

At Toronto, Frantisek Musil scored his second goal of the season 23 seconds into the second period to carry the North Stars, who posted just their sixth road victory of the season. Ed Olczyk ruined Minnesota's shutout bid with a power-play goal at 18:15 of the third period.

#90072u0455 03/13/1990 ~United Press International

GREEN BAY, Wis. (MARCH 13) UPI - A mixture of dense fog and factory smoke enshrouded a bridge and caused 52 vehicles to collide in a fiery chain reaction, killing at least three people and injuring 30 others, authorities said.

''It was like boom! boom! boom! every couple of seconds,'' said James Vandertie, 19, who escaped the rush-hour crash Monday on the Tower Drive Bridge, Green Bay's tallest structure.

Police said the chain reaction apparently began when drivers slowed because of reduced visibility on the high-rise bridge, which crosses the mouth of the Fox River at the city's bay.

Police Lt. John Thompson said the speed limit on the bridge is 55 mph and there are no signs for motorists to slow down in inclement weather. ''Maybe there will be after today,'' he said.

The accident, which left cars jammed together like an ''accordion,'' also touched off a fire fueled by leaking gasoline, police Capt. Larry Gille said.

Among the 52 vehicles in the mass wreck were three large trucks, including a fuel tanker, Gille said.

Two people were burned to death near the flaming truck and a third was crushed in his small car that was caught between two other vehicles, police said. Of the 30 people injured, six remained hospitalized Monday night, including three in serious condition, hospital officials said.

Deputy Police Chief Robert Kreuser said a semi-trailer truck and two cars were involved in an initial accident, and that dense fog plus smoke from nearby factories limited visibility and drew more unsuspecting motorists into the wreck.

''We had the smoke coming over from the factories and we had the fog. That combined and the vehicles began slowing down because they could not see and we had a chain reaction, rear-end type collision,'' said Lt. Bob Bocher, one of the first officers to arrive at the scene.

''It was just an accordion type of thing, they just kept running into those vehicles already stopped,'' Gille said. ''There was a fire about the middle of it. A large truck was on fire, a semi truck. What it was carrying, I have no idea. That is the area where we had our fatalities.''

Sharie Deicher, 39, who was involved in the accident but was not injured, called the burning truck ''just a mass of flames.''

The bridge was closed as firefighters brought the flames under control, and authorities worked for hours to free trapped motorists. Police said 17 wreckers and a crane were brought to the scene to remove the wreckage.

''The fog was just like a thick blanket. There was no way of stopping,'' said Julie Vlies, 36, of New Franken, one of the drivers involved in the crash on the bridge that arches 200 feet above the Fox River.

Oklahoma truck driver Victor Brown, 30, said one woman was trapped in her

vehicle at the bottom of a pileup and her car was ''bent up, just like a folded pancake. I heard her saying 'Help me, get me out of here.' I couldn't do anything to get her out.''

One of the injured, Leo Terry of Green Bay, said he was traveling 55 mph when he hit a wall of fog and plowed into a stopped car in front of him. ''You couldn't see nothing,'' he said.

Jim Reck, a spokesman at St. Vincent Hospital, said 23 people were treated for injuries and five of those were hospitalized, including three in serious condition. A spokesman at St. Mary's Hospital said seven were treated, including one hospitalized in fair condition.

#90072u0463 03/13/1990 ~United Press International

(MARCH 13) UPI - Around the world... around the clock... U-P-I brings you the latest news.

Oliver North says he saw his boss, former Reagan national security adviser John Poindexter, rip up a politically sensitive document in which Ronald Reagan O-K'd an explicit arms-for-hostages deal with Iran. Poindexter has admitted to the act, but he confessed to it under a grant of congressional immunity. The trial resumes today.

The State Department has adopted a cautious tone toward Lithuania's declaration of independence. A government spokeswoman says the State Department will reserve granting Lithuania diplomatic status until the Baltic republic negotiates its sovereignty with Moscow.

The Soviet Union has begun its pullout of troops from Hungary. The first caravan of Red Army soldiers to withdraw from Hungary boarded a train outside Budapest to the strains of both countries' national athems played by a military band. Most of the troops appeared tense as they headed home.

The White House says President Bush could act on a Nicaraguan aid package as early as today. A spokesman for Nicaraguan President-elect Violeta Chamorro says Bush told Chamorro that he'd lift a five-year-old trade embargo against the Latin American country, and also ask Congress to approve 500-Million dollars in aid to her government.

In Japan, the key indicator on the Tokyo Stock Exchange reached its lowest level in one year at the close of today's trading. The benchmark Nikkei index slipped 747-point-66 points, to close at 32-thousandS dollar is blamed for the current crisis.

-30- 1746

#90072u0465 03/13/1990 ~United Press International
(MARCH 13) UPI - Vice President Quayle is in Paraguay on the fourth-leg of his six-nation Latin American tour. Last night, Quayle met with President Andres Rodriguez and discussed the two countries' tense trade relationship. An aide to Rodriguez says the two men also talked about the region's drug-trafficking problem.

Chile's newly inagurated President Patricio Aylwin says his country will NEVER again experience the dark ages of human rights abuses. Some 80-thousand people gathered at an outdoor stadium in Santiago yesterday to hear Aylwin promise... in his words... ''NO more outrages against human dignity.''

Talks are scheduled to resume today between West Virginian Governor Gaston Caperton and the state's teachers union leaders. The two sides met for seven hours yesterday without resolving the seven-day-old walkout. Educators say Caperton double-crossed them on a five-percent pay raise.

New York authorities say former Mayor Abe Beame is listed in stable condition after experiencing chest pains last night. A Bellevue Hospital spokesman gave NO further word about Beame's condition. 83-year-old Beame served one term as mayor before Ed Koch unseated him in 1977.

The government says retail prices for fresh vegetables, up 20 percent due to freeze damage in the South, should return to normal levels by the end of the month. The Agriculture Department says prices are well above average for tomatoes, asparagus, broccoli, cauliflower and onions.

-30- 1638

#90072u0575 03/13/1990 ~United Press International
(MARCH 13) UPI - An aide to Nicaraguan President-elect Violeta Chamorro says President Bush has contacted Chamorro to inform her that he would lift a five-year-old U-S trade embargo against Nicaragua today.

The spokesman also says Bush promised to ask Congress to approve a 500-Million-dollar aid package for Nicaragua, the country the White House describes as the latest addition to Latin America's growing democratic trend.

The White House yesterday said Bush would take formal steps this week to re-instate economic ties with Nicaragua. But administration officials did NOT specify when such an action would occur.

Since May 1985, the United States has banned imports from Nicaragua and the export of most American goods to Nicaragua and denied landing and docking rights to Nicaraguan airliners and ships.

It's still NOT clear what type of aid formula will be used. Chamorro estimates it will take at least 300-Million dollars to jump start her nation's economy.

Former White House aide Oliver North returns to the witness stand today in the Iran-Contra trial of his ex-boss, former national security adviser John Poindexter.

In potentially embarrassing testimony for former President Reagan... North testified that he saw Poindexter tear up a politically embarrassing document signed by Reagan approving an explicit arms-for-hostages deal with Iran.

On November 13th, 1986, Reagan told a national television audience that the United States NEVER had traded arms for hostages.

North testified he watched Poindexter order the document retrieved from a White House safe and then tear it up November 21st, 1986.

Poindexter has already admitted destroying the document, but he made those comments to Congress under a grant of immunity. Since that confession canNOT be used in the trial, prosecutors needed North to provide the evidence.

Poindexter is charged with five felony counts of obstructing a congressional investigation into the scandal by lying and destroying documents.

-30- 2191

#90072u0595 03/13/1990 ~United Press International

(MARCH 13) UPI - Soviet leader Mikhail Gorbachev has ruled out negotiations with Lithuania or its Baltic neighbors.

Gorbachev rejected a bid by Baltic legislators to draw Moscow into negotiations two days after the new Lithuanian parliament declared the Soviet republic independent.

The Lithuanian legislature sent Gorbachev a message yesterday, asking him to recognize Lithuania as a sovereign nation.

Members of the Communist Party-dominated Congress of People's Deputies burst into applause when Gorbachev opened the session today by declaring ''We conduct talks with foreign states.''

Many Lithuanian and Estonian lawmakers are boycotting the Congress.

Liberal Soviet lawmakers booed a radical colleague for UNleashing a

scathing attack on the founder of the Soviet Union, Vladimir Lenin.

Yuri Afanasiev's remarks came yesterday during a debate on President Gorbachev's proposal to create a so-called super presidency which would give Gorbachev sweeping new powers.

Afanasiev said... quoting here... ''If our leader and founder laid the foundation of anything... it was the institutionalization of a policy of mass violence and terror.'' The remark brought an audible murmur in the chamber.

Afanasiev's blistering condemnation of Lenin drew loud boos from fellow legislators in the Congress of People's Deputies. His allies in the liberal parliamentary opposition say they fear the attack on Lenin could lead to a backlash of support Gorbachev needs to win the presidential powers he wants.

Gorbachev is asking lawmakers to give him broad new authority that he says is necessary to salvage his reform drive and stem growing public dissatisfaction.

The radical contingent opposes Gorbachev's bid to create the presidential post, then fill it immediately without direct national elections.

ROCKY MOUNT, N.C. (MARCH 13) UPI - A CSX Corp. work train hit an Amtrak train carrying 471 passengers from Miami to New York early Tuesday, derailing five passenger cars and injuring at least 30 people, authorities said.

The Amtrak Silver Meteor was preparing to leave the Rocky Mountain station just before 1:30 a.m. EST when it was rear-ended by a slow-moving work train pulling 96 freight cars, said Amtrak spokeswoman Pat Duricka in Washington.

''All we know is that (the work train) did have permission to come on the line and it struck the (Amtrak) train in the rear,'' Duricka said.

Five middle cars on the 16-car, three engine Amtrak train were pushed off the rails but remained upright, the Amtrak spokeswoman said.

At least 21 people were taken to Nash General Hospital complaining of neck pain and other minor injuries, and two were held for evaluation, hospital officials said. Nine people were treated and released from Community Hospital of Rocky Mount, said spokeswoman Teresa Bebout.

A dispatcher for the Nash County sheriff's department described the collision as ''minor'' and said no serious injuries were reported.

The accident occurred in eastern North Carolina's tobacco country, about 50 miles northeast of Raleigh.

''The cause of the impact is under a very vigorous investigation,'' said Lindsay Leckie, a spokesman for CSX in Jacksonville, Fla.

The Amtrak train from Miami was carrying 471 passengers, most of whom were to be shuttled to Washington and placed aboard another train, Duricka said. Passengers were expected to arrive in New York three hours later than scheduled.

(MARCH 13) UPI - White House chief of staff John Sununu tells U-P-I that anyone who thinks he designs Bush administration policy is just plain wrong.

Sununu says that people who believe he makes the president's decisions... in his words... ''doN'T know George Bush.''

The three-time conservative governor of New Hampshire appears to have survived his initiation to Capitol Hill. But even though he has developed a subtle ability to compromise, he still has many critics throughout Congress as well as among environmental activists.

However, Sununu brushes aside complaints of his straight-forward manner, saying he only has to concern himself with Bush's opinion.

Among the issues concerning the president's right-hand-man these days are designing an agenda for the upcoming summit between Bush and Soviet President Gorbachev.

Sununu says Gorbachev has expressed an interest in spending a number of days in the United States, possibly visiting former President Reagan in California and traveling to Bush's vacation home in Maine.

West Virginia Governor Gaston Caperton and teachers union leaders are scheduled to meet this morning to try and resolve a seven-day-old walkout by most of the state's more than 21-thousand educators.

The two sides met throughout the day yesterday without success.

The head of the West Virginia Education Association, which represents about 16-thousand teachers, says her members will NOT return to their

classrooms today.

Her stance comes despite the state attorney general's opinion that the walkout is illegal, and the declaration by many county school boards that striking teachers would be terminated.

Teachers left their classes March 7th, claiming Caperton had backed out of a promise to give them a five-percent pay raise.

The state Education Department says 29 counties cancelled all classes yesterday, while another nine counties called off some classes.

#90072u0603 03/13/1990 ~United Press International

(MARCH 13) UPI - Vice President Quayle is in Paraguay today on the fourth leg of his six-nation Latin American tour.

Officials say Quayle is scheduled to continue discussing strained trade relations with Paraguayan President Rodriguez. He arrived in Asuncion yesterday and met last night for 40 minutes with Rodriguez.

Paraguay's foreign minister says the two men discussed greater technical and economic support.

In 1986, Washington placed trade restrictions on Paraguay because of alleged workers' rights violations under former dictator Alfredo Stroessner.

Quayle and Rodriguez reportedly also discussed the region's drug-trafficking problem. Under Stroessner, Paraguay was considered a transit point for illegal drugs moving to the United States.

Quayle is the first U-S vice president to visit Paraguay since Richard Nixon more than three decades ago. Quayle is scheduled to leave today for Argentina.

#90072u0620 03/13/1990 ~United Press International

NEW YORK (MARCH 13) UPI - Renovations in a landmark Manhattan hotel may have caused the ceiling to collapse in a ground-floor croissant shop, sending tons of debris crashing down, killing a customer and injuring as many as 17 people, officials said.

The 15- by 40-foot ornate plaster ceiling of Croissant & Co. collapsed ''like an earthquake'' about 3:50 p.m. Monday, and water immediately began gushing from the restaurant's sprinkler system, briefly flooding the

eatery, witnesses and officials said.

Some of the injured were trapped for a brief time beneath plaster, metal and concrete as the rushing water tamped down debris, leaving the coffeehouse a wasteland of twisted rubble as bloodied customers struggled to escape, authorities said.
The first two floors of the 15-story, block-long Beaux-Arts Ansonia Hotel building were evacuated, police said. The restaurant was left a gutted shell littered with shards of glass and 20-pound plaster cornices.

The woman customer who died in the collapse, believed to be in her 20s, was not immediately identified, authorities said.

Buildings Commissioner Charles Smith said virtually the entire ceiling in the restaurant caved in, mixing portions of old asbestos-laced plaster with more recent ceiling debris.

''Over the years, the ceiling had been worked on, and chunks were removed to make way for pipes,'' Smith said. ''In fact, work had been done over the last several weeks on a facility above the (adjoining) deli.

''Altogether, that is a factor in the collapse,'' Smith said, ''but what was the straw that broke the camel's back, we can't say right now. We want to look into if that work done on the floor above was a contributing factor.''

Police officer Desmond Stafford, who arrived at the restaurant moments after the collapse, said diners and employees ''were breaking out the windows from the inside. We were grabbing them, trying to get them out. But once they got outside they wanted to go back in and get the others still trapped inside.''

One woman who was inside the restaurant when the ceiling crashed down said she had been sipping coffee.

''It was like an earthquake,'' she said.

One unidentified woman was pronounced dead at the scene, Emergency Medical Services spokesman Charles DeGaetano said.

DeGaetano said 13 people were injured, the Police Department issued a statement saying 17 people were hurt, all suffering ''minor'' injuries, while three hospitals could account for only 10 injured.

''I felt a vibration, and then I heard a big boom,'' said Elvin Rodriguez, a guard at a nearby Barnes & Nobles bookstore. ''Water was gushing all over. This guy named Tony who sells books here on the street ran in and he pulled one person out. He was soaking wet.''

Ziggy Hirsch said he also arrived moments after the collapse and saw three bloodied people being led out from the debris. ''When I ran over, I saw a bloody jacket on the ground,'' he said.

The Ansonia Hotel, an imposing structure on upper Broadway, was built in 1904 and has long been hailed as one of the city's architectural gems. Some of its more illustrious guests have included conductor Arturo Toscanini, Enrico Caruso, Florenz Zigfeld, soprano Lily Pons and composer Igor Stravinsky.

HONG KONG (MARCH 13) UPI - A group of 109 Vietnamese boat people voluntarily traded life in Hong Kong's cramped detention centers for a return to their homeland Tuesday as part of an ongoing repatriation program.

Also, violence flared in a refugee camp that has been the scene of numerous disturbances, resulting in injuries to two people, officials said.

The 109 Vietnamese boarded a chartered jet bound for Hanoi, becoming the 13th group of refugees to participate in the U.N.-sponsored voluntary repatriation program since its inception in March 1989.

A total of 1,393 Vietnamese have chosen to return to Hanoi, according to government statistics.

Two refugees were hurt Tuesday during a fight involving 20 boat people at the Whitehead detention center, security officials said. Camp guards broke up the melee, said the officials, who did not know what prompted the fracas.

Whitehead, which houses about 20,000 of the colony's 56,000 refugees, has been the scene of riots and protest suicide attempts since Hong Kong forced 51 boat people back to their homeland in December.

Hong Kong officials hope to continue the policy of mandatory repatriation, saying the voluntary program does little to ease the political and economic strain on the colony's refugee camps.

Vietnam, upset with worldwide condemnatioon of the initial forced repatriation, has refused to accept any more boat people returned against their will.

Favorable winds have returned to the South China Sea and the colony is bracing for the beginning of what has become an annual influx of tens of

thousands of Vietnamese seeking a better life the West.

According to government statistics, 149 Vietnamese have sailed into Hong Kong in the first 11 days of March, compared with 75 for the same period in 1989.

Since June 1988, Hong Kong has defined its boat people as either political refugees or economic migrants. Only those who can prove they have a legitimate fear of persecution in Vietnam are eligible for resettlement in the West.

The rest - an estimated 90 percent of the colony's refugees - face life in Hong Kong's bleak camps or forced return to Hanoi.

#90072u0659 03/13/1990 ~United Press International

BEIJING (MARCH 13) UPI - A six-year study of a remote region in western China, where the military has exploded test nuclear weapons for three decades, has found no significant radiation harm to area residents or the environment, an official newspaper reported Tuesday.

The report by the China Youth News, a government daily in Beijing, could not be independently confirmed. The Chinese nuclear weapons program is conducted in secret and is rarely discussed in the state media.

The newspaper said the study was conducted for more than six years beginning in 1982 by the Radiation Sanitary Protection Supervision Institute of the Xinjiang Province government. Xinjiang is China's northwesternmost region, much of it desert.

The report did not cite the specific area studied, but China's nuclear weapons testing ground is known to be at Lop Nor, a remote, sparsely populated outpost in the Gobi Desert in eastern Xinjiang.

The China Youth News said the researchers had determined that the radioactive materials generated by atomic testing over the years ''has not left evident pollution in the residents' areas around the test ground, and has had no bad influence on their health.''

Western intelligence analysts estimate China has conducted about 27 test explosions since its first device was detonated in October 1964. The last, in the fall of 1988, was a low-yield underground blast believed to have been an experimental neutron bomb.

The Chinese are believed to have halted atmospheric testing in the early 1980s amid international concern over nuclear fallout.

The China Youth News said the researchers measured radiation levels in the ground and air, sampled nuclear elements in 17 living species and tested radioactivity in six kinds of water resources.

They also compiled data on residents in the area, analyzing death rates from malignant tumors and hereditary disease and rates of birth defects. The results were compared with other regions.

''The results show that the research targets in the investigated areas and in the contrast areas show no obvious difference,'' the newspaper said.

The report indicated the study was the first comprehensive research undertaken on the effects of fallout from nuclear testing at Lop Nor. It noted earlier studies lacked ''systematic and comprehensive investigation.''

#90072u0800 03/13/1990 ~United Press International

(MARCH 13) UPI - Israel's coalition government took another step toward breaking up today. Army Radio reports that Prime Minister Yitzhak Shamir fired Labor Party chairman Shimon Peres from the Cabinet. All Labor ministers from the government then resigned their posts. The move virtually ensures that Labor will join a NO-confidence vote scheduled for Thursday. The turmoil follows the government's inability to reach a peace process compromise.

Soviet President Gorbachev opened today's session of the Communist Party-dominated Congress of People's Deputies by declaring that Moscow will... in his words... ''conduct talks with foreign states.'' The statement was a veiled rejection of Lithuania's request for negotiations to iron out differences between Baltic nationalists and the Communist Party. Many Lithuanian and Estonian lawmakers boycotted the gathering.

New York City authorities say they will investigate recent renovations at a landmark Manhattan hotel to determine if the work caused a bread shop ceiling to collapse. One unidentified woman was killed when the ornate plaster ceiling came tumbling down yesterday. There are conflicting reports of the number of people injured in the accident.

North Carolina authorities say a work train rear-ended an AMTRAK passenger train this morning as the Miami-to-Washington AMTRAK train prepared to leave the Rocky Mount station. Rescue crews say as many as 21 people were taken to area hospitals following the accident. Nine others were treated and released. A sheriff's department spokesman describes the crash as ''minor'' and says NONE of the injuries was serious.

-30- 1801
#90072u0802 03/13/1990 ~United Press International
(MARCH 13) UPI - Texas election officials estimate that two-point-six-Million voters will cast ballots in today's gubernatorial primary. The Democratic race features a three-way neck-and-neck contest that has consisted of negative personal attacks by each of the three candidates. Political observers do NOT expect any of the trio to collect the majority needed to go directly to the November general election.

Haiti is set to receive its new interim president today when Supreme Court Justice Ertha Pascal-Trouillot is scheduled to take the oath of office. Pascal-Trouillot has been in hiding since Sunday night, when she accepted the presidential nomination. She is to replace General Avril Prosper, who resigned his post following widespread discontent.

New York prosecutors in the racially motivated gang slaying of a black teen-ager are trying to pick up the pieces of their case following the refusal of a key witness to testify against his friends. The youth in question now faces second-degree murder charges for his alleged role in the attack. A spokesman for the Brooklyn district attorney says Joseph Vento could be arraigned as early as today.

Officials of the Iditarod Sled Dog Race say one of the three leaders of the 11-hundredmile trek is bound to cross the finish line first as the trio nears the finish line in Nome. The threesome is far ahead of the rest of the pack with two days and 229 miles between them and the finish line. The leaders are three-time race winner Susan Butcher, last year's champ Joe Runyan and Lavon Barve.

#90072u0930 03/13/1990 ~United Press International
(MARCH 13) UPI - The relentless rise of the dollar against the Japanese yen, coupled with weakening bond prices, sent the Tokyo Stock Exchange's Nikkei Average to its lowest level in a year Tuesday in extremely thin trading.

The blue-chip Nikkei Average of 225 selected issues, which fell 624.89 points Monday to wipe out gains from a two-day rally, plunged another 747.66 points, or 2.2 percent, to 32,620.57.

It was the ninth worst daily decline on record for the bellweather Nikkei Average and its lowest close since March 28, 1989, when it finished at 32,306.36.

The dollar closed at 152.62 yen, up 0.62 from Monday's close on the Tokyo Foreign Exchange.

The broader-based Tokyo Stock Exchange Price Index of all major listed shares plunged 51.78 points to 2,457.10, after losing 31.01 points Monday.

Volume was extremely low, with an estimated 400 million shares changing hands, compared with 380 million shares Monday.

Elsewhere in Asia, prices continued to ease on the Hong Kong Stock Exchange with activity concentraded on smaller, more specualtive stocks.

The key Hang Seng Index, which fell 19.69 points Monday, slipped 5.67 points to 2,887.62. Utilities fell 1.46 points, financials lost 12.45, industrials fell 1.43 and properties closed down 9.78 points.

Turnover was boosted by a placement and trading activity in the smaller issues as 1.251 billion shares changed hands, above the 1.09 billion traded Monday.

Prices closed lower in light trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which eased 4.12 points Monday, fell 16.38 points to 1565.68. The narrower All Singapore Index dipped 4.49 points to 428.31.

Turnover was 64.7 million shares, below the 73.2 million traded Monday.

In Australia, stock prices closed lower in light trading on the Sydney Sharemarket.

The All Ordinaries Index, which eased 8.3 points Monday, fell 10.3 points to 1560.7.

Turnover was about 70 million shares, up from the 49 million shares traded Monday.

#90072u0936 03/13/1990 ~United Press International

NEW YORK (MARCH 13) UPI - Covenant House officials stymied private and internal investigations of the murder of a young man who appeared on the first page of beleaguered charity's 1989 annual report, a published report said Tuesday.

New York Newsday, citing internal Covenant House memos and sources, said the charity denied knowing the victim, Sean Russell, 23, when a private investigator asked about the bizarre murder last year.

When acting Covenant House head Frank Macchiarola months later discovered internal memos that discussed a possible cover-up and allegations that

Russell was involved with a drug and prostitution ring operating out of the charity, trustees rebuffed his attempts to investigate, Macchiarola told Newsday. Macchiarola then resigned.

Covenant House, the country's largest shelter system for runaway youth, has been rocked by reports of scandal for weeks. Its founder, Bruce Ritter resigned last month amid allegations of sexual misconduct.

''This is one of the allegations that I wanted (former first deputy police commissioner) Patrick Murphy to investigate,'' Macchiarola told the newspaper last week.

Officials at the charity refused to comment on any aspect of the story Monday, noting only that all allegations would be turned over to former police commissioner Robert Maguire for an independent investigation, Newsday reported.

Maguire was hired last week by the Board of Directors of Covenant House.

Russell was stabbed repeatedly on Oct. 20, Newsday said. His assailant, who was also a suspect in the unrelated killing of his aunt, then slit his own throat. Both men later died at Bellevue Medical Center.

Russell was counseled at Covenant House from his arrival in New York City two years ago until his death, Newsday said.

Russell appears on the first page of the Covenant House 1989 annual report photographed in an embrace wih an older, female counsellor, Newsday said. he is also featured in the charity's official calendar, distributed to thousands of contributors to the $87-million charity.

#90072u0950 03/13/1990 ~United Press International

KHARTOUM, SUDAN (MARCH 13) UPI - Sudan, increasingly keen to promote the cause of Arab unity, waived visa requirements for all Arabs wishing to enter the country, the official Sudan News Agency said Tuesday.

Military ruler Gen. Omar al Bashir announced the policy on television, saying Sudan sought full political integration with Egypt, Saudi Arabia and other Persian Gulf states.

Earlier this month Sudan dropped visa requirements for Libyan nationals wishing to enter the country.

Al Bashir appealed for Arabs to invest in Sudan to counteract the influence of foreign powers. The United States last week cut off military and economic aid to Sudan because al Bashir had not reinstated democracy

within eight months of the coup that brought him to power in June last year.

Under former President Jaafar Mohamed Nimeiry, Sudan signed an Integration Charter with Egypt in 1982, aiming at a total merger of the two countries in 10 years. Successive changes of government, however, have effectively invalidated the charter.

The largest country in Africa, Sudan has borders with Egypt, Libya, Chad, the Central African Republic, Zaire, Uganda, Kenya and Ethiopia.

This year, because of civil war in the south and west, it will require 500,000 tons of food aid, according to the U.N. Food and Agriculture Organization.

The news agrency also reported continuing violence in western Sudan. It said at least 69 people died and 14 villages were burned to the ground in tribal fighting last week.

Men of the Fur and Arab tribes in the Darfur region resumed their long-standing feud in the Shattaya region, about 500 miles west of Khartoum, ending a seven-month-old truce. The tribes have fought intermittently for years.

More than two hundred members of the black African Shilluk tribe were massacred in central Sudan by Arab tribesmen in December last year, after the Shilluk, itinerant farm laborers, murdered their Arab landlord.

#90072u1013 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Another month of sluggish automotive sales caused retail sales to fall by 0.9 percent in February to $146.5 billion, the Commerce Department reported Tuesday.

The decline was the biggest since a drop of 1.3 percent in October.

Irwin Kellner, chief economist for Manufacturers Hanover in New York, said the 0.9 percent decline ''shows an underlying weakness in the economy that should not be ignored.''

If the 6 percent drop in automotive sales - the biggest since a 26.5 plunge in January 1987 - were not figured in, total sales of all other goods to consumers would have increased by only 0.5 percent in February, officials said.

''It's a sign that we are are teetering on the edge of a recession,'' Kellner said. ''What makes it even more alarming are the markets have

talked about the need for tighter markets higher interest rates.

''This report suggests the recipe for continued economic growth is lower interest rates,'' he said.

But Robert Dederick, chief economist for Northern Trust in Chicago, was much more optimitic.

''It's a strong report,'' Dederick said. ''There doesn't seem to be any sign that the consumer believes there is going to be a recession, and consequently that reduces the risks there will be a recession.''

Auto dealers have been hard hit with sluggish sales over the past several months, and they turned to rebates and other discounts to clear their lots in December and January.

Sales of durable goods, items made to last three or more years, were down by 0.3 percent last month to $54.8 billion, while the sales of non-durable goods were up by 0.4 percent to $91.7 billion, the department's Census Bureau said in its monthly report.

All the figures were adjusted for seasonal factors.

The 0.9 percent decline in total retail sales for February compared with a surge of 2.8 percent in January after a decline of 0.3 in December and a gain of 0.7 percent in November, the Commerce Department said.

In other categories during February, retail sales of building materials, hardware and garden supplies increased by 1.4 percent, and sales of furniture and home furnishings were up by 0.5 percent.

Sales at department stores increased by 2 percent, while sales at food stores were up by 0.5 percent, the Commerce Department said.

Gasoline stations, meanwhile, saw sales decline by 0.8 percent in February and drug stores also reported a 0.8 percent decline in business, the department said.

But February retail sales increased by 1.6 percent at clothing stores, while restaurants and bars reported a 1.4 percent advance in sales, the monthly report said.

#90072u1029 03/13/1990 ~United Press International

STOCKHOLM, SWEDEN (MARCH 13) UPI - Black South African leader Nelson Mandela Tuesday implored the world community to intensify sanctions against South Africa, including severing all diplomatic ties, and

suggested he may snub British Prime Minister Margaret Thatcher on a visit to England next month.

Looking relaxed and refreshed, Mandela told reporters on the second day of a five-day visit to Sweden that African National Congress calls to nationalize key sectors of South Africa's industry should give no cause for alarm.

''I am asking the international community, and every country to intensify sanctions on South Africa and to cut diplomatic ties. Nothing has changed there to make us change our view on the policy of sanctions,'' Mandela said.

''If only (South African President Frederik) de Klerk decided on real fundamental change, he would have the entire black population of the country behind him. The majority of the white population would support him too.

''I believe de Klerk to be an honest man and full of integrity who wants to honor the undertakings he has made. But our (ANC) policies and strategies are not determined by what we observe in an individual but by the policy of the party which de Klerk represents. That policy has not changed,'' Mandela said.

Speaking of black against black violence in South African homelands in recent weeks, Mandela said they were the product of a disintegrating system.

''The violence that is going on in the homelands is a clear illustration that the system is being rejected totally by blacks. The troubles that are taking place today in spite of continued state of emergencies shows that the system is crumbling,'' Mandela said.

''The only way of bringing about peace in the homelands is to allow the people to say whether they want this system retained or want to rejoin their brothers in South Africa,'' Mandela said.

Asked if he would discuss sanctions and developments in South Africa with Thatcher during a planned visit to Europe next month, Mandela replied it was not certain the ANC would be interested in him meeting the prime minister.

Britain's opposition Labor leader Neil Kinnock was scheduled to travel to Sweden Thursday to have discussions with Mandela.

''The question of whether I will talk to Thatcher or not is a matter to be decided by the National Executive of the ANC at the right time,'' Mandela said.

The British prime minister dropped economic sanctions against South Africa after Mandela's release last month and is the only European Community country to do so.

''But as I have already said we expect all countries to intensify sanctions against South Africa,'' Mandela said.

Mandela went on to elaborate on the ANC's political platform for South Africa, which calls for the nationalization of several major industries, in particular the gold and diamond mining industry.

''The platform is a clear attack on all forms of racialism. We are saying to South Africans economic liberation must go hand-in-hand with political liberation,'' Mandela said.

''The present position is that the wealth of the country is monopolized by a minority. The balance must be redressed by finding a formula where the wealth of the country can be shared equally amongst its citizens.

''Nationalization is only for use as a method of ensuring that this imbalance is ratified. There are many sectors of the economy which are nationalized already in our country. We don't see any reason whatsoever why there should be any hue and cry in regard to these provisions,'' he said.

Mandela had an emotional reunion Monday with ANC President Oliver Tambo, who is recovering from a stroke in a Swedish hospital. It was the first meeting between the two former law partners and ANC activists in 28 years.

Mandela's visit to Sweden is the fifth and final leg of the 71-year-old black nationalist leader's foreign tour and his first outside Africa since being released from a South African jail three weeks ago.

#90072u1030 03/13/1990 ~United Press International

PHILADELPHIA (MARCH 13) UPI - The estates of five children who died in a 1985 fire at the house of the radical cult MOVE will receive $2.5 million, raising the city's cost of the debacle to $25.1 million, a lawyer for the families said Tuesday.

The families of the children filed a lawsuit against the city four years ago. The settlement followed a year of negotiations.

The agreement to give each family $500,000 was reached Feb. 28 but not announced by the city. James Beasley, attorney for the families, confirmed the settlement Tuesday.

''It's not as much as I would have hoped these people would have gotten from this tragic day in the history of Philadelphia when this thing started,'' Beasley said. ''It's something that the city needs to get behind it and get on with the business in hand.''

In return for the money, payable in July, the families agreed to drop their consolidated wrongful death suit against the city.

''We can't do anything about these children now but we can do something about the image of Philadelpia,'' Beasley said. ''The fact that Philadelphia was willing to recognize its responsibility is a step in the right direction.''

The five children, 9 to 14, and six adults were killed May 13, 1985, when police in a helicopter dropped a bomb on the roof of the fortified house occupied by the MOVE cult. One adult and one child escaped.

The resulting fire destroyed the neighborhood.

The group, which advocates back-to-nature ways of living and confrontation with authority, had angered neighbors for months by shouting and cursing on a bullhorn at all hours of the night.

City officials, whose confrontation with the group in 1978 resulted in the death of a police officer, had tried in vain to get the cult to correct building code violations and other legal matters.

The conflict came to a head on that fateful day in 1985 and left an indelible mark on the administration of Mayor Wilson Goode and the City of Brotherly Love.

The city has since rebuilt the 61 West Philadelphia houses destroyed by the fire and also settled a suit by agreeing to pay a contractor $3.5 million in cost overruns.

Ten lawsuits against the city that are related to the incident are still pending.

An investigating commission appointed by Goode issued a scathing attack on the mayor and other top officials but did not recommend criminal charges. A grand jury also cleared the officials of criminal wrongdoing.

#90072u1078 03/13/1990 ~United Press International
WASHINGTON (MARCH 13) UPI - President Bush said Tuesday he was heartened by the ''very broad proposal'' to balance the budget put forward by the House Ways and Means Chairman Dan Rostenkowski, D-Ill., but remains opposed to tax increases.

Bush, in a news confrerence called to announce a new aid package for Nicaragua and Panama, told reporters that he particularly welcomed the tone of Rostenkowski's plan to eliminate the federal deficit in five years because it was presented ''without rancor, without rhetoric.''

Rostenkowski, head of the tax writing committee in Congress, presented his plan in a long item on the editorial pages of The Washington Post Sunday, calling for an increase in taxes, a freeze in Social Security benefits and other spending and a rejection of tax cuts, including Bush's cherished plan to reduce the capital gains tax.

Bush's spokesman, Marlin Fitzwater, said Monday that while the president was opposed to many elements of the plan, ''we are willing to talk about it.''

But Bush made clear that there would be no deficit reduction negotiations any time soon.

Rosteknowski ''made a very broad proposal. We've made a proposal,'' Bush said. ''We'd like to hear from the budget process on the hill. Then we'll talk.''

Bush submitted his 1991 budget less than two months ago and it is unlikely they will have a comprehensive spending proposal ready before summer.

When asked if Fitzwater's receptive comments the previous day meant he was willing to negotiate a tax increase, Bush said, ''No, it doesn't.''

But he said he wants a budget deficit agreement and ''was being receptive by not knocking the things we don't like.''

Sen. Lloyd Bentsen, chairman of the Senate Finance Committee, said Monday he was not encouraged by the White House's guarded reaction.

Speaking to reporters in San Diego, Bentsen, D-Texas, hailed the Rostenkowski proposal as a ''bold'' plan with some ''solid ideas.''

In the same breath, he warned that ''squabbling isn't over'' on Capitol Hill, saying it will take a ''tough approach'' and leadership from the Bush administration to make it work.

''There's no way you can get that through without a president ready to sit down and go into the details,'' said Bentsen of Bush, whose no new taxes pledge was a cornerstone of his 1988 presidential campaign.

Rostenkowski chastised Democrats as well as Republicans for playing politics with the budget and urged compromise all around to cut the deficit by more than $500 billion over five years and end ''a national embarrassment.''

The plan was welcomed by a Republican member of the Ways and Means Committee, Rep. Bill Frenzel, R-Minn., who said it ''may be what is needed to start the stalled congressional budget debate moving again.''

Frenzel said the plan ''has many flaws,'' but he commended Rostenkowski for stepping forward to offer a counterproposal to the administration's budget plan.

The Rostenkowski plan would supersede the Gramm-Rudman balanced-budget law which uses the threat of automatic across-the-board spending cuts to enforce its mandate of steady annual reductions in the deficit through fiscal 1994.

In place of that system, Rostenkowski would derive savings from a freeze on spending and benefit programs, a combination of tax increases and 3 percent annual cutbacks in defense spending.

While reiterating Bush's opposition to ''messing around with Social Security'' or tampering with higher taxes, Fitzwater welcomed the proposals as ''the first comprehensive and thoughtful kind of plan we've seen.''

''We want to begin discussions on the budget that are serious,'' he said. ''So that's why I don't want to go into specifics, because clearly when you get into specifics, we're going to get pretty negative.''

An aide to Rostenkowski said the chairman's next move depends on reaction to the plan.

Rostenkowski's tax proposals tread on areas the administration declared off-limits in previous deficit-reduction talks, including higher consumption taxes on oil, pollutants, alcohol and tobacco and eliminating a provision in current law that does not require the wealthiest taxpayers to pay the highest tax rate on income.

His plan would raise the top tax rate on the highest earners to 33 percent from 28 percent and flatly rejects Bush's proposed cut in the tax on capital gains, the profits from certain investments.

(MARCH 13) UPI - Israeli Prime Minister Yitzhak Shamir fired Labor Party head Shimon Peres from the Cabinet today, reportedly because Peres repeatedly threatened to break up the coalition government. The Labor-Likud government has teetered lately because of Likud refusal to accept an American peace process plan.

Soviet President Gorbachev flexed his political muscle today by saying Moscow will NOT hold talks with Lithuania. Gorbachev's comments came at today's Congress of the People's Deputies, which he moved up from June to

win legislative approval for his struggling ''perestroika'' reform program.

Oliver North is scheduled to undergo further cross-examination today at the Iran-Contra trial of his former boss, John Poindexter. During testimony yesterday, North delivered a blow to Poindexter's defense when he said he saw Poindexter tear up a sensitive document signed by Ronald Reagan that O-K'd an arms-for-hostages deal with Iran.

U-S Commerce Secretary Robert Mosbacher is in Tokyo for what the Bush administration sees as a last-ditch effort to stem possible congressional trade sanctions against Japan. Mosbacher's three-day visit to get stalled trade talks back on track comes as Tokyo admits the U-S-Japanese trade discussions have reached a ''crisis'' stage.

The lone opposition lawmaker in the Philippine Senate says he is ready to challenge President Aquino for the presidency in 1992. Senator Juan Ponce Enrile, who is currently charged in last December's coup attempt against Aquino, says he may be lucky enough to unseat Aquino. Aquino maintains she will NOT seek re-election.

(MARCH 13) UPI - AMTRAK officials say they shuttled to the nation's capital most of the 471 passengers aboard the Miami-to-Washington train that was rear-ended this morning by a work train in Rocky Mount, North Carolina. Authorities say the collision left at least 30 people injured. A police dispatcher says NONE of the injuries was serious.

Officials in Hong Kong say a group of 109 Vietnamese boat people have voluntarily chosen to return to their homeland. So far, 13 groups of refugees have used the U-N-sponsored voluntary repatriation program since it started one year ago. Colony officials say they still hope to implement forced repatriation.

Haitian Supreme Court Justice Ertha Pascal-Trouillot is set to come out of hiding this morning to be sworn in as the island's interim president. Pascal-Trouillot replaces military leader General Avril Prosper, who resigned during the weekend. A U-S military jet flew Prosper to Florida yesterday.

Officials in Grenada say more than 58-thousand of the Caribbean island's residents are eligible to vote in today's election to fill 15 parliamentary seats. 76 candidates are vying for the spaces. Grenada was the site of a controversial U-S military intervention in October 1983.

There's NO word when the two sides in the Greyhound labor dispute will return to the negotiating table. Federal mediators in Washington say

they're confident that union leaders are interested in re-starting stalled talks in the often violent strike. Company management boasts it has a multi-Million-dollar war chest to weather the 12-day-old walkout.

#90072u1098 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - The broadest measure of America's trade deficit fell by $2.3 billion in the fourth quarter of 1989 to $20.5 billion, and finished the year down by $20.7 billion to $105.9 billion, the government said Tuesday.

The decline in the current account deficit in October, November and December was the lowest since a similar $20.5 billion drop in the first quarter of 1984, and the yearly total was the lowest since $104.2 billion, also in 1984.

The current account deficit, compiled by the Commerce Department, is the most comprehensive of trade statistics. It includes merchandise trade and trade in services, which tracks the flow of investment income between nations.

All the figures were adjusted for seasonal changes.

The trade deficit in merchandise goods increased by $248 million in the fourth quarter to $28.8 billion compared to $28.6 billion in the third quarter, which includes July, August and September, the Commerce Department said.

But for all of 1989, merchadise trade decreased by nearly $14 billion to $113.2 billion versus $127.2 in 1988, according to the report compiled by the department's Bureau of Economic Analysis.

Exports of goods and services increased by $5.5 billion to $159 billion in the fourth quarter, compared to $153.6 the quarter before, while imports totaled $175.2 billion in the fourth quarter compared to $173 in the third quarter, the department said.

For the year, exports increased by $70.6 billion to $600.4 billion, while imports were off by $50.3 billion to $692 billion, the department said.

Dividends, interest and other income payments on American investments held by foreigners, such as government bonds, increased by $4 billion in the fourth quarter to $67 billion compared to $62.9 billion, the Commerce Department said.

For the year, foreign investment increased by $16.9 billion to $124.7 billion, the department said.

#90072u1102 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Nearly 1.5 million Americans are exposed to a health hazard in the workplace that they can't see, smell or hear. But it certainly can be felt.

Vibration may seem harmless. After all, at low levels it can be used to massage tense muscles. However, frequent exposure to the quivering and shaking of power tools may cause a debilitating ''white finger'' disorder that in severe cases may require finger amputation.

In a recent report on ''hand-arm vibration syndrome,'' the National Institute for Occupational Safety and Health estimates half of the American workers using jack hammers, chain saws, grinders, drills and other vibrating power tools will develop the distressing condition.

The most obvious sign of the syndrome is the appearance of unusual white splotches on the fingers. At first, attacks of blanching, numbness or tingling are occasional and affect just the tips of one or more fingers.

If exposure to vibration is not reduced, attacks become more frequent and the numbness more persistent. Eventually, most fingers are affected along their entire lengths.

At the most severe stage, skin and tissue may die - forcing the amputation of fingers.

''The symptoms have appeared in two or three months in some people. Others under the same situation, may take 20 years to develop or they may never get it. What the difference is between people, nobody knows,'' said Austin Henschel, a physiologist at NIOSH's Cincinnati office and developer of the report.

Hand-arm vibration syndrome is caused by two factors - constriction of blood vessels in the hands and a degeneration of peripheral nerves, Henschel said in a telephone interview. Variables that influence the disease as it progresses include intensity of tool vibration, length of daily use, cumulative exposure and tool design.

Studies cited in the federal report show the prevalence of the disorder varies widely, with anywhere from 6 percent to 100 percent of workers studied showing symptoms. The average rate was about 50 percent.

Henschel issued one caution about interpreting such statistics. He said hand-arm vibration syndrome is virtually indistinguishable from Raynaud's phenomenon, a condition which affects about 5 percent of the general

population and is caused by exposure to cold or emotional stress.

Workers showing high rates of hand-arm vibration syndrome included pedestal grinders at foundries, jack-leg drill operators in mines and those using chipping hammers in quarries, steel plants and shipyard.

But industrial plants are far from the only vibration threat.

Lumberjacks can be affected if their chain saws and brush saws are not equipped with anti-vibration equipment. And a 1982 British study of 32 motorcyclists in speedway racing found nearly all showed signs of the syndrome.

In addition to work-related hazards, Henschel said people who use chain saws, and power tools often at home could be at risk for developing the disorder, especially if they also are exposed to vibration on the job.

Frank Grimes, of the United Steel Workers of America's health department in Pittsburgh, said he considers hand-arm vibration syndrome ''a very serious problem'' in many workplaces.

Grimes said his brother-in-law, who used vibrating tools to clean drums in a vinyl chloride plant, developed the syndrome. ''He had white fingers and when you shook his hand it was ice cold, hard and it cracked,'' the union official said.

He supports establishing government standards to reduce workers' exposure to vibration, noting no regulations exist even though the problem has been known for decades.

Although the NIOSH report offers guidelines for regulations, the Occupational Safety Health Administration and the Mine Safety and Health Administration do not have to act on them, Henschel said. Rules might be difficult to establish because so far researchers have not found a uniform threshold at which vibration begins to cause health problems, he added.

NIOSH emphasizes that hand-arm vibration syndrome is reversible if it is detected in early stages and the harmful activity stopped or reduced.

To lower the risk of developing symptoms, Henschel recommends workers use tools equipped with anti-vibration devices whenever possible and limit their daily use of power tools.

Other precautions include:

-Wearing warm clothing to prevent cold-induced constriction of blood vessels.

-Avoiding tobacco because it constricts blood vessels.

-Incorporating vibration-damping materials into palms and fingers of work gloves.

-Designing tools and work gloves to reduce grip force on tool handles.

-Monitoring all workers using vibrating tools for early signs of the syndrome.

#90072u1151 03/13/1990 ~United Press International

ISLAMABAD, PAKISTAN (MARCH 13) UPI - U.S.-backed Afghan guerrillas, profiting from a failed coup against the pro-Soviet Afghan regime, have reoccupied strategic positions near Kabul and forced the surrender of a government convoy, Western diplomatic sources said Tuesday.

The sources also confirmed the alleged coup leader, former Afghan defense minister Gen. Shah Nawaz Tanai, fled to Pakistan with his family on March 7, but said he is believed to have returned to Afghanistan. The reports contradicted Pakistan government statements that Tanai had never crossed the border.

The Afghan government alleges Tanai led the revolt on March 6 backed by Moslem fundamentalist guerrilla leader Gulbuddin Hekmatyar.

Rebel military units bombed Kabul, including the presidential palace, and fought street battles with forces loyal to President Najibullah in the most serious threat to his regime since Soviet troops withdrew one year ago.

But about 20 generals involved in the revolt fled to Pakistan on March 7 when it became clear the attempt had failed.

Official sources have said Tanai arrived aboard a military helicopter with his wife and three children near the Pakistan border city of Peshawar. The Pakistani government insisted he landed on the Afghan side of the border and returned to deeper inside Afghanistan.

Tanai ''flew to Pakistan during the afternoon of March 7, where he met with (guerrilla) leaders,'' one diplomatic source said Tuesday. ''Usually reliable sources believe he is now inside Afghanistan.''

The diplomatic sources said the Pakistan-based Moslem guerrillas, who have been fighting the communist government since 1978, have taken advantage of military opportunities accorded by the coup attempt. They said large numbers of guerrillas left Pakistan to launch new operations against the regime.

One source said ''the most significant resistance gains'' occurred in eastern Logar Province, where the guerrillas, known as Mujahideen, reoccupied all positions along a 15-mile stretch of highway leading south from Mohammad Agha town, 21 miles south of the capital.

The government captured the positions in heavy fighting on Jan. 6. But the sources said the guerrillas were able to retake the area because many of the forces defending it were withdrawn to Kabul to support Najibullah during the coup attempt.

They said a convoy bound for the besieged eastern city of Gardez and consisting of 80 loaded trucks and seven armored vehicles, including tanks surrendered to the resistance in Logar on March 6 or 7.

The sources also reported heavy fighting around the eastern garrison town of Khost, where they said the guerrillas captured several outposts.

A massive resupply convoy bound for Khost left Kabul in January and reached Gardez, about 40 miles northeast of the town, last month. The sources said Khost, which is surrounded by guerrilla-held territory and has been supplied only by air for the past two years, could fall this summer unless it receives new supplies of heavy weapons soon.

The resistance holds about 90 percent of Afghanistan's territory. But it has failed to capture any major urban centers despite the completion of the Soviet withdrawal in February 1989.

The guerrillas are desperately seeking a military victory to boost their contention they are still capable of defeating the Kabul government on the battlefield.

Najibullah came to power in 1986, seven years after the Soviets invaded in December 1979 to support the first of a series of Marxist rulers against anti-communist Moslem rebels.

#90072u1153 03/13/1990 ~United Press International

GENEVA (MARCH 13) UPI - Libya told the 40-nation Disarmament Conference Tuesday that the United States is alleging Libyan manufacture of chemical weapons as a pretext for a military attack.

Reiterating denials of the U.S. charge, Libyan representative Ibrahim A. Omar said the United States should instead ''clarify'' whether Israel is making such weapons with South African help.

The White House on March 7 renewed a previous U.S. charge that Libya is manufacturing chemical arms at the Rabta plant near Tripoli and said ''nothing is ruled out'' in stopping the plant's operation.

''In fact, the American administration is seeking a pretext to commit aggression,'' Omar told a Disarmament Conference committee discussing an international chemical weapons ban.

''The American announcement implies a clear threat to use force against Libya,'' he said.

Omar said Libya - which has observer status at committee meetings - does not have chemical weapons and wants to cooperate in negotiating a global ban on such arms.

He made it clear, however, that Tripoli would only allow international inspection of the Rabta factory if others did the same under an international convention.

''Libya supports measures of verification and inspection that would be adopted by the international community on chemical weapons, subject to implementation by all states,'' Omar said.

He challenged the United States, meanwhile, to be more specific in statements to the disarmament forum that around 20 countries either have or are seeking chemical weapons.

''Why does the (U.S.) administration single out Libya?'' Omar said. ''I would also like to ask whether this list includes Israel.

''Could the American administration clarify what Israel has and whether it can say about Israel what it says about Libya?

''The same question can be raised regarding South Africa and its collaboration with Israel in this field,'' the Libyan delegate said.

#90072u1159 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - President Bush acknowledged a traditional conflict between his office and the Federal Reserve Board Tuesday, but denied a report that he did not plan to reappoint Alan Greenspan as the board's chairman.

''There is no discussion of that nature at all,'' Bush told a news conference when asked about a report in The Los Angeles Times last week that he would not reappoint Greenspan due to the chairman's refusal to lower interest rates.

Greenspan's four-year term expires next year.

Bush said, ''Now, the question: Am I happy with interest rates? Look, every president would like to see interest rates lower.''

He said, ''I don't knock the concern some have over inflation. ... But there's no bubbling war with Alan Greenspan.''

Bush said, ''There is always some built-in conflict between the president and the chairman of the Fed,'' but ''I'm not in a FED-bashing mode. I also think it's very sensitive.''

Michael Boskin, Bush's economic adviser, last week also denied that the administration planned not to reappoint Greenspan, but refused to say if he would recommend that Greenspan keep the job.

Boskin said he had not yet considered the matter.

#90072u1206 03/13/1990 ~United Press International

GENEVA, Switzerland (MARCH 13) UPI - A global survey of senior executives published Tuesday rated Japan as the world's most successful business nation but also the most ''unfair player.''

The United States for its part was considered the most ''complacent and self-satisfied'' while South Korea ranked as the number one ''rising star.''

Conducted annually by the International Institute for Management Development and the World Economic Forum, the ''business confidence survey'' for 1990 poll was based on replies to 124 questions from 1,800 senior executives in 34 nations.

Japan with 74 percent of the votes easily topped the ''sprinters'' category of countries thought best in innovative business, and was followed by the United States with 10 percent and then by West Germany, South Korea, Taiwan and Hong Kong.

Japan also ranked first, however, in an ''unfair players'' list of countries using whatever means possible to win markets.

The Japanese took 52 percent in that category, followed by South Korea at 8.86 percent, the U.S. at 8 percent, and then by Taiwan, France and Brazil.

South Korea walked off with the ''rising stars'' rankings with 34 percent, followed by Thailand and Taiwan with 10.8 percent and 10 percent. Spain placed fourth but another Asian nation, Singapore, was fifth.

Executives were also asked to name those countries they consider to be ''self-satisfied'' and ''complacent'' in terms of competitiveness.

The United States topped that list with 22.2 percent, followed by Switzerland with 13.7 percent and then with almost the same percentages by by West Germany, United Kingdom and Japan. France was sixth.

#90072u1207 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - The United States, reacting to European allied demands, abandoned its original verification proposal and offered a softer version to the Soviets at the conventional arms control talks, an administration official said Tuesday.

The senior official said that when the talks resume in Vienna later this week the Western arms reduction proposal will be ''90-95 percent of the way there,'' and ''the ball is in the Soviet court'' for completing an agreement this year.

NATO is proposing that U.S. and Soviet troop levels be cut to 195,000 each in Central Europe and that NATO and the Warsaw Pact each reduce arsenals to 5,700 combat aircraft, 20,000 tanks, 28,000 troop carriers and 24,000 artillery pieces.

The senior Bush administration official, who is familiar with arms control talks, spoke to reporters about the Conventional Forces in Europe, or CFE, negotiations in Vienna on condition he not be identified.

He said the United States wanted to propose a verification procedure that, in addition to on-site inspections of declared areas where the limited weapons are stored, would have included on-site monitoring of treaty-covered weapons production and prior notification of the entry or exit of weapons into Europe.

But the Western allies soundly rejected these last two items, he said.

''They like to manufacture and sell things outside Europe (and) they felt themselves to be at a commercial disadvantage to the United States,'' the official said in explaining European rejection of production monitoring.

''If KGB agents were watching their production processes and reading their manufests ... and were not at all present in ours ... they felt as if the United States was pushing them hard to accept what they regard as an extremely onerous and intrusive infringment of the rights of their manufacturers and also of a sense of their national rights.

''The United States is out of the zone and this is a treaty that deals with Europe. But try telling that to a French helicopter manufacturer. ... They were most insistent on these points.''

On the second part of prior notification, the official noted that some of the Western European countries have responsibilities in Africa and elsewhere.

''Their attitude toward prior notification of exits of treaty-limited equipment from the continent of Europe was, 'Now you're going to tell us, of course, the next time your Marines want to take off and go somewhere.'

''That set of proposals went absolutely nowhere within Europe,'' he said.

The United States abandoned those and is seeking a verification procedure that will include on-site inspections of declared areas where weapons are stored, challenge on-site inspections, aerial overflights for monitoring purposes and ''some type of notification'' of entry or exit from the zone.

Most of the verification procedure was proposed at the end of the last session of talks, he said.

''The rest, the destruction protocol and reductions articles and some other verification materials ought to be tabled ... right at the beginning of this round that begins later this week,'' he said.

''There are a few gaps in some of the verification and destruction-related issues. But in terms of treaty text and final proposals, by the beginning of this coming round, (it) will be 90-95 percent of the way there,'' the official said.

''Beginning about the end of this week - it was true to a great extent before, but it's true now almost with respect to everything in the talks - the ball is in the Soviet court,'' he said.

-30- 3814

#90072u1210 03/13/1990 ~United Press International

MOSCOW (MARCH 13) UPI - The Congress of People's Deputies ended the Communist Party's monopoly rule Tuesday and established a presidential system of government in a victory for Mikhail Gorbachev that gives the Soviet leader broad new powers.

''We are about to take one of the most fateful steps in the history of our government,'' Gorbachev said just before the dramatic votes. ''It is a giant step for the benefit of democracy and in defense of democracy.''

The 1,771 to 164 vote to effectively create a multi-party system amended the Soviet constitution to remove clauses making the Communist Party the ''leading and guiding force of Soviet society and the nucleus of its political system.''

The 1,817 to 133 vote for the super-presidency, with 61 abstentions, was a political triumph for Gorbachev, who convened the Congress three months ahead of schedule specifically to consider creation of the new post. He was forced to overcome objections that it would give him too much power and created a dictatorship.

Lawmakers were to choose the new president in a separate vote later Tuesday or Wednesday.

A conservative bloc of legislators suggested Premier Nikolai Ryzhkov and Interior Minister Vadim Bakatin as alternate candidates to Gorbachev but the overwhelming vote to establish the presidency all but sealed Gorbachev's selection.

Radical deputies fell far short in their bid to gather about 500 votes against the new executive post, which easily passed the two-thirds majority threshold needed to amend the Soviet constitution.

Before the dramatic votes, Gorbachev ruled out negotiations with Lithuania or its Baltic neighbors two days after a new nationalist-dominated Lithuanian parliament declared the republic independent.

''We hold talks with foreign states,'' Gorbachev said two days after Lithuania's parliament issued a declaration of independence and a day after it asked Gorbachev to recognize Lithuania as a country. Estonia's Congress also sent an emissary to Moscow to seek talks on Estonian independence.

Gorbachev's rebuke as the Congress of People's Deputies morning session began Tuesday drew hearty applause from the national assembly, about 85 percent of whose 2,250 members also belong to the Soviet Communist Party.

The original agenda called for a vote Monday on creating the new presidency but speakers from a list of 298 legislators requesting the floor delayed the vote until Tuesday.

Both the presidency and the Communist Party monopoly are issues that require amendments to the Soviet Constitution with approval by two-thirds

of the Congress of People's Deputies or 1,500 votes.

The maneuvering followed a raucus debate Monday when radical lawmaker Yuri Afanasiev attacked Soviet state founder Vladimir Lenin. Liberal lawmakers were irate at Afanasiev, saying his comments crippled their campaign to defeat Gorbachev's effort to win sweeping new powers.

The Inter-Regional Deputies' Group had chosen Afanasiev, a historian and one of the leaders of the panel, to present the radical contingent's reasons for opposing Gorbachev's bid to create the presidential post, then fill it immediately without direct national elections.

But Afanasiev, standing beneath a giant portrait of Lenin, shocked the group of about 300 liberal lawmakers when he abandoned the speech they had approved Saturday and launched into an impromptu assault on the Soviet state founder and personal idol of Gorbachev.

''If our leader and founder laid the foundation of anything, it was the institutionalization of a policy of mass violence and terror,'' Afanasiev said as an audible murmur rolled through the cavernous Palace of Congresses at the Kremlin.

''He also initiated the rule of lawlessness as state policy,'' Afanasiev said. ''This was true throughout the (Josef) Stalin period. It brought many victims. We squandered our national wealth wholesale and retail.''

Gorbachev has maintained that Stalin distorted the democratic principles of Lenin, who died in 1924, seven years after the Bolshevik revolution.

The super presidency won preliminary approval Feb. 27 by the Supreme Soviet, the standing Parliament that meets between sessions of the Congress.

#90072u1226 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Another month of sluggish automotive sales caused retail sales to fall by 0.9 percent in February to $146.5 billion, the Commerce Department reported Tuesday.

The decline was the biggest since a drop of 1.3 percent in October.

Some analysts were pleased by the report, but Irwin Kellner, chief economist for Manufacturers Hanover in New York, said the 0.9 percent decline ''shows an underlying weakness in the economy that should not be ignored.''

If the 6 percent drop in automotive sales - the biggest since a 26.5

plunge in January 1987 - were not figured in, total sales of all other goods to consumers would have increased by only 0.5 percent in February, officials said.

''It's a sign that we are teetering on the edge of a recession,'' Kellner said. ''What makes it even more alarming are the markets have talked about the need for higher interest rates.

''This report suggests the recipe for continued economic growth is lower interest rates,'' he said.

But Robert Dederick, chief economist for Northern Trust in Chicago, was much more optimitic.

''It's a strong report,'' Dederick said. ''There doesn't seem to be any sign that the consumer believes there is going to be a recession, and consequently that reduces the risks there will be a recession.''

Added forecaster William MacReynolds of the U.S. Chamber of Commerce: ''True, automobile sales fell, but almost all other sectors experienced nice increases.''

Auto dealers have been hard hit with sluggish sales over the past several months, and they turned to rebates and other discounts to clear their lots in December and January.

Sales of durable goods, items made to last three or more years, were down by 0.3 percent last month to $54.8 billion, while the sales of non-durable goods were up by 0.4 percent to $91.7 billion, the department's Census Bureau said in its monthly report.

All the figures were adjusted for seasonal factors.

The 0.9 percent decline in total retail sales for February compared with a surge of 2.8 percent in January after a decline of 0.3 in December and a gain of 0.7 percent in November, the Commerce Department said.

In other categories during February, retail sales of building materials, hardware and garden supplies increased by 1.4 percent, and sales of furniture and home furnishings were up by 0.5 percent.

Sales at department stores increased by 2 percent, while sales at food stores were up by 0.5 percent, the Commerce Department said.

Gasoline stations, meanwhile, saw sales decline by 0.8 percent in February and drug stores also reported a 0.8 percent decline in business, the department said.

But February retail sales increased by 1.6 percent at clothing stores, while restaurants and bars reported a 1.4 percent advance in sales, the monthly report said.

KUWAIT (MARCH 13) UPI - Former Defense Secretary Frank Carlucci said in a newspaper interview published Tuesday that the Iranian threat to Arab Gulf states is diminishing but he urged the nations to upgrade their defenses.

Carlucci also said Gulf Arab states are concentrating on strengthening internal security systems to face any domestic sabotage and the United States will cooperate with them.

''I think the Iranian danger is retreating but in the long run, these countries should upgrade their defenses,'' Carlucci told the Kuwaiti daily Al Anba in an interview conducted in Washington.

Carlucci held the defense secretary's post at the height of the Iran-Iraq war, when the United States boosted its naval presence in gulf waters to show solidarity with gulf Arab allies and to protect international navigation in the strategic seaway. Almost a fifth of the Western world's oil imports come through the gulf.

At the time, Kuwait placed 11 of its oil tankers under the U.S. flag to ward off Iranian attacks.

Carlucci ruled out any Soviet military push toward the gulf region in the wake of withdrawals of Soviet troops from Eastern Europe.

''I think a Soviet invasion of the gulf is a far possibility ... even if the Soviets have withdrawn their forces from Eastern Europe, they now have their own problems in Azerbaijan and Armenia,'' he said.

Carlucci's view is in line with a recent study by the U.S. Defense Department about the situation in the gulf region. The study rules out any Soviet intervention through Iran to reach oilfields in the gulf region.

Carlucci said he believed that the six-nation Gulf Cooperation Council would consider ''internal sabotage'' as the main threat now.

''They are doing their maximum effort to strengthen their internal security systems,'' he said, adding: ''We will cooperate with them in this regard.''

HOUSTON (MARCH 13) UPI - A teenager described by a prosecutor as ''Satan personified'' has been sentenced to life in prison for shooting to death another youth who refused to hand over his $125 designer basketball shoes.

Jurors deliberated about 3 1/2 hours Monday before returning the life sentence against Demetrick James Walker, 17, for the slaying of Johnny Bates, 16.

Walker, who was convicted by the same jury last Thursday, will be eligible for parole in 2005.

Bates was killed 26 days after Walker was granted probation by a juvenile judge for beating a man and taking his car.

''What you're looking at right here in this courtroom is Satan personified '' Assistant District Attorney Mark Vinson told jurors in urging them to return the life sentence.

On April 1, Bates was standing at a bus stop about 9:30 p.m. when Walker approached and demanded his Nike Air Jordan high-top tennis shoes, Vinson said. When the victim refused, Walker shot him in the back of the head with a .22-caliber pistol and fled without the shoes.

Minutes later, after catching a ride with four girls, Walker had them return to the bus stop to make sure Bates was dead and boasted that he had gunned down the victim. One of the girls reported the incident, leading to Walker's arrest two days later.

Walker did not dispute killing Bates but told jurors the shooting was an accident and that he has changed since the incident.

Walker's attorney said he would appeal the conviction.

HOLLYWOOD (MARCH 13) UPI - Academy Award-winner Richard Dreyfuss has signed a long-term development agreement with Disney's Touchstone Pictures in partnership with Judith James to develop and produce movies.

Dreyfuss' films for Touchstone include ''Down and Out in Beverly Hills,'' ''TinMen'' and ''Stakeout.'' The agreement also calls for Dreyfuss to appear in pictures for the studio.

Dreyfuss, who won a best-actor Oscar in 1977 for ''The Goodbye Girl,'' recently completed starring in ''Rosencrantz and Guildenstern Are Dead.'' He currently is working in ''Once Around'' with Holly Hunter.

ZANUCK WINS

Richard D. Zanuck and his partner-wife Lili Fini Zanuck won the Producers Guild of America's Producer of the Year Award for theatrical motion pictures released in 1989 for ''Driving Miss Daisy.''

Their adaptation of the hit Broadway play, which stars Morgan Freeman and Jessica Tandy, led all other movies with nine nominations for Academy Awards this year and so far has grossed more than $60 million.

Zanuck becomes the second member of his family to be honored by the Producers Guild of America. His father, Darryl F. Zanuck, won the award in 1953.

TV SPECIAL

A flock of motion picture and TV stars will appear in the ABC-TV two-hour broadcast of ''Time Warner Presents the Earth Day Special,'' to generate interest in the ecology movement.

Bette Midler will be seen as Mother Earth attempting to survive today's onslaught of pollution and waste. The two-hour show will be aired Apr. 22.

Other stars participating are Chevy Chase, Kevin Costner, Ted Danson, Geena Davis, Jane Fonda, Michael Keaton, Meryl Streep, Barbra Streisand, Robin Williams and Bruce Willis.

MURPHY REPRISE

Eddie Murphy will reprise his role as the convict released to help track down criminals in ''Another 48 Hours,'' co-starring Nick Nolte asthe

frustrated cop who keep track of the felon.

Walter Hill, who directed ''48 Hours,'' will return for the sequel written by John Fasano, Larry Gross and Jeb Stuart, based on a story by Murphy.

Also coming back to play cops are Brion James and Frank McRae who appeared in the original film.

ACADEMY DONATIONS

Two new film-related collections have been donated to the Margaret Herrick Library of the Academy of Motion Picture Arts and Sciences byproducer-director Bryan Forbes and the Los Angeles County Museum of Art.

Forbes donated material documenting his career, including scripts, correspondence and photographs from such films as ''The Angry Silence,'' ''Whistle Down the Wind,'' ''The Wrong Box,'' ''The L-Shaped Room'' and ''King Rat.''

The museum's contribution consists of more than 35,000 photographs and negatives that originally were part of the Hollywood Photographers Archive established by Sid Avery.

#90072u1283 03/13/1990 ~United Press International

NEW YORK (MARCH 13) UPI - Trump Shuttle passengers arriving more than 15 minutes late at Boston, New York and Washington airports now will be compensated even if the weather is to blame for the delay, the airline said Tuesday.

Starting Wednesday, late arrivals will be offered a choice of a 5,000-mile credit to Trump's frequent flyer program, a free companion ticket for their next weekend Trump shuttle flight, or a $20 American express restaurant ticket.

''The Trump Shuttle will compensate customers arriving late even as a result of weather or other conditions we cannot control ... We are able to make this unusual offer to our customers because we have an outstanding on-time arrival record,'' said Trump Shuttle President Bruce Nobles in a statement.

He said Trump's flights arrive on time better than 90 percent of the time. ''On time'' is defined by the U.S. Department of Transportation as arriving within 15 minutes of the scheduled time.

Pan American World Airways, Trump's main competitor on the Northeast shuttle routes, does not plan a similar compensation plan.

''At this time, we are not planning on matching it. Our passengers expect that our flights will arrive on time,'' said Pan Am spokeswoman Elizabeth Manners.

She said Pan Am shuttle flights have had a 95 percent on-time rate thus far in March. She could not say what the February or January on-time rates were.

#90072u1289 03/13/1990 ~United Press International

ST. GEORGE'S, GRENADA (MARCH 13) UPI - Turnout was reported a ''mere trickle'' as Grenadians voted Tuesday for a new government to run the island nation that U.S. forces invaded in 1983.

Balloting was slow when polls opened at 6 a.m., picked up then slowed again to a ''mere trickle,'' election officials said at mid-morning. They expected the pace to increase in the afternoon.

Officials said 58,268 Grenadians - 10,000 more than in the 1984 general election - are eligible to vote in Tuesday's elections to select from 76 candidates vying for 15 parliamentary seats. Six of the candidates are women.

Six political parties concluded their one-month campaigns Monday with rallies and motorcades throughout the tiny, English-speaking spice island north of Venezuela.

Polling stations were scheduled to stay open until 4 p.m. EST, and preliminary results were expected about 7 p.m. EST, officials said.

A public opinion poll has given the National Democratic Congress the edge, saying it is likely to capture a majority in the Parliament, which will allow the party to form the next government.

Also strong contenders, according to political observers, are the Grenada United Labor Party led by one-time Prime Minister Sir Eric Gairy and Keith Mitchell's National Party.

Other parties in the battle are The National Party, led by incumbent Prime Minister Ben Jones, the Maurice Bishop Patriotic Movement, headed by Cuban-trained doctor Terry Marryshow, and the Good Old Democracy party led by Justin Francis McBurnie.

Jones took office when former Prime Minister Herbert Blaize died in December.

Gairy, one-time prime minister, was overthrown in March 1979 by Maurice Bishop of the New Jewel Movement party. Bishop installed himself as prime minister, but was ousted and killed by dissidents within his administration led by Bernard Coard.

Coard was removed in October 1983 when 5,000 U.S. troops accompanied by 250 police from Jamaica, Dominica, St. Lucia, Antigua, St. Vincent and Barbados invaded the island.

About 800 Cuban construction workers who were building an airstrip on Grenada left the island after the invasion.

Most of Grenada's 110,000 people are mixed descendants of white settlers, African slaves and Caribbean Indians. The dominant religions are Roman Catholicism and Protestantism.

Grenada, about 100 miles north of Venezuela at the southern end of a string of volcanic islands, is renown for its nutmeg, cocoa and cinnamon. It is home to the American-owned St. George's University, a medical school with an enrollment of 600 students, most of them U.S. citizens.

#90072u1300 03/13/1990 ~United Press International

TOKYO (MARCH 13) UPI - Commerce Secretary Robert Mosbacher arrived in Tokyo Tuesday for three days of trade talks, and Japan acknowledged for the first time the discussions have reached a ''crisis'' stage that could damage U.S.-Japanese relations.

Mosbacher's visit was being viewed as a final push by the administration to get stalemated trade talks back on track before U.S. Trade Representative Carla Hills delivers a crucial report to Congress on Japanese trade at the end of the month.

The Bush administration has warned that if the report contains no significant progress on U.S. demands to remove Japan's barriers to increased trade and investment, Congress is expected to increase the call for economic sanctions against Tokyo.

Washington maintains the only way to make a dent in the $49 billion annual trade surplus in Tokyo's favor is for Japan to get its 122 million citizens to spend more, make it easier for American retailers to open stores in Japan and provide its people a better lifestyle.

''If we fail to resolve (trade) problems, then it will be a very serious matter. In that sense, we feel this is a crisis,'' Japan's top government spokesman, Chief Cabinet Secretary Misoji Sakamoto, told a news conference.

U.S. Ambassador to Japan Michael Armacost said in a speech in Tokyo this week: ''If we can resolve trade problems in a spirit of friendship and equity, there are few limits to the possibilities of our wider partnership.

''If we fail,'' Armacost said, ''our relationship will become more troubled, and our peoples alone will not be the only ones to experience the adverse consequences.''

U.S. Embassy officials in Tokyo are billing Mosbacher's visit as a "low-keyed" affair expected to produce no breakthroughs in the trade dispute.

Mosbacher will open discussions Wednesday with Japanese Foreign Minister Taro Nakayama and newly appointed Minister for Trade and Industry Kaubun Muto.

On Thursday, he meets Prime Minister Toshiki Kaifu and Finance Minister Ryutaro Hashimoto, and addresses a National Press Club luncheon before leaving Friday. Other meetings are set with U.S. business leaders in Japan.

Mosbacher said in Washington prior to his departure that he wants to ''make sure there is a clear understanding'' between Bush and Kaifu following their summit meeting in Palm Springs, Calif., this month.

Kaifu told Bush he would make the trade dispute ''one of the top priorities'' for his Cabinet, but offered no specifics.

In Washington Tuesday, President Bush called Kaifu's statements at the time ''very constructive'' and discounted Japanese media reports criticizing the prime minister. Kaifu has been attacked for promising too much.

''I think those reports just highlight the sensitivity of the situation in Japan and I think as far as I'm concerned, the talks were very good,'' Bush told a news conference.

Asked if he and Kaifu discussed the key issue of telecommunications - as Bush said last week but which Kaifu denied - Bush repeated they covered ''a broad, broad discussion of several categories ... we left the details of all of these categories that are so well known as differences between the U.S. and Japan, to the experts.''

Bush said he ''covered the same broad agenda'' in talks with former Prime Minister Noboru Takeshita in Washington Monday.

''I didn't go into every specific,'' Bush said. ''But I'm convinced that both Mr. Kaifu left Palm Springs, and Mr. Takeshita, will leave Washington with a far better understanding of the problem that we face. And

hopefully, I have a better understanding of theirs.''

Takeshita, Kaifu's mentor and believed to hold the real power in government, told Bush that Kaifu has become ''increasingly aware of the urgency'' and "public pressures" are driving both sides "to reinvigorate the relationship."

In Tokyo, a heightened sense of urgency on the trade dispute was clearly evident among government ministries Tuesday.

Foreign Minister Nakayama told reporters ''We should realize that this issue amounts to crisis management in Japan-U.S. ties.''

''Discontent within the U.S. Congress is surging and is on the verge of explosion,'' he said.

Kaifu told the day's Cabinet session, ''I intend to make the final decision myself,'' on Japan's response to U.S. demands to remove structural trade barriers.

#90072u1370 03/13/1990 ~United Press International

HOLLYWOOD (MARCH 13) UPI - The slumping 1990 box office erupted last week with the arrival of ''Joe Versus the Volcano'' and the continued popularity of ''The Hunt for Red October,'' which combined for grosses of $23 million.

Leading the pack was ''The Hunt for Red October,'' the underwater drama of a defecting Soviet nuclear sub commander starring Sean Connery, which pulled in $14 million on 1,665 screens.

The film, often called the last Cold War thriller, dropped only 18 percent from its opening week to notch a two-week total of $37.6 million.

Exploding into second place in its debut week was ''Joe Versus the Volcano '' proving once again actor Tom Hanks' enormous box-office appeal.

The romantic fantasy of a terminally ill man seeking happiness, ''Joe Versus the Volcano,'' co-staring Meg Ryan in multiple roles, garnered $9.2 million on 1,802 screens.

Ranking no. 3 was another new flick, ''House Party,'' a black comedy-musical for youngfolk. The sprightly new entry picked up $4.6 million in 520 theaters for a neat $8,867 per-screen average.

Rob Lowe's new picture, ''Bad Influence,'' which eerily reflects some of Lowe's publicized real-life sexual escapades, was the third new release landing in the top 10.

Co-starring James Spader, ''Bad Influence'' - a stark drama of murder and lost innocence - grossed $3.8 million on 1,297 screens in its opening week.

''Driving Miss Daisy,'' the front-running candidate for an Oscar for best picture later this month, dropped from second place the previous week all the way down to No. 5.

It's nine Academy Award nominations, however, continued to draw national interest with a gross of $3.4 million and a 13-week total of $65.3 million.

''Daisy's'' toughest competition for the Oscar, ''Born on the Fourth of July,'' was in eighth place with a take of $1.4 million and a 12-week gross of $61.7 million.

For the first time this year the weekly total box-office gross showed considerable improvement over the equivalent week during a record-setting 1989. The 23,000 theaters in the United States and Canada collected $81.2 million, against $72.2 million for the same week last year.

But the overall total for 1990 ($728 million) still lagged behind 1989 ($755 million).

The top 10, last week's gross, total gross, weeks in release:

1. ''The Hunt for Red October,'' $14 million, $37.6 million, 2 weeks. 2. ''Joe Versus the Volcano,'' $9.2 million, 1 week. 3. ''House Party,'' $4.6 million, 1 week. 4. ''Bad Influence,'' $3.8 million, 1 week. 5. ''Driving Miss Daisy,'' $3.4 million, $65.3 million, 13 weeks. 6. ''Hard To Kill,'' $2.6 million, $37.1 million, 5 weeks. 7. ''Madhouse,'' $1.8 million, $15.9 million, 4 weeks. 8. ''Born on the Fourth of July,'' $1.4 million, $61.7 million, 12 weeks. 9. ''Glory,'' $863,225, $21.4 million, 13 weeks. 10. ''Revenge,'' $820,242, $14.3 million, 4 weeks.

LONDON (MARCH 13) UPI - Protesters against the imposition of a flat tax

threw cans and bottles and scuffled with police in another round of violent anti-tax demonstrations that left 20 people arrested and others injured.

The unrest, the latest in a series of clashes amid imposition of the tax in England and Wales, erupted Monday night as a north London city council approved a new tax of $797 per person.

''There's a very small but hard core of demonstrators who have gone out of their way to cause disruption,'' said David Stevens, who was in charge of the police operation in Islington.

Twenty people were arrested after about 30 people, from the initially peaceful crowd of up to 2,000, began throwing bottles and cans at police. Scuffles broke out as protesters pushed against police lines.

Several people suffered minor injuries and one man was knocked unconscious by a hurled billiard ball. Two policemen were slightly hurt.

Inside the town hall, council members discussing the level of the new tax were heckled by 50 protesters in the public gallery.

The meeting was interrupted when council leader Margaret Hodge was narrowly missed by a piece of wood thrown from the gallery. When the meeting was reconvened Hodge was hit by nail also thrown from the gallery.

Shops opposite the town hall were boarded up but windows were smashed at at least three shops nearby.

The poll tax, more formally known as the community charge, requires local governments to set a flat sum that must be paid by every Briton who is at least 18 years old, with some exceptions.

Unlike income tax, or the property tax it replaces, the community charge must be paid regardless of wealth or earnings and has triggered a series of recent protests.

#90072u1409 03/13/1990 ~United Press International
JOHANNESBURG, SOUTH AFRICA (MARCH 13) UPI - Police battled Tuesday to contain a wave of violence sweeping the country that left at least 25 dead and scores wounded and forced thousands to seek refuge in local police stations and churches.

State-run radio reported more than 500 people arrested and 23 killed since Monday morning in scattered incidents in black areas across the country. A school girl died in police gunfire during a protest march in the nominally independent homeland of Venda.

Venda's president, Frank Ravele, announced Tuesday that a police officer suspected of killing the girl as she paraded a severed head during the protest had been detained. A homeland Cabinet minister implicated in the 1987 beheading also was suspended.

In Johannesburg's black satellite city of Soweto, an angry crowd beheaded the suspected leader of a Rastafarian politico-religious gang, raising the death toll to 25. His head was delivered to the local police while a crowd of mostly children set his body ablaze. The Sowetan, the largest black newspaper, carried a photograh of the blazing corpse on the front page under the headline ''Horror Killling.''

Moderate Zulu leader Mangosuthu Buthelezi told the government's chief racial reform negotiatior, Constitutional Affairs Minister Gerrit Viljoen, that the violence threatened to derail proposed talks between the black majority and the white government.

State-run radio also reported the financial rand, the investment currency and a benchmark in foreign confidence in South Africa, had dropped against the dollar to a six-week low. The radio blamed a stronger dollar and political uncertainty for the 27 percent drop in value.

Hardest-hit by the violence overnight appeared to be a township on the outskirts of the conservative mining town of Witbank, 100 miles east of Johannesburg, that erupted between rival migrant workers.

Regional Police Commissioner Maj. Gen. Robbie Robinson said at least nine people have been killed and 130 injured in the fights and said some 10,000 residents had sought protection at municipal police offices. Another 3,000 residents sought refuge at Witbank's Catholic cathedral, parish priest Alois Plankenstein said.

''It wasn't a nice sight here. In fact, it was horrifying,'' Witbank

hospital Superintendent Willie Snyman said. ''People came in here chopped to pieces.''

The police unrest report on violence over the past 24 hours reported eight blacks killed in the strife-torn province of Natal, where ANC-linked groups have been fighting Buthelezi's Inkatha movement for political control over black areas since 1985. As many as 3,000 have died in the province since September 1987.

Six deaths were reported elsewhere in the country.

In the central Orange Free State province, police reported continuing unrest. In the black township of Phahameng near Bultfontein, 220 miles southwest of Johannesburg, mobs barricaded roads and police arrested 206 demonstrators.

WASHINGTON (MARCH 13) UPI - President Bush, citing his bid to improve ties with China after the Tiananmen massacre, dismissed suggestions Tuesday he pays too much attention to public opinion, saying, ''I don't live by the polls.''

Bush, whose approval rating is near 80 percent, was asked at a news conference if he is ready to sacrifice some of that political capital by taking a stand on controversial issues.

''I don't believe much in polls,'' said the president, attempting the minimize the importance of opinion surveys that show him with record high approval from Americans.

As an example, Bush pointed to surveys in Nicaragua that showed President Daniel Ortega defeating Violeta Chamorro - who won last month's election.

The president joked that Ortega's pollster probably is ''gainfully unemployed right now for missing it by a jillion points.''

Bush said he learned his lesson about polls during the 1980 campaign when one of his strategists lectured him about the dangers of ''hanging your hat on the polls.''

''That's not the way I try to call the shots,'' he said, and recalled his unpopular conciliatory stand toward the Beijing government following the brutal suppression of the Cinese democracy movement last year.

Also, he said he might not have gone to the recent drug summit in Cartagena, Colombia, if he had ''put my finger in the wind in terms of

polls, but that's not the way I run this administration.''

''I don't live by the polls,'' said Bush.

Pressed further, the president said, ''Please believe me that (his standing in the polls) doesn't guide the decisions we take, and I've given you a couple of examples. And I'm trying to do the best I can for the country and to work with the Congress.''

#90072u1422 03/13/1990 ~United Press International

PANAMA CITY, PANAMA (MARCH 13) UPI - In his temporary home with its stained glass windows and wooden pews, President Guillermo Endara looked pale and tired as he explained that democracy in Panama could be jeopardized by a lack of U.S. aid.

Endara, who on Monday went into the twelfth day of fast at the Metropolitan Cathedral, said he stopped eating to show solidarity with the poor and as a sacrifice for Lent. Many observers, however, say he is trying to pressure the U.S. government to speed up the approval of a $1 billion aid package for Panama.

''I understand it (the fast) has gotten the attention of Washington but that was not my intention,'' Endara said in an interview with United Press International.

Still, Endara claimed that Panama has not yet received any U.S. aid and said only about half of Panama's $400 million in assets in U.S. banks - frozen during the regime of ousted strongman Manuel Antonio Noriega - have been released.

Endara said such delays could cause problems for his government, which is trying to recover from two years of U.S. economic sanctions and more than $1 billion in damages from the Dec. 20 U.S. invasion and an outbreak of looting. His government also faces 30 percent unemployment, a dramatic increase in crime, and $4 billion external debt.

''Democracy has to provide the essentials to the people,'' Endara said, as about 20 people stood in line to greet the 54-year-old president who was installed during the invasion. ''If the people see a system they wanted but it fails them in the essential things, they will simply look elsewhere. They will look back to a dictatorship if that provides their needs.''

A U.S. official, however, said agreements for $32 million in American funds have already been signed by the two countries. She said Congress is discussing the remainder of President Bush's $1 billion aid request for Panama.

The $32 million package includes $13 million in housing funds for residents of the capital's El Chorrillo neighborhood that was destroyed during the invasion, money for small business loans and for an emergency work program expected to employ 3,000 people, according to Jan Edmonson, a spokeswoman for the U.S. Embassy.

Endara, who weighed about 260 pounds before the fast, has consumed only water during his fast. He runs the government from the cathedral, dictating letters to secretaries, holding meetings, and using three specially installed telephones. He sleeps about nine hours a day on a portable bed surrounded by three electric fans.

He is attended by his fiance, Ana Mae Diaz, and several doctors and nurses who keep track of his vital signs, check his blood pressure and take urine samples.

Mireya De Perez, an Endara nurse, said he is in good condition and can probably continue the fast for several days without serious helth problems.

''I am working harder here than in the presidency,'' Endara said. ''I greet a lot of people who come to tell me their problems.''

Endara said he hopes his fast will help the poor understand that his government is working for them.

''People would not believe a person living in the luxury of the presidential palace,'' Endara said. ''Now that I have (shared) some of their suffering, I think they will be more likely to believe in me.''

Endara acknowledged that approval of foreign aid by the U.S. Congress can be a drawn-out process but said he worries that his government will ''lose momentum'' if the package is delayed.

In Washington, White House spokesman Marlin Fitzwater acknowledged Monday that there have been delays in getting a Panamanian emergency aid package passed in Congress.

Fitzwater said there is a request for a $500 million appropriation for Panama on Capitol Hill, adding, ''There have been delays. We're trying to break out'' the package ''in Congress and get it passed.''

Another $500 million package in loans and other aid is also in the works.

Dr. Osvaldo Velasquez, president of the Panamanian Human Rights Commission said the main purpose of Endara's fast is to pressure Washington into the quick approval of an aid package.

''I believe it is one way of putting some pressure on the United States,'' Velasquez said. ''I'm sure he would not have received so much attention had he just made declarations.''

BY LEON DANIELS

WASHINGTON (MARCH 13) UPI - The March madness of the upcoming NCAA basketball tournament is a reminder that in these exciting times grown men are signing six-figure contracts to plug sneakers.

When I wore them as a kid, we called our sneakers ''tennis shoes,'' although most of us never played the game.

Come to think of it, my pals and I never swung flexible mallets from horseback either, but we wore polo shirts.

And on wintry school days, although we certainly weren't licensed pilots, we sported aviator helmets with goofy-looking ear flaps.

Tennis, polo and flying weren't big in my neighborhood. We were more into shooting baskets, sandlot baseball, Kick the Can, fist-fighting and stealing hubcaps.

In pursuing those activities, we wore our misnamed ''tennis shoes.''

What has happened to the once lowly sneaker is a dramatic illustration of the startling change in sports fashion.

The often ragged and sometimes smelly canvas ''tennis shoes'' of my youth have undergone a veritable evolution.

For some, athletic shoes have become practical all-purpose footwear. For others, they are status symbols.

Working women remove their high heels and put on athletic shoes when walking to their offices. Grandmothers don them before taking their constitutionals at the local mall.

With sneaker sales in the United States topping $10 billion last year, athletic shoes have become expensive fashion statements. Reebok has come out with a $170 shoe with a built-in air pump that gives the wearer a customized fit.

Professional basketball players get big bucks for endorsing sneakers. Michael Jordan of the Chicago Bulls reportedly is paid about $1.6 million

a year for plugging Nike's Air Jordans.

Sneaker companies, to promote their shoes, also pay college and high school coaches to outfit their teams in them. As income sources, coaches' sneaker contracts sometimes top their salaries.

Gerald Eskenazi, writing in The New York Times, said critics fear the result of all this sneaker money could be corruption.

''They say a youngster might be manipulated by his high school coach, who is being paid by a sneaker company, to attend a college where the same sneaker company is doing business with the coach there as well,'' Eskenazi wrote.

The Times reporter also posed the question of whether it is ''proper for high school or college players - supposed amateurs - in effect to be promoting a sneaker company that is paying their coach.''

In the great scheme of things, I doubt if it matters much. But fairness probably would be best served if the players who wear the sneakers got a cut of the loot now pocketed by their coaches.

Back when I was a kid wearing those ragged canvas sneakers, it was widely believed that sports built character. Some folks even contended that coaches provided moral leadership.

These days, it probably wouldn't even occur to a kid to look for ethical guidance from a guy with a six-figure sneaker contract.

#90072u1462 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Citing a ''great and historic'' need to support democracy, President Bush lifted a 5-year-old trade embargo against Nicaragua Tuesday and proposed $500 million in aid over two years to help rebuild its war-torn economy.

At a White House news conference, Bush took the first tangible steps toward a restoration of economic relations with Nicaragua after a decade of civil war carried out by the Contra rebels with arms and aid from the United States.

With the Feb. 25 election of Violeta Chamorro, whose democratic government on April 25 will replace more than a decade of Marxist-led Sandinista rule Bush said, ''Americans are determined to help the people of Nicaragua.''

The initial $300 million for Nicaragua, to be followed next year by a request for $200 million, will be added to a previously requested $500

million for Panama that has bogged down on Capitol Hill over its source and projected use.

Bush called on Congress to act by April 5 on this combined ''Fund for Democracy'' and, under pressure to tap a ''peace dividend'' from the reduction in superpower tensions, said the $800 million would come from the defense budget.

Echoing Panamanian President Guillermo Endara's impatience over congressional delays, Bush said the aid ''is urgent to advance the prospect for democracy'' in two countries that suffered under dictatorships and U.S. economic sanctions.

''This is a great and historic task,'' he said. ''But we are inspired by the courage of our neighbors.''

The repeal of economic sanctions cleared the way for an immediate renewal of trade and commercial ties with Nicaragua. The White House said steps also are under way to grant Nicaragua export and investment incentives.

About $125 million of the direct aid proposed for this year would go for restructuring the economy and helping Nicaragua qualify for assistance from international financial institutions. The rest would fund agricultural, employment, resettlement and development projects.

Bush promised $21 million in other immediate assistance, including food, to help repatriate the estimated 10,000 Contras still under arms.

While concerned that some Contras have been reluctant to disarm, he said the assurances that Sandinista leader Daniel Ortega conveyed Monday to Vice President Dan Quayle at a meeting in Chile left him ''less concerned than I was about the peaceful transfer of power.''

A $49 million humanitarian aid program for the Contras expired at the end of February, though some money has yet to be disbursed. The aid was approved by Congress last year to keep pressure on the Sandinistas to hold free elections.

Tuesday's announcement, signaling the end of U.S.-backed economic and military warfare, was expected to win bipartisan support, though the prospects for approval before Chamorro's inauguration were uncertain.

Bush urged prompt negotiations with Congress to find $800 million in ''mutually acceptable offsets from the defense budget'' for the aid to Panama and Nicaragua.

If no such agreement is reached by March 27, he said he would seek congressional authority to unilaterally select the defense programs to be

cut or ask that the aid be exempted from deficit-reduction constraints.

Consideration of the aid request will come against a backdrop of competing budget demands, intensified in recent months by cries for economic help from East European countries trying to shake off failed communist systems.

While looking abroad - to allied governments and even the Soviet Union - for wider participation in the economic rehabilitation of Nicaragua, Bush said, ''other nations can help, but only America can take the lead on this one.''

''What I'm proposing here is an investment in democracy,'' he said. ''I don't think anybody would have the American people try to believe that we owe it, but it's the right thing to do.''

Although Bush has been under pressure to deliver a quick show of good faith to Chamorro, questions about the vast problems facing her - and her ability to cope with them - have complicated the aid picture.

Since May 1985, the sanctions have banned imports from Nicaragua and the export of most U.S. goods to Nicaragua and denied landing and docking rights to Nicaraguan airliners and ships. In 1984, two-way trade totaled $171 million.

Trade, however, is just one of many challenges facing Chamorro. The election has left her untested as a political leader and civil war has left Nicaragua's economic base and social infrastructure in severe disrepair.

Unlike the situation in Panama, which until relatively recently thrived on foreign commerce, Chamorro will have to resolve those uncertainties before Nicaragua begins to attract the foreign aid and investment that could be vital to its economic recovery.

#90072u1463 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - President Bush refused to pass judgment Tuesday on broad new presidential powers granted Soviet leader Mikhail Gorbachev and urged a ''peaceful resolution'' of the volatile dispute over Lithuania's secession.

At a free-wheeling televised morning news conference in the White House press room called to announce an $800 million aid package for Nicaragua and Panama, Bush gingerly fielded a raft of other sensitive foreign policy problems.

Asked about Gorbachev's victory Tuesday in gaining expanded powers from

the Congress of Peoples' Deputies, Bush said: ''I stay out of the internal affairs and deliberations of the Soviet Union. They are going through'' processes of reform ''that we support.''

''I think we have a good relationship and I'm going to continue to work with him,'' the president added.

Bush also said that no date or place has been pinned down for the next summit meeting with Gorbachev, which is expected to take place between June 15 and 25 in Washington and perhaps another location.

Responding to a question, Bush said the United States was not prepared to accord diplomatic recognition to Lithuania ''because we want to see the evolution of the control of the territory there and because we want to see a peaceful resolution of this situation.''

The Lithuanian Parliament declared itself an independent republic Sunday, but the next day Gorbachev ruled out any negotiations with Lithuania or its Baltic neighbors.

Surprisingly, Bush told reporters, ''I wouldn't use that term'' when asked if Lithuania was a ''captive native.''

For a span of several years the White House has annually issued a ''Captive Nations'' proclamation calling for freedom for Lithuania, Latvia and Estonia - three nations whose annexation just before World War II has never been recognized by the United States.

''We rejoice as people are permitted the free expression that we take for granted in this country,'' he said, ''and clearly there is a great deal of interest in working this out - the Lithuanians working this out with the Soviet Union.''

Bush said there were no plans at present for sending aid to the economically strapped Soviet Union, and added that Gorbachev has not asked for food assistance. But he added that ''the answer is to help in a technical way ... with know how to establish free markets.''

The president added ''there are all kinds of things down the road'' to assist the Soviet Union, including an Eastern Development Bank but he was not ready to discuss them.

The president, perfectly at home on the podium and presiding at what press secretary Marlin Fitzwater called his 43rd news conference, discussed a broad range of other foreign developments:

-He did not regret saying the United States opposes Jewish settlements on the occupied West Bank and in East Jerusalem. The Jerusalem remark worried

American Jewish groups, who believe Israel has a right to maintain a presence there. Bush said he thought the issue had been ''blown out of proportion in the last few days'' and any further speculation on this ''highly emotional'' issue would be counterproductive.

-Bush expressed disappointment for the first time over the slow pace of reform in China, saying ''I'm not happy with the status quo.'' He held out hope his conciliatory policy ''will bear more fruit.''

-He is convinced his recent talks with Japanese leaders on the growing trade rift with the United States has left them ''with a better understanding'' of the growing support for protectionism in Congress.

-Hinted that the full story of his acceptance of the hoax telephone call and efforts to win release of the American hostages in Lebanon has not been revealed. ''When the whole story comes out on this, you all are going to be very, very fascinated with this.''

-Despite reports to the contrary, he insisted Defense Secretary Richard Cheney and CIA Director William Webster ''are pretty close together'' in views on the Soviet Union with neither believing that Moscow will go back to the aggressive eighties. The differences may stem from an assessment of future Soviet intentions, he said.

#90072u1465 03/13/1990 ~United Press International

(MARCH 13) UPI - Lionel Simmons of La Salle, the third highest scorer in college basketball history, and Gary Payton of Oregon State, second on the all-time assist list, Tuesday highlighted United Press International's All-America team.

Derrick Coleman of Syracuse, Larry Johnson of Nevada-Las Vegas and Kendall Gill of Illinois completed the team chosen by a national panel of UPI sports writers.

Simmons, Payton, Coleman and Gill are seniors and Johnson is a junior. Simmons and Coleman moved up from second team a year ago.

Southeastern Conference stars Alec Kessler of Georgia and Chris Jackson of Louisiana State made the second team, with Dennis Scott of Georgia Tech, Rumeal Robinson of Michigan and Doug Smith of Missouri.

National scoring leader Bo Kimble of Loyola Marymount heads the third team which includes Billy Owens of Syracuse, Stephen Scheffler of Purdue, Anthony Peeler of Missouri and Steve Smith of Michigan State.

The Big Ten, considered the strongest conference this season, has four

players among the three teams. All 15 players are competing in the NCAA Tournament, which starts Thursday.

Simmons, a 6-foot-7 forward from Philadelphia, is only the fifth player to surpass 3,000 points. He has started all 129 games in his career at La Salle and totaled 3,157 points and 1,407 rebounds. He is third on the all-time scoring list behind Pete Maravich and Freeman Williams and is the only 3,000-point scorer to surpass 1,000 rebounds.

''Years from now, our team can say that we coached and played with one of the great players in the history of the game,'' La Salle Coach William ''Speedy'' Morris said. ''And I've never been around a player so unselfish and caring about his team. He reflects what every coach would want a player to be like. He's something special.''

Simmons averages 26.2 points and 11.1 rebounds this season for the Explorers, 29-1. He is three-time Metro Atlantic Player of the Year.

Payton, a 6-4 guard from Oakland, has 935 career assists. He needs 25 assists to catch all-time leader Sherman Douglas. Payton averages 26.3 points, 8.3 assists and 3.5 steals and had a 58-point game against Southern Cal. He led Oregon State to a 22-6 record.

''He's the best money player in America,'' Southern Cal Coach George Raveling said. ''There are 10 different ways he can beat you: with his leadership, his attitude, his passing, his defense, his rebounding. Nothing bothers him on the floor.''

Coleman, a 6-10 center/forward from Detroit, is the all-time scorer and rebounder in Syracuse history and was named Big East Player of the Year this season. Coleman averages 18.1 points and 12.2 rebounds for the Orangemen, 24-6.

''One of the marks of a good rebounder is his ability to finish plays and (Coleman) does that,'' Missouri Coach Norm Stewart said. ''I don't think there is a better rebounder in the country that gets the fastbreak started off a rebound than Coleman.''

Gill, one of the country's most versatile players, led the Big Ten with a 20.4 scoring average in league games. The 6-4 guard from Matteson, Ill., also had a team-high 61 steals for the Illini, 21-7.

''Gill is just something else, a human highlight film,'' Northwestern Coach Bill Foster said. ''If his shot isn't hitting, he makes up for it defensively. He's that kind of player.''

Johnson, a powerful 6-7 forward from Dallas, entered the season as perhaps the most heralded newcomer after being named the top junior college player

last year in Odessa, Texas.

But Johnson lived up to expectations, averaging 20.9 points and 11.2 rebounds for UNLV. He was named Big West Player of the Year as the Rebels went 29-5 overall.

LSU's Jackson falls to the second team after being the first freshman to make UPI first team a year ago. The 6-foot sophomore averages 28.8 points.

Georgia Tech's Scott, a 6-8 junior forward, was the top player in the Atlantic Coast Conference, and his 27.6 average is the league's highest in 15 seasons.

Kessler, a 6-11 senior, is the sport's top student-athlete with a 3.9 grade-point average in microbiology. On the court, he averages 20.5 points and 10.2 rebounds for Georgia, which won its first SEC title in 57 seasons.

Missouri got 19.4 points and 9 rebounds a game from Smith, a 6-10 junior, and Michigan's Robinson, a 6-2 senior, averages 18.9 points and also led the Wolverines in assists and steals.

On the third team, Kimble averages 35.3 points for high-scoring Loyola Marymount; Owens averaged 18.4 points and 8.3 rebounds for Syracuse; Purdue's Scheffler was Big Ten Player of the Year and averages 16.5 points and makes 72.9 percent of his shots; Missouri's Peeler hit for 17.2 points and had 5.9 assists and 5.7 rebounds; and Steve Smith keyed Michigan State's Big Ten title with team-high figures of 19.7 points and 6.9 rebounds.

#90072u1466 03/13/1990 ~United Press International

PITTSBURGH (MARCH 13) UPI - A New York investment group attempting to buy bankrupt appliance maker Allegheny International announced Tuesday it would keep company headquarters in Pittsburgh.

Japonica Partners issued a statement amid reports that a proposed reorganization plan supported by Allegheny International management would move company headquarters to Tampa, Fla.

AI employs about 60 people at its headquarters in downtown Pittsburgh.

A hearing before U.S. Bankruptcy Judge Joseph Cosetti was scheduled Tuesday. Allegheny County commissioners were expected to ask the judge to approve Japonica's reorganization proposal and to allow AI shareholders and creditors to vote on it.

Japonica is offering to buy the appliance maker for $650 million in cash.

AI managers have proposed a plan that would pay off creditors with stock rather than cash.

Japonica, meanwhile, announced PNC Venture Capital Corp. has become a partner in its bid for AI. PNC is an arm of the state's largest bank holding company, PNC Financial Corp.

WASHINGTON (MARCH 13) UPI - About seven of 10 American households give high marks - more than a third say perfect - to the quality of their homes and neighborhoods, the Census Bureau said Tuesday.

In the survey, conducted for the Department of Housing and Urban Development, respondents were asked to separately rate their homes and neighborhoods on a scale of 1-to-10.

''More than a third gave perfect 10s to their dwelling and more than a third gave a 10 to their neighborhood,'' the bureau said. ''More than a third also gave ratings of either 8 or 9.''

Overall, 73 percent rated their homes at least an 8, the survey said.

Owners, however, liked both their homes and neighborhoods better than renters.

Some 42 percent of owners gave their house a 10 rating, compared with 23 percent of renters. And 39 percent of owners gave their neighborhood a perfect mark, compared to 28 percent of renters.

Black householders were a little less enthusiastic about both their homes and neighborhoods but still generally favorable.

About 64 percent of black householders gave their homes at least an 8 and 60 percent rated their neighborhood as an 8, with 32 percent giving their home a perfect 10 and 32 percent rating their neighborhood a 10.

The survey showed a total of 102.7 million housing units in the nation. Of these 90.9 million were occupied, 64 percent by owners and 36 percent by renters.

Some 10.3 million were occupied by black households and 5.6 million by Hispanics.

According to the selected results released by Census, the median value of owner-occupied homes in 1987 was $68,000, up from $62,100 in 1985. ''Values of owner-occupied homes in central cities gained $5,900 to

$68,000, while those in the suburbs increased in value by $9,100 to $82,500.

Among the regions, homes in the Northeast gained the most in value, up $25,500 to $100,300.

The survey also found that 93 percent of owner-occupied homes had a washing machine but only 42 percent of rental units did.

In addition, 55 percent of owners and 31 percent of renters reported the presence of a dishwasher, 84 percent of owners and 33 percent of renters reported a clothes dryer, 38 percent of owners and 36 percent of renters reported a garbage disposal unit in the kitchen sink and 40 percent of owners and 29 percent of renters reported central air conditioning.

Census also reported on selected amenities in homes, with 83 percent of owners reporting a porch, deck, balcony or patio, compared with 61 percent of renters. In addition, a usuable fireplace was reported by 40 percent of owners and 12 percent of renters; two or more livingrooms or recreation rooms were reported by 43 percent of the owners and just 9 percent of renters and 72 percent of owners reported a garage or carport as did 29 percent of renters.

Other highlights of the report said:

-43 percent of black householders were homeowners and the median value of housing units owned by blacks was $48,790 in 1987 and their median purchase price was $19,940.

-42 percent of the 4.5 million owner-occupied units were owned free and clear and the median number of years remaining on those with mortgages was 17. The median monthly payment for principal and interest was $265 and for real estate taxes was $31 for black homeowners.

-About 60 percent of Hispanic households are renters and Hispanics occupy about 5.6 million units, 6 percent, of the nation's 90.9 million occupied housing units.

-The median value of Hispanic owner-occupied units was $70,180 and the monthly payment for principal and interest wa $389 with an additional $45 in monthly real estate taxes.

#90072u1476 03/13/1990 ~United Press International
NEW YORK (MARCH 13) UPI - Americans worried that the sweeping changes

around the world are leaving them behind may be pleased to learn that when it comes to their personal lives, they adjust to challenges just fine, a survey reported Tuesday.

A Gallup poll of 1,026 adults found that 90 percent of those questioned had made at least one major change in their personal lives, such as significantly altering a diet, overcoming a serious emotional problem or quitting smoking.

The poll said positive feelings, not fear or self-disgust, drive most people to change, and a sudden insight or unpredictable event is likelier to push someone into action than a carefully developed plan.

It also indicted that people are powerfully motivated by concern for their health to exercise, change their diets or lose weights.

Seventy percent of those who cut down on alcohol and 54 percent of those who quit smoking said, ''It was easy to change - I just decided to do it one day.''

In addition, 55 percent of those who had cut back on their drinking and 72 percent of ex-smokers said they had never relapsed.

For weight lose, 35 percent of respondents said they reduce for their health, 35 percent to look better and 27 percent to feel better physically.

The telephone survey, sponsored by American Health magazine and the Campbell Soup Co., had a sampling error of plus or minus 3 percent.

Those answering the poll said 51 percent of the time there was no special event that pushed them to a major life change - they just did it.

Support for these major changes usually came from close friends or relatives, not professional help, the poll said.

Only 3 percent said doctors had helped them change, while psychologists and psychiatrists, self-help groups and religious counselors received even less credit.

But 14 percent said they received support from friends, 21 percent from parents, children or siblings, and 29 percent from spouses, boyfriends or girlfriends, the survey said.

#90072u1479 03/13/1990 ~United Press International

MANILA, PHILIPPINES (MARCH 13) UPI - President Corazon Aquino Tuesday rejected a communist guerrilla proposal for a cease-fire in the 21-year

leftist revolt if she agreed to dismantle vital U.S. military bases in the Philippines.

Sen. Wigberto Tanada urged Aquino Monday to heed the proposal by the National Democratic Front, the political wing of the outlawed Communist Party of the Philippines, for a unilateral truce on condition Aquino would not renew U.S. basing rights.

''The NDF's interests do not necessarily coincide with those of our people '' Aquino said in a statement.

''I reiterate that the future of the bases will be decided on the basis above all of our national interest and it is our people as whole that we must take into account, for it is their best interests and common good that we must increasingly pursue,'' Aquino said.

The 1947 treaty governing six U.S. facilities, including the huge Clark Air Base and Subic Bay Naval Base, expires in September 1991. Exploratory talks on the future of the installations are expected to begin about April 18.

The communist-led New Peoples Army of 19,000 men has battled the government for 21 years. A 60-day cease-fire called in December 1966 was allowed to lapse after peace talks broke down over rebel demands for power sharing.

#90072u1485 03/13/1990 ~United Press International

Taipei, Taiwan (MARCH 13) UPI - A government task force has recommended easing a ban on business trips to China and opening direct transportation links with Beijing as part of a program to liberalize Taiwan's China policy, the China Times newspaper said Tuesday.

Businessmen will be limited to one three-month visit each year, according to the Cabinet-level task force proposal, which still requires passage by the Cabinet.

''Once the Cabinet approves the proposal, we will move full force to prepare for the opening of direct ties,'' Communications Minister Chang Chien-pang said.

He said direct transportation links would likely be the next step. Taiwan currently bans direct air and shipping links with China, which it has considered a rebel regime since the Nationalists lost a civil war to the Communists on the Chinese mainland in 1949.

The government also prohibits direct trade and investment ties, although

it permits limited people-to-people contacts across the 160-mile Taiwan Strait.

But this has not stopped many local companies from investing in or doing trade with China. According to unofficial figures, more than 300 firms from Taiwan have invested between $600 million and $1 billion in China despite government objections.

#90072u1500 03/13/1990 ~United Press International

BISMARK, ND (MARCH 13) UPI - North Dakota authorities are considering filing charges against three Northwest Airlines crew members accused of being drunk when they flew a jetliner from Fargo to the Twin Cities, Attorney General Nicholas Spaeth said Tuesday.

North Dakota law prohibits cockpit crews from drinking eight hours before a flight. Violation of the law is a misdemeanor and punishable by up to one year in jail and-or $1,000 in fines, he said.

''There was a clear violation of that statute in this case,'' he said.

The attorney general said he would be talking with local authorities in Fargo to explore the possibility of having charges filed in North Dakota.

Spaeth said he would be in Minneapolis Wednesday to review a Federal Aviation Administration report of the incident with Assistant Minneapolis City Attorney Mitch Rossman.

The three Northwest crewmen also face possible charges in Minnesota.

Spaeth criticized the Federal Aviation Administration inspector who let the flight leave Fargo.

''It was a serious mistake in judgment for him not to contact officials here and to let that flight take off,'' Spaeth said.

Rep. James Oberstar, D-Minn., chairman of a House aviation subcommittee, also blamed the inspector for allowing the plane to take off. He said the crew members told the inspector they had been at a restaurant and had not been drinking. But he said the inspector should have called Northwest and told them he thought the crew should not be allowed to fly or should have called police and had the crew test. Oberstar said that to his knowledge, the inspector did neither.

''He made a mistake in judgment,'' said Oberstar.

FAA officials have said the inspector did not have evidence or authority

to stop the flight.

Oberstar said FAA Administrator James Busey would announce new training procedures Wednesday that would be designed to keep pilots who have been drinking from flying.

The three Northwest crew members were arrested in the Twin Cities after completing the flight without incident last Thursday. An FAA inspector at Minneapolis-St. Paul International Airport made a citizen's arrest and then turned the three over to airport police.

Blood-alcohol tests showed the crew members were in violation of federal regulations, said Federal Aviation Administration officials, who revoked their pilot licenses Friday. The three already had been grounded by Northwest.

The Star Tribune in Minneapolis reported sources said the pilot, Capt. Norman Prouse, 51, Conyers, Ga., had a blood-alcohol level of between 0.12 and 0.13. That would have made him legally drunk if he was driving a car.

The newspaper said its sources said the other two officers, Robert Kirchner, 35, Highland Ranch, Colo., and Joseph Balzer, 34, Antioch, Tenn. had levels of at least 0.06 percent. The federal limit is 0.04 percent.

#90072u1501 03/13/1990 ~United Press International

NASHVILLE, TN (MARCH 13) UPI - Atlantic Records is a relatively new kid on the block in country music, but already the company is making waves.

The label is making the rare move, in country music at least, of underwriting a tour to promote two of its acts.

Jeff Stevens and the Bullets and Robin Lee both have new albums out for Atlantic and both have charted singles out - ''Boomtown'' for the former and ''Black Velvet'' for the latter.

Stevens, a native of West Virginia, has been working with Atlantic for about four years. Lee, a Nashville native, has been with the label about three years. Atlantic opened its Nashville office about a year ago.

''The reason they picked Robin and me and the Bullets to do it (the tour) is that they believe in us,'' Stevens said. ''I think we've got something different so we're going out to meet first hand the people in radio and let them get to see us first hand. They want the radio people to see us live the first time so they can know what we're about.

''There will be no coverup. The record company is trying to exploit that

and it will help to sell records.''

Lee said she and Stevens have been with Atlantic ''since dirt.''

''Jeff and I had stuck around and many times we wondered if we were going to make it to the next week or be on the drop list. The label wants to give us a fair shot,'' she said.

Lee, whose first interest in music was as a classical pianist, said underwriting the tour is a ''big commitment'' by Atlantic.

''They are spending a lot of money, but the people at the label are also working hard to make this work. They are spending the money in the right way,'' the vocalist said.

''Our bands are working at a reasonable rate and are really putting in the time and effort. I've been to a lot of radio stations in my car, and it helped a lot. But it doesn't look real good when you pull up in a Plymouth Sundance trying to promote your records. But at least you're doing something,'' Lee said.

Both Stevens and Lee feel their particular brands of country music will complement each other.

''We are both on the cutting edge of country music. It's not traditional country and it's not pop. It's just music from our heart. I think it's new and fresh and not predictable,'' Lee said.

''We've had a chance to rehearse together. We're pretty compatible,'' Stevens said.

Asked if the tour was a make or break thing for his career, Stevens said:

''I don't feel that way; maybe I ought to. I've been trying for a long time. Most people who are in music have been working at it for a long time but I'd like to do it now. I hope we do well. If it doesn't, I'm just going to back up and keep trying again. The only scary thing about it is that Atlantic is putting forth a lot of effort for me and Robin, too.''

Lee said it's like she and Jeff are Atlantic's ''little babies.''

''There will be no stone unturned. For our part, we are going to do our best to perform the best we can.''

The format of the shows will be this: Stevens and the Bullets will perform a 30-35-minute mini-show and break, followed by Lee with a show of similar length.

At each of the tour cities, radio program directors and dj's from the surrounding areas will be brought in to hear the two performers.

Atlantic's other country acts include Billy Joe Royal and The Girls Next Door in addition to several new artists.

Some of the cities included in the tour are Cincinnati, Kansas City, Dallas, Atlanta, Bryan, Texas, Longview, Texas, Myrtle Beach, S.C., Charlotte, N.C., Columbia, S.C. and Corpus Christi, Texas.

Rich Blackburn, Atlantic's Nashville vice president for oprations, said several West Coast cities will be added to the tour.

WASHINGTON (MARCH 13) UPI - President Bush has named Evan Kemp Jr., a member of the U.S. Equal Employment Opportunity Commission since 1987, to serve as chairman of the anti-job bias panel, the commission said Tuesday.

Kemp, 52, succeeds Clarence Thomas, who was confirmed by the Senate last week to a seat on the U.S. Court of Appeals for the District of Columbia.

''My priorities are to continue to build on the EEOC's record as a law enforcement agency and to vigorously fight employment discrimination in promotion as well as hiring,'' Kemp said in a statement.

The EEOC enforces Title VII of the Civil Rights Act of 1964, which prohibits employment discrimination based on race, color, religion, sex or national origin. It also enforces the Age Discrimination in Employment Act the Equal Pay Act and federal prohibitions banning discrimination against people with handicapping conditions.

Before his 1987 appointment to the EEOC, Kemp was executive director of the Disability Rights Center.

#90072u1514 03/13/1990 ~United Press International

TAMPA, FL (MARCH 13) UPI - A jail clerk accused of sleeping on the job and making snoring sounds that were captured on a videotape of a drunken driving suspect has erased the recording to blot out the embarrassing noises, officials say.

Beverly Gray, a technician at the Central Breath Testing Unit at Hillsborough County Jail, denied dozing on duty and blamed the nasal noises on her asthma, an internal investigation report released Monday said.

Gray said she did not intentionally erase the tape of a drunken driving suspect undergoing routine tests to determine alcohol consumption, records show.

But Sheriff Walter Heinrich ruled she violated policy by handling evidence the records say.

The suspect was videotaped during the midnight shift Nov. 19 by another technician, Adiela Palacios, who administered the tests while Deputy Michelle Simmons watched, records show.

Palacios and the deputy both told investigators that Gray was sleeping and snoring, according to records.

And the snoring was so loud and distracting, the deputy told investigators that she stuttered and lost her place while reading to the suspect the instructions for the breath test.

Palacios said she later told Gray that her snoring could be overheard on the videotape, and Gray asked to review the tape. Investigators began looking into the matter after Palacios complained someone had noted in a log book that the tape was ''erased in error.''

The technician accused of sleeping didn't violate state law against evidence tampering, said sheriff's Sgt. Bob Spooner, because she was trying to expunge the snoring sounds and not attempting to change the outcome of the suspect's criminal case.

Drunken driving suspects are routinely videotaped in the breath-testing unit while performing coordination tests. Sometimes the videotapes are presented in court as evidence.

It was not immediately known if the erasure would affect the April 2 trial of the drunken driving suspect, who was also charged with reckless driving and fleeing and eluding police.

#90072u1517 03/13/1990 ~United Press International

LONDON (MARCH 13) UPI - Stocks closed slightly higher in sluggish trading Tuesday on the London International stock exchange.

The blue-chip Financial Times 100-stock index, which fell 11.5 points Monday, added 1.7 points to 2,224.5. The narrower top 30 industrial average gained 3.8 points to 1,755.6.

Volume amounted to 317 million shares, compared with the 298 million

shares changing hands Monday.

Analysts said many large institutional investors seemed reluctant to take fresh positions ahead of next Tuesday's government budget.

Standard Charter Bank PLC, which has already issued a 1989 profits warning due to trading losses late last year, said it is making an $80 million provision against a $220 million loan to Miniscribe Corp., a computer peripherals manufacturer in bankruptcy.

The news sent Standard Charter shares tumbling 24 cents to $8.76 in active trading.

In the pharmaceuticals sector, Wellcome PLC gained 14 cents to $10.60 following adverse comment on a rival drug by Bristol Myers.

Brokers recommendations and anticipation of higher financial results Thursday helped Glaxo gain 10 cents to $11.66.

Smithkline Beecham also benefited from speculation of higher results Wednesday, moving up 10 cents to $8.41.

Saatchi and Saatchi gained 10 cents to $2.30. After the group's annual general meeting Tuesday, Maurice and Charles Saatchi announced they were cutting their salaries by $321,800 in an attempt to restore investor confidence.

Among the day's other highlights, Thorn-EMI rose 18 cents to $11.08, Imperial Chemical Industries gained 31 cents to $17.61 and BOC Group climbed 25 cents to $8.43.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed broadly higher in moderate trading.

The German Stock Index jumped 21,40 points to 1,867.48.

Traders said a flurry of joint venture agreements signed by the major West German concerns with East German groups at the Leipzig Spring Fair lured foreign investors back into the market.

#90072u1526 03/13/1990 ~United Press International

(MARCH 13) UPI - Soviet President Gorbachev has newly added political muscle. The Soviet Congress today established a new super presidency that gives Gorbachev sweeping new powers... which he says are necessary to save his reform program. Soviet lawmakers voted 18-hundred-17 to 133 in favor of the new presidential system... with 61 abstentions. The vote was a

political victory for Gorbachev, who fought against objections that the system would give him too much power. A small group of conservative Soviet lawmakers had suggested two other candidates for the super presidency.

An impasse over a U-S Middle East peace plan has led to the collapse of Israel's government. Prime Minister Yitzhak Shamir fired Labor Party Chairman Shimon Peres from the Cabinet after Peres refused to back down from threats to break up the coalition government. Immediately after Peres was fired, all of the Cabinet's Labor ministers resigned. The dismissal and resignations don't take effect until Thursday.

The Commerce Department is blaming another month of sluggish auto sales for a nearly one percent fall in the nation's retail sales. The department says auto sales fell six percent last month and retail sales dropped by nine-tenths of one percent in February... down to 146-and-a-half-BILLION dollars. The decline was the biggest since a one-point-three percent drop in October.

#90072u1533 03/13/1990 ~United Press International

(MARCH 13) UPI - A fire in a low-income apartment complex near Madison, Wisconsin, took the lives of five children who died in their beds. The children ranged in age from 10 months to 12 years. Authorities speculate that the blaze may have started in a downstairs kitchen of the two-floor apartment unit. Authorities say they believe there was NO adult in the apartment at the time of the fire.

Federal agents arrested four workers at a Pittsburgh jewelry firm, accusing them of laundering some 90-Million dollars in drug money from New York City through the business. An affidavit filed in federal court says the cash passed through L-U Kustom's account with a Pittsburgh bank during the last 15 months. The I-R-S was tipped off about unusual activity on the jewelry company account by the bank early last year. Prosecutors say the money was ''clearly drug proceeds'' with international connections through New York City.

#90072u1548 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - President Bush, hinting that fascinating revelations are ahead, said Tuesday he would again risk answering a hoax telephone call if it could lead to freedom for American hostages.

''But what's wrong with reaching out and touching someone, when the hostages are at stake?'' Bush asked reporters at a televised news conference.

''The hostages are at stake here, and what's wrong with trying? Look, I feel this all the time. I've talked about this, that I will go the extra mile, and when the whole story comes out on this, you are going to be very very fascinated with the details, very fascinated,'' he said.

Last week the White House acknowedged that Bush took a call from a prankster apparently posing as an Iranian official and claiming to have knowledge about the eight American hostages in Lebanon. Bush told reporters he did not regret picking up the phone.

''But I'm just telling you that it is important. It is very important to run down every avenue in terms of these hostages, and I would be remiss if I didn't,'' Bush said. ''And there are things that go on, going around in back alleys and trying to find out information, and we've got to do that.

''I owe it to the families of those people and to those people themselves that are held.''

The president repeated his call to Iran from his inaugural speech that ''good will begets good will.''

Bush said he did not know why Iranian President Hashemi Rafsanjani said Bush had been trying to get in touch with him for a month.

''I don't know where he got that. I saw that statement and there was no truth in it, our trying to contact him for a month,'' Bush said.

''It'd be very easy to do. I responded to an incoming call. I think the bottom line is, you have to say, 'Would you do it again based on the information you had?' And I'd say, 'Yes, I probably would.'''

But Bush evoked laughter when he added, ''It might be difficult for somebody to get through again.''

#90072u1557 03/13/1990 ~United Press International

CAPE CANAVERAL, FL (MARCH 13) UPI - Martin Marietta technicians Tuesday readied a towering Titan 3 rocket for blastoff Wednesday to put a $140 million communications satellite into orbit in another step forward for America's infant commercial space program.

''We are delighted with the weather, all systems are go, the rocket's ready ... and we intend to push the button at 6:49 a.m. EST and one millisecond and get that sucker off the ground,'' said Ed Browne, president of Commercial Titan Inc.

Coming just 20 days after a spectacular explosion Feb. 22 that grounded

the European Ariane rocket program, Wednesday's planned Titan flight took on added significance as America's post-Challenger commercial space program continues its struggle to win a share of the international launch market.

The first commercial Titan 3 rocket - a civilian version of Martin Marietta Astronautics Group's Titan 34D Air Force booster - was successfully launched Dec. 31 from pad 40 at the Cape Canaveral Air Force Station after nine delays, all but one blamed on bad weather.

The goal of Wednesday's flight was the launch of a four-story, 5,600-pound communications satellite capable of handling up to 120,000 telephone calls and three color television channels at once.

If all goes well, the giant drum-shaped satellite will be on station over the Atlantic Ocean equator and ready for service by May 26, relaying television and telephone signals between Europe, Africa, the United States Central and South America.

It is the second in a series of five Intelsat 6 satellites built by Hughes Aircraft Co. for the International Telecommunications Satellite Organization - Intelsat - a 118-nation non-profit consortium that handles most of the world's commercial space communications traffic.

Frederick Ormsby, Intelsat spacecraft mission director, said the consortium paid $700 million for five Intelsat 6 spacecraft and that the total cost of Wednesday's launch came to about $270 million, including the price of the Titan 3 and other launch services. The satellite was not insured.

With an expected lifetime of more than 13 years, the Intelsat 6 satellites are the largest and most powerful such communications stations ever built on a commercial basis.

Each spacecraft is equipped with 48 radio transponders, allowing them to carry a minimum of 24,000 simultaneous two-way telephone conversations and three simultaneous color television channels - a far cry from Intelsat's first ''Early Bird'' satellite, which carried just 240 telephone circuits or one TV channel.

By using digital circuit multiplication equipment on the ground, Ormsby said, ''we can increase this capacity to 120,000 simultaneous circuits'' for Intelsat 6 by quickly switching between six coverage regions with connection times as short as 4 microseconds.

The new satellite will replace a less-powerful spacecraft already on station over the Atlantic Ocean and allow Intelsat engineers to move a second satellite to another location.

''It has about double the capacity of the satellite it's replacing,'' Ormsby said.

The Intelsat 6 launched Wednesday is scheduled to be stationed over the equator at 332.5 degrees east longitude at an altitude of about 22,300 miles.

A satellite's orbital velocity depends only on its altitude. In ''geosynchronous orbits,'' spacecraft take 24 hours to complete one trip around the globe, thus appearing to hang stationary in the sky, eliminating the need for costly steerable ground antennas.

The planned launching Wednesday marked the 44th for Intelsat. Once the satellite is on station, it will join the first in the series, launched last October by a French-built Ariane rocket, and boost the consortium's total to 14 operational satellites.

The Titan 3, equipped with two strap-on solid-fuel boosters, is the most powerful commercial rocket ever produced by a U.S. company, one capable of boosting payloads weighing up to 32,500 pounds into low-Earth orbit.

Martin Marietta currently has contracts in hand to launch a second Intelsat 6 satellite June 1 and NASA's Mars Observer space probe in 1992. Overall, the company hopes to launch two commercial Titans a year.

#90072u1570 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - The Pentagon identified several programs Tuesday - ranging from military base construction to repair of the battleship USS Iowa - that it said Congress could cut to pay for the $300 million in aid for Nicaragua.

The Defense Department a few weeks earlier had sent up to Capitol Hill its suggestions of programs that could be cut to pay for more than $500 million in proposed economic aid for Panama.

For the $300 million in aid to Nicaragua, which President Bush announced at the White House Tuesday, the Pentagon proposed that Congress take $83 million from savings achieved through the civilian personnel hiring freeze that Defense Secretary Dick Cheney imposed for fiscal 1990, which ends Sept. 30.

Another $81 million is targeted to come from deferring new construction at military bases that are being studied for possible closure by the military services. No specific construction sites or bases were identified.

Under the Pentagon plan, another $11 million could be taken out of the budget for repair of the Iowa's 16-inch gun turret, which was severely damaged in an explosion that killed 47 sailors last year. The administration has proposed in its fiscal 1991 budget to mothball the Iowa based at Norfolk, Va.

Other amounts and the programs targeted by the Pentagon include:

-$69 million by deferring plans to put more powerful and fuel-efficient engines in eight of 36 KC-135R tanker planes.

-$30 million by canceling a surface anti-submarine warfare improvement program.

-$18 million by canceling the Mobile Armored Reconnaissance Vehicle (MARV) program. These vehicles would have been used to survey damage to a battlefield and to destroy unexploded ordnance.

-$9 million by canceling the NATO frigate replacement program, from which several Western European countries had already withdrawn, making it uneconomical.

#90072u1592 03/13/1990 ~United Press International

(MARCH 13) UPI - TODAY'S PEOPLE:

WINGER'S WAYS: Debra Winger is again spending time with Sen. Bob Kerrey, D-Neb. The actress, who dated Kerrey before she married and divorced Timothy Hutton back in the days when Kerrey was governor of Nebraska, has been Kerrey's house guest in Omaha for the past several days, an aide to the senator said. Winger, who brought her son, Noah, along with her, is a business partner with Kerrey in the Prairie Life Center in Omaha and attended a ceremony at the fitness center Saturday night. Kerrey met Winger in April 1983, when she was filming ''Terms of Endearment'' in Lincoln. The two were romantically linked until the fall of 1985. Winger married Hutton in March 1986 and he filed for divorce in December 1988.

HANGING UP THE ROYAL SPURS: Britain's Princess Anne, an avid horsewoman, will give up competitive riding when she turns 40 in August, according to the London Daily Mail. ''I have been advised that people over 40 really should not go on,'' the princess reportedly said. Anne rode in the 1976 Montreal Olympics, was the 1971 European Three-Day Event champion and recently competed in flat and steeplechase races in Britain and the United States. She's also working on a book about her riding career, due out on her birthday and entitled ''Me and My Horses.'' Anne, the mother of two, also keeps busy with about 500 public engagements each year, plus extensive work abroad for the Save the Children foundation.

KATE'S CHOICE: Katharine Hepburn says she accepted the job of chairwoman of the Art Pro Choice auction and dinner in New York Tuesday night because abortion rights is ''a cause I believe in.'' Hepburn rounded up a glittering committee of show business, political and social names. Artists who contributed paintings and sculptures include Roy Lichtenstein, Claes Oldenburg, Julian Schnabel, Robert Rauschenberg, Jenny Holzer and many others from the avant-garde world. The contributed art works are expected to raise $3 million to $4 million for the cause.

KIMLAND: Actress Kim Basinger told the folks back home in Georgia that she won't turn the town of Braselton into a theme park, a la Dollywood. Basinger was honored in Atlanta Monday as an outstanding Georgia citizen and told the crowd of officials, legislators and gawkers at the secretary of state's office that she still is working on plans for a film and recording center in Braselton, which she bought last year for $20 million. ''Excuse me Dolly Parton, wherever you are, but this will be no Dollywood '' Basinger said, referring to Parton's theme park at Pigeon Forge, Tenn.

GLIMPSES: Billionaire New York real estate magnate Harry Helmsley, 80, is hospitalized in stable condition after suffering a fall Monday. A spokesman says Helmsley appears to have no serious medical problems and has been up and talking. Helmsley was indicted with his wife, Leona, on tax fraud charges, but was declared to incompetent to stand trial. Leona was convicted and sentenced to four years in prison ... Former heavyweight champ Muhammad Ali is in Jakarta, Indonesia, for a sports and music festival. Ali also plans to give a speech to thousands of Moslem communities in Jakarta following a Friday prayer at the Istiqlal Mosque, reputedly the biggest mosque in Southeast Asia. His agenda also includes a trip to orphanages and a meeting with senior Moslem leaders.

#90072u1595 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Following is the text of President Bush's St. Patrick's Day message:

I am delighted to extend warm greetings to all those celebrating St. Patrick's Day. As history tells us, St. Patrick led a life filled with exciting adventures and tremendous challenges. Born the son of a British city leader, he was captured by pirates as a youth and sold into slavery. After gaining his freedom, Patrick returned home, where he eventually decided to dedicate his life to God as a cleric.

Soon he was to discover that God was calling him to take part in yet another extraordinary adventure - bringing the Christian faith to the people of Ireland. He spent the remaining years of his life serving God and his fellow man with tireless devotion. In so doing, he helped change

forever the course of Irish history. St. Patrick's faith, courage and compassionate spirit have lived on through the centuries, inspiring generations of men and women to follow his example of voluntary service and fervent prayer.

On St. Patrick's Day, Irish-Americans - indeed Americans of every ethnic background - happily join with the people of Ireland in celebrating the life of this remarkable man. This occasion also provides us with a wonderful opportunity to celebrate the many contributions the sons and daughters of Ireland have made to our nation. Many of those early pioneers who braved the stormy Atlantic to seek a new life in America were of Irish descent. They, like their spiritual ancestor, Patrick, helped to build a strong and proud nation through faith and hard work. On this day we also celebrate the special friendship the United States shares with Ireland - one we look forward to enriching and strengthening in the months and years to come.

Barbara joins me in sending our best wishes to all for a joyous and memorable St. Patrick's Day. May God bless you.

#90072u1612 03/13/1990 ~United Press International

MIAMI (MARCH 13) UPI - Burger King Corp. announced Tuesday that C. Ronald Petty resigned after serving for a year as president and chief operating officer of Burger King USA, the fast-food company's domestic division.

Petty, 45, has been with Burger King 12 years. He joined the domestic division from the restaurant chain's international division just before Burger King was acquired by Grand Metropolitan PLC in January 1989.

Barry Gibbons, chief executive officer for the parent Burger King Corp., said in a statement that he and Petty ''decided we would get right down to the urgent tasks at hand and take a year or so to decide whether we wanted to work together, long term. We have had that review and decided to change.''

Company spokeswoman Joyce Myers said Burger King would say only that Petty's resignation was unrelated to charges the Labor Department filed against Burger King last week.

Burger King said that, ''pending further announcement,'' Gibbons would take over as chief operating officer of Burger King USA while remaining president and chief executive officer of the parent company.

Burger King and its franchisees operate more than 6,000 restaurants in 34 countries worldwide. Estimated sales for fiscal 1989 were $5.7 billion.

Last week, Labor Secretary Elizabeth Dole filed a complaint accusing the company of violating U.S. child labor laws.

The alleged violations included permitting children under 16 to work more hours than allowed by law and allowing teens to perform ''hazardous'' jobs such as operating power-driven machinery.

Burger King said that since Grand Met acquired the company, it had increased its vigiliance to ensure that those laws are followed by conducting additional training for restaurant managers and by performing internal audits.

-30- 2012

#90072u1625 03/13/1990 ~United Press International

NEW YORK (MARCH 13) UPI - ABC's ''Funniest Home Videos'' was the top show of last week, but CBS won the Sunday night on which it aired and NBC took the week as usual, it was reported Tuesday.

''It's rather strange,'' said Sari DeCesare, NBC manager, audience research. ''What's happened is that ABC has an isolated show.''

''Home Videos'' was up there alone in the numbers. The show that preceded it, ''Life Goes On,'' tied for 65th place with an 8.8 rating and a 15 share. ''Home Videos'' was No. 1 with a whopping 24.1 rating and a 37 share - up an incredible 22 share points. Then along came ''Elvis,'' tied for 47th with an 11.1 rating and a 17 share.

Where did all the viewers go? To ''The Simpsons'' on Fox, which airs in the subsequent half hour and won its time period for the first time ever, in 20th place with a 15.1 rating and a 23 share.

All this has hurt ''Murder, She Wrote'' in 29th place, knocking it out of its accustomed spot as time period winner - but that has not knocked CBS out of first place on Sunday.

One reason is ''60 Minutes,'' which in its second week with Andy Rooney back came in sixth with a 19.6 rating and a 34 share, about the show's average before the Rooney fracas. That's not as good as the previous week, when Rooney's return boosted the show to fourth place with a 22 rating and a 37 share.

NBC won the Sunday movie contest with ''Perry Mason: The Case of the Desperate Deception,'' which came in 13th. On CBS ''The People's Choice Awards'' tied for 22nd, earning a 14.9 rating and a 24 share, way down from last year when it had a 19.6 rating and a 31 share. ABC's repeat of ''The Women of Brewster Place,'' part 1, tied for 62nd place.

On a night-by-night basis, CBS took Sunday, ABC won Monday with its movie, ''A Son's Promise,'' ABC and NBC tied for Tuesday, NBC took Wednesday and Thursday, ABC won on Friday and NBC continued its lock on Saturday.

NBC won the ratings race for the week for the 21st consecutive time, and 89th out of the last 90 weeks. The network took the week ending Mar. 11 with a 13.5 rating and a 22 share, according to the A.C. Nielsen Co. ABC was back in second place with an 12.2 rating and a 20 share, while CBS was third with an 11.0 rating and an 18 share.

The 25-week-old season-to-date ratings show NBC with a 14.8 rating and a 24 share, ABC with a 13.0 rating and a 21 share, and CBS with a 12.3 rating and a 20 share.

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings continued to dominate with an 11.5 rating and a 21 share. The Jennings news has been in sole possession of first place or tied for first for 22 of the last 23 weeks. ''NBC Nightly News'' with Tom Brokaw and ''CBS Evening News'' with Dan Rather were tied for second with a 9.7 rating, although NBC had a 19 share and CBS an 18 share.

DeCesare explained the difference in share points, saying, ''CBS and NBC do not air their news shows head-to-head across the country. Share is a percentage of households using television at the time a program is airing, and that may differ in different time periods.''

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, Mar. 11, according to the A.C. Nielsen Co., were:

1. America's Funniest Home Videos (ABC)
2. Cheers (NBC)
3. Roseanne (ABC)
4. The Cosby Show (NBC)
5. A Different World (NBC)
6. 60 Minutes (CBS)
7. Wonder Years (ABC)
8. Golden Girls (NBC)
9. In The Heat of the Night (NBC)
10. Who's the Boss? (ABC)

-30- 3840

#90072u1632 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Actor Paul Michael Glaser and his wife, Elizabeth, who has AIDS, told a House hearing Tuesday they are seeking new

stars for their campaign to help children with the disease - President and Mrs. Bush.

Elizabeth Glaser became infected with the AIDS virus through a blood transfusion she received while delivering the Glasers' first child in 1981 and subsequently passed the virus on to both of the couple's children.

The Glasers' daughter died in 1988 at age 7, but their son and Elizabeth Glaser have not yet developed full AIDS. Paul Michael Glaser, star of the ''Starsky and Hutch'' TV series, has not been infected.

The Glasers recently made a public service advertisement on AIDS featuring former President Ronald Reagan, and said they need the White House's help to reach Americans who are not concerned about victims of the disease.

Elizabeth Glaser, a founder of the Pediatric AIDS Foundation, said she spoke with one of Mrs. Bush's aides last month about the first lady making her own television commercial, but has not received a response.

Mrs. Bush's spokeswoman said the first lady had not received a written request to make a public service ad, and that there would be no response until one had been made.

Elizabeth Glaser said in an interview she had not been told of the need for a written request, but added, ''I think that if someone is interested in helping, it shouldn't take a written request.''

The Glasers appeared at a hearing of the House Budget Committee's task force on human resources to call for doubling government spending on acquired immune deficiency symdrome and for additional money to study the different ways the disease affects children.

''I believe that President and Mrs. Bush care deeply about this issue. I do believe that stronger leadership is necessary,'' Elizabeth Glaser testified.

''I would love to see Mrs. Bush make a public service spot saying that all children with AIDS should be in school,'' she said. ''It has to be someone that the world will listen to.''

Anna Perez, a spokeswoman for Mrs. Bush, said the first lady has ''always been very concerned'' about AIDS and that all requests for her to make public service ads are considered.

But Perez said until a formal request is made, it would be ''really difficult'' to speculate about whether Mrs. Bush would make the commercial.

As of January, federal health officials said there were 2,055 known cases

of children with AIDS. As many as 20,000 children are believed to be infected with the virus that causes the disease.

President Bush has proposed increasing the Public Health Service's AIDS budget from $1.6 billion in the current fiscal year to $1.7 billion in 1991. Pediatric AIDS funding would be raised from $126 million to $155 million.

WASHINGTON (MARCH 13) UPI - Stricter limits on subsidy payments to farmers are an option for Congress in its hunt for budget savings, an administration official said Tuesday but there were signs it could be a painful choice.

The White House wants Congress to trim crop subsidy spending by $1.5 billion in fiscal 1991 but has refused to recommend how to do it. Instead, it has listed three areas, including payment limitations, that could be considered.

Despite that, Agriculture Department officials have warned of drawbacks to that approach, which could take the form of cutting off crop support payments to large-scale farmers.

Sources have suggested that payment limitations were included on the list of possible budget actions at the insistence of the White House budget office.

Deputy Undersecretary John Campbell told reporters that work on payment limits could derail the idea, popular in Congress, of writing a new farm policy law that continues the direction of the 1985 law. Instead, he said, there could be a debate whether federal assistance should be directed to some, but not all, farmers.

At present, farm program benefits are available to any farmer who enrolls although there is a $50,000 limit on crop subsidy payments to an individual and a $250,000 limit on all types of farm program benefits.

''It's always tough to slice a shrinking pie,'' Campbell said, before holding up a copy of a 10-year-old report that advocated the ''targeting'' of benefits to family farms. ''We're basically back to some of these issues - either continue the direction of the '85 farm bill or start asking some of these hard questions.''

During testimony before a House Agriculture subcommittee, Campbell repeated the administration position that payment limits were ''an option for this committee to consider.''

''We have (no) specific road map for this Congress to follow,'' Campbell said.

Assistant Secretary Bruce Gardner told senators last week that payment limits would be ''the most difficult and controversial'' technique for reducing spending.

''Aside from the fact that it would alienate farmers, agreement on how to design and administer the test would be difficult, to say the least,'' Gardner said. ''And we know from experience that is difficult to achieve actual savings ... in this way.''

There have been complaints about farmers subdividing their operations in order to evade the $50,000 limit.

Some congressmen, acting with different motivations, have expressed interest in creating an ''eligibility standard'' that would be based on a farmer's income or sales.

Rep. Dan Glickman, D-Kan., has said an eligibility standard might be more palatable than the two other budget choices. Those are reducing target prices or limiting the number of acres eligible for federal payments.

Rep. Richard Armey, R-Texas, advocates a cut-off point on grounds it is wasteful to aid large-scale farmers.

During an impromptu session with reporters, Campbell said that if the cut-off point is set too low, it would discourage farmers from enrolling in the farm program and reduce the program's effectiveness in boosting crop prices.

Farm-state congressmen have cited those possibilities, too, as well as saying proposals based on sales levels ignore agriculture's low profit margins.

''I think we are going to have to address'' the payment limit, Rep. Charles Stenholm, D-Texas, said during the subcommittee hearing.

After pointing to the possibility a farmer could get up to $500,000 in payments under the current system, Stenholm said tighter rules would be needed just to maintain public support for the farm program.

Crop subsidies are estimated to cost $11.7 billion in fiscal 1991 if Congress makes no changes.

#90072u1665 03/13/1990 ~United Press International

PANAMA CITY, PANAMA (MARCH 13) UPI - President Guillermo Endara ended his 13-day Lenten fast Tuesday after losing 17 pounds, saying he had shared the hunger pains of the poor of his country.

''At the beginning of the fast, I announced it would last for an indefinite amount of time and that I would end it when my conscience tells me. I consider that the moment has arrived,'' Endara said at a news conference at the Metropolitan Cathedral, where he has lived and worked during the fast.

''No one needs to tell me what it is to suffer from hunger. I know it and I have endured it,'' Endara said.

Endara's weight dropped from 249 to 232 pounds during the fast, but he said he would probably gain the weight back because of his big appetite.

Endara said the fast was to show his solidarity with the poor and to make a sacrifice for Lent, but many believed he was trying to pressure the U.S. Congress to speed up the approval of a $1 billion aid package for Panama.

Endara denied the fast was related to U.S. aid, but said foreign aid would help bolster his country's economy, which has been crippled by two years of U.S. economic sanctions and over $1 billion in damage during the U.S. invasion last December.

''I must clarify in the first place that this fast has had nothing to do with the United States or the Congress or the aid,'' Endara said. ''If it has sensitized the opinion of any country, including the United States, that will be an additional benefit.''

Although Congress has approved $32 million of President Bush's $1 billion aid request for Panama, legislators are debating the remainder of the package. On Monday, White House spokesman Marlin Fitzwater acknowledged that there have been delays in moving the aid package through Congress.

Endara's government, elected last year in balloting annulled by strongman Manuel Noriega and installed during the U.S. invasion, is also struggling to overcome 30 percent unemployment, a dramatic increase in crime and a $4 billion foreign debt.

''I know that we will (recover),'' Endara said. ''It will be faster if we receive sufficient and timely aid. It will be slower if we are not given a hand on time.''

During the fast, Endara ran the government from the cathedral, where he was attended by several nurses and doctors and his fiancee, Ana Mae Diaz. He consumed only water and, although nurses said he was in good shape,

Endara appeared tired during an interview on the eleventh day of his fast.

In September 1989, Endara embarked on a 20-day hunger strike to protest the naming of Francisco Rodriguez as provisional president of Panama by Noriega, who was ousted during the U.S. invasion.

Endara has been criticized in the local press for fasting and the National Assembly designated a commission to ask the president to end the fast, saying that Endara was putting his life in danger.

WASHINGTON (MARCH 13) UPI - The Consumer Product Safety Commission and Baby Needs Inc., of Burlington, N.C., recalled some 25,000 pacifier holders Tuesday because a safety pin for attaching the holder could open and injure a child.

No injuries from the holders have been reported, officials said, but they urged parents to return the pacifiers for a refund to the store where they were purchased. They also can be returned to Cutoy Cooperature Association P.O. Box 2197, Burlington, N.C., 27216.

The pacifier holder, sold nationwide in 1989 for about $1.99, is a 2-inch brown plastic teddy bear figure, officials said. It features two ribbons with snaps at each end for attaching a pacifier and a safety pin on the back.

The package in which the holder is sold is labeled, ''Grow Time, Holder For: Pacifier-Teether Rattle, Interchangeable Ribbon, Item No. GT1026, ...Taiwan...''

#90072u1697 03/13/1990 ~United Press International

NEW YORK (MARCH 13) UPI - With President Bush calling on both sides to resolve the 27-day spring training lockout, Commissioner Fay Vincent and the two league presidents Tuesday discussed the likely postponement of Opening Day.

A spokesman for the commissioner's office could not say what, if anything, had been settled in the talk among Vincent, American League President Dr. Bobby Brown and National League President Bill White.

Both sides in the dispute acknowledge the season-opener cannot take place as scheduled April 2. The announcement, just a formality at this point, could come Wednesday.

Owners negotiator Chuck O'Connor said officials probably would not adjust the regular-season schedule on a daily basis, but instead cancel or postpone games a series at a time or a week at a time.

The commissioner's office gave no indication when negotiations with the union would resume.

A key owner has defended management's stance and assailed what he called ''old-time unionism.'' John McMullen, Houston Astros owner and a member of the Player Relations Committee, said that players lack respect for the game and are balking at a deal.

''The reason I'm pessimistic is that I've been in the meetings trying to get it done, and it just doesn't happen,'' McMullen said. ''I'm convinced we're faced with a situation where it is old-time unionism that's dominating instead of intelligence, brains and understanding.''

Ken Kowalski, a mediator with the Federal Mediation and Conciliation Service in New York, said he has spoken to both players and management.

''They know where we are,'' Kowalski said. ''The service is available. It's not a mandatory situation.''

Kowalski said he put in a call to Vincent that was never returned.

At a Washington news conference, Bush acknowledged concern about the stand-off.

''Yes, I'm a ball fan,'' said the former Yale first baseman, whose son George is part owner of the Texas Rangers. ''And I want to go to the opening game some place. Last year I went to the American League. This year I'd like to go to the National League, if possible.

''I don't want to intervene. ... But I would simply appeal to both sides to get the matter resolved so the American people can hear that cry 'play ball' again.''

Also acknowledging with chagrin that he had called the impasse a strike and received calls from concerned players, Bush said he would not follow the example of President Johnson and lock both sides of a labor dispute in a room until they reached accord.

Last year, Bush threw out the traditional first pitch at the Baltimore Orioles' season-opener.

Speaking at the Astros' spring training base in Kissimmee, Fla., McMullen criticized the union for its treatment of management's positions.

''They seem incapable of making a deal,'' ''McMullen said. ''The owners surrendered unconditionally, and now they refuse to accept the surrender. This is nothing more than just power. It's just taking and taking and taking.''

#90072u1701 03/13/1990 ~United Press International

BUFFALO, NY (MARCH 13) UPI - A former employee of a pump manufacturing company has filed suit charging customers were defrauded through the sale of more than $1 million worth of faulty pumps claimed to be in use in nuclear facilities, court officials said Tuesday.

In the suit filed in U.S. District Court, Jeffrey Jacob, a former quality assurance manager at Buffalo Pumps Inc., said faulty pumps will have to be removed ''to prevent a catastrophic occurrence.''

Jacob, employed by Buffalo Pumps from November 1978 to June 14, 1986, alleged the company installed a faulty pump at an FMC Corp. plant in Middleport, N.Y.

A pump malfunction at the plant caused the discharge of 50 pounds of methyl-isocyanate - the same chemical that was responsible for deaths and injuries in the Bhopal, India, disaster - on Nov. 15, 1984, but a strong wind dispersed the gas before it reached a nearby elementary school.

Jacob, in his complaint, said the company and its parents, Buffalo Forge and Ampco-Pittsburgh Corp., conspired ''to hide and cover up casting and other defects'' in an effort to defraud the government.

An Ampco-Pittsburgh spokesman would not comment on the allegations because the matter is in litigation. Buffalo Pumps sells most of its pumps to the military.

Jacob's suit seeks full restitution to the government, plus triple damages.

The complaint, which said the amount of damages to the government is not known, does not specify if allegedly faulty pumps were sold for use in government or commercial nuclear reactors but lists one nuclear facility - a Savannah, Ga., nuclear waste-processing plant owned by the government.

The lawsuit alleges that the plant had to remove 45 pumps and that Buffalo Pumps routinely sold the government and other customers pumps that did not pass inspections over a 30-year period.

Jacob charged the company treated faulty pumps with a sealant and concealed other defects. Military specifications forbid using sealants to cover up structural defects.

#90072u1716 03/13/1990 ~United Press International

PORT-AU-PRINCE, HAITI (MARCH 13) UPI - In a ceremony at the ornate national palace from which dictators have long ruled Haiti, Supreme Court Justice Ertha Trouillot was sworn in Tuesday as interim president, ending nearly four years of chaotic military rule.

''The army will stay in its barracks and will remain to serve the task of guaranteeing the security and well-being of all citizens,'' said Army Chief of Staff Herard Abraham, who has held power since dictator Prosper Avril resigned Saturday.

''Madame president of Haiti, the Army is at your command,'' said Abraham to the applause of about 400 people at the palace ceremony. The crowd included prominent Haitian businessmen and politicians, military officers, foreign diplomats and Haitian and foreign journalists.

Abraham then saluted the new president, removed his military cap, stepped forward and shook her hand.

''Brothers and sisters, I accept this heavy task on behalf of Haitian women,'' said Trouillot, 44.

She pledged, ''with the loyal help of the army,'' to work ''most rapidly to hold elections for the definitive government that the people will chose in liberty.''

She called Tuesday's installation of a civilian government ''the first step to save a Haiti that has been humiliated, pillaged and pushed to the limit.''

Switching from French to the Creole more widely understood by Haiti's poor majority, she said she wished to ''clean the face of the nation which had become disfigured.'' Trouillot, wearing a white suit with black trimming at the collar and carrying a white purse, spoke clearly and with great energy in her inaugural address.

Outside, a crowd estimated at upwards of 10,000 people cheered as she took the salute of the army while a band from the Presidential Guard played the national anthem.

She becomes the second civilian to take over the government since the collapse of the three-decade dictatorship of the Duvalier family in February 1986. Leslie Manigat served less than five months in 1988 before he was overthrown by Lt. Gen. Henri Namphy who had ruled following Jean-Claude Duvalier's departure for French exile in 1986.

Capt. Dieujuste Delima of the heavily armed troops at the palace said that elements of Avril's feared 1,000-man Presidential Guard were still guarding the palace because they are familiar with the security needs there.

One Haitian observer noted, ''This is an extremely dangerous situation - the army is a private one of the (Tontons) Macoutes and should be dissolved.''

He referred to the notorious secret police formed by the late President-for-Life Francois Duvalier who began the family rule in 1957.

Jean-Claude Roy, one of the 12 civilian leaders who in one week sparked the overthrow of the military regime and selected Trouillot as interim president, praised the new leader, the first woman chief executive since Haiti's West African slaves overthrew their French masters in 1804.

Roy noted that since the new president's late husband Ernst Trouillot was close to the Duvaliers, she might win support of Duvalierists still heavily in place in Haiti's power structure.

''We are happy with Trouillot because of her age, courage and willingness to assume that responsibility and because she is a woman and brings some support from women's groups,'' said Roy.

Louis Roy, a human rights activist who wrote Haiti's 1987 constitution and was driven into exile by Avril in January, returned to Haiti Monday and was appointed to the 19-member Council of State that will assist the president.

Louis Roy warned, ''The Duvalierists were defeated and will have to accept it but they won't go quietly. They have to play their last card.

''Members of the present administration are Duvalierists. Jean Claude left in 1986 but there was no fall of Duvalierism. We will start to know tonight or tomorrow if the army will face up to that threat.''

''The biggest problem is the security problem. The Macoutes are still in power - they have munitions and money.''

U.S. Ambassador Alvin Adams, who helped engineer the departure of Prosper Avril on a U.S. Air Force plane Monday, said, ''This is a great day for Haiti. The army has pledged to control itself and show respect for the constitution and uphold the democratic process.''

#90072u1734 03/13/1990 ~United Press International

VATICAN CITY (MARCH 13) UPI - Prospective Roman Catholic monks and nuns ''must be dismissed from religious life'' if they cannot overcome homosexual tendencies or think they can compromise on celibacy, a Vatican document released Tuesday said.

The firm instruction was contained in a 70-page booklet on the training of candidates in religious institutes issued by Cardinal Jean Hamer, prefect of the Vatican's Congregation for Institutes of Consecrated Life, with the approval of Pope John Paul II.

It laid down guidelines - including psychological testing - for training aspirants and also for judging the suitability of candidates for religious life, including prospective monks, nuns and other members of religious orders.

''Future religious should be offered the possibility of reflecting on the role of sexuality in the divine plan of creation and salvation,'' the booklet said.

''In this context, reasons must be given and understood to explain why those who do not seem to be able to overcome their homosexual tendencies, or who maintain that it is possible to adopt a third way, living in an ambiguous state between celibacy and marriage, must be dismissed from the religious life,'' the document said.

The document said candidates for religious life should be trained to follow the evangelical requirements of chastity, poverty and obedience.

''The evangelical counsel of chastity assumed for the sake of the kingdom of heaven, as a sign of the future world and a source of more abundant fruitfulness in an undivided heart, entails the obligation of perfect continence in celibacy,'' it said.

''The observance of perfect continence touches intimately the deeper inclinations of human nature,'' it said. ''For this reason, candidates ought not to go forward, nor should they be admitted, to the profession of chastity except after really adequate testing.''

The document warned against particular problems affecting young candidates who have grown up in the modern world.

''They have not been spared by consumerism, with the deceptions which it begets,'' it said. ''Succeeding, at times with difficulty, in finding their place in the world, some let themselves be seduced by violence, drugs and eroticism.

''It is becoming less and less rare to find young people among the

candidates for religious life who have had unhappy experiences in this last domain,'' the document said.

WASHINGTON (MARCH 13) UPI - President Bush pledged U.S. assistance to President Joaquim Chissano of Mozambique Tuesday, and the African leader said his government is ready for ''direct dialogue'' with rebels as soon as possible.

Chissano, 50, on a two-day visit to Washington, received a warm welcome for replacing the Marxist ideology of his nation's government with democratic and free market policies.

After talks and a luncheon at the White House, Bush told the departing leader: ''I look forward to working with you toward peace and democracy in Mozambique. I'm glad you came to the White House.''

In his farewell statement, Bush said, ''We pledge our assistance to meet Mozambique's humanitarian and political needs.''

He did not mention an amount of additional aid to Mozambique, which has been allotted $100 million in the current year, the same amount as last year.

Referring to the 13-year-old civil war that has taken hundreds of thousands of lives and forced 3 million Mozambicans to flee, Bush said, ''We urge all parties to talk at the earliest opportunity.''

The right-wing Renamo guerrillas in Mozambique were organized by white Rhodesia and South Africa as a counterweight to black-ruled neighboring countries. But the new South African government has cut out direct assistance to Renamo, the official said.

In parting, Chissano said he had informed Bush ''about the ongoing peace plan in my country. And I informed him on the decision of my government to enter into a direct dialogue with Renamo as soon as possible and about the measures already taken to bring this decision into effect.''

Bush said that the African leader's visit has enhanced the ties between Mozambique and the United States, and praised Chissano for ''strengthening the right to vote, the right to worship'' and bringing about other democratic reforms.

''These reforms have buoyed the Mozambican peace process and led to economic liberalization and privatization,'' Bush told Chissano. ''For that, I salute you and we look forward to even further reforms.''

Bush said that in their talks they had reviewed ongoing developments in southern Africa and explored political trends.

He praised Chissano for opening up the economic and political process, adding that ''as we learned about the world, democracy and development are related.''

''Mr. President, ours is a chance to act not merely for Mozambique but all of Africa,'' Bush said.

Chissano said that as a result of the talks, ''I believe we have taken another giant step forward.''

He thanked the United States for the stand it took on the war in Mozambique and ''the positive role it is playing in the peace process.''

#90072u1741 03/13/1990 ~United Press International

LONDON (MARCH 13) UPI - Maurice and Charles Saatchi, founders of the advertising and communications giant Saatchi and Saatchi PLC, said Tuesday they would voluntarily cut their annual salaries by 33 percent to $680,000.

The pay cuts were announced during a stormy annual meeting, during which

shareholders were told it was doubtful any dividend would be paid this year because of a drop in the company's earnings.

Saatchi officials, as part of a plan designed to restore investor confidence, said that the two founders' salaries would be reduced and that other company directors would take a 10 percent pay cut.

There had been speculation the brothers would resign at the meeting, but chief executive Robert Louis-Dreyfus said they ''have a vital role to play in the future of the company.''

One shareholder criticized Charles Saatchi's absence, but Maurice Saatchi defended him as a ''shy, private person who had not attended an annual general meeting in 19 years.''

Finance director Charles Scott said the company sold items from its art collection and made a $7.5 million profit on works that originally cost $3 million.

Scott said that the remaining art collection was worth about $12 million and that he did not expect any more art investments to be made in the near future.

#90072u1754 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Attorneys for a small Illinois thrift on the verge of being seized by regulators prepared Tuesday to argue that all actions taken by the Office of Thrift Supervision under former head M. Danny Wall were invalid.

U.S. District Court Judge Royce Lamberth was scheduled to hear arguments this afternoon about the propriety of Wall's appointment last August to head the agency.

Last week, Lamberth issued a temporary restraining order to block the OTS from taking any actions against Olympic Savings and Loan, a small thrift based in Berwyn, Ill., a Chicago suburb.

In its lawsuit, Olympic argued that all actions taken by the OTS under Wall's administration were invalid because Wall was never confirmed by the Senate to lead the agency.

Olympic attorneys now are seeking a preliminary injunction against the agency to prevent it from taking further steps against the thrift.

Bert Ely, a thrift industry consultant, said a ruling in Olympic's favor could pose serious problems for the OTS, which has seized 200 failed

savings institutions since it was created last August.

''It will be a mess,'' Ely said. ''I don't even want to think about it.''

Ely said Congress may be prompted to prepare emergency legislation to preent other savings and loans seized by regulators under Wall's tenure from challenging the authority of the OTS.

Wall, the former chairman of the Federal Home Loan Bank Board, became director of the OTS, which regulates the nation's thrift industry, when it was created in August as part of President Bush's $166 billion thrift bailout bill.

A provision of the bill allowed Wall to move from his position at the bank board to head the new OTS without undergoing confirmation hearings by the Senate.

Wall left the agency last week after resigning last December amid pressure from congressional investigation of the failure of Lincoln Savings and Loan Association and concerns that he downplayed the size of the looming thrift crisis.

In a series of quick moves, Bush last week named Salvatore Martoche, the Treasury's assistant secretary for enforcement, to head the agency temporarily until a permanent director is named.

On Friday, a White House spokesman confirmed reports that Bush has tapped Timothy Ryan, a former Labor Department attorney, to head the agency pending sucessful completion of a background investigation.

During his first few days in office, Martoche began signing new versions of a number of orders and decisions issued by Wall, the Washington Post reported. Banking lawyers saw this as a sign that the appointment of Martoche was linked to the Olympic case, the newspaper said.

Aside from the question of Wall's authority, Olympic is battling serious financial difficulties, including a negative net worth of $92 million on assets of about $1 billion at year's end, Ely said.

''This institution is not making it,'' Ely said. ''They are trying to postpone being taken over.''

#90072u1773 03/13/1990 ~United Press International

(MARCH 13) UPI - President Bush today lifted a five-year-old trade ban against Nicaragua. Bush also is calling for 300-Million dollars in aid to help Nicaragua rebuild its war-shattered economy. The moves come after

Sandinista opponent Violetta Chamorro was elected president in elections last month.

At a White House news conference this morning, Bush asked Congress to act by April 5th to approve economic aid to both Nicaragua and to Panama's new government. He told reporters- ''It is urgent to advance the prospect for democracy in Nicaragua and Panama. Damage to both economies has been great.''

President Bush remains opposed to any tax increases. But Bush says he's heartened by ''the very broad proposal'' to balance the budget offered by Congressman Dan Rostenkowski. The Illinois Democrat heads the House Ways and Means Committee. His plan calls for a tax hike, which Bush opposes. Bush says there will be NO deficit reduction talks any time soon.

Soviet President Gorbachev's decision to convene his nation's Congress three months early has paid off. Soviet lawmakers today voted overwhelmingly in favor of Gorbachev's plan for a new super presidency. They also decided to abolish the Soviet Communist Party's monopoly rule.

Nelson Mandela is calling for an increase in international sanctions against South Africa... including the severing of all diplomatic ties. The black South African leader also suggested to reporters in Stockholm, Sweden, today that he may snub British Prime Minister Thatcher during a visit to England next month. Thatcher lifted British sanctions against the white-minority government in South Africa.

#90072u1782 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - President Bush refused to be drawn into the Texas gubernatorial primaries Tuesday, keeping his vote secret and saying voters should decide whether previous drug use ought to be held against a candidate.

Bush, who calls Houston his adopted hometown, said he would be involved in the general election. Campaign appearances on behalf of the GOP gubernatorial nominee seem certain.

Clayton Williams appeared to be the likely winner of the four-way GOP primary Tuesday, while State Treasurer Ann Richards, former Gov. Mark White and Attorney General Jim Mattox battled for the Democratic Party's nomination.

Richards was once thought to be the heavy favorite. But the refusal by Richards, a recovering alcoholic, to say whether she had ever used illegal drugs cut into her support.

Bush, asked at a White House news conference if prior drug used should be held against a candidate, said, ''I think it is a matter for the voters to decide.''

''But in terms - in my view, somebody used marijuana sometime ago, and is not into anything of that nature, why no, I don't think it should be held against them,'' the president said.

The president declined to discuss his feelings on the matter if the drug were something stronger. He also declined, when asked, to reveal whom he voted for in the GOP primary.

''I did vote in the Texas Republican primary. I will not tell you who I voted for, and I hope everybody understands,'' he said. ''It's not a proper question to reveal.''

#90072u1787 03/13/1990 ~United Press International

NORTH BLENHEIM, NY (MARCH 13) UPI - A cloud of propane that leaked from a pipeline exploded in a huge ball of fire Tuesday, demolishing 10 homes, injuring six people and engulfing ''a whole hill'' in flames, authorities said.

Witnesses said the 7:36 a.m. explosion roared with the thunder of a jet breaking the sound barrier and sent flames shooting 60 feet into the air.

Six people were injured, two critically, authorities said. Earlier police reports that one person was killed in the explosion were incorrect, authorities said.

A rupture in a Texas Eastern pipeline spewed propane for about 5 minutes before the blast, police said.

Town Supervisor Robert Shaffer said he was heading out to his barn when he saw a ''huge white cloud of mist 1,000 feet in the air.''

The cloud was followed a few minutes later by the explosion that enveloped the rural Schoharie County town 30 miles southwest of Albany in a ball of fire.

Ten homes were reduced to ash, and five others were extensively damaged. Smoke wafted from the shells of burned-out cars at the side of Westkill Road, police said.

The explosion knocked all power and telephone service at least 6 miles from North Blenheim. Shaffer immediately declared a state of emergency and asked Gov. Mario Cuomo for assistance.

Residents said they called for help when the propane cloud formed, but the explosion occured before crews could arrive.

Jim Gately, a North Blenheim resident, nursed minor burns to his nose and arm and described how the explosion sounded ''like a bomb went off.''

''I heard this whoosh and my clothes were on fire. I jumped in the shower '' he said.

''It jumped us right out of bed,'' said resident Selma Milone. ''It was a very big explosion.''

Elizabeth Mace, who lives near the pipeline, said there was a ''horrendous explosion.''

''It sounded like a jet when it passes the sound barrier,'' she said. ''I looked out the window and the whole hill was on fire.''

Ed Collins, a Public Service Commission spokesman, said it was not known what caused the the 8-inch propane pipeline to rupture.

Two critically burned victims were taken to Albany Medical Center.

Greg McGarry, a hospital spokesman, said Richard Smith, 43, of Central Bridge, suffered second- and third-degree burns on 100 percent of his body while Robert Hitchcock, 53, of North Blenheim, was burned on 90 percent of his body.

Two others were being treated for burns at Ellis Hospital in Schenectady and were in satisfactory condition. Two other victims did not require hospitalization.

The explosion apparently occurred just moments after two school buses drove past the area, but no children were injured in the blast.

(MARCH 13) UPI - The lawyer for a Houston teen-ager described by prosecutors as ''Satan personified'' plans to appeal his client's conviction for the shooting death of another youth. Demetrick Walker was sentenced to life in prison yesterday for slaying a youth who refused to hand over his 125-dollar Nike Air Jordan basketball shoes.

The U-N Security Council's five permanent members are wrapping up talks on Cambodia that could lead to a major U-N role toward ending the 11-year-old conflict. Representatives of the United States, Britain, France, China and

the Soviet Union met in Paris... amid reports of continued fighting in the Southeast Asian nation.

Lawyers for the families of five children killed in the 1985 fire at a Philadelphia house of a cult group says the estates will get two and one-half-Million dollars. The deal calls for each family to get 500-thousand dollars. The children died when police in a helicopter dropped a bomb on the roof of the fortified house occupied by the MOVE cult.

NEW YORK (MARCH 13) UPI - The former butler of one of Pittsburgh's wealthiest socialites has filed a lawsuit for more than $1.5 million in damages, charging that he was fired when his employer learned he had AIDS.

Ironically, Frances Gilmore Scaife, charged in former butler Anthony Deleu's suit, which was filed last Wednesday in state Supreme Court in Manhattan, has been a prominent fundraiser for AIDS causes, such as Pittsburgh's AIDS Task Force.

Deleu, 47, of New York, claims Scaife fired him soon after he was diagnosed as having the AIDS virus last November. He said he had worked at her Fifth Avenue apartment in New York for seven years as butler, cook and cleaning man and was paid $325 a week by check.

Deleu's attorney, David Spears, said Mrs. Scaife never paid anything toward Deleu's health and unemployment benefits and he has been forced to go on welfare.

''He is asking for $1.5 million in tentative damages for discrimination, pain, suffering and expenses plus consequential damages for government benefits that she should have paid for, vacation pay he never got and time-and-a-half for overtime owed him because he worked seven days a week '' Spears said.

''He doesn't have the safety net to fall back on which employers are required by law to contribute to,'' he added.

Spears described Deleu's condition as ''not good'' but said his client was able to work at the time Scaife fired him.

However, Scaife's attorney, Jay Cohen, disputed this assertion.

''The claim Mrs. Scaife fired him over AIDS is baseless,'' Cohen said. ''She didn't know he had AIDS. She let him go because he couldn't perform his duties.''

Scaife is married to Pennsylvania newspaper publisher Richard Mellon Scaife, a great-grandson of 19th century banker Thomas Mellon. Mellon founded a dynasty of financiers that included Secretary of the Treasury Andrew Mellon, who started the National Gallery in Washington.

Scaife's husband, a social registerite who is listed in the Forbes ''400 Richest People in America,'' is reported to be worth more than $600 million by Forbes magazine.

She has been separated from him for several years and maintains homes in both Pittsburgh and New York. The Scaifes have two children.

#90072u1797 03/13/1990 ~United Press International

BRUSSELS, BELGIUM (MARCH 13) UPI - European Community car makers must boost productivity to match Japanese competition when a single market of the 12 EC member states is established at the end of 1992, officials said Tuesday.

They said a large consensus developed at a one-day meeting of EC industry ministers on two major policy lines - an increased, systematic research and development effort, and complete technical harmonization within the EC.

The EC has already approved several directives to harmonize technical norms for cars between the member states. The last few directives have been submitted by the executive Commission to the council of ministers.

Once they have all been approved, the various directives will have to be capped with a general one, making them all mandatory in all member states, officials said.

It will be a great stride forward when there is a unified certification procedure for cars throughout the Community, instead of 12 different procedures, officials said. But that will also benefit foreign exporters who will need only one certification to sell their cars freely throughout the EC.

Officials said the European automobile industry has made great efforts to rationalize its production in the past few years. This has paid off in an increase in profits from $2.5 billion in 1986 to $12 billion in 1989.

But only the most productive European car makers can compete with the best ones in Japan, officials said. It takes those European manufacturers 23 working hours to produce a car, against 20 in Japan.

The gap, however, becomes enormous when performances of the least

productive factories are compared: where in Europe it takes 56 hours to build a car and in Japan only 26.

The European industry produced 13.3 million cars last year of which about 1.4 million were exported. Japan produced 9 million cars, exporting nearly half of them, officials said.

Another significant factor is that Japanese car makers are present in the three major markets in the world - Asia, North America and Europe, officials said.

EC car makers should try to match that, whereas at present most of their production is sold in Europe, they said.

The Japanese car industry has achieved this partly by abandoning the idea of a ''world model'', namely one that can be sold everywhere. Instead Japanese car makers have understood they should take into account regional taste, purchasing power, traffic patterns.

Officials said further mergers and increased cooperation may enable European car makers to bridge gradually the competitivity gap with Japan, also because they would bring down considerably the high cost of research and development.

BILLINGS, MT (MARCH 13) UPI - Former state Sen. Dave Manning, once the dean of U.S. state legislators with 53 years of service, has died at age 93.

The coal country Democrat died Sunday night at a nursing home in Billings.

Manning unseated a Republican incumbent representative in a strongly Republican district during the Franklin Roosevelt landslide of 1932, and represented Treasure County in the House and later the Senate for 53 years.

When illness forced his resignation from the Montana Senate in 1985, no U.S. legislator had served longer or represented a larger district.

Manning was the focus of national attention in the 1960s when the U.S. Supreme Court ruled that state legislative districts must be drawn on the basis of population, ''not trees or acres.''

''I do represent cows,'' Manning said. ''I represent cows, acres, trees, coal and a lifestyle.''

Manning was born on a farm near Chippewa Falls, Wis., on Feb. 28, 1897, and moved with his family to Billings when he was 7 years old. He married Ruth Ann Clark in 1920. She died in December.

#90072u1826 03/13/1990 ~United Press International

ASPEN, Colo. (MARCH 13) UPI - One month after soundly defeating a proposal to ban the sale of furs in this upscale mountain resort, residents voted Tuesday on recalling Mayor Bill Stirling, the man responsible for the fur-ban proposal.

Voters also were deciding the political futures of three other city councilmen who have been criticized as slow-growth opponents of progress. They were given that label after opposing construction of a 298-room hotel at the foot of Aspen Mountain.

Informal polls before the election indicated that Stirling and councilman Steve Crockett, who once described his constituents as ''idiots,'' stood the best chance of being recalled. Also facing recall were Councilmen Michael Gassman and Frank Peters.

The only councilman on the five-member Council not facing recall was Bill Tuite.

The four up for recall have been accused by their opponents of governing by confrontation, being rude to constituents, trying to scuttle the already approved Ritz-Carlton hotel project, neglecting traffic and housing problems, and promoting causes such as Stirling's proposed ban on wild-animal furs.

Running against Stirling is fitness club owner Terry Butler, who lost by 300 votes to Stirling just a year ago.

One of those backing Stirling is lawyer Mick Ireland, who said many of the longtime residents of Aspen believe that ''newcomers are changing the values system here.''

''For many years, people moved to Aspen simply to live a life that wasn't directed at career accomplishment and acquisition of material goods. There are people now whose sole view of Aspen is as a product.''

BUCHAREST, ROMANIA (MARCH 13) UPI - The United States granted $80 million in food and loans to Romania Tuesday with a provision the aid will be frozen if the nation's new government does not hold free elections and work toward creating a market economy.

Philip Christenson, a representative of the U.S. Agency for International Development (USAID) said a shipment of butter and grain would arrive within six weeks under the pact, the first-ever aid agreement between the two nations.

Christenson signed the agreement at the Romanian Agriculture Ministry and said the package reflected the world's admiration for the ''courage of the Romanian people'', who last December toppled Nicolae Ceausescu's government, which he called ''a vicious and dictatorial regime.''

The aid is aimed at helping the nation's beleaguered agricultural sector by providing 315,000 tons of grain, 7,500 tons of butter and a $29 million low-interest loan for animal foodstuffs to be paid back over 25 years.

''The United States has made it clear that this humanitarian assistance is provided with the understanding that Romania is dedicated to the establishment of democratic institutions and a market economy based on the principles of freedom and opportunity, and its holding free and fair elections open to international observers,'' Christenson said.

''The entire American people look forward to a rapid development of their relationships with Romania as a democratic, market-oriented nation,'' he said.

#90072u1832 03/13/1990 ~United Press International

BY WILLIAM B. RIES - UPI

JERUSALEM (MARCH 13) UPI - Barring a last-minute reconciliation between the Labor and Likud parties, the Arab-Israeli peace process appears to be the chief victim of the breakup of Israel's governing coalition.

With the sacking of Labor Party Chairman Shimon Peres from the Cabinet and the subsequent resignation of 10 Labor ministers, Israel again entered a period of political turmoil that is likely to take several weeks, if not months, to resolve.

With the upheaval, the focus has shifted from the peace process to the Byzantine world of Israeli power politics. Until either Labor or Likud is firmly in power, no progress in resolving the Palestinian question can be expected.

If Labor's attempt to pass a no-confidence vote this week in the Parliament succeeds, the government of Prime Minister Yitzhak Shamir will fall and the peace process will not move forward until a new coalition government is formed or new elections are held.

In either case, it is not certain that Labor will emerge victorious.

If Labor did form a government, it probably would pursue the peace process actively. But it is not clear how far it could advance in negotiations with Palestinians if it lacked a broad consensus in the government.

If Shamir defeats the no-confidence votes, he likely will fill the vacant Cabinet seats with members of the right-wing political parties and religious parties that supported him.

In that scenario, Shamir will be unable to propose any advances in the peace process because of the extreme right-wing positions of the Cabinet members who helped him stay in power. This was what he tried to avoid when he agreed to the coalition with Labor in December 1988.

Both Labor and Likud have tried to portray the other as the one that is not willing to remain in the coalition government to pursue the peace process.

But the breakup of the coalition was the result of fundamental differences between Labor and Likud over the ultimate goals of the peace process and which Palestinians could participate. The differences have simmered below the surface and several times threatened to split the government.

Until now, Labor and Likud leaders managed to patch together compromises that allowed the government to continue.

One of the basic disagreements was over the involvement of East Jerusalem Arabs in the peace process. In his May 1989 peace initiative, Shamir left

vague their role. Both sides had agreed to discuss the matter later.

But this month Shamir did not have the backing of his party to avoid the issue once again when Secretary of State James Baker offered a plan to put together a delegation with West Bank Palestinians who had second addresses or offices in East Jerusalem.

The prime minister was forced to oppose the plan or risk a full revolt within his party. Likud ministers fear the participation of East Jerusalem Arabs will lead to negotiations on Israeli sovereignty over the city.

#90072u1834 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - President Bush's entourage pulled into a Sunoco station Tuesday to inspect the first methanol fuel pump in the nation's capital.

Climbing into one of first of the government's fleet of ''flexible fuel'' cars, Bush gunned the engine for a slew of photographers before proclaiming the visit part of a ''national effort to reduce air pollution.''

And again hailing compromise clean air legislation pending on Capitol Hill the president said, ''The federal government is trying to lead by example. This is part of our overall answer to those who worry about cleaning up the environment, as we do.''

William Reilly, head of the Environmental Protection Agency, also dismissed suggestions of a dozen or so protesters near the station in a rundown part of town that Bush had caved in to industry pressure in jettisoning his original proposal to order 1 million such cars on the nation's highways.

#90072u1845 03/13/1990 ~United Press International

CHICAGO (MARCH 13) UPI - The grain market drifted lower throughout the day Tuesday on the Chicago Board of Trade in relatively quiet activity.

Closing prices were at or near session lows.

Improving soil moisture conditions across the Grain Belt pressured the entire floor. Rainy weather was reported in much of the area and more rain was in the forecast the rest of this week.

Soybeans were lower across the board, despite fairly good demand from locals and commission houses. Nearby soybean oil futures were sharply

lower which contributed to the weakness in soybeans.

Oil prices fell on profit-taking and the lack of export business, while soybean meal was lower in sympathy with the rest of the complex.

Corn made session lows just before the final bell. Trading ranges were narrow and buying interest was light. Scattered protection of up to two cents on corn also weighed on corn prices.

Wheat followed corn to lower levels and ended the day with moderate losses.

At the close, corn was off 1 to 3 1/4, soybeans down 4 1/4 to 6 3/4, wheat off 1 to 4 and oats down 1 3/4 to 2 3/4 cents.

#90072u1851 03/13/1990 ~United Press International
LONDON (MARCH 13) UPI - Britain pressed on Tuesday with diplomatic efforts to save a journalist condemned to death in Baghdad on espionage charges, and said Iraqi President Saddam Hussein has not formally responded to pleas for mercy.

No date has been set for the execution of Farzad Bazoft, 31, condemned on Saturday by an Iraqi military court.

The tribunal ruled Bazoft was spying last September when he disguised himself as a doctor to enter a military zone to investigate reports of a massive explosion for the Observer newspaper in London.

The judges also handed down a 15-year sentence to Daphne Parish, a

52-year-old British nurse who allegedly helped Bazoft - an Iranian expatriate with British residency - to enter the restricted area.

Britain, European Community nations and various human rights groups have issued numerous appeals to Hussein, who must confirm the sentence and has the sole power to grant mercy.

Prime Minister Margaret Thatcher asked King Hussein of Jordan, who is visiting London, to use his influence over the Iraqi leader, officials said.

Iraqi Information Minister Latif Sayed Jassim said on Monday Bazoft and Parish had been fairly tried under the nation's laws, and criticized an outcry by the Western media as being tantamount to interference in Iraq's internal affairs.

But a Foreign Office official said Jassim's statement was regarded as a comment, and that there had been no response from Baghdad through official channels.

The official would not comment on suggestions that Foreign Secretary Douglas Hurd should fly to Iraq on a mercy mission, but said British diplomats were calling on ''friends and allies in the Middle East and elsewhere'' to enlist their support.

''Our efforts to save Mr. Bazoft's life and to reduce Mrs. Parish's sentence continue,'' he said. ''We must remember that there is a man's life at stake.

''A number of other countries and domestic and international organizations have joined our campaign for the government of Iraq to commute the death sentence,'' he said. ''There has been no Iraqi response to our appeals for clemency.''

At the United Nations, spokeswoman Nadia Younes said British officials had contacted U.N. Secretary-General Javier Perez de Cuellar, who was ''conducting discreet and confidential diplomacy'' to assist London.

Deputy Foreign Minister William Waldegrave in Parliament on Monday expressed his ''dismay and horror at the unjustified sentences,'' which he said were ''out of all proportion to any offense which may have been committed.''

''(Iraq) can be in no doubt about the damage that would be done on her standing in the world, and along with her relations with the United Kingdom, if these unacceptable sentences were confirmed,'' Waldegrave said.

In Strasbourg, France, a motion was moved to hold an emergency debate on

Thursday in the European Parliament.

#90072u1870 03/13/1990 ~United Press International
NEW YORK (MARCH 13) UPI - The American Paper Institute presented Tuesday its strategy to protect the environment and forest resources while boosting waste recycling to help meet growing demand for paper products.

''Recycling has a dramatic and positive impact on our industry,'' API Chairman Thomas Norris told the institute's annual meeting. ''By 1995, we will recover about 40 million tons of waste paper a year, amounting to a 40 percent recycling rate, probably the maximum level of recycling we can achieve.''

Norris pointed out that recycling was bringing the paper industry back to where it started 300 years ago, when ragmen collected discarded pieces of fabrics which were turned into cotton fiber paper at the first U.S. paper mill built in Philadelphia in 1690.

''We began as a recycling industry and recycling now is a vital component

of our future growth,'' said Eugene Cartledge, chairman of Union Camp Corp., and a panel member on the key conservation issue discussed at the industry's 113th meeting.

In 1989, the U.S. production of paper and paperboard amounted to 76.5 million tons for a $112 billion market, while about 26 million tons of waste paper were recovered and used in various recycling sectors.

If the paper industry meets its 1995 goal to recover about 40 million tons of waste paper material, this could amount to about 30 percent of the raw material needed, an API estimate said.

Cartledge warned that waste management measures were a must not only for the waste-intensive paper industry, but for every American.

''This country will have to change the way it is managing its waste as landfills are no longer politically acceptable,'' Cartledge added. ''No one wants waste to end up in their backyards. It is our role to promote what we have done ourselves.''

A key issue in recycling paper waste is collection, which must be improved by separating collectible material from the rest of the garbage, an area which needs to come under more government control, Cartledge said.

''About 36 percent of municipal solid waste is paper or paperboard,'' he said. ''We'll recycle everything we can recover ... and we should work with the government to improve collection programs.''

Cartledge announced that the paper industry will set up a nationwide ''Match Maker'' database that will list all waste collection companies as well as corporations which can recycle or use waste as an alternative source of raw material or energy.

Norris stressed that the U.S. paper industry has been for two decades a leader in waste recycling and energy saving.

''Half of the energy consumed by our industry comes from recycled refuse, resulting in savings of 200 million barrels of oil a year,'' Norris said, stressing that environmental measures contributed to the industry's profitability.

Westvaco Corp. President John Luke said the paper industry has invested $8 billion in environmental projects since 1970. He outlined a number of areas where the U.S. paper industry will focus its efforts to combine growth and environment protection, including reforestation, clean air measures, and water and energy conservation.

Luke also said paper manufacturers are working with wildlife organizations

to protect the habitat of endangered species.

''The industry is replanting 2 billion trees per year, a growth rate which exceeds all removals by 20 percent,'' Luke said. ''We have reduced water use by 40 percent and solid waste by 95 percent,'' down from industry levels in the early 1970s.

Over the same period, the U.S. paper industry spent $4 billion to reduce air pollution created by the chemicals used in the manufacturing process, he said.

''While U.S. imports of oil have been going up since 1982, the paper industry replaced 57 percent of its energy needs by using industry refuse '' Luke said.

Postmaster General Anthony Frank presented a new 15 cent stamp to commemorate the 300th anniversary of the U.S. paper industry and said the U.S. paper industry produces 31 percent of the world's paper output, while the U.S. postal service handles 40 percent of the world's mail.

Frank defended the proposed 19 percent increase in mail rates to go into effect in February 1991, which he said was necessary to keep the U.S. postal service ''the best in the world.''

WASHINGTON (MARCH 13) UPI - Federal officials and AIDS activists stood firmly behind a plan Tuesday to give AIDS patients earlier access to promising experimental drugs, despite a furor over deaths linked to the unapproved drug DDI.

A controversial proposal to establish a ''parallel track'' of testing for AIDS drugs has been under review by the Health and Human Services Department for four months.

Under the plan, some experimental drugs would be provided to AIDS patients who have no other treatment options, but who cannot take part in traditional drug tests for medical or travel reasons. A second track would consist of patients eligible for the more strictly monitored tests required for government drug approval.

Currently, it takes about eight years for the average drug to reach the market, FDA officials said. Past efforts to speed up the delivery of drugs to AIDS patients, including allowing early use of experimental drugs on a case-by-base basis, have not met the widespread need, activists said.

Dr. James Allen, director of the National AIDS Program Office, Tuesday

said the parallel track plan has undergone ''no significant changes'' since an expert panel submitted the proposal to Health and Human Services Secretary Louis Sullivan in December.

Allen refused to estimate how long it would take before the policy statement authorizing the parallel track strategy is published in the Federal Register. But he added, ''We are very hopeful that things will move quickly.''

Earlier this week, Bristol-Myers Squibb Co.'s free, ''early access'' distribution of the drug dideoxyinosine (DDI) - considered a prototype for the parallel track - came under attack for the number of deaths among patients.

Bristol-Myers confirmed drug-related inflammation of the pancreas killed five of 8,000 AIDS-infected people who received DDI in the new plan, as well as one of 700 patients who got it through traditional channels.

When AIDS-related deaths are added to pancreatitis deaths, 290 of 8,000 patients taking DDI in the free expanded access distribution program have died, compared with two of the 700 patients in traditional tests, a company spokeswoman said.

Much of the disparity probably stems from the tendency of patients in the expanded access plan to be sicker than those in traditional tests, the spokeswoman said.

Dr. Daniel Hoth, head of the AIDS division of the National Institute of Allergy and Infectious Diseases, praised Bristol-Myers for taking the lead in providing experimental treatment to those ''who no longer have hope from standard therapies.''

''I think it is going very, very well,'' Hoth said told an Institute of Medicine meeting. Unlike some other researchers, Hoth found no serious problems with the rate at which Bristol-Myers is enrolling patients in traditional tests needed for DDI's final approval.

Worries about DDI's safety have been ''overstated,'' Hoth said, adding he thinks it is too early to judge whether the benefits of the new approach outweigh its risks.

Others speaking out in support of the parallel track were Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases; Dr. Ellen Cooper, head of anti-viral drugs for the Food and Drug Administration and Jim Eigo of New York's AIDS Coalition to Unleash Power (ACT-UP).

But Eigo expressed concern about how long it is taking the government to

implement the strategy, first embraced by federal health officials in July.

''Unless we see some movement very soon, it will be time for AIDS activits tired as we are, to push again,'' he said. ''I still think the parallel track is a major breakthrough. I just wish it were in effect.''

#90072u1883 03/13/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (MARCH 13) UPI - Salvadoran leftist rebels said Tuesday they would stop assassinating civilian officials and cut back economic sabotage in an attempt to prompt President Alfredo Cristiani's conservative government to soften its conditions for stalled peace talks.

''With these gestures, we are trying to unblock the path toward the initiation of negotiations'' aimed at ending the decade-old civil war, said Schafik Jorge Handal, one of five top commanders of the rebel Farabundo Marti National Liberation Front, known by its Spanish initials as FMLN.

The government issued no immediate response to the FMLN announcment.

In telephone interviews broadcast in San Salvador by several private radio stations, Handal read an FMLN communique promising to halt ''attacks against public officials and other civilians'' as well as sabotage directed at public transportation, commercial establishments and the telephone system.

The FMLN measures are to go into effect Friday.

The concessions fall short of Cristiani's conditions for restarting the peace talks. Cristiani has demanded since Dec. 9 that the rebels first halt ''all military actions directly or indirectly affecting the civilian population.'' The government has also demanded that rebels cease their extensive sabotage of the electrical power system and shift the emphasis of military operations from urban centers to sparsely populated rural regions.

The FMLN brought the civil war to major cities in November during a massive offensive that centered on the capital. The war between the FMLN and the U.S.-backed Salvadoran government has cost more than 72,000 lives.

Handal characterized the government's demands as ''stumbling blocks'' and said they could lead to ''a deepening of the confrontation.''

''It appears that the basis of this insistence on preconditions is an attempt to draw out of the conflict in hopes that recent events in Nicaragua will lead to a supposed weakening of the FMLN,'' Handal said,

referring to the recent defeat of Nicaragua's leftist Sandinista government in national elections.

''This is a bad calculation,'' Handal said. The government ''should not oblige us to new demonstrations'' of military strength, he said.

A Western diplomat said the FMLN measures made public Tuesday had already been offered privately to the government through a United Nations intermediary, but that the government had stood by its original demands.

Two rounds of talks between Cristiani's 7-month-old administration and the rebels were held late last year, but the dialogue was cut short when the rebels canceled a third encounter and launched their November offensive, the biggest of the war.

At the time, rebel commanders said they broke off the talks because of suspected government involvement in the bombing of a union hall that killed nine people, but they have since said November offensive was launched because the talks were leading nowhere.

In recent weeks, U.N. envoy Alvaro De Soto has shuttled between FMLN commanders in Mexico City and government officials in San Salvador in a renewed attempt to bring the two sides to a negotiating table.

#90072u1886 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Mayor Marion Barry, returning to the nation's capital after seven weeks of substance abuse treatment, said Tuesday he will not resign from office and will put his cocaine and perjury trial in the hands of God, his attorney and a judge and jury.

Barry used most of a 30-minute speech in forthright discussion of his alcoholism, and he revealed for the first time he also was addicted to the drugs Valium and Xanax, both anti-stress medications.

His speech at the city's Reeves Municipal Center was interrupted periodically by supporters chanting ''Four more years,'' but Barry refused to say if he will seek a fourth term as mayor despite his legal difficulties. He said he would announce his intentions in the ''very near future.''

''I'm back. I feel good about my treatment program. I feel good about myself, about my wife and our son,'' said Barry, 54, whose appearance was billed as his first news conference since his Jan. 18 drug arrest although he refused to answer questions.

Barry said he will attend ''one or two'' public 12-step treatment programs

such as Alcoholics Anonymous, each day. He did not mention cocaine.

Barry's spokeswoman, Lurma Rackley, said later City Administrator Carol Thompson will continue to handle most of the city's day-to-day operations, powers Barry handed over to her Jan. 19.

''The mayor is going to phase himself back into a schedule that will not be as hectic as before,'' said Rackley.

Faced with preparing for a June 4 trial on eight cocaine and perjury charges, Barry said he will spend more of his time dealing with personal issues.

''My life will be more balanced now,'' he said, looking healthy and smiling at supporters. ''I must spend more time on myself, my family.''

Barry returned from the Fenwick Hall substance abuse center near Charleston, S.C., after undergoing treatment there since Feb. 22. He entered Fenwick Hall after 31 days of treatment at the Hanley-Hazelden Center in West Palm Beach, Fla.

Rackley would not say whether Barry returned to the city Monday night or Tuesday. Before his return, Barry had been in the city only one day since Jan. 22, that was for his arraignment on three felony perjury and five misdemeanor cocaine possession charges Feb. 28. He pleaded innocent.

Barry was arrested Jan. 18 in a downtown Washington hotel, reportedly after smoking crack cocaine. He was later indicted on the further charges, but maintained his problem involves alcohol, not cocaine.

Barry said he had ''no idea of the depths of my problem.''

''I had known for a long time that there was something very wrong. I no longer felt as good about myself as I once did,'' he said. ''But I convinced myself I didn't have a real problem, because I didn't drink in the morning before I went to work. I didn't drink at the middle of the day at work, except when I went to lunch, maybe. I didn't beat my wife as some alcoholics do. Paid my bills on time, mostly on time. Paid my mortgage each and every month.''

Barry also said he learned he had been suffering from ''repressed anger.''

''Repressed anger is when you get angry and just stuff it inside of you, and many of you have done that, haven't you?,'' he said. ''Can't express it outwardly, just express it inside. Also, I was suffering from prolonged and overwhelming stress. This job is a very stressful job, but I did not learn how to deal with it very well.''

He said there was ''never a question in my mind'' about resigning.

''There is no serious or logical reason to resign'' his term, which ends next Jan. 2, Barry said. ''A person is presumed innocent until proven guilty.''

Under city law, Barry would be barred from holding office only if jailed after conviction of a felony.

''I'm going to turn the outcome of this (his June 4 trial) over to God, my attorney, U.S. District Judge Thomas Penfield Jackson and the prospective jurors,'' Barry said.

If convicted of all charges, Barry could face 20 years in prison and $1.25 million in fines. An ongoing federal probe reportedly has widened to include allegations Barry may have given city contracts to friends who provided him with drugs.

The city is renovating a small room in the basement of Barry's Southeast Washington home as an office. He is expected to spend less time than usual at his high-profile District Building office.

A group calling itself ''Citizens for Mayor Barry,'' headed by his close political aide Anita Bonds, used Barry's return to publicize the Marion Barry Defense Trust, an effort to raise money for his legal fight.

BALTIMORE (MARCH 13) UPI - University of Maryland surgeons said Tuesday they have performed what they believe is the nation's first gallbladder surgery using only a local anesthetic.

The patient, a 32-year-old opera singer who did not want a general anesthetic for fear of damage to her vocal cords, had gallbladder surgery Monday by an incision through her navel.

University surgeons have had success with the operation, performing about 100 of the procedures since October, but had never before completed the operation with only local anesthesia.

''We are in close contact with the major players in this rapidly growing

technique, and as far as we know, this patient is the first to undergo gallbladder surgery without general anesthesia,'' said Dr. Robert Bailey, an assistant professor of surgery at University of Maryland.

Doctors said most patients, with problems such as gallstones, could have the surgery in an ambulatory setting and be discharged the same day.

Surgeons use a laparascope, a tube with a tiny lens on one end and a miniature video camera at the other end, to puncture the abdomen and reach the gallbladder.

Monday's operation lasted just 55 minutes, and the patient, opera singer Melissa Locher of Carlisle, Pa., needed only an anesthetic in her spinal cord for doctors to remove troubling gallstones. Locher remained overnight at the hospital for observation, hospital officials said.

With the navel incision, Locher avoided undergoing more complicated surgery that would cut through stomach muscles she uses for singing and using an endotracheal tube down her throat that might have affected her vocal cords.

''She feels she definitely chose the right course,'' said Mark Stambaugh, Locher's husband. Locher soon will get her ''first real break'' with the Washington Summer Opera, he said.

#90072u1962 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Defense Secretary Dick Cheney confirmed Tuesday he is discussing with Israel a possible sale of the sophisticated Patriot air-defense system to counter the spread of ballistic missiles in the Arab world.

''We have talked with the Israelis ... about a number of ways of dealing with the increasingly sophisticated ballistic missile threat basically, and the air threat to Israel in the Middle East,'' Cheney told the United Jewish Appeal's Young Leadership Conference meeting in Washington.

He added that ''the efforts involve discussion of such things as early warning radars'' and the Patriot, which is a sophisticated air defense system that has significant capabilities.

''We have not yet finalized arrangements in this area, but it is one of a number of measures that's under discussion that would enhance Israeli capabilities against possible future threats,'' Cheney said.

The proposed sale of the Patriot system, which can detect and shoot down tactical ballistic missiles, was first reported last week by The Los

Angeles Times and later confirmed by U.S. defense officials who requested anonymity.

The sale reportedly would be worth more than $200 million.

The Patriot system, which would be alerted by U.S. satellites to approaching missiles, would mark the introduction of a high-tech missile-defense shield to the Middle East for the first time. It is already employed in Europe.

Cheney is scheduled to visit Israel and other nations in the Middle East in May to hold talks on security matters and the issue is likely to be raised again.

The world has seen a proliferation of tactical ballistic missiles in the Middle East during the past several years.

Iran and Iraq fired tactical ballistic missiles at each other in the so-called war of the cities in 1988, and last December Iraq test-launched a ballistic missile that reportedly had the range to reach Israel.

In addition, Saudi Arabia has a number of Chinese-built tactical ballistic missiles, and Syria is believed to be negotiating to buy missiles with a range of 375 miles from China.

Israeli officials are concerned such missiles fitted with chemical or conventional warheads could be used to terrorize Israeli cities.

Defense officials said the Patriot system could be operational in Israel by late 1991 - nearly 10 years earlier than Israel now expects to complete work on the its own anti-ballistic missile system, the Arrow.

In answer to other questions, Cheney called the U.S. intelligence reports that Libya is developing chemical weapons ''worrisome'' and said the United States is watching developments in Libya ''very closely.''

He also defended the sale to Egypt of 700 M-60A1 tanks, now being used by U.S. forces in Europe, against criticism that it is fueling a Middle East arms race. He said Egypt will destroy ''one for one'' the old Soviet tanks it now uses.

#90072u1979 03/13/1990 ~United Press International

ANCHORAGE, AK (MARCH 13) UPI - A defense alcohol expert Tuesday said Exxon Valdez skipper Joseph Hazelwood would have had to consume least a dozen shots of vodka and would have been staggering drunk if he had as much to drink before his tanker hit the rocks as the prosecution maintains.

But prosecutor Brent Cole suggested that perhaps the Exxon Valdez skipper consumed a dozen vodkas in six double shots - prosecution testimony is that Hazelwood had five vodkas - and that Hazelwood had become an expert at masking his intoxication.

Defense alcohol expert Thomas Burr said it would be very unusual for Hazelwood to be as drunk as alleged and not show any signs of it. Not a single witness has testified that Hazelwood exhibited any signs of impairment - even as he negotiated the gangway to the tanker.

However, Burr acknowledged that some individuals develop a tolerance to alcohol and can mask the symptoms of intoxication - the prosecution contention in Hazelwood's case.

Using the prosecution's calculations of Hazelwood's alleged drunkenness, Burr figured that the skipper would have had to have consumed a dozen vodkas, perhaps more, during a day ashore in Valdez March 23 in order to achieve the level of alcohol in his blood computed by the prosecution expert for the time of the wreck.

Burr attacked the core of the prosecution's case that Hazelwood was intoxicated. Burr criticized as unreliable the backwards extrapolation used by prosecutors who took Hazelwood's blood almost 11 hours after the wreck, found a 0.061 alcohol level and calculated that the skipper probably had a 0.14 level at the time of the grounding.

The legal limit in Alaska is 0.10 and one of the four charges against Hazelwood is that operated the Exxon Valdez last March while he was intoxicated.

Despite Burr's rejection of the backwards calculation theory that produced the probable level of alcohol in Hazelwood's blood, he wavered under cross-examination and acknowledged that he, too, had used the so-called retrograde extrapolation theory in Minnesota, where he works as an alcohol intoxication specialist.

Burr said he used the controversial calculations to determine someone's blood alcohol level up to three hours before a blood alcohol test but would never try to calculate as far back as 11 hours before a blood alcohol test.

Cole said the 11-hour backwards extrapolation performed by prosecution toxicologist Richard Prouty of Oklahoma was accurate because all alcohol in the stomach would have been absorbed and the subject would be eliminating alcohol at a fairly predictable rate.

Both sides said the theory required that the subject had stopped drinking.

If Hazelwood had any alcohol on the ship after the wreck, then the prosecution's alcohol calculation for the time of the wreck is invalid.

The Exxon Valdez ran aground about 12:04 a.m. March 24. The only blood sample taken from Hazelwood occurred at 10:50 a.m.

Hazelwood also is charged with reckless endangerment, negligent discharge of oil and criminal mischief. The 43-year-old Huntington, N.Y., mariner faces up to seven years, three months in jail and a $61,000 fine if convicted.

The Exxon Valdez grounding on Bligh Reef broke open the tanker and caused nearly 11 million gallons of oil to spread out into Prince William Sound.

TOPEKA, KS (MARCH 13) UPI - A federal judge has issued a temporary

restraining order to prevent the Office of Thrift Supervision from appointing a receiver for the largest savings and loan in Kansas.

U.S. District Judge Dale Saffels issued the order Monday, saying Franklin Savings Association and its parent company had raised questions about the government's handling of Franklin. Saffels issued the order after Franklin filed a legal challenge to its takeover by the OTS.

''Our case, we believe, is singularly different than most (involving thrifts) that have come up,'' Roger Stanton, an attorney representing Franklin, said Tuesday.

Franklin, of Ottawa, wants to block the appointment of a receiver, which would have authority under federal law to liquidate the thrift. The temporary order prevents the appointment until March 23, when Saffels will consider issuing a permanent injunction that would bar such an appointment.

The OTS took over Franklin Feb. 16, saying it was insolvent and operating in an unsafe and unsound manner. The regulator then appointed another government agency, the Resolution Trust Corp., as conservator to run the $11.4 billion thrift.

Franklin was declared insolvent after the government ordered the company to declare $396 million in losses it had planned to defer or did not expect.

The OTS and the Federal Deposit Insurance Corp. had challenged Franklin's deferral of $200 million in losses from its interest-rate hedging program. Franklin said the company and its accountants thought that losses on financial futures were handled correctly.

In a suit filed Monday, Franklin's owners contended that the thrift was not insolvent and that the OTS had no basis for its action. The suit, filed by Franklin and parent Franklin Savings Corp., seeks to have the conservator removed, an attorney for Franklin said Tuesday.

''The basis of it is that they have taken a position of what the accounting rules are under generally accepted accounting practices,'' said Stanton. ''There was a certified audit performed by a national accounting firm that established the interpretation Franklin used was correct.

''But the OTS disagrees with that. It was in essence this disagreement they said gave them the right to come in and appoint a conservator.''

Marc Elkins, an attorney representing the OTS, could not be reached Tuesday for comment.

Stanton said Franklin's suit against the OTS was different from other

legal action taken against the federal agency.

''Franklin is not insolvent,'' he said. ''The other actions that have been taken (by the OTS) were when there is an insolvent institution. We believe this is a different type of situation than any of those brought to light to date in others around the country.''

#90072u2010 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - Critics of President Bush's Central America policy, undaunted by the popularity of the Panama invasion and the electoral ouster of Nicaragua's Sandinistas, Tuesday called for a march to mark the death of Salvadoran Archbishop Oscar Romero.

A coalition of church, labor and student groups, including Jesse Jackson's National Rainbow Coalition, said the day-long series of events on March 24 the 10th anniversary of the assassination of Romero, will end with mass civil disobedience as hundred of people kneel to pray in the street in front of the White House.

Romero, a conservative prelate who slowly changed to denunciations of the Salvadoran military and the sprialing violence in El Salvador, was gunned down after celebrating mass. He has become a hero and martyr to many peasants in El Salvador and to opponents of U.S. policy in the United States.

The announcement of the demonstration came shortly after Bush announced an $800 million Fund for Democracy to funnel aid to Panama and Nicaragua.

''Today our government is searching desperately for a veneer of democracy, trying to save face when it should be trying to save Salvadoran lives and

the soul of our nation,'' said the Rev. William Sloane Coffin, president of the peace group Sane/Freeze.

Coffin and others at a news conference announcing the March 24 march and demonstration said the focus of the protest would be on U.S. military aid to El Salvador but they made it clear they opposed the entire fabric of U.S. policy toward Central America.

Jackson, in a statement released at the news conference by aides who said he was in Maryland testifying on statehood for the District of Columbia, said Bush has ''yet to make a serious proposal to disarm the Contras.''

He said the recent Nicaraguan election was ''free because the government of Nicaragua committed itself to a process guaranteeing that freedom.

''However, the elections were not fair because the Nicaraguan people were voting under the pain and pressure of a seven year long economic embargo, imposed by the United States,'' Jackson said.

Also speaking out against administration policy was Julianne Marley, president of the U.S. Student Association, the nation's largest college and university student group.

''As students, we find ourselves with a self-described education president and a so-called education Congress who are more interested in funding the kidnapping, torturing and killing of students in El Salvador than in funding an adequate quality college education for people in this country '' Marley said.

''Today alone we will spend more than $1.5 million on war in El Salvador '' she said. ''That sum could, at 1990 levels, send 1,012 students to school next fall with Pell grants. What our nation spends on war in El Salvador in 30 days would fund Pell grants for over 20,000 students.''

Organizers of the March 24 rally said it will begin with a religious service, include a march from the Capitol to the White House and conclude with the civil disobedience.

Featured speakers are expected to include Jackson, Coffin, actor Ed Asner, Jennifer Casolo, the religious worker detained by the Salvadoran government, and Vietnam veteran Ron Kovic, central character in the new movie ''Born on the Fourth of July.''

(MARCH 13) UPI - President Bush wants Congress to take action by April 5th on an 800-Million-dollar ''Fund for Democracy'' for Nicaragua and Panama. Bush today lifted a five-year trade embargo against Nicaragua and proposed 500-Million dollars over two years to help rebuild Managua's war-torn economy. The president says it's urgent to advance the prospect for democracy in both Nicaragua and Panama.

An administration official says the United States is backing off its original proposal for verifying conventional arms reductions with the Soviet Union. The official says U-S negotiators bowed to the wishes of European allies and offered a softer version of the plan to the Soviets at the talks in Vienna. The official says the Western proposal is now ''90 to 95 percent'' complete and the ball is now in the Soviet court.

The current account deficit... the government's broadest measure of the trade gap... fell in the fourth quarter of 1989, to 20 and one-half-BILLION dollars. That's down two and one-third-BILLION dollars. For the year, the current account deficit finished lower by more than 20-BILLION dollars, at 105-point-nine-BILLION. The current account deficit includes the merchandise trade and trade in services, which tracks the flow of investment income between nations.

#90072u2029 03/13/1990 ~United Press International

BUENOS AIRES, ARGENTINA (MARCH 13) UPI - Vice President Dan Quayle arrived in Argentina Tuesday afternoon, and was escorted by motorcycle police on the 40-minute drive from the international airport to Buenos Aires.

Quayle, arriving from Paraguay on the fifth stop on a five-nation Latin American tour, was to meet with President Carlos Menem and other government officials.

Tuesday night Quayle was to attend a reception at the Alvear Palace Hotel along with visiting prime ministers Felipe Gonzalez of Spain and Giulio Andreotti of Italy.

During his 17-hour visit to Paraguay, Quanle endorsed steps toward democracy made by President Andres Rodriguez.

The day before, in Santiago, Chile, Quayle met with Nicaraguan President Daniel Ortega and afterward said the Central American leader assured him there will be a smooth and peaceful transition when the Sandinista government leaves office in April.

At a news conference before leaving Paraguay, Quayle, ending the fourth leg of a six-nation Western Hemisphere tour, said he and President Rodriguez discussed ways to coordinate the fight against narcotics trafficking and improve relations between United States and Paraguay.

''I have had a good visit to Paraguay,'' Quayle said. ''I have been deeply impressed by the commitment of President Rodriguez to democracy.''

Rodriguez, the former 1st Army commander, ousted ruling Gen. Alfredo Stroessner in a coup February 1989, ending Stroessner's 35-year dictatorship.

The new president, once an associate of Stroessner, has eased press censorship and freed political prisoners. However continued restrictions on labor union activity and an outmoded system of congressional representation, favoring the incumbent party, make Paraguay less than a full democracy.

Asked if the United States will lift economic sanctions imposed on Paraguay at the end of 1986, Quayle said between May and June representatives of both countries will study ways in which Paraguay can become a member of the General System of Preferences.

Paraguay has been excluded from the agreement, which would enable it to sell foodstuffs in the United States, because of the human rights violations of the government during the Stroessner era.

The United States is pressing the Rodriguez government to take even greater liberalization measures.

Quayle said he and President Rodriguez ''have touched upon specifics regarding human rights and other conditions (for trade preference), and the Paraguayan side knows what steps have to be taken.''

Quayle and Nicaragua's Ortega are likely to cross paths again Thursday in Brasilia, Brazil, where they will attend the inauguration of President-elect Fernando Collor de Mello.

Joining them at the Brasilia ceremony, along with other world leaders, will be Cuban President Fidel Castro, who is reportedly angry at Ortega

for straying from strict revolutionary socialist principles.

Both Quayle and Ortega, but not Castro, attended last Sunday's inauguration of Chilean President Patricio Aylwin, who leads a constitutional, elected government that replaced the military dictatorship of Gen. Augusto Pinochet, who came to power in a 1973 coup.

Quayle is the first U.S vice president to visit Paraguay since Richard Nixon made the trip holding that office over 30 years ago.

WASHINGTON (MARCH 13) UPI - Chairmen of the Conrail and Canadian Pacific railroads met Tuesday with Sens. Alfonse D'Amato, R-N.Y., and Arlen Specter, R-Pa., and swapped ideas that could lead to Canadian Pacific's purchase of the Delaware and Hudson Railroad.

Until a purchaser can be found, the D&H, which filed for bankruptcy in June 1988, is being operated by the New York, Susquehanna and Western Railroad and two other lines. The D&H services about 70 shippers in New York, New Jersey, Pennsylvania, Maryland, Washington and Delaware and in Canada.

Canadian Pacific offered to buy D&H for $35 million, but the deal was contingent upon Conrail giving up track rights between Harrisburg, Pa., and Hagerstown, Md., in order to provide a southern outlet for D&H traffic. Conrail refused and the deal fell through.

At the private meeting in D'Amato office, Conrail Chairman James Hagen and Berry Scott, chairman and chief executive officer of Canadian Pacific Ltd.'s CP Rail subsidiary, discussed a possible deal.

According to Specter's press secretary, Dan McKenna, Conrail would allow Canadian Pacific to use the 80-mile track between Harrisburg and Hagerstown, while Canadian Pacific would allow Conrail to use trackage between Albany, N.Y., and Montreal and between Montreal and Quebec.

Hagen and Scott agreed to report back to D'Amato Tuesday or Wednesday next week.

''We're hopeful in that we've got the parties continuing to negotiate,'' D'Amato said. ''At least there's bargaining in good faith. I think the parties are looking and exploring avenues for their positions to be enhanced.''

McKenna said all parties would prefer the situation ''resolved amicably'' and without the need for legislation introduced by D'Amato and Rep. Norman

Lent, R-N.Y. Under the bill, the Interstate Commerce Commission would be required to force Conrail to allow access on the Hagerstown-Harrisburg track.

On Feb. 23, the ICC approved two options for the D&H: its interim operators could run the line until Mar. 23 or for 48 hours after a purchaser has been selected.

If a resolution is not made Mar. 23, the D&H will have to be liquidated, sold to various railroads or discontinued.

(MARCH 13) UPI - Striking West Virginia teachers are embroiled in talks that include Governor Gaston Caperton. So far, there is NO indication that an agreement is near. A spokesman for Caperton says the talks as ''going better than expected.'' Last week, teachers walked out when union leaders accused Caperton of reneging on a promised five percent pay raise. State officials say that schools in 25 counties are closed. 11 counties had spot closings today as a result of the strike.

Soviet leader Mikhail Gorbachev came out the big winner in Moscow today. The Congress of Peoples' Deputies ended the Communist Party's monopoly rule and set up a presidential system of government. Just before the vote was taken, Gorbachev called the action ''one of the most fateful steps'' in Soviet history. The vote was 17-hundred-71 to 164 to create what is, in effect, a multi-party system and amend the Soviet Constitution to remove the Communist Party's dominance.

#90072u2059 03/13/1990 ~United Press International

(MARCH 13) UPI - Western diplomatic sources say the recent failed coup attempt in Afghanistan is helping U-S-backed Afghan guerrillas. The sources say that while the government was focusing on crushing the takeover attempt, the rebels re-occupied strategic positions near Kabul and forced the surrender of a government convoy. Rebel units bombed Kabul and fought street battles with government troops.

Voters in Grenada went to the polls today to choose a new government to run the island nation that U-S forces invaded in 1983. Election officials say the balloting was slow when the polls opened, then picked up only to slow again to a ''mere trickle.'' Voters are choosing from 76 candidates vying for 15 parliamentary seats. A public opinion poll has given the National Democratic Congress the edge, saying it is likely to capture a majority in the Parliament, which would allow the party to form the next government.

President Bush says he doesn't want to intervene in the baseball lockout, but he wishes both sides would solve their dispute- quote- ''so the American people can hear that cry 'play ball' again.'' Bush told reporters at a White House news conference this morning that as a baseball fan he's concerned about the standoff. He hopes to throw out the ceremonial first pitch in the National League this year.

#90072u2062 03/13/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (MARCH 13) UPI - Brazilian authorities intercepted and blocked the unloading of 10 tons of sophisticated weapons Cuban authorities said they needed to protect Fidel Castro on a visit to Brazil this week, diplomatic sources said Tuesday.

The sources said 10 tons of armaments arrived Saturday night in Brasilia, the inland capital, aboard a Soviet-made Ilyushin Cuban airliner, carrying 15 crew members and 83 passengers.

Government officials blocked unloading of the heavy weapons but permitted

security men who flew in on the plane to carry off their personal sidearms the sources said.

Stopped at the airport was a cargo of submachine guns, grenades, anti-aircraft guns, and even missiles, all apparently intended to protect Castro when he takes part in the inauguration ceremony Thursday of President-elect Fernando Collor de Mello, according to Brazilian newspaper reports.

U.S. Vice President Dan Quayle and Nicaraguan President Daniel Ortega are among the 18 leaders, mainly from Latin American, who plan to attend the inauguration.

The incident came to light Tuesday in articles published in the newspapers O Globo and Jornal do Brasil.

''The Cuban authorities were overzealous,'' a senior official of the Foreign Ministry said. He said the heavy weapons ''violated international norms,'' but he did not give further details.

Cuban Ambassador Jorge Bolanos confirmed Tuesday that Castro would attend the inauguration, but he would not release details of his schedule. Diplomatic sources said, however, they expected Castro to visit the cities of Sao Paulo and Rio de Janeiro after the ceremony.

#90072u2078 03/13/1990 ~United Press International

CHARLESTON, WV (MARCH 13) UPI - Gov. Gaston Caperton and teachers' union leaders returned to marathon negotiations Tuesday, seeking to resolve a strike that closed 25 county school systems and handicapped 11 others.

The governor and West Virginia Education Association officials met for seven hours Monday and resumed bargaining Tuesday morning, but there was no report of substantial progress.

''It's going better than we expected,'' said Gordon Morse, Caperton's press secretary. ''The governor has been at every session and he has removed everything from his schedule.''

Morse said he was authorized to speak for both sides in the strike, which is illegal under state law. Neither Caperton nor WVEA officials would comment directly on the talks.

Kayetta Meadows, president of the WVEA, which represents about 16,000 of the state's 21,653 public school teachers, scheduled a mass rally Wednesday afternoon, three hours before Caperton plans to deliver a ''major education address'' over statewide television.

Caperton had scheduled the speech for Tuesday night, but delayed it by one day because of the negotiations.

Teachers launched West Virginia's first school strike March 7 after the union accused the governor of backing out of an offer to provide $35 million for a 5 percent pay raise, provide an extra $6.5 million to the state's health insurance program and levy $27 million in new taxes on coal operators to help pay for the package.

State Education Department officials reported Tuesday that 25 counties had closed school because of the strike, while 11 had spot closings and 19 were fully operational.

In Cabell County, school administrators scrambled Tuesday morning to find replacements for 19 teachers who refused to cross a picket line set up by educators from adjoining Wayne County.

In Ohio County, teachers denied allegations that a striker deflated 30 tires on school buses Monday. Local union leaders said they ''did not condone such actions.''

#90072u2079 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - A secret Pentagon report concludes that the situation in Europe has changed so much that NATO and U.S. forces need not rely on the threat to use nuclear weapons, Rep. Les Aspin, D-Wis., said Tuesday.

The comments from the House Armed Services Committee chairman, based on his reading of a new classified threat assessment prepared by the Joint Chiefs of Staff, followed a public presentation by Maj. Gen. John Robinson who said the likely advance warning of a conventional attack in Europe is now ''four or five times'' more than the 14 days estimated one year ago.

Aspin said that longer warning time, coupled with military and political changes in the Soviet bloc, mean the Warsaw Pact has lost the advantage in Europe and in the event of a conflict, NATO could hold its lines - and

even turn the tide - without resorting to nuclear weapons.

Aspin's remarks were likely to increase pressures for major cuts in the military spending. House Democrats planned to meet Wednesday to discuss defense budget issues.

In earlier threat assessments, Aspin noted, Pentagon planners have consistently said that within a given numbers of days after a European conflict began, NATO commanders would face the choice of using nuclear weapons or acknowledging defeat.

Since then, estimates of warning time have increased, Soviet leader Mikhail Gorbachev has begun unilateral troop and equipment reductions, the Warsaw Pact has virtually dissolved as a military threat and the superpowers are on the verge of a treaty to reduce conventional forces in Europe to equal levels.

''If you take the first two things ... what they say is that if an attack comes, and I'm using my own words, that the Warsaw Pact attacks and gets a lot of territory, but at no point does it look like NATO can't contain them without nuclear weapons,'' said Aspin.

Aspin said this year's report makes no specific mention of resorting to nuclear weapons after a certain time, so some of his conclusion was based on implication. But he said the report looked at the post-conventional arms treaty era and it looks ''even better.''

The report, Aspin said, suggests NATO ''ought to be able to defend right at the forward lines. They don't put in the dissolution of the Warsaw Pact and I look at this and say, 'We win.' We can go the other way (and advance east in Europe). The good guys win.''

Robinson did not comment publicly on Aspin's assessment of the conclusions in the secret document presented to Congress, but he did not argue or raise any objection when Aspin spoke.

A major loser in the new view of Europe will be the follow-on to the Lance nuclear missile, a modernization of a system intended to fly less than 500 kilometers - about 300 miles - to attack points behind the front lines. Such a weapon would likely strike in East Germany, which is moving rapidly toward unification with West Germany into a single state.

The administration is seeking $112 million for the weapon in the 1991 budget, but Aspin said the weapon is effectively gone.

Defense Secretary Dick Cheney has cautioned against cuts in his proposed $307 billion budget during what many describe as a year of transition in East-West relations and the military balance in Europe.

But Aspin, pointing to the new report, said, ''I think you can make some changes in this budget now.''

NEW YORK (MARCH 13) UPI - American Telephone & Telegraph Co. said Tuesday it will reorganize its leasing and financing operations into one single subsidiary, AT&T Capital Corp.

The new subsidiary, based in Morristown, N.J., will offer equipment leasing and financing services, the telecommunications giant said.

AT&T Capital will offer leasing and financing services for both AT&T and non-AT&T equipment, and it will employ 1,200 people in the United States and Canada, said Thomas Wajnert, president and chief executive officer of the subsidiary.

Five business units will report to AT&T Capital.

AT&T Credit Corp. will handle AT&T customers' needs. The division handled more than one-third of all the company's business equipment sales in 1989.

AT&T Commercial Finance Corp. will handle medium-size transactions ranging from $100,000 to $5 million; AT&T Capital Holdings will focus on international transactions; Eaton Financial Corp. will deal with small contracts of less than $50,000; and Encore International Inc. will lease computers.

The restructuring is to be completed by the end of March.

#90072u2120 03/13/1990 ~United Press International
WASHINGTON (MARCH 13) UPI - The Nicaragua aid proposal President Bush offered Congress Tuesday falls into a legislative hopper filled with many other budget requests that have the same chronic problem - finding the money.

Democrats and Republicans welcomed the president's proposal of $300 million in aid for Nicaragua, but cautioned that appropriating the money is a difficult political problem.

Congress already is struggling with another foreign aid request of $500 million to help Panama rebuild from a U.S. economic embargo and invasion that toppled Manuel Noriega.

Sen. Patrick Leahy, D-Vt., who heads the Appropriations subcommittee dealing with the requests, said the massive federal deficit makes it difficult to find money for foreign aid requests.

''This is checkbook diplomacy,'' Leahy said. ''There is not anything in the balance. Until the administration has answered the questions, where does the money come from, and where is it spent, I do not intend to sign a blank check.''

Bush announced a $300 million aid package for Nicaragua and the lifting of a trade embargo ordered by former President Ronald Reagan in 1985 to punish the Sandinista government for its alleged subversion in Central America and ties to the Soviet Union. The Sandinistas were ousted at the ballot box Feb. 25, and Bush promised the economic aid to the new government of President-elect Violeta Chamorro.

There are many nations worthy of American foreign aid on security and humanitarian grounds. But foreign aid has never been popular in the United States, and coming up with the money is difficult - a task made even more difficult during a time of budget deficits and proposed cuts in domestic programs.

Bush said Congress could come up with the $300 million by making cuts in several Defense Department accounts and called on lawmakers to come up with a package that includes $500 million in economic assistance to Panama by April 5.

But lawmakers are bogged down on how to pay for Panama's bills and are not ready to rush the process.

''I don't really accept artificial deadlines,'' House Speaker Thomas Foley D-Wash., told reporters. ''I can't promise a specific date but we want to cooperate with him and move as quickly as possible.

''We need to provide assistance to Nicaragua,'' Foley said. ''We don't know the specifics of how the money is to be spent in Nicaragua and that is one of the things we would like to have.''

''I applaud the president's request,'' said Rep. David Bonior, D-Mich. ''We ought not ... just put a rubber stamp on what he sends to us. I think that in the end we can come together.''

Rep. Mickey Edwards, R-Okla., warned that the Democratic leadership should not use the aid package for a legislative ''Christmas tree'' of other spending programs that Bush does not want.

''The only reason it could not be bipartisan will be guys like (Democratic leader) Dick Gephardt (D-Mo.) running around and trying to make an issue of it,'' Edwards said.

#90072u2211 03/13/1990 ~United Press International

BEIRUT, LEBANON (MARCH 13) UPI - Factional violence erupted Tuesday on both sides of Beirut's Green Line, as rival Christian forces in the east attacked each other in violation of cease-fire and Shiite Moslems in the west squared off in a new round of accusations and gunfire.

At least four people were killed and 19 were reported wounded in the two sets of battles, which sent explosives raining down on the city and trapped residents of both enclaves inside buildings or in underground shelters.

Shiite gunmen of Amal and Hezbollah, or party of God, exchanged fire with machine guns and rocket-propelled grenades in the Ouzai area of west Beirut, cutting the main road that links the city to the south.

In explaining the latest violence, Amal charged that Hezbollah attacked its headquarters in the Burj el-Barajneh neighborhood in the southern suburbs. Hezbollah later said Amal militiamen kidnapped a Hezbollah member in that neighborhood.

Amal and Hezbollah last fought each other in west Beirut in December, although the two sides have continued their fighting south of the city.

Meanwhile, in an unrelated round of violence in the other half of the city Christian rivals skrimished Tuesday after a night of terror in which troops of Gen. Michel Aoun and Lebanese Forces militiamen traded tank fire and mortar shells along a 7-mile line dividing east Beirut.

The fighting was the fifth violation of an 11-day cease-fire worked out by a local Christian mediation committee backed by France and the Vatican, and observers said they feared the recurrent setbacks would lead to a collapse of the truce.

In the western half, witnesses said the clashes stretched to other areas of the mainly Shiite inhabited southern suburbs of the capital and blocked the road leading to the Beirut airport.

At least three people were killed and 11 were wounded in the Shiite fighting, security sources said.

Witnesses said after five hours of clashes, hundreds of young students were still stranded in their schools and most employees and travelers at the airport were trapped inside buildings.

Security sources said Syrian troops in west Beirut began a heavy deployment in at least three areas of clashes.

The warfare in east Beirut prompted many civilians, including children and elderly, to abandon damaged houses and rush to underground shelters along the demarcation line slicing east Beirut into two sectors, police said.

Police said at least one person was killed and five were wounded in the violence, which raged until daybreak before subsiding into sporadic skirmishes.

Three gunmen were wounded with gunfire during the day violence, as civilians appeared on the streets buying food and bread from shops and roadside stands, witnesses said.

Aoun's troops and Samir Geagea's militiamen also battled in the mountainuous region of Kesrwouane, northeast of Beirut, using multi-barreled rocket launchers and mortars.

Geagea, in a published interview, urged Aoun to recognize the legitimacy of President Elias Hrawi's government.

''If there is a solution for General Aoun to enter the political process, he has first to recognize the legitimacy of President Hrawi so that the political process can start,'' Geagea said in a brief interview Tuesday with the leftist daily newspaper As Safir.

Geagea also said he was ready to join Hrawi's government if it is enlarged or a national unity government is formed.

But Western diplomatic sources, quoted by the independent An-Nahar daily newspaper, said behind-the-scene French diplomatic efforts to reach a compromise between Aoun and the Syrian-backed Hrawi have reached a dead end.

(MARCH 13) UPI - The Soviet Congress today in effect set up a multi-party system and gave broad powers to Soviet President Gorbachev. The vote by the Congress of People's Deputies in Moscow ends the Communist Party's monoply rule. Another vote establishing a super-presidency was 18-hundred-17 to 133. It's a political triumph for Gorbachev who was forced to overcome objections that the changes would give him too much power and create a dictatorship.

President Bush says he's staying out of the internal affairs of the Soviet Union. Bush today refused to comment on broad new presidential powers granted Soviet leader Mikhail Gorbachev this morning. Bush told reporters at his Washington news conference that the Soviet Union is going through processes of reform that his administration supports and he will continue

to work with Gorbachev.

President Bush used his White House news conference to announce the end of a five-year-old trade embargo against Nicaragua. Bush also proposes providing 500-Million dollars in aid over the next two years to help the Central American nation rebuild its economy... in addition to another 500-Million for Panama. Bush took the first tangible steps toward restoration of economic ties with Nicaragua after a decade-old civil war involving the U-S-backed Contra rebels and the Sandinista regime.

Commerce Secretary Mosbacher arrived in Japan today for three days of trade talks, which come at a critical time. Japanese officials are acknowledging for the first time that the discussions have reached a ''crisis'' stage that could damage U-S-Japanese relations. Mosbacher's visit is seen as a final effort by the United States to get the stalemated talks back on track before the end of the month.

(MARCH 13) UPI - Federal authorities say three Northwest Airlines pilots accused of being drunk while flying a jetliner may face charges. Attorney

General Nicholas Spaeth says North Dakota authorities are considering filing charges against the crew, which flew the plane from Fargo to Minneapolis-St. Paul last Thursday. North Dakota law prohibits cockpit crews from drinking eight hours before a flight.

One person was burned to death and three others suffered severe burns this morning when a propane pipeline exploded in North Blenheim, New York. Witnesses say the blast rocked the small community about 30 miles southwest of Albany, knocking out power and telephone service in the area. As many as 15 homes were destroyed by the explosion, which is under investigation.

The University of Arkansas student newspaper is out with a special edition on the subject of AIDS that includes condoms. Editor Ray Mino says the idea is to promote safety and AIDS education. About seven-thousand condoms are being distributed inside the paper's special edition. University officials at Fayetteville refused comment, saying only that the administration has NO control over decisions about the newspaper.

NEW YORK (MARCH 13) UPI - The dollar fell against the German mark and other currencies in New York trading Tuesday after West German Chancellor Helmut Kohl said only small East German savers would be allowed to convert their soft Ost marks to more valuable deutsche marks at a one-to-one rate.

Currency traders said Kohl's statement left many questions unanswered about a projected monetary union between East and West Germany, in which the deutsche mark would be the Germanys' sole legal tender. But it eased fears somewhat about the inflationary effect of monetary union.

The dollar at first surged on reports that Kohl endorsed one-to-one exchange of Ost marks for deutsche marks, hitting its day highs on expectations that inflation would ensue. But the deutsche mark rallied when it became clear Kohl was referring to limited household savings.

In late New York trading the dollar was quoted at 1.7090 German marks, off

from 1.7125 marks Monday. The American currency was changing hands at 152.05 yen, also off from 152.50 late the previous day.

''The implication is that the first thousand (Ost marks) will be converted '' said Earl Johnson of Chicago, a foreign exchange vice president with the Harris Trust & Savings Bank. He said Kohl's remarks triggered dollar sales as traders took profits on the unit's recent rise.

''Some large American banks came in selling aggressively on the dollar,'' said Stephen Burnett, a trader with the Bank Fur Gemeinwirtschaft. Players heavily committed to dollars made frantic stop-loss sales, he said.

Participants said there wasn't much reaction to a U.S. Commerce Department report of a 0.9 percent falloff in February retail sales.

But Johnson said a 0.5 percent sales growth revealed when the soft automobile sector was excluded offered support to the dollar. ''It certainly doesn't show the economy collapsing,'' he said, arguing that the Federal Reserve is unlikely to undermine the dollar by lowering interest rates.

Other dollar rates: 1.52 Swiss francs, down from 1.5253; 5.7770 French francs, off from 5.7855; and 1,262 Italian lire, down from 1,264.

The British pound slipped to $1.6105 from $1.6115.

In Europe the dollar closed higher against the major currencies. In Frankfurt it moved up to 1.7170 German marks against 1.7045 Monday. It was also higher in Zurich at 1.5278 Swiss francs against 1.5125.

In Paris, Brussels and Milan it rose to 5.8035 French francs against 5.7740, 35.66 Belgian francs against 35.46, and 1,267.20 lire against 1,260.30.

In London, the pound fell to $1.6020 against $1.6095. It hit a three-month low of $1.5975 in trading nervous about the British economy.

Earlier in Tokyo, the dollar hit a three-year high against the Japanese yen in heavy trading, closing at 152.67 yen against 152.

Republic National Bank in New York closed cash gold lower at $399.25, off from $399.50 Monday. The New York Commodity Exchange settled gold at $399.80 an ounce, unchanged. In Zurich gold declined to $397.50 an ounce from $401.50 Monday. In London gold also fell, to $396.25 an ounce from $401.

Republic closed cash silver at $5.055 an ounce, down from $5.115. Comex spot silver fell to $5.042 an ounce from $5.095. Zurich silver fell to

$5.05 an ounce from $5.15. London silver eased to $5.06 an ounce from $5.13.

ST. PAUL, MN (MARCH 13) UPI - Soviet actress Larisa Firsova, 24, who defected in December when her acting troupe was in Minneapolis, was granted political asylum Tuesday.

She appeared at a news conference with Sen. Rudy Boschwitz, R-Minn., who

helped her defect, a spokeswoman for Boschwitz said.

The Immigration and Naturalization Service District Office in St. Paul announced the actress had been granted political asylum, said Donnette Hilton, projects director for Boschwitz.

Firsova is staying with Rudy and Marge Walz of Mendota Heights and works in a nearby McDonalds restaurant. She is taking English classes.

''She is now in a position to petition for her husband,'' Hilton said.

Firsova came to the United States with a Soviet acting company. Her husband, Vadim, 24, stayed behind in Moscow. While the troupe was in Minneapolis, she slipped out and caught a cab and went to the FBI on Dec. 11. An unidentified woman helped her flee.

Firsova was a chorus singer and dancer with the Central Children's Theater of Moscow. The group staged seven performances of ''Dream to be Continued'' at the Children's Theatre Company of Minneapolis.

Firsova said she would like to pursue a career in America as a singer and an actress.

VENTURA, CA (MARCH 13) UPI - A dispute over the appointment of a defense lawyer forced a postponement Tuesday in an arraignment for a man charged with poisoning an associate with a toxic shrub.

The Municipal Court arraignment was rescheduled for April 6. At that point the defendant, David Wayne Sconce, 33, will either be represented by a lawyer of his choice or the Public Defender's Office, prosecutors said.

Sconce, who was convicted and sentenced to state prison in a separate case for a wide range of grotesque funeral home practices, is charged with the April 1985 murder of Timothy R. Waters, 24.

Waters, who ran the Alpha Society Cremation Service in Burbank, died at his parents' home in Camarillo.

If convicted, Sconce, who once worked at his parents' Lamb Funeral Home in Pasadena, could be sentenced to death.

Sconce is accused of poisoning Waters with oleander, a toxic shrub, to keep him quiet about Sconce's illegal activities in the funeral industry.

Prosecutors said they believe Sconce is the first person in the country

ever to be charged with murder for using oleander poison.

Prosecutors said two witnesses will testify that Sconce told them he had poisoned Waters by dropping something into his drink at a restaurant.

Kevin McGee, the assistant chief deputy district attorney, said Sconce wants to be represented by Roger John Diamond, a private defense lawyer who represented the defendant in the earlier case.

''The court is not inclined to appoint Diamond'' because of the costs and would prefer that Sconce be represented by the public defender, McGee said.

The matter was referred to county lawyers and a decision was to be made by the April 6 arraignment date.

#90072u2313 03/13/1990 ~United Press International

NORTH BLENHEIM, NY (MARCH 13) UPI - A cloud of propane that leaked from a pipeline exploded in a huge ball of fire Tuesday, demolishing 10 homes, injuring six people and engulfing ''a whole hill'' in flames, authorities said.

A rupture in the Texas Eastern Transmission Co. pipeline hissed propane for about five minutes until the explosion at about 7:30 a.m., police said. The blast roared with the thunder of a jet breaking the sound barrier and sent up a column of flames 60 feet high, witnesses said.

Street signs were scorched black. Flames danced atop 60-foot trees. Spot fires burned on the ground. Only chimneys remained where whole houses stood moments before.

Town Supervisor Robert Shaffer said he was heading out to his barn shortly before the explosion when he saw a ''huge white cloud of mist 1,000 feet in the air.'' Then came the explosion that enveloped the rural Schoharie County town 30 miles southwest of Albany in a ball of fire.

Ten homes were reduced to ash, and five others were extensively damaged. Smoke wafted from the shells of burned-out cars at the side of Westkill Road, police said.

Six people were injured, two critically, authorities said. Earlier police reports that one person was killed in the explosion were incorrect, authorities said.

The explosion of the 8-inch-diameter pipeline knocked all power and telephone service at least 6 miles from North Blenheim. Shaffer immediately declared a state of emergency and asked Gov. Mario Cuomo to

send state assistance.

Residents said they called for help when the propane cloud formed, but the explosion occured before crews could arrive.

Jim Gately, a North Blenheim resident, nursing minor burns to his nose and arm, said the explosion sounded ''like a bomb went off. I heard this whoosh and my clothes were on fire. I jumped in the shower.''

Another resident, Selma Milone, said the blast ''jumped us right out of bed. It was a very big explosion.''

Elizabeth Mace, who lives near the pipeline, said there was a ''horrendous explosion. It sounded like a jet when it passes the sound barrier,'' she said. ''I looked out the window and the whole hill was on fire.''

Ed Collins, a Public Service Commission spokesman, said it was not known what caused the the propane pipeline to rupture.

Two critically burned victims were taken to Albany Medical Center.

Richard Smith, 43, of Central Bridge, suffered second- and third-degree burns on 100 percent of his body, and Robert Hitchcock, 53, of North Blenheim, was burned on 90 percent of his body, hospital spokesman Greg McGarry said.

''We're praying for all of (the injured),'' said resident Gail Shaffer, the town supervisor's daughter who is the New York secretary of state. ''This is a small community were our neighbors,'' she said. ''It's just devastating. Half our town is gone.''

Two other people were being treated for burns at Ellis Hospital in Schenectady and were in satisfactory condition, and two more of the injured did not require hospitalization.

WASHINGTON (MARCH 13) UPI - Lawyers for John Poindexter, trying to limit damage from Oliver North at the retired admiral's Iran-Contra trial, argued Tuesday that North worked behind Poindexter's back in the worst scandal of Ronald Reagan's presidency.

Poindexter's defense attorney, Richard Beckler, portrayed North as frequently working without Poindexter's approval and took aim at the former Marine's dealings with Robert McFarlane, who preceded Poindexter as national security adviser.

Even after he left the White House, McFarlane worked on the secret U.S. plan to sell arms to Iran, North said during his third day on the stand. North was expected to complete his testimony Wednesday.

North, who was an aide to both men at the National Security Council, also testified he continued to work with McFarlane, sometimes without Poindexter's knowledge.

Poindexter, 53, is accused of five felony counts of lying to Congress and obstructing its investigation of secret arms sales to Iran and the transfer of money to the Nicaraguan Contras when U.S. aid was banned.

As part of a strategy to shift blame from Poindexter to McFarlane, Beckler produced a February 1986 message from North to McFarlane in which North noted Poindexter was not getting a copy.

U.S. District Judge Harold Greene expressed astonishment that McFarlane - no longer a government official - still played a senior national security role in the Reagan administration.

''On what basis are you sending him notes on secret, classified matters?'' the judge asked North, who said he was not sure of McFarlane's role after he left the White House.

North said he was never told not to send secret messages to McFarlane and that he believed Reagan decided to send McFarlane to Tehran aboard a secret flight with spare missile parts in May 1986.

The judge, with a tone of disbelief, told North: ''You were the one telling us and other tribunals and other juries that you always followed orders. Here you're communicating with an outsider and telling him your immediate boss is not to be told about it!''

The memo from North to McFarlane was one of two times that President Bush's name cropped up at the trial Tuesday.

In the note, North proposed a trip to Iran to establish arrangements for a

subsequent visit by a ''senior U.S. official'' - possibly Bush, who was then vice president.

Earlier, in an effort to show that many top administration officials knew about secret U.S. plans to help the Contras, Beckler cited a handwritten note from Bush to North in which the vice president thanked him for his help ''both with the hostage thing and Central America.'' The note was used in North's own trial last year.

About the proposed trip to Iran, North said he wanted to begin the project but Poindexter opposed it.

''I thought the advance trip was worth the risk and the admiral didn't,'' North testified.

The concept was for a White House advance team to visit Tehran to meet with the ''senior leadership of Iran'' and pave the way for the subsequent flight of ''a senior U.S. official, including perhaps even the vice president,'' North testified.

The prosecution has portrayed Poindexter as a mastermind of the scandal. Beckler has tried to blunt that argument with a legal strategy that places much of the blame on McFarlane, who has pleaded guilty to withholding information from Congress.

Beckler used North's own testimony to Congress and in other courtrooms to show that many people, including Bush, knew about secret efforts to help the Nicaraguan Contra rebels.

North has tried hard not to implicate his former boss, but said again that he kept Poindexter advised of all of his activities.

Beckler stressed that North did not tell Poindexter when McFarlane appeared in his office to falsify a chronology of events about the scandal. Beckler also noted that North did not tell his boss when he advised CIA Director William Casey to change some congressional testimony.

''You didn't have any scheme with Admiral Poindexter to lie to Congress, did you?'' Beckler asked.

''No,'' said North.

MOSCOW (MARCH 13) UPI - Soviet leader Mikhail Gorbachev ruled out talks with the breakaway republic of Lithuania and independence-minded Estonia Tuesday, but directed a special commission to settle the status of the two

Baltic states.

Gorbachev discussed the Lithuania parliament's declaration of independence before the Congress of People's Deputies gave him a major political victory, establishing a presidential system in the Soviet Union and ending the Communist Party's monopoly rule.

The Lithuanian parliament convened in Vilnius to address the presence of Soviet army troops on its territory. The session came two days after the nationalist-dominated legislature declared the republic independent of the Soviet Union, shed its socialist name and chose a non-communist president.

In Washington, President Bush appeared to be uncertain about the U.S. reaction to Lithuania's historic step, saying Washington had never recognized the Soviets' 1940 annexation of the Baltics but adding that Moscow has at least some claim to control of the region.

The Lithuanian legislature, dominated by nationalists after the Sajudis independence movement's Feb. 24 election triumph, sent Gorbachev a message Monday asking him to recognize Lithuania as a sovereign nation.

A Lithuanian Supreme Soviet source reached by telephone said the president of the Lithuanian legislature, Vytautas Landsbergis, briefed lawmakers on Gorbachev's statement on Lithuania but offered no reaction.

Landsbergis said there was a demonstration in the city of Svieckus, 75 miles north of Vilnius and mostly inhabited by Russians, who demanded that the Lithuanian Supreme Soviet annul the declaration of independence.

Landsbergis said that an unspecified number of demonstrators urged the Supreme Soviet to announce a referendum on the secession issue and some of them said Moscow should come with military aid.

''I call on you to maintain peace,'' Landsbergis told Lithuanians during the parliament session, which was broadcast live by television.

Gorbachev was also pressed by deputies from Estonia, where a founding nationalist congress met Sunday to usurp the republic's official parliament and demand talks with Moscow on independence.

Members of the Communist Party-dominated Congress of People's Deputies burst into applause when Gorbachev opened the session Tuesday by declaring: ''We conduct talks with foreign states.''

Gorbachev reacted negatively to the documents he said had just received from Vilnius on the Lithuanian declaration of independence.

''From what I have read, it is illegal and invalid,'' he said.

Gorbachev appeared to falter, however, when a lawmaker stood up, shouted out that Australia had already recognized Lithuania as a free country and asked the Soviet leader how Moscow would respond to an ''avalanche'' of official support by foreign governments.

''I think that our position, which will be denoted in the near future, will be made known in the Soviet Union and throughout the world,'' Gorbachev said. ''This will have significance for all (foreign) states.''

Later in the day, Gorbachev told the legislators that a special parliamentary commission headed by Premier Nikolai Ryzhkov had been set up to deal with the Baltic challenge and suggested that the panel ''in a day or two start discussing the whole complex of questions.''

Gorbachev also appeased Lithuanian and Estonian deputies in order to get them to participate in the historic vote on the presidency.

Gorbachev accepted constraints on some of the new executive post's powers, primarily the right to declare a state of emergency in any part of the country, to ease Baltic lawmakers' fears that he might use the new authority to clamp down on the northern region.

With a partial boycott in effect, it was not immediately known how many of the Baltic legislators participated in the vote that established the presidential system.

''We have never regarded Lithuania as being incorporated into the Soviet Union,'' Bush said at a Washington news conference. ''That's been our policy, and we rejoice as people are permitted the free expression that we take for granted in this country.

''There is a great deal of interest in this concept of working it out, Lithuanians working it out with the Soviets, to achieve what they want,'' Bush said. ''So we're not standing in the way, but in terms of recognition there is a standard of control of one's territory that I've been advised should guide this.''

#90072u2330 03/13/1990 ~United Press International

NEW YORK (MARCH 13) UPI - The stock market closed lower Tuesday in moderate trading on renewed concerns about interest rates sparked by a retail sales report that showed some unexpected strength in consumer spending.

The Dow Jones industrial average, which rose 3.38 Monday, lost 12.16 to close at 2674.55.

Broader market gauges fared worse than the blue-chip indicator. The New York Stock Exchange composite index fell 1.26 to 185.25 and Standard & Poor's 500-stock index dropped 2.67 to 336.00, equivalent to about a 20-point decline in the Dow industrials. The price of an average share lost 23 cents.

Declines pounded advances 900-556 among the 1,957 issues crossing the NYSE tape. Big Board volume was 145,440,000 shares, compared with the 114,790,000 shares traded Monday, the year's lightest session thus far.

The government reported that another month of sluggish auto sales dragged retail sales down 0.9 percent in February. The decline was the biggest since a drop of 1.3 percent in October. Economists had expected sales to be unchanged from January.

But if the 6 percent drop in auto sales - the biggest since a 26.5 percent plunge in January 1987 - were not figured in, sales of all other goods to consumers would have risen 0.5 percent in February. In addition, the January gain in sales was revised upward to 2.8 percent from 1.6 percent.

Some economists saw the data as weak because of the overall decline. But market analysts said the part of the report that weighed on stocks and bonds was the sharp upward revision to January sales, which was seen as a piece of inflationary data that would discourage the Federal Reserve from lowering interest rates.

Treasury bonds were down more than a point in late trading with the yield rising to 8.71 percent.

''It told us inflation definitely is not dead, we still have to be concerned about it,'' said Dale Tills, manager of institutional equity trading at Charles Schwab and Co. in San Francisco.

''We were really affected by the revision, though,'' he said. ''Sales were up a lot in January and were revised even higher. That kind of kicked us when we were down. It had a pretty big impact on us, that revision,'' Tills said.

In any case, analysts said they expected quiet trading until Friday's economic reports on February housing starts, producer prices, capacity utilization and industrial production.

They also said they did not expect any sharp moves in the market before the quarterly ''triple-witching hour'' expirations Friday of stock-index futures, options on those futures and options on individual stocks.

On the trading floor, Unisys was the most active issue, up 1/2 to 15 5/8.

General Motors followed, up 1/8 to 47 1/8. Philip Morris was third, down 3/8 to 37 5/8.

Among the other blue chips, IBM lost 1 1/2 to 106 1/4 in heavy trading, AT&T was unchanged at 41 1/8, Merck fell 1 3/8 to 67 1/8, and Du Pont lost 1 to 38 7/8, but Goodyear Tire and Rubber jumped 1 1/2 to 37 7/8.

Airlines were sharply higher, bucking the trend. UAL, parent of United Airlines, rose 3 3/8 to 139 7/8; AMR, owner of American Airlines, gained 1 3/8 to 64 7/8; and Delta Air Lines was up 1 5/8 to 71 3/4.

Elsewhere, Pathe Communications added 3/8 to 5 3/4, riding investor optimism that it will be able to finance its proposed $1.2 billion takeover of MGM/UA Communications.

Dayton Hudson jumped 1 3/4 to 67 5/8. It expects to report Thursday a 37 percent rise in earnings for its fourth quarter ended Feb. 3.

And Compaq Computer climbed 2 1/8 to 95 7/8. Reports said Businessland, which just reached an agreement to begin selling Compaq products again, expects revenue from the sales to hit $150 million within a year. Other technology issues were lower.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 172,683,740 shares, compared with 139,738,040 shares traded in the previous session.

Prices closed lower in active trading on the American Stock Exchange.

The Amex Market Value index fell 1.08 to 360.79. Declines led advances 306-236 among the 806 issues traded. The price of an average share dropped 4 cents. Composite volume totaled 16,930,680 shares, compared with 14,246,300 shares traded Monday.

Salomon ''put'' warrants on Tokyo's Nikkei stock index led the Amex issues up 3/8 to 6 1/4 after the sharp decline in the Japanese market.

The National Association of Securities Dealers composite index fell 1.98 to 434.58.

#90072u2331 03/13/1990 ~United Press International

WASHINGTON (MARCH 13) UPI - More than 100 demonstrators, most in wheelchairs, were arrested Tuesday for staging a demonstration inside the Capitol to demand speedy passage of legislation to expand civil rights for the disabled.

Their chants of ''access is a civil right'' and other slogans echoed from the soaring dome of the Capitol Rotunda where some of the demonstrators chained their wheelchairs together or crawled onto the stone floor to thwart the efforts of police to carry them away.

Wearing gloves and using hydraulic snippers to cut the chains, dozens of Capitol police worked nearly two hours to clear the area of the protesters.

Officer J.T. Nevitt, spokesman for the Capitol Police, said 104 people were arrested. Nevitt said they would be charged with demonstrating within a Capitol building, which carries a maximum penalty of six months in jail and a $500 fine, and unlawful entry, punishable by up to six months in jail and a $100 fine.

The demonstration was organized by the activist group American Disabled for Accessible Public Transit to push for passage of the Americans with Disabilities Act, which has become bogged down in the House. Approved last year by the Senate, the legislation would provide protections against discrimination in the workplace, access to public places and transportation for the disabled.

House Speaker Thomas Foley, D-Wash., Minority Leader Robert Michel, R-Ill. and Rep. Steny Hoyer, D-Md., a key sponsor of the bill, appeared briefly before the demonstrators to promise the measure would be passed by the House.

But angry protesters said the bill has been delayed for too long by committee studies and is threatened by amendments that could weaken the protections it offers.

''I'd like to see the speaker of the House live one day the way we have to '' said Walter Hart of Fort Worth, Texas, as he sat in his motorized scooter outside the Capitol while police loaded the demonstrators into vans.

Hart, 47, said he joined the 1,000 demonstrators who wheeled or walked from the White House to the Capitol Monday to show support for the legislation. He also was among about 100 people who abandoned their wheelchairs and crawled up 81 steps to the Capitol at the conclusion of the march.

''This is our Civil Rights Act of 1964,'' Hart said of the pending legislation. ''We're just 20 years behind.''

''It's been delayed long enough,'' said Jim Parrish of Miami as he sat in his wheelchair under an unseasonably hot sun. ''With 43 million Americans disabled it's really obscene that this is taking so long.''

#90072u2335 03/13/1990 ~United Press International

ROCHESTER, NY (MARCH 13) UPI - An environmental group said Tuesday it plans to sue Eastman Kodak Co. under the federal Clean Water Act, seeking substantial fines for tons of toxic chemicals allegedly discharged in 1987 and 1988.

The Atlantic States Legal Foundation sent a letter Monday to Colby Chandler, Kodak's chairman and chief executive, and Bruce Klanderman, the director of environmental technical services, giving 60 days notice of the lawsuit. The notice is required under the federal act.

Atlantic States alleged Kodak has discharged a host of toxins not covered by its environmental permits from the company's Kodak Park facility into local waterways.

Over the two years, more than 590,000 pounds of unauthorized chemicals were released into the waterways, the suit will contend. The Syracuse, N.Y.-based organization cited Kodak's own records as the source of some of its information.

Charles Tebbutt, Atlantic States's legal counsel, said, ''Kodak does not have permits for'' 25 chemicals that will be listed in the suit, which will become part of a suit charging Kodak with exceeding the discharge limits of permits it does have that the environmental group filed last year.

This suit, filed last year in U.S. District Court in Rochester, has yet to make it into the courts.

The suit will demand the photography and chemicals giant pay the maximum $25,000 a day for the alleged violations, as well as any subsequent violation, the foundation said.

''These unpermitted discharges are huge and totally inexcusable,'' Atlantic States President Samuel Sage said, adding: ''They're about half again more than Kodak's permitted discharges.''

Kodak spokesman James Blamphin said the company was unaware of a proposed lawsuit. In any event, he added, company policy prohibits him from commenting on pending litigation.

Blamphin did say that Kodak, which operates one of the world's largest waste treatment plants to accommodate its industrial processes, ''is 99.99 percent in compliance with New York state law.''

#90072u2343 03/13/1990 ~United Press International
CAIRO, EGYPT (MARCH 13) UPI - Former President Jimmy Carter said Tuesday he believes Western hostages kidnapped in Lebanon will be released only when Iran feels their freedom serves its national interests.

Carter also said he thinks Syrian President Hafez Assad, Iran's only Arab ally, had a minimal influence in securing the release of the 18 hostages, including eight Americans.

On the current political crisis in Israel, Carter said lasting peace would be best served if either a strong Likud, or a strong Labor government were to emerge after probable elections, rather than a stalemated coalition.

''In my opinion, I think that Iran does indeed play a substantive role in how long the hostages will be held,'' Carter said after meeting with Egyptian President Hosni Mubarak.

''And my belief is that when and if Iran believes it is in its best interest to use its influence for the release of the hostages, they will be released ... (but) I don't know when,'' Carter said.

''I think Syria has a minimal influence on when the hostages might be released,'' the former president said. ''I think President Assad has made very strong efforts in the past to seek the release of the hostages.''

Carter, who mediated the 1978 Camp David accords and subsequent Egyptian-Israeli peace treaty, said a strong government is needed in Israel to advance the peace process.

The former president said he believed there still is a good chance that U.S.-sponsored efforts to achieve Palestinian-Israeli dialogue might get off the ground, despite the fall of Israel's coalition government.

''Even if the Likud should triumph and have a clear control of the Israeli government, I think this might be better for a strong mutual peace than they would have (under) a stalemated coalition government,'' he said.

Carter, on a four-nation Middle East peace tour which also will take him to Syria, Jordan and Israel, said he will discuss the hostage issue in the capitals he visits. He arrived in Cairo on Monday with his wife, Rosalyn, and the director of the Carter Center for Middle Eastern studies on the first leg of his nine-day fact-finding tour.

Carter was president when Iranian radicals stormed the U.S. Embassy in Tehran in 1979 and held embassy staff, including 62 Americans, hostage for 444 days until he was replaced by Ronald Reagan.

#90072u2346 03/13/1990 ~United Press International
NEW YORK (MARCH 13) UPI - A federal judge Tuesday denied a motion by United Press International for a preliminary injunction that would bar Reuters from terminating a news photo exchange agreement between the two news agencies.

UPI sought to enjoin Reuters from breaching an agreement through which UPI clients in the United States receive Reuters pictures from abroad and Reuters clients outside the United States receive UPI domestic news photos.

U.S. District Judge Peter Leisure denied UPI's motion, saying UPI ''had failed to meet its burden of showing irreparable harm'' if the agreement were terminated.

But Leisure extended a temporary restraining order until March 19 preventing London-based Reuters from stopping the flow of news photos to UPI clients as it did for four hours and five minutes Feb. 16.

The stay of the restraining order gives UPI an opportunity to appeal the decision or seek an alternative to the Reuters photo feed without interrupting foreign photo service to UPI clients.

''We are pleased with the developments in court today,'' said Dorothy Delman, a Reuters spokeswoman. ''We have been confident about our position all along.''

There was no immediate comment on the ruling by UPI.

''UPI's urging that the unavailablity of Reuters news picture service will reap permanent harm, leading to the destruction of UPI's news picture business, is at this time insufficiently imminent and probable to warrant extraordinary preliminary relief,'' Leisure ruled in a written opinion.

Reuters, claiming a deterioration in the volume and quality of UPI's newspictures, announced Feb. 16 it was terminating the 5-year-old contract. Reuters then filed suit seeking to recover what it claimed was the additional cost of supplementing UPI's domestic photo service. UPI, in a counterclaim to the Reuters suit, sought the injunction and damages of at least $1.6 million.

UPI and Reuters entered a 10-year picture exchange agreement Jan. 1, 1985.

In briefs and arguments before the court, UPI said the loss of the Reuters service would result in customer defections from the UPI news picture service.

''The court finds UPI's assertion of loss of customers due to the loss of Reuters to be speculative and attenuated,'' Leisure wrote.
